Engineering Documentation Control Handbook

Third Edition

Configuration Management in Industry

Design
Engineer

 William
Andrew

Preface	xv
1 Introduction	1
What is Configuration Management	4
Between Engineering and Manufacturing	5
The Configuration Management Ladder	6
The Configuration Management Discipline	6
The Configuration Management System	8
History of Configuration Management	9
Organization of Configuration Management	10
Document Control Functions	12
Configuration Management Functions	12
Distributed Configuration Management	13
Manager's Job	14
Manager of Configuration Management	14
Organization Within Configuration Management	16
Configuration Management—What Is It?	16
Summary	19
2 Product Documentation	21
Document Formats and Standards	21
Title Block	21
Revision Block	25
Body of a Part Drawing	26
English or Metric	28
Document Signatures	28
Online Signatures	29
Drawing Notes	30
Body of the Assembly Drawing	30
Assembly Parts List	33
Controlled Engineering Parts List	35
Units of Measure	35
Specification Control and Source Control Drawings	36
AML—QVL—AVL	36
General Specifications	39
Make-to-Stock Product Specifications	40
Make-to-Order Product Specifications	41
Make-to-Print Product Specifications	43

Process Design Specifications	43
Document Sizes	44
Proprietary Note	44
Document Groups	44
Distributed Document Control/CM	47
Files and Masters	49
3 Identification Numbers	51
Introduction	51
Product Numbers and Model Number	51
Part Number Cycle	51
Version Numbers	53
Traceability	54
Serial Numbers	54
Part Number	56
Classification Coding	56
Preferred and Alternate	57
Significant versus Nonsignificant Part Number	58
Recommended Part Number	58
Sketch Number	61
Part Number Assignment	61
Changing the Part Numbering System	62
Revision Numbers and Revision Letters	63
Revision Levels	66
Page Revision Levels	66
Change Identification Number	67
What Gets a Part Number	67
Item Marking	69
Labels and Stickers	70
4 Interchangeability	73
Interchangeability Defined	73
Compatible	75
Interchangeable—Which Items	75
Service Parts and Assemblies	76
Used-on	77
Examples to Ponder	78
Interchangeability Test	82
Part Number Change Logic	82
Form and Function	85
Effect on the Field Units	86

PCB Interchangeability/"Bug Fixes" When in Doubt	87 90
5 Bill of Material	93
Data Responsibility	93
Data Dictionary	94
Item Master File	94
Design Engineering Data	95
Parent-Component Relationship	96
Marked-up Parts List	97
Manufacturing Data	98
System Item Codes	98
Field Support Data	99
Data Element Criteria	100
Purchasing a Manufacturing Software System	100
Purchasing an Engineering System	102
Bills of Material	103
Parts List and BOM	103
BOM History	104
One BOM Database	106
BOM Accuracy	109
BOM Content	109
Structuring the BOM	112
Engineering Structure	112
Manufacturing Structure	113
Supply Chain Structure	114
Accounting Structure	115
Field Support Structure	115
MRP/Phantom Solution	115
Common Industry Problem	116
Un-structure the BOM	116
Field Replaceable Items	116
Cost Centers	118
Pictorial Assembly Drawings	118
Multiple Plant Build	119
Stock an Item	119
Buy an Item	120
Ship Between Buildings/JIT/DFT	120
Firmware/Application Software	121
The Standard Assembly	122
One Product Structure	123

Structure Right the First Time	123
BOM Evolution	124
Modular Design	125
Modular Parts List	126
Modular BOM Benefits	128
Order-related BOM	129
Customer-configured BOM	129
Modular Forecasting and Scheduling	129
The Perfect BOM	130
Referenced Documents	131
Configurator Modules	132
6 Potpourri	135
Cross Functional Teams	135
Team Make Up	136
Team Responsibility	137
Team Meetings	137
Team Action List	140
Team Success	141
Team Measurement	141
Design Responsibility	142
Cognizant Engineer List	143
Other Function Engineers	144
Responsibility	145
Delegated Design	145
Change Control Boards	146
Process Documentation	151
Fabricated Part Processing	151
Assembly Instructions	152
Process Document Control	153
Process Control Summary	154
Sales Document Control	155
Quality Document Control	155
Publications	155
On Time Publications	156
Lot Control	157
Shelf Life	158
Down Level Drawings	159
Non-conforming Material	160
Field Support	160
Field Change Order and Kit	161

Software (SW) and Firmware (FW) Control	162
ISO/QS/AS	164
7 Product and Document Release	167
Life Cycle Phases	167
Documents Tied to Release Phase	169
The Revision Block	170
Life Cycle Phase Issues	171
Baseline-Phase Relationships	172
The CM and the Release Process	173
Product Definition Phase	175
Product Development Phase	176
Product Pilot Phase	178
Product Production Phase	179
Product Phase Out	179
Management of the Release Process	180
Status Codes	181
Release Form and Signatures	182
Release Checklist	183
Closing the Gap in Pilot	184
Catch-22	185
The Release Process	185
Release Process Tasks	186
Release Procedure/Flow Diagram	188
Measure the Process Time	190
Visibility	190
8 Change Requests	191
Field Failures	191
Reliability and Other Test Data	192
Material Review Boards (MRB)	193
Production Problems	193
Can Anyone Originate a Change?	193
Request for Change	194
Request Form Instruction	194
Avoid Temptation	197
Request Process Design	198
Request Flow/Procedure	198
Request Process Measurement	200
Request Action Items List	200
Summary	201

9	Change Cost	203
	Costing a Change	203
	Design and Development Cost	204
	Manufacturing and Field Costs	204
	Materials and Parts Costs	204
	Cost Policy	204
	Who Should Estimate Change Cost	205
	Cost Pay Back	206
	Which Changes to Cost	206
	Change Cost From	207
	Dollar Approvals	211
	Charge-Back of Costs	211
	Dollars Without Delay	212
10	Change Control	213
	Why Change?	214
	Type of Change	215
	Deviations, Waivers, Off-specs, etc.	216
	Change Urgency	218
	Class of Change	221
	What Makes Up a Change	221
	Software Changes	223
	What Goes into the ECO Package	224
	Distribution of the ECO	226
	Depiction of Adds and Deletes	226
	Flag Notes	228
	Mark Up Standard	229
	Same As Except	230
	Revision Drafting	231
	Queuing Changes	232
	Advanced Document Change Notice	232
	Who Signs	234
	Empower the Team	236
	Change Impacts	237
	Mark Ups in Production	237
	Effectivity	238
	Effectivity Responsibility	241
	The Effectivity Pipeline	242
	Disposition of Old Design Parts	243
	Effectivity Planning	244
	Effectivity and the Parts List	246

Effectivity/Make to Order	247
Effectivity/Batch Manufacturing	247
Sequencing Parts List Changes and Rev Rolling	247
Sequencing Part Changes and Rev Rolling	248
Tracking the Change	250
Status Accounting/Traceability Reports	251
Change Modeling and Testing	252
Cover Sheet Revisions	253
Change Forms	253
Form Instruction—ECO	255
Facts Database	259
Cultural Change	260
11 Fast Change	261
Why is Process Speed Important?	261
Measure the Process Time	263
Publish the Results	264
Points to Measure	265
Change Phases	268
Revision of Master Documents	268
Set Change Throughput Goals	269
Measure Volume/Reduce Backlog	270
Significance of Speed	272
12 Implementing Process Improvement	273
Recognition of the Problem	273
Establish Key Metrics and Publish Them	280
Who will Design Improvements	280
Missionary Team Leader	281
Steps to Reinvent a Process	281
Continuous Improvement or Reinvent	283
Fast Change Work Flow	284
Work-flow Diagram	286
Engineering Workflow	286
Point of No Return—Technical Release	288
Change Check List	290
Configuration Management Workflow	290
Manufacturing (Implementation) Workflow	292
Management for Fast Change	294
Quality Factor	296
A Case Study	298

System Redesign Is Not Easy	301
Continuous Improvement	301
13 Process Standards and Audits	303
CM Policy	304
Writing and Formatting Standards	304
Best Practice for a Standard	308
Subjects to Standardize	309
Procedures and Work Flow Diagrams	311
Procedure in a Flow Diagram	313
Standards Manual	313
Training	314
Auditing the CM Processes	315
Outside Auditors View	315
Internal Audit	316
Audit Plan	316
Audit Frequency	317
Audit Follow-up	317
Release Process Audit	317
BOM Process Audit	318
Request Process Audit	319
Change Process Audit	319
Train without a Whistle	320
14 EDC and the Supply Chain	321
Supply Chain is Broken	321
Supply Chain Analysis	324
Supplier's Relationship with the Customer	324
ECO Sent to Supplier	325
Supplier BOM	325
Tracking Changes to a Supplier BOM	326
Customer Review and Approval	326
Default Clause	327
15 Benchmarking	329
Benchmarking Pitfall	329
How to Benchmark	330
Survey	330
Automotive Suppliers—Summary of Results	331
Survey—University Seminar Attendees	336

Benchmark Report	338
Interpretation	339
16 CM in the Future/Summary	341
System Standards	341
Part Numbers	341
Interchangeability	341
The BOM	342
Clear and Crisp Release Process	342
Simplified Request Process	343
One Fast Change Process	343
Software Systems	344
Goals and Plans	345
The Government	346
ISO and Copycats	346
The Discipline	347
Education and Training	347
Industry in General	348
Reference and Reading List	349
Index	351
