

LIBRARY AND INFORMATION SCIENCE TEXT SERIES

INTERNET TECHNOLOGIES AND INFORMATION SERVICES

Joseph B. Miller

Contents

Preface	xv
Acknowledgments	xix

PART 1: Internet Technologies

1—Introduction 3

The Internet Has Changed Everything!	3
The Internet Defined	4
History of the Internet	4
Administration of the Internet	6
IT Foundations	7
<i>Computers: The Binary Machine</i>	7
<i>Client-Server Architecture</i>	10
The Internet and Technology Trends	11
<i>Computing to Connecting</i>	11
<i>Bandwidth</i>	12
<i>Open Source Software</i>	12
<i>Internet-Based Collaboration</i>	13
<i>The Internet and Commerce</i>	14
Summary	15

2—Networks 17

Network Basics	17
The OSI Network Reference Model	18
Key Concepts and Terminology	19
Network Hardware	20
<i>The Network Interface Card</i>	20
<i>Packet Forwarding and Routing Hardware</i>	20

Wired Network Topologies	21
Protocols: Rules for a Common Language	23
Ethernet	25
Wireless Networks	27
Virtual Private Networks	28
Summary	28
3—Accessing the Internet:	
Connection Technologies.	29
Modems	30
<i>Analog Service: POTS and PSTN</i>	30
Broadband Services.	31
<i>Leased Telephone Lines</i>	31
<i>Integrated Services Digital Network</i>	31
<i>Digital Subscriber Line</i>	32
<i>Cable Broadband</i>	34
<i>Wireless Broadband Technologies</i>	34
Routers and Proxy Servers	35
Summary	35
4—Internet Technologies: TCP/IP.	37
Packet Switching and TCP/IP	37
IP Packet Address Headers	39
TCP, UDP, and ICMP	40
IP Addressing	42
<i>Private IP Addresses and NAT</i>	44
<i>Proxy Servers</i>	45
<i>IPv6</i>	45
<i>Managing IP Address Assignments</i>	46
Routing and Subnet Masks	50
The Domain Name System.	53
<i>Domain Name Registration</i>	53
<i>DNS Lookups</i>	54
TCP/IP, System Layers, and OSI	57
Command Utilities for TCP/IP	58
Summary	58
5—Higher-Level Internet Protocols:	
Making the Internet Work	61
Email: SMTP, POP, IMAP	62
Real-Time Internet Connections	64
<i>Telnet and TN3270</i>	64
<i>RTP and IRC</i>	65
Internet File Management with FTP.	66
Gopher Information Services	66
The World Wide Web	67
<i>The Development of the Web</i>	67
<i>The Uniform Resource Locator</i>	68
HTTP	69

The Statelessness of the Web	72
Web 2.0	74
Summary	74

6—Internet-Connected Computers and Security 77

Security Issues for Windows Systems	78
OS and Office Application Updates	79
Internet Client Programs and Security	79
Internet Server Security	82
Common Threats: Viruses, Worms, and Trojans	83
TCP/IP and Ports	85
Computers Under Attack	87
Warning Signs of a Problem	87
Responding to Attacks	88
PC Security “Top-Ten List”	89
Summary	90

PART 2: Web Publishing

7—Web Design 95

Design Teams for Website Development	96
Site Mission and Audience	97
General Design Guidelines	99
<i>Key Elements of Web Design</i>	99
<i>Web 2.0 and Design</i>	103
Site Schematics	104
Layout	104
Hypertext	106
Site Organization	107
Navigation	108
Image Symbolism	110
<i>Image Maps</i>	110
Typography and Fonts	110
Color in Design	112
Graphic Formats for Web Design	114
Accessibility	115
Design and the Lowest Common Denominator	116
Usability and Findability	117
Summary	117

8—Graphics Primer 121

Hardware Issues	121
Analog to Digital	122
Graphic Types	123
Color Schemes	125
Resolution Issues	128
Graphics File Formats	128
Graphics and HTML	130
Summary	130

9—Web Publishing with the Hypertext Markup Language	133
Markup Languages	134
HTML—The Hypertext Markup Language	135
The HTML Specification	136
Physical vs. Logical Markup	138
Elements, Tags, and Attributes	138
<i>Deprecated Tags and Attributes</i>	140
<i>Inline and Block-Level Elements</i>	140
Using HTML: Common Tags	140
<i>Images and HTML</i>	141
<i>The Hypertext Reference</i>	142
<i>Relative vs. Absolute References</i>	143
<i>HTML Tables</i>	146
<i>Forms</i>	147
<i>Image Maps</i>	151
<i>Framesets, Frames, and Iframes</i>	153
<i>Hypertext Links and Framesets</i>	156
<i>The Base Tag</i>	158
<i>Inline Frames</i>	159
XHTML	159
Hosting Issues	160
<i>UNIX Web Servers</i>	162
<i>UNIX Permissions</i>	163
Summary	165
10—Controlling Presentation with Styles	167
The Box Model	169
CSS Positioning	170
Adding Styles to HTML	170
<i>External Style Files</i>	171
<i>Embedded Styles</i>	171
<i>Inline Styles</i>	172
CSS Syntax and Rules	172
<i>CSS Rules</i>	172
<i>CSS Classes</i>	173
<i>Pseudo-classes</i>	175
<i>Sizing and Color Units in CSS</i>	176
CSS Hacks and Shortcuts	177
Understanding the Cascade	178
Putting IT Together: A CSS Example	179
Summary	187
11—Introduction to Web Programming	189
Concepts and Terminology	190
Web Programming	191
Databases and Web Programming	192
Script Programming Basics	195

<i>Software for Script Programming</i>	197
<i>Client-Side vs. Server-Side Programming</i>	197
<i>Pros and Cons of Server vs. Client Execution</i>	198
<i>Programming Details for Scripts</i>	199
JavaScript Basics	202
<i>JavaScript Examples</i>	203
PHP Overview	208
<i>PHP Syntax</i>	208
<i>PHP: First Example</i>	210
<i>PHP Arrays and Functions</i>	211
<i>PHP and HTML Form Processing Example</i>	212
<i>Global and Superglobal Variables</i>	214
Summary	218

12—XML Primer 221

XML: The Extensible Markup Language	222
XML vs. HTML	223
XML Key Concepts	223
<i>Key Components of the XML Specification</i>	224
<i>XML and Data Structures</i>	225
<i>Creating XML Documents</i>	226
<i>Well-Formedness and Validity</i>	228
The Document Type Definition (DTD)	228
<i>DTD Elements</i>	229
XML Schema Definition	230
<i>XML Schema Definition Example</i>	232
<i>XML Schema Organization</i>	235
Vocabularies and Namespaces	236
Viewing and Processing XML	238
<i>CSS and XML</i>	239
<i>XSL</i>	242
XML-Related Technologies	242
XML Implementations	244
XHTML	244
Summary	245

PART 3: Internet Content and Information Retrieval

13—Internet Content 249

Content Challenges	250
File Basics	250
Standards and Formats	251
Presenting Content on the Web	252
Common Document Formats	253
Collaborative Content	253
<i>Email Discussion Lists and Usenet</i>	254
<i>Blogs, News Feeds, and Podcasts</i>	255

Wikis	256
Multimedia on the Web	256
<i>Sound and Video Files</i>	256
<i>Macromedia Flash</i>	258
Compression and Encoding Formats	258
Internet Resource Evaluation	259
Summary	261
14—Information Retrieval	263
Information Retrieval.	263
Textual IR Systems	265
Indexes and Inverted Files.	266
Vocabularies	268
<i>Controlled Vocabularies</i>	269
<i>Automatic Indexing</i>	270
<i>Query Formation</i>	270
Performance Measures	271
Classical IR Models	273
<i>Boolean IR</i>	274
<i>Vector Space Model</i>	275
<i>Probabilistic Model</i>	277
Nontextual IR	277
<i>Concept-Based Indexing: Textual</i>	
<i>Descriptors and Metadata for Multimedia</i>	279
<i>Content-Based IR for Multimedia</i>	280
Types of Searching	280
Summary	281
15—Internet Search	285
The Challenges of Internet IR	285
<i>The Size and Currency of the Web</i>	286
<i>Format Issues</i>	286
<i>Quality of Information</i>	287
<i>The Invisible Web</i>	287
<i>Web Organization</i>	288
A Short History of Internet Searching	288
Internet Search Services	290
<i>Directories</i>	290
<i>Search Engines</i>	291
<i>Metasearch Engines</i>	294
The Economics of Search Engines	294
Search Engine Size and Indexical Bias	296
Internet Search Engine Anatomy	298
<i>The URL Database</i>	298
<i>Creating the Index</i>	299
<i>The User Interface</i>	300
<i>Query Processing and Relevance Ranking</i>	300
<i>Link Analysis and Retrieval Rankings</i>	301

Google: An Example of a Large-Scale Search Engine	303
<i>Google History and Background</i>	303
<i>Google Infrastructure</i>	304
<i>Google Architecture</i>	304
<i>Google and Relevance Ranking</i>	304
<i>Page Rank</i>	305
Peer-to-Peer	307
Clustering and Visualization	308
Smart Agents and Personalization	309
Comparison with Traditional Online Services	313
Summary	314

16--Libraries and the Internet: Learning from the Past, Exploring the Future 319

The Internet in Libraries: Pre-Web	320
Web 1.0	322
Web 2.0	325
<i>RSS Blogs and Podcasts</i>	326
<i>Wikis</i>	327
<i>Flickr, YouTube, and Shared Bookmarking</i>	328
<i>Social Networking Services (SNS)</i>	329
<i>Instant Messaging (IM) and Twitter</i>	330
<i>Tagging</i>	330
<i>Mashups</i>	331
<i>Virtual Reality and Second Life</i>	332
<i>The World Wide Computer</i>	334
Critiques of Web 2.0	335
Web 3.0	337
Summary	338

Appendix: The Binary Machine	343
Glossary	349
Bibliography	363
Index	377
