

Practical

Grounding, Bonding, Shielding and Surge Protection

**G Vijayaraghavan
Mark Brown
Malcolm Barnes**

Contents

Preface	ix
1 Introduction and basics	1
1.1 Introduction.....	1
1.2 Basics of grounding	2
1.3 Bonding	4
1.4 Lightning and its effect on electrical systems.....	4
1.5 Static charges and the need for bonding	5
1.6 Ground electrodes and factors affecting their efficacy	6
1.7 Noise in signaling circuits and protective measures such as shielding	8
1.8 Surge protection of electronic equipment	9
1.9 UPS systems and their role in power quality improvement	10
1.10 Case studies.....	11
1.11 Importance of local codes.....	11
1.12 Summary	11
2 Grounding of power supply system neutral.....	13
2.1 Introduction.....	13
2.2 Ungrounded systems.....	15
2.3 Solidly grounded systems.....	16
2.4 Impedance grounding using neutral reactor	18
2.5 Resonant grounding using neutral reactor.....	18
2.6 Impedance grounding through neutral resistance.....	19
2.7 Point of grounding	20
2.8 Other challenges	21
2.9 Summary	23
3 Equipment grounding	24
3.1 Introduction.....	24
3.2 Shock hazard	24
3.3 Grounding of equipment	27
3.4 Operation of protective devices	28
3.5 Thermal capability	29
3.6 Touch Potential during ground faults	30
3.7 Induced voltage problem	30
3.8 Mitigation by multiple ground connection.....	31
3.9 Mitigation by reduction of conductor spacing.....	31

3.10	EMI suppression	32
3.11	Metal enclosures for grounding conductors	32
3.12	Grounding connections for surge protection equipment	34
3.13	Sensing of ground faults	34
3.14	Equipotential bonding	35
3.15	Summary	37
4	Lightning, its effect on buildings and electrical systems and protection against lightning	38
4.1	Introduction	38
4.2	Incidence of lightning	41
4.3	Probability of lightning strike	45
4.4	Method of lightning protection	47
4.5	Planning for lightning protection	50
4.6	Improvements to lightning protection	51
4.7	Factors governing decision whether or not to protect	52
4.8	Effect of lightning strike on electrical lines	53
4.9	Summary	54
5	Static electricity and protection	55
5.1	Introduction	55
5.2	What is static electricity?	55
5.3	Generation of charge	56
5.4	Some common examples of static buildup	56
5.5	Energy of spark and its ignition capability	57
5.6	Dangers of static electricity buildup	58
5.7	Control of static electricity	58
5.8	Assessment of static risks and planning prevention	61
5.9	Summary	61
6	Ground electrode system	62
6.1	Introduction	62
6.2	Grounding electrodes	62
6.3	Soil resistance	63
6.4	Measurement of soil resistivity	64
6.5	Resistance of a single rod electrode	68
6.6	Current-carrying capacity of an electrode	70
6.7	Use of multiple ground rods in parallel	71
6.8	Measurement of ground resistance of an electrode	71
6.9	Concrete-encased electrodes	73
6.10	Corrosion problems in electrical grounding systems	75
6.11	Maintenance of grounding system	76
6.12	Chemical electrodes	76
6.13	Summary	78
7	Surge protection of electronic equipment	79
7.1	Introduction	79
7.2	What is a surge?	79

7.3	Bonding of different ground systems as a means of surge proofing	80
7.4	Surges and surge protection.....	82
7.5	Principle of surge protection	85
7.6	Surge protection of electronic equipment	86
7.7	Achieving graded surge protection	88
7.8	Positioning and selection of lightning/surge arrestor.....	89
7.9	A practical view of surge protection for sensitive equipment.....	92
7.10	Summary	101
8	Electrical noise and mitigation	102
8.1	Introduction.....	102
8.2	Definition of electrical noise and measures for noise reduction	102
8.3	How are sensitive circuits affected by noise?	105
8.4	Frequency analysis of noise	106
8.5	Categories of noise.....	109
8.6	Disturbances from other equipment in the same distribution system	110
8.7	Earth loop as a cause of noise	111
8.8	The ways in which noise can enter a signal cable and its control	113
8.9	More about shielding	117
8.10	Shielded isolation transformer	121
8.11	Avoidance of earth loop.....	123
8.12	Use of insulated ground (IG) receptacle	125
8.13	Zero signal reference grid and signal transport ground plane.....	126
8.14	Harmonics in electrical systems	128
8.15	Summary	131
9	UPS systems and their grounding practices	132
9.1	Introduction.....	132
9.2	Power quality issues.....	132
9.3	Definitions of abnormal voltage conditions	134
9.4	Susceptibility and measures to handle voltage abnormalities.....	137
9.5	Regulating transformer	137
9.6	Standby sources.....	138
9.7	Electromechanical UPS systems.....	142
9.8	Solid-state UPS systems	144
9.9	Multiple units for redundancy.....	146
9.10	Considerations in selection of UPS systems for ADP facilities.....	147
9.11	Grounding issues in static UPS configurations	149
9.12	UPS configurations and recommended grounding practices	149
9.13	Summary	153
10	Case studies.....	154
10.1	Introduction.....	154
10.2	Case study 1	154
10.3	Case study 2	155
10.4	Case study 3	158

10.5	Case study 4.....	159
10.6	Case study 5.....	160
10.7	Case study 6.....	160
10.8	Case study 7.....	162
10.9	Case study 8.....	162
Appendix A: Grounding regulations from various national codes		165
Appendix B: IEE system classification based on grounding practices		182
Appendix C: IEEE exposure classifications		191
Appendix D: Glossary of terms related to grounding		193
Appendix E: Steps to ensure effective substation grounding		201
Appendix F: Course exercises		207
Appendix G: Answer schemes		210
Appendix H: Group activities		221
Index ..		233
