A Guide and Reference for Creating WoW Addons

Contents

Introduction		xxxi
Part I	Learning to Program	1
Chapter 1	Programming for World of Warcraft	3
	Customizing the User Interface	3
	How Do Addons Work?	4
	What Can Addons Do?	4
	Getting Started with Lua	5
	Downloading and Installing WowLua	5
	Using Lua on the Web	6
	Downloading and Installing a Lua Interpreter	6
	Microsoft Windows	6
	Mac OS X	7
	Exploring Your Lua Interpreter	8
Chapter 2	Exploring Lua Basics	9
	Using the Lua Interpreter	9
	Running Commands	10
	Understanding Error Messages	10
	Using History to Make Changes	11
	Quitting the Interpreter	11
	Microsoft Windows	11
	Mac OS X	11
	Working with Numbers	12
	Basic Arithmetic Operations	12
	Scientific Notation	13
	Hexadecimal Notation	14
	Understanding Floating Point	14

Understanding Values and Variables	15
Exploring Values and Their Types	15
Primitive Types	15
Using the type() Function	16
Using Variables	16
Valid Variable Names	17
Assigning Variables	17
Assigning Multiple Variables	18
Comparing Values	18
Working with Strings	19
Comparing Strings	19
Concatenating Multiple Strings	20
Converting Numbers to Strings	20
Converting Strings to Numbers	21
Quoting Strings	21
Single Quote ('')	21
Double Quote ("")	22
Bracket Quote ([[]])	22
Escaping Special Characters	23
Getting a String's Length	24
Boolean Values and Operators	25
Using the and Operator	25
Using the or Operator	26
Negation Using the not Operator	26
Understanding the nil Value	27
Exploring Scope	27
Blocks	27
Chunks	28
Summary	29
Chapter 3 Basic Functions and Control Structures	31
Using Functions	31
Creating a Function	31
Local Functions	32
Function Arguments and Returns	33
Converting Celsius to Fahrenheit	33
Empty Arguments	33
Functions as Lua Values	34
Making Decisions with the if Statement	34
Simple Conditionals	35
Complex Expressions	35
Extended Conditionals	35
Displaying a Personalized Greeting Redux	36
Repeating Actions with the while Statement	37
Computing Factorials	37
Differences Between while and repeat	38

Looping with the Numeric for Statement	39
Computing Factorials	41
Evaluation of Loop Conditions	41
Variable Scope in for Loops	42
Summary	42
Chapter 4 Working with Tables	43
Storing Data Using Tables	43
Creating and Indexing Tables	44
Clearing an Element from a Table	44
Shortcuts for String Keys	45
Creating Populated Tables	45
Using Tables as Arrays	46
Creating an Array	46
Getting the Length of an Array	47
Adding Elements to an Array	48
Removing Elements from an Array	49
Sorting the Elements of an Array	50
Using Tables as Namespaces	51
Creating a util Namespace	51
Adding Functions to util	51
Storing an Existing Function	51
Defining a New Function	52
Object Oriented Programming with Tables	52
Creating a Non-Object-Oriented Counter	53
Using Tables as Simple Objects	53
Using : to Call Object Methods	54
Defining Functions Using :	54
Making a Better Counter	55
Extending Tables with Metatables	56
Adding a Metatable	56
Defining Metamethods	57
Defining Basic Arithmetic using __add, __sub, __mul, and __div	58
Defining Negation using __unm	59
Creating Meaningful Output with __tostring	59
Concatenating Tables Using __concat	60
Exploring Fallback Tables with __index	60
Catching New Keys with __newindex	62
Bypassing Metatables	63
value = rawget(tbl, key)	63
rawset(tbl, key, value)	63
Summary	63
Chapter 5 Advanced Functions and Control Structures	65
Multiple Return Values	65
Converting Hex to RGB	65

Assigning Multiple Values	66
Missing Return Values?	67
Multiple Return Values in World of Warcraft	67
Accepting a Variable Number of Arguments	69
Declaring a Vararg Function	69
Using <code>select()</code> with ...	70
Generic for Loops and Iterators	71
Syntax of Generic for	72
Traversing the Array Part of a Table	72
Traversing an Entire Table	73
Clearing a Table	74
Using Other Iterators	74
Sorting an Array of Table Data	74
Define Example Data	75
Default Sort Order	75
Creating a Comparison Function	75
Creating a More Complex Sort Function	76
Summary	77
Chapter 6 Lua Standard Libraries	79
Table Library	80
<table.concat (table="" [,="" i="" j]])<="" sep="" td=""><td>80</td></table.concat>	80
table.insert (table, [pos,] value)	81
table.maxn (table)	81
table.remove (table [, pos])	81
table.sort (table [, comp])	82
Math Library	82
String Utility Functions	85
Formatting New Strings	87
Pattern Matching	89
Character Classes	90
Pattern Items	91
Pattern Captures	92
Pattern Anchors	93
Pattern Examples	93
Pattern Matching Functions	93
World of Warcraft Additions to Lua	95
Function Aliases	97
Summary	98
Chapter 7 Learning XML	99
XML as a Markup Language	99
XML's Relationship to HTML	100
Components of XML	100
XML Tags	101
XML Elements	101
XML Attributes	101
XML Entities	101
Creating Well-Formed XML	102

Validating an XML Document	102
Example Schema Definition	103
Example XML Document	103
XML in World of Warcraft	104
Using a GradientType	106
Exploring the Schema	106
Summary	106
Part II	107
Programming in World of Warcraft	107
Chapter 8	109
Programming Within World of Warcraft	109
Running and Testing Code In-Game	109
Setting Up	109
Using /script and /run	110
Displaying Output	111
Editing Code In-Game	111
TinyPad	112
Omnibus	112
WowLua	112
Writing a Custom <i>print()</i> Function	113
Limitations of Addons and Scripting	113
Blizzard Addon Writing Resources	114
User Interface Customization Tool	114
UI and Macros forums	116
Community Resources	116
WowWiki	116
WoW Version Tracker	116
Summary	116
Chapter 9	117
Anatomy of an Addon	117
Exploring Your Addons Folder	117
Blizzard Addons	117
Custom Addons	118
Addon Components and Files	119
Table of Contents Files (.toc)	119
## Interface:	119
## Title: MyAddonName	120
## Notes: This is a description for MyAddonName.	121
## Dependencies or ## RequiredDeps: AddonA, AddonB	121
## OptionalDeps: AddonA, AddonB	122
## LoadOnDemand: 1 or 0	122
## LoadsWith: AddonA, AddonB	122
## DefaultState: enabled or disabled	123
## LoadManager: AddonA	123
## SavedVariables: VariableName	123
## SavedVariablesPerCharacter: VariableName	123
Lua Script Files	124
XML Files	125

Media Files	125
Music	125
Graphics	126
Localizing Your Addons	126
Valid Locales	127
Reasons for Providing Localization	127
<i>Encouraging Users to Contribute</i>	127
Implementing Localization	128
Add a File for Each Locale	128
Create a Global Table Containing the Base Strings	128
Using the Localization Table	129
Adding New Locales	129
Handling Partial Translations	130
Creating an Addon Skeleton	130
Naming your Addon (Creating a Directory)	130
Creating a .toc File	130
Generating a Skeleton .xml file	130
Using External Libraries	131
Summary	131
Chapter 10 Creating Frames in XML	133
Understanding UI Objects	133
Naming Objects	134
Parenting Objects	134
Using Attributes	134
Using XML Hierarchy	135
Using the :SetParent() Method	135
Giving Objects Sizes	135
Absolute Dimensions	136
Relative Dimensions	136
Anchoring Objects	136
Sticky Anchors	138
Anchor Examples	138
Layering Frames and Graphical Elements	138
Frame Strata	139
Frame Levels	140
Graphical Layers	140
Common Attributes	141
Creating Textures	142
Adding Colors	142
Adding a Gradient	143
Adding a Graphic	144
Creating Text using FontStrings	145
Using Templates	146
Example Use	146
Further Customization	147

Exploring Frame Types	148
Buttons	148
Check Buttons	149
ColorSelect	149
EditBox	150
GameTooltip	150
MessageFrame	150
Minimap	151
Model	151
ScrollingMessageFrame	152
ScrollFrame	152
SimpleHTML	152
Slider	152
StatusBar	153
TaxiRouteFrame	153
Summary	154
Chapter 11 Adding Behavior to XML Frames	155
Understanding Events and Scripts	155
Frame Scripts	155
Game Events	156
Responding to Frame Events with Scripts	156
<OnEnter> and <OnLeave>	156
<OnLoad>	157
<OnEvent>	157
<OnClick>	158
<OnUpdate>	159
Available Frame Scripts	160
Altering Frames with Frame Methods	161
Common Methods	162
Type-Specific Functions	162
Creating and Using Templates	163
Why Are Templates Useful?	163
Creating New XML Templates	163
Using XML Templates	164
Using Default UI Widget Templates	165
Summary	166
Chapter 12 Creating Your First Addon: CombatTracker	167
Defining Specifications	167
CombatTracker User Experience	167
Finding the Right Game Events	168
PLAYER_REGEN_DISABLED	168
PLAYER_REGEN_ENABLED	168
UNIT_COMBAT	168
Creating Your Addon's Skeleton	170
Defining CombatTracker's XML Frame	170
Testing CombatTrackerFrame	171

Adding Script Handlers to CombatTrackerFrame	172
<OnLoad>	172
<OnEvent>	173
<OnClick>	173
<OnDragStart>	173
<OnDragStop>	173
Adding Functions to CombatTracker.lua	173
CombatTracker_OnLoad(frame)	174
CombatTracker_OnEvent(frame, event, ...)	174
PLAYER_REGEN_ENABLED	175
PLAYER_REGEN_DISABLED	175
UNIT_COMBAT	175
CombatTracker_UpdateText()	176
CombatTracker_ReportDPS()	176
Testing CombatTracker	177
Frame Dragging	177
Right-Click Reporting: Part I	178
Testing Combat Tracking	178
Right-Click Reporting: Part II	179
Summary	179

Chapter 13 Using the World of Warcraft API 181

Understanding the WoW API	181
Normal APIs	182
Library-like APIs	182
FrameXML Functions	183
Protected Functions	183
Unit Functions Up Close	184
Creating a Simple Unit Frame	186
Building the Frame	187
Adding Data Fields	188
Setting Up Frame Event Handlers	190
OnLoad	191
OnEvent	192
OnShow and OnHide	193
Putting the API to Use	194
Showing and Hiding the Frame	195
Implementing Simple Update Functions	196
Setting the Name of Your Target	196
Showing PvP Status	197
Updating the Target's Power Type	197
Setting the Target's Class	197
Displaying Health and Mana Values	198
Updating Hostility Information	200
Setting Your Target's Faction	201
Showing the Target's Level	201
Displaying the Target's Reaction	202
Summary	205

Chapter 14	Building a Basic Addon with AddOn Studio	207
	Getting Started with AddOn Studio	207
	Visually Designing your Interface	208
	Using the Toolbox	209
	Setting Properties	210
	Writing the Code	211
	Listening to Events	211
	Adding Event Handlers Automatically	211
	Verifying a Unit Exists	212
	Add the Close Button Code	213
	Deploying your Addon	213
	Summary	214
Part III	Advanced Addon Techniques	215
Chapter 15	Using Templates Programmatically	217
	Using CreateFrame	217
	Adding Buffs to TargetText	218
	Creating the Basic Templates	219
	Defining Fundamental Behaviors	221
	Event Handlers	221
	Arranging the Buffs and Debuffs	222
	Creating the Buff Icons	223
	Building the “Grid”	223
	Setting Anchors	223
	Creating Specialized Wrappers	224
	Updating the Buffs	225
	Looping Through the Buffs	225
	Showing or Creating the Buff	226
	Setting Visual Attributes	226
	Wrapping the Update	228
	Summary	229
Chapter 16	Writing an Addon Without XML	231
	Exploring Basic Frame Creation	231
	Using CreateFontString()	232
	Using CreateTexture()	233
	Creating a Better PlayerFrame	233
	Setting Up the Lua	234
	Creating the Frames	235
	Making It Work	236
	Comparing Lua Frames to XML Frames	237
	Summary	240
Chapter 17	Taking Action with Secure Templates	241
	Understanding Taint	241
	Enabling Taint Logging	242
	Execution Taint	243
	Variable Taint	244

Creeping Taint	246
Understanding Protected Frames	246
Setting Frame Properties without Taint	247
Using Secure Templates	248
Defining Behaviors for Action Buttons	248
Casting a Spell	249
Looking Under the Hood	249
Specifying Units to Affect	250
Other Types and Their Uses	250
Making Simple Choices	253
Deconstructing a Modified Attribute	253
Delegating Attribute Responsibility	256
Choosing an Action by Hostility	256
Giving Life to Your Unit Frame	257
Removing Forbidden Code	258
Accepting Clicks	258
Showing and Hiding the Frame	258
Setting up Actions	259
Summary	260
Chapter 18 Creating Slash Commands	261
Examining the Basics of Slash Commands	261
Tips, Tricks, and Good Ideas	262
Tokenizing Input	262
Using Validation for Pattern Matching	263
Faking a Switch	264
Good Ideas	265
Summary	266
Chapter 19 Altering Existing Behavior with Function Hooking	267
What Is Function Hooking?	267
Modifying Return Values	268
Hooking Widget Scripts	269
Hooking a Function Securely	270
Hooking Scripts Securely	271
Deciding When to Hook	271
Understanding the Hook Chain	271
You Can't Rely on Order	272
There Is No "Unhook"	272
Hooking Hits Performance	272
Finding Alternatives	273
Designing an Addon: MapZoomOut	273
Creating a Timer	274
Creating MapZoomOut	275
Creating a Timer Frame	276
Initial Setup	276

	Create the Function Hook	276
	Writing the Timer Code	276
	Final Setup	277
	Testing MapZoomOut	278
	Summary	278
Chapter 20	Creating Custom Graphics	279
	Common Rules for Creating Graphics	279
	The GIMP	280
	Create a New Image	280
	Adding Graphical Components	280
	Saving Textures	281
	Adobe Photoshop	282
	Create a New Image	282
	Adding Graphical Components	283
	Creating an Alpha Channel	283
	Saving an Image	284
	Paint Shop Pro	285
	Creating a New Image	285
	Adding Graphical Components	286
	Creating an Alpha Channel	286
	Saving an Image	287
	Testing Your Texture	288
	No Button Appears	289
	A Green Box Appears	289
	XML Texture Definition	289
	Lua Texture Definition	290
	Summary	290
Chapter 21	Making Frames Move	291
	Drag and Drop	291
	TitleRegion	292
	Using OnMouseDown and OnMouseUp	292
	Using OnDragStart/OnDragStop	293
	Bringing Life to the Frames	293
	Fading	295
	Summary	295
Chapter 22	Creating Scroll Frames	297
	Using Scroll Frames	299
	Defining a Scroll Frame	299
	Adding a Scroll Child	300
	Creating Scroll Bars	301
	Creating Faux Scroll Frames	302
	Adding Scroll Bars	305
	Scrolling with the Mouse Wheel	306
	Summary	307

Chapter 23	Creating Dropdown Menus	309
	Creating a Simple Dropdown	310
	Adding a Toggle Button	310
	Creating a Dropdown Frame	311
	Initializing the Dropdown	311
	Adding Buttons to the Dropdown	311
	Calling <code>UIDropDownMenu_Initialize()</code>	313
	Toggling the Dropdown Menu	314
	Testing the Dropdown	314
	Creating Multilevel Dropdowns	315
	Creating Advanced Dropdowns	316
	Function Menu Items	317
	CheckButton Menu Items	318
	ColorPicker Menu Items	318
	Automating Menu Creation	320
	Summary	322
Chapter 24	Tooltips	323
	Manipulating Tooltips	323
	Using <code>:Set. . .</code> Functions	323
	Tooltips with Custom Content	324
	Creating Custom Tooltips	325
	Parsing Tooltip Data	326
	Basic Anatomy	327
	Basic Scanning Loop	327
	Summary	328
Chapter 25	Using State Headers	329
	Creating Your First State Header	329
	Remapping Mouse Clicks	332
	Using State Attributes	332
	Configuring the Buttons	333
	Changing State with a Click	334
	Delaying the State Change	335
	Controlling Visual Properties	336
	Showing and Hiding Children	336
	Repositioning Children	336
	Resizing Children and the Header	337
	Repositioning the Header	338
	Anchoring to the Cursor or Screen	338
	Re-Parenting the Header	339
	Configuring Other Properties	341
	Changing the Header's Unit	341
	Overriding Key Bindings	342
	Storing States in a Stack	344

Creating a Macro Sequencer	344
Defining the Sequences	346
Setting up the Basic Sequences	347
Resetting the Sequence	349
Creating a Pie Button	351
Setting up Pie Buttons	351
Building the Frame	352
Finishing the Behavior	354
Summary	355
Chapter 26 Driving State Changes	357
Working with State Drivers	357
Delaying Driven State Changes	359
Understanding Macro Options	359
Building Macro Option Sets	360
Exploring Conditionals	361
Combining State Types	364
Sharing States Among Headers	365
Using Anchor Templates	365
Triggering Anchor Changes	366
Remapping Anchor Transitions	367
Creating an Action Popup	368
Building the Frame	368
Adding the Buttons	369
Defining the Basic Behavior	370
Creating the Slash Commands	371
Configuring the Buttons	372
Configuring the Header	373
Applying the Anchors	375
Selecting the Unit Frames	375
Creating the Anchors	376
Summary	377
Chapter 27 Creating Unit Frames with Group Templates	379
How Do the Templates Work?	379
Configuring a SecureGroupHeader	380
SecureGroupPetHeaderTemplate Attributes	383
Creating a New SecureGroupHeader	383
Defining an XML Template	385
Adding Behavior Scripts	385
Initializing Frames	386
Updating Unit Information	387
Updating Maximum Health	388
Adding Dragging Support	388
Testing BasicUnitFrames	389
Summary	390

Part IV	Reference	391
Chapter 28	API Reference	393
	API Reference Conventions	393
	Function Signatures	393
	Optional Arguments	394
	Argument Choices	394
	Argument and Return Listings	394
	API Pseudo-Types	395
	Alphabetic API Listing	396
Chapter 29	API Categories	765
	Action	765
	Actionbar	766
	Addon	766
	Arena	767
	Auction	767
	Bank	769
	Battlefield	769
	Binding	771

Appendix B Tracking History Using Version Control Systems **939**

Subversion Terminology	939
Obtaining Subversion	940
Subversion Command Primer	941
svn checkout <url> [path]	941
svn update [path]	941
svn commit [path]	941
svn log [path]	942
svn diff [path]	942
Creating a Local Repository	942

Appendix C Best Practices **943**

General Programming	943
Use Meaningful Variable Names	944
Variable Naming Exceptions	945
Use Constants Instead of ‘Magic Numbers’	945
Reorganize for Easier Maintenance	946
Rework Repetitive Code	946
Break Apart Long Functions	947
Use Consistent Programming Style	947
Lua Tips	948
Use Local Variables	948
Minimize Garbage	949
How to Reduce Garbage	949
Reuse Objects	954
Recycle Tables	955

Other Fine-tuning Optimizations	956
Check Expected Conditions First	956
Exploit Shortcut Evaluation	957
Use Tables as a Logic Structure	957
The WoW Environment	959
Use What You're Given	959
Localize with Global Strings	959
Avoid Deprecated Systems	960
Global Widget Handler Arguments	960
SecureStateDriverTemplate	961
bag and slot Attributes on item Type Action Buttons	961
Appendix D Avoiding Common Mistakes	963
Initializing Global Variables	963
Adding Files	963
Entering into the EditText	964
"Hidden" Frames	964
Logs\FramXML.log	964
Not Checking API Returns	964
Requesting Data Before PLAYER_LOGIN	965
Multiple Anchor Points	965
Appendix E Utilizing Addon Libraries	967
Why a Library?	967
Dependencies versus Embedded Libraries	968
Dependency Libraries	968
Embedded Libraries	969
Library Upgrading	970
Choosing a Library Method	971
Existing Libraries	971
Ace2	971
Chronos	972
Dongle	972
Earth	972
Satellite	972
Sea	972
Telepathy	973
Other Library Resources	973
Appendix F Author and Addon Communities	975
Official World of Warcraft Forums	975
IncGamers UI Customization Forums	975
WoWInterface Forums	976
Elitist Jerks	976
WowAce Forums	976
CosmosUI Forums	976
WowProgramming Forums	977
Glossary	979
Index	983
