

THE EXPERT'S VOICE® IN OPEN SOURCE

Expert Shell Scripting

*Everything you always wanted to know about
shell scripting, but were afraid to ask.*

Ron Peters

About the Author	xv
About the Technical Reviewer	xvii
Acknowledgments	xix
Introduction	xxi

PART 1 ■■■■ Basic Scripting Techniques

CHAPTER 1	Shell Script Debugging	3
	Shell Trace Options	3
	Simple Output Statements	6
	Controlling Output with Debug Levels	8
	Simplifying Error Checking with a Function	9
	Manual Stepping	11
CHAPTER 2	Standard Function Library	13
	The Library File	13
	Some Useful Functions	14
	Using Your Library	16
CHAPTER 3	Date and Time Manipulation	19
	Date in Days	19
	Days Since Epoch	20
	Alternatives for Finding the Date in Seconds	22
	Evaluating for the Current Day and Time	22
CHAPTER 4	Comparisons and Tests	25
	The Basics of Comparisons	25

CHAPTER 5	Accepting Command-Line Options, Switches, and Parameters	31
CHAPTER 6	Testing Variables and Assigning Defaults	37
	Setting Defaults	37
	Variable Substitution	38
	:= Syntax	39
	= Syntax	40
	:- Syntax	40
	- Syntax	40
	:? Syntax	41
	? Syntax	41
	:+ Syntax	42
	+ Syntax	42
CHAPTER 7	Indirect Reference Variables	43
	Log File Monitoring with Indirect Variables	43
	The Main Monitor Loop	44
CHAPTER 8	Shell Process Tree	49
	Process Tree Implemented Using Arrays	50
	Process Tree Implemented Using Indirect Variables	55
	Bourne Shell Implementation of a Process Tree	56
CHAPTER 9	Data Redirection	59
	Avoiding Confusion	59
	Common Redirection	60
	Access to User-Specified File Handles	62
	Descriptor Access from the Shell	64
CHAPTER 10	Piping Input to read	65
	Line-by-Line Option 1	66
	Line-by-Line Option 2	67
	Line-by-Line Option 3	68

Line-by-Line Option 4	68
Pipe to read Directly	70
Process Input Word-by-Word	70

PART 2 **System Interaction and Advanced Techniques**

 CHAPTER 11	Math from the Shell	75
	expr	75
	Internal Shell Math	76
	bc	78
	dc	78
 CHAPTER 12	cron	81
	crontab Entries	81
	Environment Problems	82
	Output Redirection	84
 CHAPTER 13	Self-Linked Scripts	87
 CHAPTER 14	Throttling Parallel Processes	91
	Parallel Processing with ksh	92
	Parallel Processing with bash	97
 CHAPTER 15	Command-Line Editing and History	99
	Setting Up vi Editing	100
	bash	100
	ksh	101
	Command and File Completion	101
 CHAPTER 16	Scripting from the Command Line	103
	A Few Examples	103

CHAPTER 17	Automating User Input with expect	107
	A Shell Script to Customize Parameters for an expect Script	108
	An expect Script to Automate telnet	111
CHAPTER 18	User Input Timeout	115
	Manual Timeout Method	115
	Timeout Using stty	117
	General Timeout Utility	118
CHAPTER 19	Instant Keyboard Response	121
CHAPTER 20	Directory Copying	125
	Using cp	125
	Using tar	126
	Using find	126
	Using rsync	127
CHAPTER 21	A Brief Tour of the X Display Environment	131
	The Display	131
	X Traffic Through ssh	133
	X Applications Through a Third-Party System	133
	User-Profile Entry	135
	Root-Profile Entry	137
	Throw a Temporary Root Window	138
CHAPTER 22	X Navigation Window	141
	Navigation Window Usage	141
	Navigation Setup	142
	Navigation Window	145
CHAPTER 23	Command-Line E-mail Attachments	151
	uuencode	151
	MIME Encoding	153

CHAPTER 24	Text-Processing One-Liners	157
	Displaying Specific Fields	157
	Specifying the Field Separator	158
	Simple Pattern-Matching	158
	Matching Fields Against Several Values	159
	Determining the Number of Fields	159
	Determining the Last Field	159
	Determining the Second-to-Last Field	160
	Passing Variables to awk	160
	Using a Variable Passed to awk in a Condition	161
	Displaying a Range of Fields (Main Method)	161
	Displaying a Range of Fields (Alternate Method)	162
	Determining the Length of a String Using awk	163
	Determining the Length of a String Using expr	163
	Displaying a Substring with awk	163
	Displaying a Substring with expr	164
	Conducting Simple Search and Replace with sed	164
	Disregarding Blank and Commented Lines from a File	164
	Conducting Dual Search and Replace with sed	165
	Filtering Lines with sed	165
	Searching for Multiple Strings with egrep	166
	A Clean Method of Searching the Process Table	166
	Summing Columns Using awk	167
	Generating Random Numbers Using awk	167
	Generating Random Numbers from the Shell	168
	Displaying Character-Based Fields with sed	168
	Escaping Special Characters	169
	Returning Trailing Lines from a Pattern Match Using grep	170
	Returning Preceding Lines to a Pattern Match Using grep	171
CHAPTER 25	Editing Files in Place	173
	Simple Search and Replace with ed	174
	Search and Replace Using ed, Dissected	174
	Examples of ed Commands	175
	Escaping Special Characters in a File	178
CHAPTER 26	Evaluating Variables in a Flat File	181

CHAPTER 27	Read Piped Input	183
CHAPTER 28	Free-Format Output Using cat	185
CHAPTER 29	Automating Interactive Processes	187

PART 3 Useful Scripts

CHAPTER 30	Automating E-mail with procmail	193
	The .procmailrc File	194
	Usage Examples	196
	The Code	196
CHAPTER 31	Process-Management Monitor	201
CHAPTER 32	Managing File Counts	211
	File-Count Monitor	211
	Testing File-Count Methods	213
CHAPTER 33	Processes Running from inittab	215
CHAPTER 34	Automatic RCS	219
CHAPTER 35	Colorful /proc Reporting	223
CHAPTER 36	Password-Aging Notification	231
	Script Initialization	232
	Processing Begins	234
	Determine Password Age	236
CHAPTER 37	A Pseudo-shadow File	241
CHAPTER 38	Linux Gold-System Build	245

 CHAPTER 39	System Snapshots	251
	Snapshot Script	253
	Snapshot Promotion	255
	Creating the Latest Snapshot	258
	Final Thoughts	258
 CHAPTER 40	Removing Large Files and Log Rolling	261
 CHAPTER 41	Core Finder	265
 CHAPTER 42	Network Adapter Failover	267
	Check the Network	270
	Switch the Interfaces	271
 APPENDIX A	Test Switches	273
 APPENDIX B	Special Parameters	275
 APPENDIX C	Other Shell-Scripting Resources	277
	Manual Pages	277
	Books	277
	Scripting Books	278
	Supplementary Books	278
	Shell Resources	278
	Online Resources	279
 INDEX		281
