

METHODS IN ENVIRONMENTAL ANALYSIS WATER SOIL AND AIR

P. K. GUPTA

Second Edition

CONTENTS

1 THE ENVIRONMENT	1
Micro-environment of Microclimate.....	2
Environmental Pollution and Pollutant.....	3
Needs for Environmental Analysis	4
2 WATER AS A COMPONENT OF ENVIRONMENT.....	5
Sources of Water.....	6
Atmospheric Water.....	6
Surface Water.....	6
Stored Water	6
Ground Water.....	6
Human use of Water	7
Water Pollution.....	8
Water Pollutants.....	8
<i>Origin of Water Pollutants.....</i>	<i>8</i>
<i>Sources of Water Pollutants</i>	<i>9</i>
Effects of Water Pollution	11
Physico-Chemical Effects	11
Biological Effects	11
Toxic Effects	12
Pathogenic Effects	12
Physical, Chemical and Biological Characteristics of Water	12
Water Quality Related Problems in Public Health,	
Environment and Agriculture	12
Drinking Water Standards	12
Bacteriological Standards	14
Irrigation Standards	14
<i>Salinity</i>	<i>15</i>

<i>Water Infiltration Rate</i>	15
<i>Specific ion Toxicity</i>	15
<i>Miscellaneous</i>	15
<i>Problems Related to High Sodium Concentration</i>	15
Stream Standards	17
Effluent Standards.....	18
Chemicals and Biological Parameters for Evaluation of	
Aquatic Environment.....	21
Chemical Parameters	22
<i>Redox Potential</i>	22
<i>Total Dissolved Solids</i>	22
<i>Dissolved Oxygen</i>	22
<i>Calcium plus Magnesium (Total Hardness)</i>	23
<i>Sodium and Potassium</i>	23
<i>Carbonates Bicarbonates or Total Alkalinity</i>	23
<i>Residual Sodium Carbonate (RSC)</i>	23
<i>Chloride</i>	24
<i>Sulphate</i>	24
<i>Carbohydrate</i>	24
<i>Boron</i>	24
<i>Free Carbon Dioxide</i>	24
<i>Fluoride</i>	25
<i>Hydrogen Sulphide</i>	25
<i>Nitrogen</i>	25
<i>Ammonia</i>	25
<i>Nitrite</i>	25
<i>Nitrate</i>	26
<i>Organic Nitrogen (Total, Dissolved and Particulate)</i>	26
<i>Total Phosphorus</i>	26
<i>Silica</i>	27
<i>Oil and Grease</i>	27
<i>Biochemical Oxygen Demand (BOD)</i>	27
<i>Chemical Oxygen Demand (COD)</i>	27
Biological Parameters	28
<i>Macrophytes</i>	28
<i>Phytoplankton</i>	28
<i>Zooplankton</i>	29
<i>Benthos</i>	29
<i>Biotecton (Periphyton)</i>	29

	<i>Saprotrophs (Bacteria and Fungi)</i>	29
	<i>Primary Productivity</i>	30
3	WATER: COLLECTION OF SAMPLES	31
	Ruttner Water Sampler	31
	Von Dorn Water Sampler	32
	Dussart-flask Water Sampler.....	32
	Thermos-flask Water Sampler.....	32
	Pump Samplers.....	32
	Collection of Water Samples for Irrigation Quality	33
	Handling and Preservation of Water Sample	33
	Collection of Biological Matter of Water	34
4	WATER ANALYSIS: PHYSICAL.....	35
	Colour.....	35
	Platinum - Cobalt Method	35
	Forel-Ule Colour Scale Method.....	36
	Movement.....	36
	Temperature	38
	Measurement of Surface Temperature	38
	Measurement of Subsurface Temperature	38
	Thermosflask Sampler Method	38
	Reversing Thermometer Method	38
	Odour and Taste	39
	Transparency	40
	Secchi Disc Method	40
	<i>Other Method</i>	41
	Turbidity.....	41
5	WATER ANALYSIS: CHEMICAL	43
	pH.....	43
	Electrical Conductivity (Soluble Salts Concentration)	43
	Redox Potential.....	43
	Total Dissolved Solids	44
	Dissolved Oxygen.....	44
	Oxygen Meter Method	45
	Winkler's Method.....	45
	Calcium by Versenate (EDTA) Method	47
	Calcium plus Magnesium (Total Hardness)	48

Sodium and Potassium.....	50
Determination of Carbonates Bicarbonates or Total Alkalinity (Richards 1954)	51
Chloride.....	53
Sulphate.....	54
Boron.....	56
Free Carbon Dioxide	57
Total Carbon Dioxide.....	58
Fluoride	58
Hydrogen Sulphide	59
Idometric Method.....	59
Nitrogen.....	61
Ammonia.....	61
Colorimetric Method.....	61
Volumetric Method.....	62
Nitrite.....	63
EDTA Method.....	63
Nitrate.....	65
Phenol Disulphonic Acid Method.....	65
Total Organic Nitrogen (TON).....	66
Dissolved Organic Nitrogen (DON)	68
Particulate Organic Nitrogen (PON)	68
Phosphorus (Ammonium Molybdate – Ascorbic acid)	68
Silica.....	70
Determination of Trace Elements/Heavy Metals.....	71
Total Carbohydrate	71
Oil and Grease	72
Biochemical Oxygen Demand (BOD)	73
Chemical Oxygen Demand (COD)	76
Photosynthetic Pigments	77
Estimation of Total Chlorophyll Content and Ratio of Chlorophyll a and b in Macrophytes	77
Estimation of Carotenoids	78
Chemical Separation of Chloroplast Pigments	79
Column Chromatography of Photosynthetic Pigments	80
Estimation of Chlorophyll in Phytoplankton.....	81

6 WATER ANALYSIS: BIOLOGICAL 83

Macrophytes	83
-------------------	----

Collection of Macrophytes	83
Biomass, Moisture, Ash, and Organic matter Estimation of Macrophytes	83
Phytoplankton.....	84
Collection and Preservation of Phytoplankton.....	84
<i>Sedimentation Method</i>	84
Measurement of Phytoplankton Population.....	86
<i>Sedgwick-Rafter Cell Method</i>	86
<i>Measurement of Phytoplankton Biomass</i>	87
Zooplankton.....	89
Collection and Preservation of Zooplankton.....	89
<i>Measurement of Zooplankton Population</i>	89
<i>Measurement of Zooplankton Biomass</i>	89
Biotecton (Periphyton)	90
Collection and Preservation of Biotecton.....	90
<i>Measurement of Biotecton Population</i>	92
<i>Measurement of Biotecton Biomass</i>	92
Benthos	92
Collection and Preservation of Benthos	92
Identification of Benthos	94
Measurement of Benthos Population.....	94
Measurement of Biomass.....	94
Saprotrophs (Bacteria and Fungi).....	95
Bacteria	95
<i>Polulation Measurement: Standard Plate Count (SPC)</i>	95
Fungi	96
Primary Productivity.....	97
Macrophytic Productivity.....	97
Phytoplankton Productivity	97
Sedimentation	99

7 SOIL AS A COMPONENT OF ENVIRONMENT 101

Soils: An Introduction	101
Modern Concept	101
Parent Material.....	102
Regolith.....	102
Top Soil or Surface Soil.....	103
Subsoil.....	103
Bedrock	103

Mineral Soil	103
Organic Soil	104
Pedon	104
Composition of Soil	105
Soil Separates (Mineral Matter)	105
<i>Physical Nature of Soil Separates</i>	105
Soil Organic Matter	106
<i>Humus</i>	107
<i>Humus and Soil Structure</i>	108
Soil Formation	109
The Soil Profile and its Layers	109
Soil Physical Properties	110
Soil Texture	110
Soil Structure	111
<i>Structure Class</i>	112
<i>Types of Structure</i>	112
Soil Density	113
<i>Particles Density</i>	114
<i>Bulk Density</i>	114
Soil Porosity and Permeability	114
Soil Air	116
<i>Composition of Soil Air</i>	116
<i>Rate of Oxygen Exchange or Oxygen Diffusion Rate</i>	116
<i>Oxidation-Reduction Potential (Eh or Redox Potential)</i>	117
<i>Aeration and Plant Growth</i>	117
Soil Temperature	117
<i>Effect of soil Temperature on Crop Growth</i>	117
Soil Colour	118
Soil Water	119
<i>Water Retention Forces</i>	119
<i>Soil Water Energy Concept</i>	120
<i>Soil Water Potential</i>	121
<i>Soil Water Classification</i>	122
Physical Classification	122
Biological Classification	123
<i>Soil Moisture Constants</i>	123
<i>When Plants Most Need Water?</i>	125
Soil Colloids and Chemical Properties	125
Inorganic Colloids (Clay)	126

Organic Colloids (Humus)	126
<i>Cation Exchange</i>	127
<i>Development of Charge</i>	128
<i>Cation Exchange Capacity (CEC)</i>	129
<i>Anion Exchange and Adsorption</i>	129
The Soil Reaction (pH)	131
Importance of Soil pH	131
Buffering in Soils	132
Soil Biology and Ecology.....	132
Soil Factors For Plant Growth	134
Soil Fertility.....	135
Soil Productivity.....	135
Essential Plant Nutrients	135
Classification of Essential Plant Nutrients.....	136
Nutrient Availability	137
Forms of Nutrients Absorbed by Plants.....	137
Dynamics of Nutrient Availability.....	138
Nutrient Deficiency Symptoms.....	139
Other Plant Nutrients	140
<i>Vanadium</i>	140
<i>Sodium</i>	140
<i>Silicon</i>	141
Multiple Deficiencies and Nutrient Interactions	141
Nutrient Toxicity	141
Indicator Plants	142
Critical Limit of Nutrients	143
Concept of Soil Degradation	144
Soils v/s Land Degradation.....	144
<i>Causes of Soil Degradation</i>	145
<i>Problem of Soil Degradation</i>	145
<i>Soil Erosion</i>	145
<i>Loss of Fertility by Mismanagement</i>	147
<i>Salinity / Alkalinity</i>	148
<i>Acidity</i>	149
<i>Waterlogging</i>	149
<i>Deterioration of Soil Structure</i>	150
<i>Floods and Droughts</i>	151
<i>Desertification</i>	151
Soil Pollution	151

Agricultural Pesticides	151
Organic Waste	155
Heavy Metals	157
<i>Fertilizers</i>	158
<i>Radioactivity</i>	159
<i>Detergents</i>	160
<i>Acid Rain</i>	160

8 SOIL - COLLECTION AND PREPARATION OF SAMPLES 161

Tools and Materials	162
Sampling for Fertility Evaluation and Fertilizer	
Recommendation	162
Sampling for Soil Reclamation.....	164
Sampling for Garden Plantation.....	165
Processing and Storage of Samples	166

9 SOIL ANALYSIS - PHYSICAL 167

Soil Profile Study	167
Soil Horizons	167
Transition Horizons	168
Solum	168
Examination of Soil Profile	170
<i>Observations (Record of Field Data)</i>	170
<i>Representation of Profile Data</i>	171
Estimation of Texture	173
Field Method for Texture Determination	173
Mechanical Analysis of Soil.....	174
International Pipette Method.....	175
Hydrometer Method	180
<i>Triangular Dand its use</i>	182
Estimation of Soil Colour	184
Estimation of Soil Moisture and Soil Moisture Constants	184
Measurement of Soil Moisture	184
Gravimetric Method	184
Spirit Burning Method.....	185
Volumetric Method.....	186
<i>a) By Soil Core</i>	186
<i>b) By Bulk Density of the Soil</i>	187

Neutron Moisture Meter	187
<i>Calibration</i>	191
Determination of Soil Moisture in Relation to Soil Water	
Potential	192
Measurement Devices	192
<i>Use of Resistance Blocks</i>	192
<i>Properties of Block Units</i>	193
<i>Preparation of Gypsum Blocks</i>	194
<i>Standardisation and Calibration of Resistance Blocks</i>	195
<i>Determination of Soil Moisture by Resistance Blocks</i>	196
<i>Tensiometers</i>	197
<i>Filter Paper Method</i>	202
Measurement of Field Capacity (Field Method).....	203
Determination of Aeration Pore Space, Pore Size	
Distribution by Low Tension Desorption Curve and	
Demonstration of Hysteresis.....	205
Soil Density and Porosity	208
Measurement of Particle Density (D_p) of Soil	208
Measurement of Bulk Density (D_b) of Soil (Laboratory	
Method for Disturbed Soil)	209
Core Method (for Undisturbed Soil).....	210
Bulk Density of Partially Filled Cores	212
Clod Method.....	214
Measurement of Porosity of Soil	214
Determination of Total, Capillary and Non-capillary Porosity....	214
Soil Temperature Measurement.....	215
Field Measurements	215
Methods-One-Point.....	215
Temperature Distribution	216
Integrated Values	216

10 SOIL ANALYSIS – CHEMICAL 217

pH and Electrical Conductivity	217
pH	217
Determination of pH.....	218
Electric pH Meter Method.....	219
(a) <i>pH in Saturated Soil Paste</i>	219
(b) <i>pH in 1:2 Soil Water Suspension</i>	220

(c) <i>pH in 1:2 Soil and Calcium Chloride Solution</i>	
<i>Suspension</i>	220
Electrical Conductivity.....	221
Measurement of Electrical Conductivity	223
(a) <i>Saturation Extract</i>	224
(b) <i>1:2 Soil Water Extract</i>	225
Water Soluble Salts.....	227
Methods of Extraction of Soluble Salts	227
(a) <i>In Saturation Extract</i>	227
(b) <i>In 1:2 Soil Water Extract</i>	228
Determination of Carbonate and Bicarbonate.....	229
Determination of Chloride	232
Determination of Sulphate.....	234
Determination of Calcium by Versenate (EDTA) Method.....	235
Determination of Magnesium by Versenate (EDTA) Method	238
Determination of Sodium.....	239
Determination of Potassium.....	241
<i>Expression of Results in different Units</i>	243
<i>Some Calculation and Interpretations</i>	244
Exchangeable Cations and Cation Exchange Capacity	245
Determination of Exchangeable Sodium	246
Determination of Exchangeable Potassium	250
Determination of exchangeable Calcium and Magnesium	252
Determination of Cation Exchange Capacity (CEC)	255
Estimation of Available Nutrients	256
Available Nitrogen.....	256
Determination of Organic Carbon	257
<i>Walkley and Black Rapid Titration Method</i>	257
<i>Colorimetric Method for Organic Carbon</i>	261
<i>Modified Wet Oxidation-redox Titration Method</i>	263
<i>Comments on Dichromate Methods</i>	264
Determination of Mineralizable Nitrogen	266
<i>Alkaline Permanganate Method (Subbiah and Asija, 1956)</i> .	266
<i>Nitrate Nitrogen Extraction with 0.01 M CuSO₄⁻</i>	
<i>Colorimetric Determination</i>	268
Total Nitrogen by Autoanalyzer	272
Digestion	272
Determination	273
<i>Distillation (Kjeltec Auto 1030 Analyzer) Method</i>	273

<i>Colorimetric (Autoanalyzer) Method</i>	274
Determination of Available Phosphorus.....	276
<i>Olsen's Method or Sodium Bicarbonate Extractable P</i>	277
<i>Bray and Kurtz No 1 Method (Bray and Kurtz, 1945)</i>	280
Determination of Available or Exchangeable Potassium.....	282
Determination of Available S.....	285
Determination of Available S through Barium.....	286
<i>Heat Soluble Sulphur</i>	286
<i>CaCl₂-Extractable S</i>	287
<i>Colorimetric Procedure for available Sulphur Estimation</i> <i>using Barium Chromate (Palaskar et al., 1981)</i>	288
<i>Phosphate Extractable – S (Ensminger, 1954)</i>	289
Determination of Available/Exchangeable Ca and Mg	290
<i>EDTA Method</i>	290
<i>Exchangeable Ca and Mg through AAS</i>	293
Micronutrients	294
Available Metallic Ions (Zn, Cu, Fe, Mn)	294
<i>Working Standard Solutions</i>	296
<i>Available Boron</i>	299
<i>Available Molybdenum</i>	302
<i>Alcohol for Washing of Glassware</i>	303
Estimation of Soil Pollutants (Cd, Cr, Ni, and Pb)	305
<i>Total Sorbed Cadmium, Chromium, Nickel, and Lead</i>	306
<i>DTPA Extraction for Cd and Ni (Modified From Lindsay and</i> <i>Norvell 1978)</i>	307
<i>Acid Ammonium Oxalate Extractable Cr</i>	309

11 SOIL ANALYSIS - BIOLOGICAL..... 310

Biological Parameters	310
Estimation of Plant Population Density	310
Estimation of Plant Biomass	311
Animal Population Density Measurement.....	311
<i>Random Sampling Method</i>	311
<i>Direct Count Method</i>	311
<i>Marking - Recapture Method</i>	312
Estimation of Benthos Population Density.....	312
Primary Productivity.....	312
Microbiological Analysis	312
Preparation and Inoculation of Culture Media.....	313

Types of Culture Media	313
Synthetic Media.....	314
The Reaction of Culture Media.....	315
Cultivation of Microorganisms.....	315
Selection of Glassware.....	316
Cleaning of Glassware	316
Preparation of Culture Medium.....	316
Culture Medium for Autotrophic Bacteria	
(Medium for Sulphur Oxidant)	316
<i>Non Synthetic Medium for Bacteria Meet Extract</i>	
(<i>or Nutrient Broth</i>)	317
<i>Meet Extract (or Nutrient) Agar</i>	317
Media for Algae	317
Media for Fungi.....	317
Method of Preparation of Culture Medium.....	318
Sterilization of Culture Medium	318
Inoculation	318
<i>Method of Inoculation</i>	319
Measurement of Growth of Microorganisms.....	320
Bacterial Counts	321
Methods of Viable Count	323
<i>The Drop-plate Method</i>	323
<i>Pour-plate Method</i>	323
<i>Roll-tube Method</i>	324
<i>Surface-spread Method</i>	324
<i>Shake Culture Method</i>	324
<i>Most Probable Number (MPN)</i>	324
<i>Membrane Counts</i>	325
<i>Viable Counting of Viruses</i>	325
<i>Spore Counts</i>	325
Staining Techniques for Microbes	326
Types of Staining.....	328
Identification of Bacteria.....	336
Methods of Identification	336
System for Bacterial Identification.....	337
<i>Morphology and Staining Reactions</i>	337
<i>Cultural Characters</i>	337
<i>Edges of Bacterial Colonies</i>	337
<i>Identification of Mixture of Bacteria in a Material</i>	338

Enumeration and Isolation of Soil Microorganism.....	339
Different Media for Isolation.....	340
<i>Microorganisms involved in Carbon Transformations</i>	341
<i>Microorganisms involved in Nitrogen Transformations</i>	341
<i>Microorganisms involved in Sulfur Transformations</i>	341
<i>Microorganisms involved in Phosphate Solubilization</i>	342
Spread Plate Counting Method.....	342
(I) <i>Preparation of Agar Petri Plates</i>	343
(II) <i>Preparation of Soil Dilutions</i>	344
(III) <i>Preparation of Agar Spread Plates</i>	344
Types of Dilutions.....	345
Most Probable Number Method (MPN)	346
Isolation of <i>Rhizobium</i> from Root Nodule	350
Cultural Tests to Distinguish Rizobia from Contaminants.....	351
<i>Test I: Congo Red Test</i>	352
<i>Test II: Growth in Alkaline Medium</i>	352
<i>Test III: Growth in Glucose-peptone Agar</i>	352
<i>Test IV: Ketolactose Test</i>	352
Vesicular-Arbuscular Mycorrhiza	353
Harvesting and Storage of Soil and Root Samples	354
Extraction and Estimation of VAM Propagules.....	355
Wet-Sieving Technique (Gerdemann and Nicolson 1963)	356
Flotation-Bubbling Technique (Furlan And Fortin, 1975)	357
Flotation-Centrifugation Technique (Ohms 1957, Allen et al. 1979)	358
Density Gradient Centrifugation (With Renografin-60).....	359
Isolation of Spores from Suspensions	360
Estimation of VAM Infectivity of Soils.....	360
Estimation of the Root Colonization Level.....	362

12 AIR AS A COMPONENT OF ENVIRONMENT 365

Atmosphere.....	365
Troposphere (0 to 6-17 km)	366
Stratosphere (6 to 17-50 km)	366
Mesosphere (50 to 85 km)	366
Thermosphere (above 85 km)	366
The Air.....	366
Composition of Air	367
Air Pollution	367

Causes of Air Pollution.....	368
Primary Pollutants.....	368
Secondary Pollutants.....	374
Natural Pollutants.....	376
Artificial Pollutants.....	378
<i>Stationery Sources</i>	378
<i>Mobile Sources</i>	379
Effect of Air Pollutants.....	381
<i>Effect of Air Pollutants on Vegetation</i>	382
Global Effects of Air Pollution.....	383
Green House Effect and Global Warming.....	383
Acid Rain.....	384
Ozone Holes.....	384
Heat Islands.....	385
Effects of Air Pollutants on Materials.....	385
Microbiology of Air.....	387
Microorganisms Found in Air.....	387
Number of Microorganisms in Air.....	388
Role of Microorganisms in Air.....	388

13 AIR: COLLECTION OF SAMPLES 390

Sampling Procedures.....	390
Collection Techniques for Particulate.....	390
<i>Gravity Technique</i>	390
<i>Filtration Technique</i>	391
<i>Inertial Technique</i>	391
<i>Precipitation Techniques</i>	392
Collection Techniques and Sampling Devices for Gaseous Pollutants.....	392
Absorption Sampling.....	392
Adsorption Sampling.....	392
Freeze Out or Condensation Sampling.....	393
Grab Sampling.....	393

14 AIR ANALYSIS: PHYSICAL 395

Measurement of Relative Humidity.....	395
Determination of Atmospheric Pressure.....	398
Determination of Wind Speed.....	399
Measurement of Wind direction.....	400

15 AIR ANALYSIS: CHEMICAL 401

Estimation of Carbon Dioxide	402
<i>Lungs Zecondroff Appartus</i>	402
Carbon Monoxide	403
Non-dispersive Infra-red Analyzer	403
Gas Chromatographic Technique.....	404
Electrochemical Cell Method	405
Sulphur Dioxide.....	405
Electrometric Method	405
Conductimetric Method.....	406
West-Gaeke Method	406
Particulate Matter	406
Filtration Method	407
Electrostatic Precipitation.....	407
Impaction Method	408
Gravitational Method	408
Nitrogen Dioxide and Nitrogen Monoxide	409
Chemical Analysis of Hydrocarbons	411
Total Hydrocarbon	411
Specific Hydrocarbons	411
Chemical Analysis of Ozone.....	412
Chemiluminescent Analysis	412
UV Absorption Technique.....	412
Chemical Analysis of Peroxyacetyl Nitrate (PAN)	413
Smoke Monitoring by Ringlemann-Charts	413
Method of use.....	415

16 AIR ANALYSIS: MICROBIOLOGICAL 416

Petri Dish Procedure	416
Enumeration and Differentiation of Total Particles in Air.....	417
Enumeration and Differentiation of Viable Particles in Air	418

17 APPENDIX 1: LABORATORY HELP 419

Analytical Chemistry.....	419
Qualitative Analysis.....	419
Quantitative Analysis.....	419
Some basic Principles in Analytical Chemistry	420
Mass and Weight	420
Atom and Atomic Weight	420

Molecule and Molecular Weight	420
Avogadro's Number	420
Equivalent Weight	421
Standard Solution.....	421
Strength (or Concentration) of Solution.....	421
Titration	422
Equivalent Point or End Point.....	423
Indicator	423
Ions and Ionisation	426
Preparation of Standard Solutions	426
Sodium Carbonate (Na_2CO_3)	427
Sodium Oxalate	427
Borax ($\text{Na}_2\text{B}_4\text{O}_7 \cdot 10\text{H}_2\text{O}$).....	428
Succinic Acid ($\text{CH}_2\text{-COOH}$) ₂	428
Oxalic Acid (COOH) ₂	428
Potassium Hydrogen Phthalate ($\text{KHC}_8\text{H}_4\text{O}_4$).....	429
Potassium Bi-Iodate	429
Standard Solution of Hydrochloric Acid	429
Preparation of 0.1 N Sulphuric Acid	430
Standard Solution of Sodium Hydroxide	430

18 APPENDIX 2: ADVANCED ANALYTICAL TECHNIQUES 432

Atomic Absorption Spectrophotometry	432
Continuous Flow Analysis.....	433
Ion Chromatography.....	435
Inductively Coupled Plasma-Atomic Emission Spectroscopy	436

19 APPENDIX 3: COMMON COMMERCIAL CONCENTRATIONS OF ACIDS AND AMMONIUM HYDROXIDE 438

20 REFERENCE 439
