

THE ART AND SCIENCE OF DIGITAL COMPOSITING

SECOND EDITION

RON BRINKMANN

Contents

<i>Introduction to the Second Edition</i>	xiii
Chapter 1 <i>Introduction to Digital Compositing</i>	1
Definition.....	2
Historical Perspective.....	3
Terminology.....	7
Organization of the Book.....	11
Chapter 2 <i>Learning to See</i>	15
Judging Color, Brightness, and Contrast.....	16
Light and Shadow.....	19
The Camera.....	27
Resolution Limits.....	27
Focus and Depth of Field.....	30
Lens Flares and Other Lens Artifacts.....	32
Motion Blur.....	39
Depth, Distance, and Perspective.....	41
Perspective and the Camera.....	42
Depth Cues.....	45
Visual “Correctness”.....	51
Chapter 3 <i>The Digital Representation of Visual Information</i>	53
Image Generation.....	53
Pixels, Components, and Channels.....	55
Spatial Resolution.....	59
Bit Depth.....	60
Normalized Values.....	63
Beyond Black and White.....	64
Floating-point and High Dynamic Range Imagery (HDRI).....	71
The HSV Color Representation.....	74
The YUV Color Representation.....	77
Image Input Devices.....	80
Digital Image File Formats.....	81
File Format Features.....	82
Variable Bit Depths.....	82
Different Spatial Resolutions.....	82
Compression.....	82
Comment Information in a Header.....	82
Additional Image Channels.....	82

Vendor-specific File Format Implementations	83
<i>Compression</i>	83
Run-length Encoding	83
Lossy Compression	86
Chroma Subsampling	87
Image Sequence Compression	90
Choosing a File Format	90
Nonlinear Color Encoding	91

Chapter 4 Basic Image Manipulation.....93

Terminology	94
Color Manipulations	97
RGB Multiply	97
Add	98
Gamma Correction	100
Invert	102
Contrast	103
Channel Swapping	106
HSV Manipulations	107
Look-up Table Manipulations	108
Expression Language	110
Spatial Filters	113
Convolve	113
Blurring	116
Sharpen	119
Median Filter	124
Geometric Transformations	125
Panning	126
Rotation	129
Scale	130
3D Transforms	133
Warping	135
Expression Language	138
Filtering Algorithms	139
Motion Blur	144

Chapter 5 Basic Image Compositing.....149

Multisource Operators	149
Add	149
Subtract	151
Mix	153
The Matte Image	154
The Integrated Matte Channel	157
Over	158
Additional Operators	160
Multiply	162

Screen.....	162
Maximum and Minimum.....	166
In.....	168
Out.....	169
Atop.....	170
Masks.....	172
Compositing with Premultiplied Images.....	174
Color Correcting and Combining Premultiplied Images.....	178
Luminosity and the Image-Matte Relationship.....	181
Morphing.....	183
Chapter 6 Matte Creation and Manipulation	189
Rotoscoping.....	192
Techniques.....	195
Motion Blur.....	203
Limitations.....	206
Procedural Matte Extraction.....	206
Keying Based on Luminance.....	207
Keying Based on Chrominance.....	210
The Color Difference Method.....	214
Difference Matting.....	218
Specialized Keying Software.....	219
Matte Manipulations.....	222
Checking the Solidity of your Matte.....	223
Garbage Mattes.....	223
Edge Mattes.....	227
Combining Mattes.....	228
Image Processing on Mattes.....	228
Chapter 7 Time and Temporal Manipulations.....	233
Apparent Motion.....	233
Temporal Resolution.....	234
Temporal Artifacts.....	235
Changing the Length or Timing of a Sequence.....	236
Keyframing.....	244
Chapter 8 Image Tracking and Stabilization	249
Tracking an Element into a Plate.....	250
Choosing the Feature to Track.....	252
Limiting the Search Area.....	254
Human Intervention.....	255
Using Tracking Curves Manually.....	256
Tracking Multiple Points.....	257
Stabilizing a Plate.....	258
Camera Tracking.....	262

Chapter 9	<i>Interface Interactions</i>	263
Workflow		264
The Evolution of Interactivity		266
Methods of Representing the Compositing Process		268
<i>Layer Lists</i>		269
<i>Trees</i>		270
<i>Compressed Branches</i>		273
Timelines		275
Curve Editors		277
Working with Proxy Images		281
Image Viewing and Analysis Tools		282
<i>Image Viewers</i>		283
<i>Pixel or Regional Information Tools</i>		285
<i>Histograms</i>		287
Chapter 10	<i>Film Formats: Media, Resolution, and Aspect Ratios</i>	291
Aspect Ratio		293
<i>Nonsquare Pixels</i>		294
<i>Deciding on a Resolution When You Have an Aspect Ratio</i>		296
Format Conversion Pipeline		297
<i>A Format Conversion Example</i>		299
Film Formats		302
<i>Common 35 mm Formats</i>		303
<i>16 mm Formats</i>		305
<i>Specialized Film Formats</i>		306
Video Formats		308
<i>Fields</i>		308
<i>Color Resolution</i>		311
<i>Gamma</i>		312
<i>Common Video Formats</i>		312
Other Formats		314
Working with Nonsquare Pixels		314
Converting and Combining Formats		319
<i>Converting between Film and Video</i>		323
Chapter 11	<i>Quality and Efficiency</i>	327
Quality		327
Efficiency		328
Production Methodologies		328
Minimizing Data Loss		329
Internal Software Accuracy		333
Consolidating Operations		336
Region of Interest		340
Working in a Networked Environment		341
Disk Usage		341
Precompositing		342

Chapter 12	<i>Creating Elements</i>	345
Lighting		346
Interactive Lighting		348
Matched Cameras		349
The Reference Stand-in		351
Clean Plates		353
Film Stock		353
Filters		356
Choosing a Format		356
Lighting and Shooting with Bluescreens		358
Bluescreen versus Greenscreen		364
Shooting Order		366
Chapter 13	<i>Additional Integration Techniques</i>	367
Scene Continuity		369
Color and Lighting		369
Lighting		370
Light Wrapping		371
Shadows		376
Digital Color Matching		379
Spill Suppression		382
Atmosphere		388
Camera Characteristics		389
Camera Mismatches		389
Camera Movements		393
Scale and Perspective		394
Focus		395
Motion Blur		397
Lens Flares		398
Film Grain and Sensor Noise		399
Chapter 14	<i>Advanced and Related Topics</i>	405
The Digital Representation of Images, Revisited		405
High Dynamic Range Imaging		406
Color Reproduction		414
Working with Limited Bit Depth		417
Conclusions		428
3D Compositing		428
Working with CG Elements		435
Z-Depth Compositing		437
Multi-pass Rendering		448
Related 2D Disciplines		455
Digital Painting		456
Editing		457
The Digital Intermediate		458

Chapter 15	<i>Case Studies</i>	461
James and the Giant Peach		461
Speed		464
Independence Day		466
The Prince of Egypt		470
Budweiser Lizards Commercial		476
Titanic		478
A Gentlemen's Duel		483
Battlestar Galactica		490
Carlton Draught "Big Ad"		494
Chronicles of Narnia: The Lion, the Witch, and the Wardrobe		499
Golden Compass		504
The Incredibles		507
I, Robot		510
King Kong		514
Lost		520
The Lord of the Rings: The Return of the King		524
The Orion Nebula from The Hubble Space Telescope		528
Sin City		536
Sky Captain and the World of Tomorrow		539
Spider-Man 2		547
Underworld: Evolution		554
Wallace and Gromit: The Curse of the Were-Rabbit		561
Star Wars: Episode 3—Revenge of the Sith		567
<i>Breaking Down the Shot—ccm436</i>		568
<i>Creating the Background</i>		570
<i>Creating the Foreground</i>		574
<i>Effects</i>		586
<i>Final Assembly and Reframing</i>		591
<i>Summary</i>		593
Appendix A	<i>Digital Compositing Software: Tools and Features</i>	595
Color Corrections		596
Filters		597
Geometric Transformations and Warps		598
Image Combination		599
Field Controls		600
Matte Generation		600
Timing and Animation		601
Image Generation		601
Tracking		601
Control		602
Other		602

Appendix B	<i>Digital Image File Formats</i>	605
	Common Image File Formats	605
	The Cineon File Format	606
	The OpenExr File Format	612
	<i>Using OpenEXR for Visual Effects Production</i>	612
	<i>Abstract</i>	612
	<i>Floating-point Pixels</i>	613
	<i>Compression</i>	614
	<i>Open Source</i>	615
	<i>How OpenEXR is used at ILM</i>	615
	<i>Color Management</i>	615
	<i>Why not Cineon/DPX?</i>	616
	<i>Real-time Playback</i>	617
	<i>References</i>	618
Appendix C	<i>Common Film and Video Formats</i>	619
	Film	619
	<i>Scanning Resolutions and File Sizes</i>	620
	Digital Cinema Projection	624
	Video	624
	<i>Aspect Ratios</i>	625
	<i>Resolutions</i>	625
	<i>Interlacing</i>	626
	<i>Frame Rates</i>	626
	<i>Bibliography</i>	627
	<i>Glossary</i>	631
	<i>Index</i>	675
