

BACK STABILITY

SECOND EDITION

**Integrating
Science and
Therapy**

Christopher M. Norris

Contents

Preface	ix
Acknowledgments	x
Exercise Finder	xi

Part I Conceptual Foundation 1

Chapter 1 What Is Back Stability? 3

Scope of the Problem	3
A New Look at the Etiology and Treatment of Back Pain	3
Model Used in This Book: Lumbar Stabilization	9
Summary	12

Chapter 2 Biomechanics of the Lumbar Spine 15

Anatomy of the Vertebral Column	15
Axial Compression	25
Movements of the Lumbar Spine and Pelvis	28
Mechanics of Bending and Lifting	33
Lifting Methods	36
Summary	38

Chapter 3 Stabilization Mechanisms of the Lumbar Spine 39

Posterior Ligamentous System	39
Thoracolumbar Fascia	40
Trunk Muscle Action	44
Intra-Abdominal Pressure Mechanism	55
Summary	58

Chapter 4 Principles of Muscle Imbalance 61

Basic Concepts	61
Muscle Adaptation to Increased and Decreased Usage	65
Training Specificity	67
Changes in Muscle Length	68
Summary	70

Part II Establishing Stability **71**

Chapter 5 Posture **73**

Optimal Postural Alignment	73
Postural Stability and Body Sway	74
Basic Postural Assessment	74
Principles of Postural Correction	81
Posture Types and How to Correct Them	83
Summary	87

Chapter 6 Muscle Balance Tests **105**

Assessing Stretched Muscles—Testing Inner-Range Holding Ability	105
Assessing Shortened Muscles	106
Principles of Muscle Stretching	106
Stretching Target Muscles	108
Assessing Segmental Control	108
Summary	109

Chapter 7 Foundation Movements **129**

Teaching Your Clients to Control Pelvic Tilt	129
Teaching Your Clients to Identify and Assume the Neutral Position	131
Teaching Your Clients to Use Abdominal Hollowing	132
Teaching Your Clients to Contract the Multifidus Muscles at Will	137
Summary	137

Part III Progressing Stability Training **163**

Chapter 8 Limb Loading **165**

Superimposed Limb Movements	165
Summary	167

Chapter 9 Unstable Base **191**

Theory of Proprioception	191
Benefits of Training	192
Summary	193

Chapter 10 Gym Ball **203**

Gym Ball Exercises	203
Summary	204

Chapter 11 Foam Rollers **219**

Principles	219
Summary	219

Part IV Building Back Fitness **225**

Chapter 12 Faults With Traditional Abdominal Training **227**

Sit-Up	227
Straight-Leg Raise	229
Potentially Dangerous Exercises	230
Summary	232

Chapter 13 Abdominal Training Using Stability Concepts **233**

Modifications of the Sit-Up	233
Modifications of the Straight-Leg Raise (SLR)	234
Ab Roller Exercises	234
Testing Midsection Muscle Endurance	234
Summary	235

Chapter 14 Resistance Training for Core Strength **249**

Weight Training	249
Summary	254

Chapter 15 Speed and Power in Core Training **271**

Theory of Power Through Speed Training	271
Summary	273

Chapter 16 Functional Training **283**

<i>Movement Analysis</i>	283
Movement Components	284
Lifting Techniques	285
Summary	289

Part V Clinical Application **299**

Chapter 17 Preliminary Client Assessment **301**

Assessing Pain	301
Assessing Disability	301
Summary	305

Chapter 18 Designing the Program **309**

Needs Analysis	309
Program Aims	312
Training Plan	313
Principles for Designing a Stability Program	314
Summary	316

Chapter 19 Case History Illustrations 317

Overweight Client	317
Athlete With Poor Stability	318
Client With Acute Pain	319
Patient Unwilling to Exercise	320
Pregnant Client With Back Pain	321
Summary	322

Glossary	323
Bibliography	325
Index	337
About the Author	347
