TABLE OF CONTENTS

PART 1

1

Health Care Systems and Reimbursement 1

Introduction 1

Health Care Facilities in the United States 4

Preventive and Primary Health Care Services 4

Secondary and Tertiary Care 5

Restorative Care 5

Long-Term Care 5

Financing the Health Care Industry 5

Private Insurance 6

Traditional Fee-for-Service Plans 6

Group Contract Insurance 6

Public Insurance 7

The Medicare Program 9

The Medicaid Program 12

The State Children's Health Insurance Program 12

The Uninsured 13

Demographic Trends and Health Care 14

The Need for Health Care Reform 15

The High Cost of Health Care 15

Efforts at Cost Containment 15

Equity and Access as Issues in Health Care 18

Racial and Ethnic Disparities in Health 18

Health Care Reform in the United States 24

Nutrition as a Component of Health Care Reform 24

The Cost-Effectiveness of Nutrition Services 25

Conclusion 26

2

The Role of the Dietitian in the Health Care System 29

Introduction 29

The Registered Dietitian in Clinical Practice 30

The Role of the Clinical Dietitian 30

The Clinical Nutrition Team 30

Other Health Professionals—Interdisciplinary Teams 30

Members of the Health Care Team 31

Developing Critical Thinking Skills and Professional Competencies 33

Definition of Critical Thinking 33

Components of Critical Thinking 34

Specific Knowledge Base 34

Experience 34

Competencies 34

Attitudes 36

Standards 36

Levels of Clinical Reasoning 37

Conclusion 37

PART 2

3

The Nutrition Care Process 39

Introduction 39

Framework for Nutrition Care: Evaluation of Nutritional Status 39

Key Concepts: Nutritional Status 41

Purpose of Providing Nutrition Care 41

Key concepts: Nutrition Care 41

ADA's Standardized Nutrition Care Process (NCP) and Model Promotes High-Quality, Individualized Nutrition Care 42

Brief History of ADA's NCP 42

Standardized Nutrition Diagnostic Language 42

Improved Quality of Care 44

Critical Thinking 45

Key Concepts: ADA's Standardized Nutrition Care Process 45

Big Picture of Nutrition Care: The Model 46

Central Core 46

Two Outer Rings 47

Supportive Systems: Screening and Referral System
and Outcomes Management System 47

Key Concepts: Nutrition Care Process and Model 48

Steps of the NCP 48

Step 1 Nutrition Assessment 48

Obtain and Verify Appropriate Data 48

Cluster and Organize Assessment Data 48

Evaluate the Data Using Reliable Standards 49

Key Concepts: NCP Step 1 Nutrition Assessment 49

Step 2 Nutrition Diagnosis 49

Example of Nutrition Diagnoses 55

Criteria for Evaluating PES Statements 56

Relationship of Nutrition Diagnosis to the Other

Steps of the NCP 56

Key Concepts: NCP Step 2 Nutrition Diagnosis 58

Step 3 Nutrition Intervention 58

Sub-Step 3a: Plan 58

Sub-Step 3b: Implement the Nutrition Intervention 59

Key Concepts: NCP Step 3 Nutrition Intervention 59

Step 4 Nutrition Monitoring and Evaluation 59

Sub-Step 4a: Monitor Progress 59

Sub-Step 4b: Measure Outcomes 60

Sub-Step 4c: Evaluate Outcomes 61

*Key Concepts: NCP Step 4 Nutrition Monitoring
and Evaluation 61*

Documentation 62

Conclusion 63

4

Complementary and Alternative Medicine 65

Introduction 65

Who Chooses CAM? 66

CAM Rationale 67

Biomedical Response 71

Alternative Medical Systems 73

Ayurvedic Medicine 73

Chiropractic Medicine 74

Homeopathic Medicine 74

Naturopathic Medicine 77

Osteopathic Medicine 77

Traditional Chinese Medicine/Acupuncture 78

Complementary Therapies 79

Chelation Therapy 79

Folk Healing 79

Natural Products 84

Dietary Therapies 91

Vitamin/Mineral Supplements and Megavitamin

Therapy 92

Mind-Body Therapies 92

Medical Pluralism in Practice 95

Conclusion 95

5

Assessment of Nutrition Status and Risk 101

Introduction 101

Nutritional Status and Nutritional Risk 102

An Overview: Nutrition Assessment and Screening 102

Subjective and Objective Data Collection 103

Dietary Information 103

Psychosocial Information 104

Information Regarding Education, Learning and Motivation 105

Tools for Data Collection 105

Dietary Assessment Methods 108

Twenty-Four-Hour Recall 108

Food Record/Food Diary 108

Food Frequency 109

Observation of Food Intake/ "Calorie Count" 112

Analysis of Food Intake 112

Analysis Based on USDA's MyPyramid 112

Analysis Based on Exchanges/Carbohydrate Counting 112

Specific Nutrient Analysis 112

Computerized Dietary Analysis 112

Evaluation and Interpretation of Dietary Analysis Information 112

USDA's MyPyramid 112

U.S. Dietary Guidelines for Americans 113

Daily Values/Dietary Reference Intakes 113

Nutritional Physical Examination 114

Anthropometric/Body Composition Assessment 114

Anthropometrics 114

Height/Stature 114

Weight 115

Interpretation of Height and Weight:

Infants and Children 116

Growth Charts 116

Body Mass Index 116

Interpretation of Height and Weight: Adults 116

Usual Body Weight 116

Percent Usual Body Weight and Percent Weight Change 116

Desirable or "Ideal" Body Weight 116

Healthy Body Weight 117

Body Mass Index (BMI) 117

Frame Size 117

Waist-Hip Ratio and Waist Circumference 117

Body Composition 117

Skinfold Measurements 118

Bioelectrical Impedance Analysis (BIA) 119

Hydrodensitometry – Underwater Weighing 120

Near Infrared Interactance (NIR) 120

Dual Energy X-Ray Absorptiometry (DEXA) 120

Biochemical Assessment 120

Protein Assessment 121

Somatic Protein Assessment 121

Visceral Protein Assessment 122

Immunocompetence 125

Delayed Cutaneous Hypersensitivity (DCH) 125

Total Lymphocyte Count (TLC) 125

Hematological Assessment 126

Hemoglobin (Hgb) 126

Hematocrit (Hct) 126

Mean Corpuscular Volume (MCV) 126

Mean Corpuscular Hemoglobin (MCH) 126

Mean Corpuscular Hemoglobin Concentration (MCHC) 126

Ferritin 126

Transferrin Saturation 126

Protoporphyrin 126

Serum Folate 126

Serum B12 126

Vitamin and Mineral Assessment 127

Other Labs for with Clinical Significance 127

Functional Assessment 127

Energy and Protein Requirements 128

Measurement of Energy Requirements 130

Measurement of Protein Requirements 131

Estimation of Energy Requirements 131

Energy Requirements Based on DRI 131

Activity Factor 132

Stress Factors 132

Estimation of Protein Requirements 133

RDA for Protein 133

Protein Requirements in Metabolic Stress, Trauma, and Disease 133

Protein-Kilocalorie Ratio 133

Interpretation of Assessment Data 133

Conclusion 133

6

Documentation 137

An Overview: Writing in the Profession 137

The Functions, Context, Parts, and Processes of Writing 137

Rhetorical Norms 138

Levels of Discourse 138

Steps in the Writing Process 138

Charting: Documentation of the Nutrition Care Process 139

Standardized Language and Medical Abbreviations 140

Medical Records 140

Organization of Nutrition Documentation 140

SOAP 140

IER Notes 142

Focus Notes 143

PIE Notes 143

PES, or Problem, Etiology, Signs/Symptoms Statements 143

Assessment, Diagnosis, Intervention, Monitoring/Evaluation (ADIM) 144

Charting by Exception 145

Keeping a Personal Medical Notebook 145

Guidelines for All Charting 145

Confidentiality 146

Writing for Nonmedical Audiences 147

Instructional Materials for Patients, their Families, and the Public 147

Tips for Writing Instructional Materials 147

Reporting Your Own Research 147

Conclusions: Your Ethos—Establishing Expertise 147

7

Methods of Nutrition Support 149

Introduction and Overview 149

Oral Diets 149

Texture Modifications 150

Oral Supplements 151

Appetite Stimulants 153

Specialized Nutrition Support (SNS) 153

Enteral Nutrition 154

Indications 154

Gastrointestinal Access 154

Formulas 157

Feeding Techniques 161

Equipment 161

Putting It All Together: Determination of the Nutrition Prescription 161

Complications 164

Monitoring for Complications 165

Parenteral Nutrition 167

Indications 167

Venous Access 167

Solutions 169

Putting It All Together: Determination of the Nutrition Prescription 172

Administration Techniques 172

Patient Monitoring 172

Complications 172

Conclusion 176

PART 3

8

Fluid and Electrolyte Balance 181

Introduction 181

Normal Anatomy and Physiology of Fluids and Electrolytes 181

Total Body Water 181

Fluid Compartments 182

Movement of Fluid between Blood and Interstitial Spaces 182

Movement between Extracellular Fluid and Intracellular Fluid 182

Total Body Water Balance 183

Fluid Intake 183

Fluid Output 184

Fluid Requirements 185

Body Solutes 185

Types of Solutes 185

Distribution of Electrolytes 186

Movement of Solutes 186

Electrolyte Requirements 186

Physiological Regulation of Fluid and Electrolytes 187

Thirst Mechanism 187

Renal Function 187

Hormonal Influence: Renin-Angiotension-Aldosterone System (RAAS) 187

Electrolyte Regulation 187

Sodium 187

Potassium 187

Calcium and Phosphorus 187

Disorders of Fluid Balance 188

Alterations in Volume 189

Hypovolemia 189

Hypervolemia 191

Alterations in Osmolality 192

Sodium Imbalances 192

Hyponatremia 192

Hypernatremia 194

Potassium Imbalances 194

Hypokalemia 194

Hyperkalemia 195

Calcium Imbalance 195

Hypocalcemia 196

Hypercalcemia 196

Phosphorus Imbalance 196

Hypophosphatemia 196

Hyperphosphatemia 197

Magnesium Imbalances 197

Hypomagnesemia 197

Hypermagnesemia 197

Conclusion 198

9

Acid-Base Balance 203

Introduction 203

Acids 203

Bases 204

Buffers 204

pH 204

Terms Describing pH 205

Regulation of Acid-Base Balance 205

Chemical Buffering 205

Other Chemical Buffer Systems 206

Respiratory Regulatory Control 206

Renal Regulatory Control 207

Other Renal Regulatory Controls 207

Effect of Acid and Base on Electrolyte Balance 208

Assessment of Acid-Base Balance 208

Acid-Base Disorders 208

Respiratory Acidosis 209

Etiology 210

Pathophysiology 210

Clinical Manifestations 210

Treatment 210

Respiratory Alkalosis 211

Etiology 211

Pathophysiology 211

Clinical Manifestations 211

Treatment 211

Metabolic Acidosis 211

Etiology 212

Pathophysiology 212

Clinical Manifestations 213

Treatment 213

Metabolic Alkalosis 213

Etiology 213

Pathophysiology 214

Clinical Manifestations 214

Treatment 214

Mixed Acid-Base Disorders 214

Assessment of Acid-Base Disorders 214

Summary 215

10

Cellular and Physiological Response to Injury 219

Introduction 219

Defining Disease and Pathophysiology 219

Disease Process: Epidemiology, Etiology, Pathogenesis, Clinical Manifestations, Outcome 219

Cellular Injury 220

Mechanisms of Cellular Injury 221

Cellular Response to Injury 221

Cellular Accumulations 221

Cellular Alterations in Size and Number 222

Cellular Injury from Infection 223

Cellular Response to Injury: Inflammation 226

Cellular Death 230

Conclusion 231

11

Nutrigenomics 237

Introduction 237

An Overview of the Structure and Function of Genetic Material 241

Deoxyribonucleic Acid (DNA) and Genome Structure 241

Translating the Message from DNA to Protein 242

The Genetic Code 242

Intervening Sequences 243

Transcription and Translation 243

Genetic Variation 245

Inheritance 245

Single Nucleotide Polymorphisms 247

Other Polymorphisms 248

Epigenetic Regulation 248

DNA Methylation 248

Histone Modification 249

The Epigenotype 249

Dietary Regulation and Measurement of Gene Expression 250

Dietary Components Influence Gene Expression 250

Measuring Gene Expression 251

Nutrigenomics in Disease 251

Cancer 251

From Single Gene Inherited Cancers to Gene-Nutrient Interactions 251

Variations in Xenobiotic Metabolism Influence Risk 251

MTHFR and ADH Polymorphisms Interact with Dietary Folate and Alcohol 252

Fruits and Vegetables 252

Obesity and Diabetes 253

Obesity 253

Developmental Origins of Adult Disease 254

Diabetes 254

Cardiovascular Disease 255

Individual Variation in Response to Environmental Influences 255

Dietary Modification is Effective in Monogenic Disease 256

Dietary Fats Interact with Various Genotypes to Influence Outcomes 256

Nutrigenomics and the Practice of Dietetics 256

Individual Testing in the Marketplace 257

Evolving Knowledge and Practice Requirements for Dietitians 257

Conclusion 257

12

Immunology 259

Introduction to Immunology 259

Natural Resistance 260

Antigens: The Key to Recognizing Pathogens and Altered Cells 261

Antigens and Immunogens 261

Characteristics of an Antigen 262

Immune System Overview 262

Functions and Requirements of the Immune System 262

Divisions of the Immune System 262

Humoral and Cellular 262

Specific and Nonspecific 263

Active and Passive 263

Cells of the Immune System 263

Origin of Cells of the Immune System 263

Cells Derived from the Myeloid Stem Cell 264

Monocytes and Macrophages 264

Polymorphonuclear Leukocytes 267

Other Cells 267

Cells Derived from the Lymphoid Stem Cell 268

T Cells 268

B Cells 269

Natural Killer Cells 269

Organs of the Immune System 269

Central Lymphoid Organs 269

Peripheral (Secondary) Lymphoid Organs 269

Soluble Mediators 270

Complement 271

Cytokines 271

Antigen Recognition Molecules 272

Major Histocompatibility Complex 272

Antibody 273

B Cell Receptor 274

T Cell Receptor 274

Interaction between the T Cell Receptor and the MHC

Antigens 274

Immune Response: Attacking Pathogens 274

Modes of Attack 275

Phagocytosis 275

Cell-Mediated Cytotoxicity 275

Antibodies 276

Inflammation 276

Progression of the Immune Response: Putting the Parts Together 276

The Primary Response 276

The Secondary Response 278

Immunity to Infection: Attacking Specific Types of Pathogens 278

Bacteria 278

Viruses 278

Protozoans 278

Helminths 278

Attacking Altered and Foreign Cells: Tumors and Transplants 278

Tumor Immunology 278

Immunological Approaches to Cancer Therapy 279

Transplantation Immunology 279

Transplant Rejection 280

Matching 280

Immunosuppression 281

Transplantation of Specific Organs and Tissues 281

Immunization 281

Passive Immunization 281

Active Immunization 281

Types of Vaccines 282

Immunodeficiency 282

Malnutrition and Immunodeficiency 283

Inherited Immunodeficiencies 283

Acquired Immunodeficiencies 284

Tolerance 284

Auto Tolerance 284

Induced Tolerance 284

Central Tolerance 284

Peripheral Tolerance 285

Attack on Harmless Antigens: When the Immunological System Causes Harm 285

Hypersensitivity 285

Classifications of Allergic Reactions 285

Type I or IgE Allergies 285

Type II Allergic Responses 290

Type III Allergies: Immune Complexes 290

Type IV Allergic Reaction: Delayed Hypersensitivity 290

Autoimmunity 290

Induction of Autoimmune Disease 292

How Autoimmune Diseases Cause Damage 292

Conclusion 293

13

Pharmacology 297

Introduction to Pharmacology 297

Role of Nutrition Therapy in Pharmacotherapy 301

Drug Mechanisms 301

Administration of Drugs 302

Pharmacokinetics: Absorption of Drugs 303

Pharmacokinetics: Distribution of Drugs 303

Pharmacokinetics: Metabolism of Drugs 303

Pharmacokinetics: Excretion of Drugs 304

Alterations in Drug Pharmacokinetics 304

Altered GI Absorption 304

Altered Distribution 305

Altered Metabolism 305

Altered Urinary Excretion 305

How Do Food and Drugs Interact? 305

Effect of Nutrition on Drug Action 306

Effect of Nutrition on Drug Dissolution 306

Effect of Nutrition on Drug Absorption 306

Effect of Nutrition on Drug Metabolism 306

Effect of Nutrition on Drug Excretion 307

Nutritional Complications Secondary to Pharmacotherapy 307

Drug Consequence: Effect on Nutrient Ingestion 307

Drug Consequence: Effect on Nutrient Absorption 307

Drug Consequence: Effect on Nutrient Metabolism 309

Drug Consequence: Effect on Nutrient Excretion 309

At-Risk Populations 309

Drug-Nutrient Interactions in the Elderly 309

Drug-Nutrient Interactions in HIV and AIDS 309

Drug-Nutrient Interactions in Nutrition Support 310

Nutrition Therapy 311

Nutrition Implications 311

Nutrition Interventions 311

Conclusion 312

PART 4

14

Energy Balance and Body Weight 323

Introduction 323

Energy Balance 324

Energy Intake 324

Energy Expenditure 324

Resting Energy Expenditure 325

Thermic Effect of Food 325

Physical Activity Energy Expenditure 326

Estimating Energy Requirements 326

Equations 326

Indirect Calorimetry 329

Doubly Labeled Water 330

Direct Calorimetry 330

Regulation of Energy Balance 330

The Adipocyte and Adipose Tissue 331

Body Composition, Obesity, and Overweight 332

Body Fat Distribution 333

Epidemiology of Overweight and Obesity 335

Overweight and Obesity in the United States 335

Overweight and Obesity in Canada 337

Overweight and Obesity in Europe 338

Effects of Race, Ethnicity, Socioeconomic Status, and Age 339

Adverse Health Consequences of Overweight and Obesity 341

Etiology of Obesity 342

Medical Disorders and Medical Treatments 342

Genetics and Body Weight 343

Obesogenic Environment 345

Energy Expenditure 347

Treatment of Overweight and Obesity 348

Assessment 348

Management 349

Nutrition Therapy 350

Physical Activity 352

Behavior Therapy 352

Pharmacologic Treatment 352

Surgery 354

Eating Disorders 355

Etiology of Eating Disorders 357

Anorexia Nervosa 358

Health Complications of Anorexia Nervosa 358

Bulimia Nervosa 360

Health Complications of Bulimia Nervosa 361

Eating Disorders Not Otherwise Specified 361

Nutrition Therapy for Eating Disorders 362

Nutrition Therapy for Anorexia Nervosa 362

Nutrition Therapy for Bulimia Nervosa 363

Nutrition Therapy for Eating Disorders Not Otherwise Specified 364

Conclusion 364

15

Diseases of the Cardiovascular System 371

Introduction 371

Anatomy and Physiology of the Cardiovascular System 371

The Heart 371

Electrical Activity of the Heart 372

Cardiac Cycle 373

Cardiac Function 373

Regulation of Blood Pressure 374

Hypertension 376

Conclusion 415

16

Diseases of the Upper Gastrointestinal Tract 421

Introduction 421

Normal Anatomy and Physiology of the Upper Gastrointestinal Tract 421

Motility, Secretion, Digestion and Absorption 422

Anatomy and Physiology of the Oral Cavity 423

Oral Cavity Motility 423

Oral Cavity Secretions 423

Normal Anatomy and Physiology of the Esophagus 423

Normal Anatomy and Physiology of the Stomach 424

Gastric Motility 424

Gastric Secretions 424

Gastric Digestion and Absorption 427

Pathophysiology of the Upper Gastrointestinal Tract 428

Pathophysiology of the Oral Cavity 428

Oral Disease 428

Surgical Procedures for the Oral Cavity 430

Impaired Taste: Dysgeusia/Ageusia 430

Nutrition Therapy for Pathophysiology of the Oral Cavity 430

Nutritional Implications 430

Nutrition Intervention 431

Evaluation and Monitoring 431

Pathophysiology of the Esophagus 433

Gastroesophageal Reflux Disease (GERD) 433

Barrett's Esophagus – A Complication of GERD 435

Nutrition Therapy - Gastroesophageal Reflux Disease 436

Nutrition Implications 436

Assessment 436

Nutrition Interventions 436

Dysphagia 436

Nutrition Therapy for Dysphagia 437

Monitoring and Evaluation 441

Achalasia 441

Nutrition Therapy for Achalasia 442

Hiatal Hernia 442

Pathophysiology of the Stomach 442

Indigestion 442

Nausea and Vomiting 442

Nutrition Therapy for Nausea and Vomiting 444

Gastritis 445

Peptic Ulcer Disease 445

Nutrition Therapy for PUD 447

Evaluation 448

Gastric Surgery 448

Vagotomy 448

Gastroduodenostomy (Billroth I); Gastrojejunostomy (Billroth II); Roux-en-Y Procedure 448

Nutrition Therapy for Gastric Surgery 448

Dumping Syndrome 448

Other Conditions of Gastric Pathophysiology 450

Stress Ulcers 450

Zollinger-Ellison Syndrome 451

Conclusion 451

17

Diseases of the Lower Gastrointestinal Tract 457

Introduction 457

Normal Anatomy and Physiology of the Lower Gastrointestinal Tract 457

Small Intestine Anatomy 457

Small Intestine Motility 458
