ENHANCED RECOVERY METHODS FOR HEAVY OIL AND TAR SANDS

James G. Speight

CONTENTS

List of Figures ix

List of Tables xi

Preface xiii

Chapter 1 Definitions1

- 1.1 History 3
- 1.2 Petroleum 5
- 1.3 Heavy Oil 13
- 1.4 Tar Sand Bitumen 16
- 1.5 Validity of the Definitions 19
- 1.6 Conclusions 24
- 1.7 Références 26

Chapter 2 Origin and Occurrence.....29

- 2.1 Origin of Petroleum and Heavy Oil 33
 - 2.1.1 Abiogenic Origin 33
 - 2.1.2 Biogenic Origin 34
 - 2.1.3 Occurrence and Distribution 35
- 2.2 Reservoirs 39
- 2.3 Reserves 42
 - 2.3.1 Definitions 42
 - 2.3.2 The Real Numbers 48
- 2.4 Production 49
- 2.5 Oil Pricing 51
 - 2.5.1 Oil Price History 52
 - 2.5.2 Pricing Strategies 53
 - 2.5.3 The Role of Heavy Oil in the Future 55
- 2.6 References 56

Chapter 3 Reservoirs and Reservoir Fluids59

- 3.1 Reservoirs 60
 - 3.1.1 Structural Traps 62
 - 3.1.2 Heterogeneity 64
- 3.2 Classes of Fluids 66
- 3.3 Evaluation of Reservoir Fluids 69
 - 3.3.1 Sampling Methods 70
 - 3.3.2 Data Acquisition and QA/QC 73
- 3.4 Physical (Bulk) Composition and Molecular Weight 75
 - 3.4.1 Sampling 76
 - 3.4.2 Asphaltene Separation 76
 - 3.4.3 Fractionation 79
 - 3.4.4 Molecular Weight 82
- 3.5 Reservoir Evaluation 89
- 3.6 References 92

Chapter 4 Properties95

- 4.1 Physical Properties 97
 - 4.1.1 Sampling 99
 - 4.1.2 Elemental (Ultimate) Analysis 100
 - 4.1.3 Metals Content 101
 - 4.1.4 Density and Specific Gravity 102
 - 4.1.5 Viscosity 104
- 4.2 Thermal Properties 106
 - 4.2.1 Carbon Residue 106
 - 4.2.2 Specific Heat 107
 - 4.2.3 Heat of Combustion 107
 - 4.2.4 Volatility 108
 - 4.2.5 Liquefaction and Solidification 117
 - 4.2.6 Solubility 118
- 4.3 Metals Content 120
- 4.4 References 125

Chapter 5 Exploration and General Methods for Oil Recovery133

- 5.1 Exploration 134
- 5.2 Primary Recovery (Natural) Methods 147
- 5.3 Secondary Recovery 152
- 5.4 Enhanced Oil Recovery 162
 - 5.4.1 Thermal Recovery Methods 163
 - 5.4.2 Gas Flood Recovery Methods 168

5.4.3 Chemical Flood Recovery Methods	174
5.5 References	180

Chapter 6 Nonthermal Methods of Recovery185

6.1 Primary Recovery (Natural) Methods	187
6.2 Secondary Recovery Methods	190
6.2.1 Waterflooding	191
6.2.2 Gas Injection	193
6.2.3 Cold Production	194
6.2.4 Pressure Pulse Technology	198
6.2.5 Solvent Processes	199
6.3 Enhanced Oil Recovery Methods	200
6.3.1 Alkaline Flooding	201
6.3.2 Carbon Dioxide Flooding	203
6.3.3 Cyclic Carbon Dioxide Stimulation	205
6.3.4 Nitrogen Flooding	206
6.3.5 Polymer Flooding	206
6.3.6 Micellar Polymer Flooding	207
6.3.7 Microbial Enhanced Oil Recovery	208
6.4 Oil Mining	211
6.5 References	217

Chapter 7 Thermal Methods of Recovery221

7.1 Hot-Fluid Injection	224
7.2 Steam-Based Methods	227
7.2.1 Steam Drive Injection (Steam Injection)	230
7.2.2 Cyclic Steam Injection	230
7.2.3 Steam Drive	234
7.3 In Situ Combustion Processes	234
7.3.1 Forward Combustion	238
7.3.2 Reverse Combustion	240
7.3.3 The THAI Process	244
7.4 Other Processes	247
7.4.1 Horizontal Well Technology	247
7.4.2 Inert Gas Technology	248
7.4.3 Steam-Assisted Gravity Drainage (SAGD)	249
7.4.4 Hybrid Processes	253
7.5 In Situ Upgrading	254
7.6 References	256

Chapter 8 Upgrading Heavy Oil.....261

8.1 Surface Upgrading	263
8.1.1 Thermal Cracking Processes	267
8.1.2 Catalytic Cracking Processes	271
8.1.3 Hydrogen Addition Processes	275
8.1.4 Solvent Processes	277
8.2 In Situ Upgrading	285
8.2.1 Solvent-Based Processes	287
8.2.2 Bulk Thermal Processes	288
8.3 References	292

App A Conversion Factors.....295

Glossary 297

Index 335
