

Antonio Badia

# Quantifiers in Action

Generalized Quantification in Query,  
Logical and Natural Languages

Springer

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Basic Concepts</b>	<b>7</b>
2.1	From Propositional to First Order Logic	7
2.2	Quantification	8
2.2.1	Semantics	9
2.2.2	Meaning	11
2.3	More on Quantification	12
2.3.1	Quantifier Scope and Prefixes	12
2.3.2	Skolemization	14
2.3.3	Quantifier Rank	15
2.3.4	Relativization	17
2.4	Games	18
2.5	More Semantics	19
2.5.1	Expressive Power of <i>FOL</i>	22
2.5.2	Finite and Infinite Models	22
<b>3</b>	<b>Generalized Quantifiers</b>	<b>25</b>
3.1	Introduction	25
3.2	Generalized Quantifiers	25
3.3	Another view	30
3.4	Basic Complexity	33
<b>4</b>	<b><i>QLGQ</i>: A Query Language with Generalized Quantifiers</b>	<b>37</b>
4.1	Introduction: GQs in query languages	37
4.2	<i>QLGQ</i>	38
4.2.1	Syntax of <i>QLGQ</i>	39
4.2.2	Semantics of <i>QLGQ</i>	41
4.2.3	Remarks on Syntax	42
4.3	Safety and Domain Independence	44
4.3.1	Relation to other languages	49

4.4	Generalized Quantifiers and SQL . . . . .	50
<b>5</b>	<b>Implementation and Optimization of Standard GQs . . . . .</b>	<b>55</b>
5.1	Languages to Define GQs . . . . .	55
5.2	Translating and Optimizing <i>QLGQ</i> . . . . .	60
5.3	The Interpreter . . . . .	60
5.3.1	Complex Queries . . . . .	66
5.4	Optimization . . . . .	67
5.4.1	Optimization on RA Expressions . . . . .	67
5.4.2	Optimization using GQ Properties . . . . .	67
5.5	Application to SQL . . . . .	69
5.6	Monadic vs. Polyadic Quantification . . . . .	71
<b>6</b>	<b>Quantifier Prefixes . . . . .</b>	<b>73</b>
6.1	Introduction . . . . .	73
6.1.1	Linear and Non-linear Prefixes . . . . .	74
6.1.2	Henkin Prefixes and Generalized Quantifiers . . . . .	76
6.2	Linear and Non-Linear Prefixes in <i>QLGQ</i> . . . . .	77
6.3	Cumulation . . . . .	81
6.4	Branching . . . . .	82
6.5	Linear Prefixes . . . . .	85
6.5.1	Algebraic Translation . . . . .	87
<b>7</b>	<b>Cooperative Query Answering . . . . .</b>	<b>91</b>
7.1	Introduction . . . . .	91
7.2	Cooperative Query Answering . . . . .	91
7.3	Cooperative Query Answering with <i>QLGQ</i> . . . . .	94
7.3.1	Presuppositions . . . . .	94
7.3.2	Constructing Explanations and Justifications . . . . .	97
7.3.3	Relaxed Queries . . . . .	100
7.3.4	Expressing and Using Constraints . . . . .	103
7.4	Further Research in CQA . . . . .	105
<b>8</b>	<b>Generalized Quantifiers and Natural Language . . . . .</b>	<b>107</b>
8.1	Introduction . . . . .	107
8.2	Question Answering . . . . .	107
8.3	GQs in Natural Language Analysis . . . . .	110
8.3.1	Combining Quantifiers . . . . .	114
8.4	<i>QLGQ</i> in QA . . . . .	116
8.5	CQA, QA and GQs . . . . .	120
8.6	Challenges . . . . .	122

<b>9</b>	<b>Extensions</b>	127
9.1	Datalog-like Languages	127
9.1.1	Aggregates	127
9.1.2	Fixpoint	128
9.1.3	Higher Order Variables	131
9.2	Distributed Quantification	134
9.2.1	Quantification and Distributed Databases	135
9.2.2	Computing Distributed Quantification	139
9.3	Other Data Models	143
<b>10</b>	<b>Conclusion</b>	149
<b>References</b>		151
