

RECONSTRUCTING TRUCK ACCIDENTS

From **TIRE MARKS**

Determining Truck Speed at Rollover

by
Frank Navin

**Institute of Police Technology
and Management**

TABLE OF CONTENTS

Foreword	xi
----------------	----

Chapter

1 Trucks at the Limit	1
1.1 Introduction	1
1.2 The Limit	1
1.3 The Approach	2
1.4 Nothing is Perfect	2
1.5 Example Problems	3
1.6 Units	3
2 Friction Circle	7
2.1 Introduction	7
2.2 Problems that can be Solved	7
2.3 Friction Circle Values	8
2.4 Experimental Results	9
2.5 Conclusions	12
2.6 References	12
3 Coefficient of Friction	15
3.1 Introduction	15
3.2 Definition	15
3.3 Factors Influencing the Coefficient of Friction	23
3.4 Measurement of Coefficient of Friction	25
3.5 Models of Friction Force	29
3.6 Empirical Model of μ	33
3.7 Sensitivity Analysis	33
3.8 Truck Experiments	35
3.9 Conclusions	37
3.10 References	37

4	In-line Braking	39
4.1	Introduction	39
4.2	Factors Influencing Stopping Distance	41
4.3	Braking Trucks	43
4.4	Experiments, Locked Wheel Braking	48
4.5	Stopping Sight Distance	54
4.6	Conclusion	55
4.7	Reference	57
5	Tractor-Trailer Jackknife and Other Skid Marks	59
5.1	Introduction	59
5.2	Tire Traction Properties	59
5.3	Vehicle Dynamics with Locked Wheels	59
5.4	Brake Distribution	62
5.5	Other Causes of Jackknife	63
5.6	Expected Skid Marks	64
5.7	Conclusions	66
6	Trucks on Their Side	67
6.1	Introduction	67
6.2	Tractor-Trailer Skidding Experiments	67
6.3	Experimental Skidding Results	68
6.4	Examples	70
6.5	Conclusions	70
6.6	References	71
7	Simple Truck Rollover	73
7.1	Acceleration Approach	73
	<i>Introduction</i>	73
	<i>Mechanics of Articulated Vehicle Rollover</i>	74
	<i>Precision of Speed Estimates</i>	80
	<i>Analysis</i>	84
	<i>Conclusion</i>	87

7.2	Force Approach	88
	<i>Anatomy of a Truck Crash</i>	89
	<i>Static Rollover Tests</i>	91
	<i>Dynamic Rollover Tests</i>	95
	<i>Measuring Rules to Estimate Truck Rollover Speed</i>	98
	<i>Conclusions</i>	100
7.3	Moment Approach	101
	<i>Rigid Body</i>	101
	<i>Sprung Mass Vehicle</i>	104
	<i>Vehicle Represented with Multiple Axles</i>	107
7.4	Conclusions	110
7.5	Simplified Rules for Using the Rollover Formula	110
7.6	References	111
8	Complex Rollovers	113
8.1	Introduction	113
8.2	Liquid Loads	115
	<i>Slosh</i>	115
	<i>Steady-State Cornering</i>	115
	<i>Transient Maneuvers</i>	117
	<i>Partial Loads</i>	119
8.3	Hanging Meat	121
8.4	Rearward Amplification	122
	<i>Introduction</i>	122
	<i>Basic Model</i>	122
	<i>Estimated Values of Gain</i>	123
8.5	References	128
9	Hydroplaning	129
9.1	The Problem	129
9.2	The Mechanism	129
9.3	Existing Hydroplaning Models	131

9.4	Conclusions	133
9.5	References	133
10	Example Reconstructions	135
10.1	Example 10-1, Ramp Rollover	135
	<i>Accident Scenario</i>	135
	<i>Vehicle Characteristics</i>	136
	<i>Calculations</i>	136
	<i>Opinion</i>	138
10.2	Example 10-2, Rollover and Slide to Stop	139
10.3	Example 10-3, Rollover and Slide to Stop	139
10.4	Example 10-4, Rollover on a Curve	140
	<i>Site Description</i>	140
10.5	Example 10-5, Rollover on a Reverse Curve	142
	<i>Site Description</i>	142
