

CD-ROM Included!

- Exercise example files
- ActionScript 3.0 code samples and more

Full-Color Insert

- Sixteen-page full-color insert with cutting-edge examples

Robert Reinhardt and Snow Dowd

Adobe® Flash® CS4 Professional

Become fluent in
the Flash workspace

Master ActionScript®
and build a game

Integrate XML data
with Flash movies

Bible

The book you need to succeed!

Contents

Preface

VII

How to Get the Most out of This Book.....	viii
Icons: What Do They Mean?	ix
How This Book Is Organized	x
Part I: An Introduction to Flash Web Production.....	x
Part II: Mastering the Flash Environment	x
Part III: Creating Animation and Effects	x
Part IV: Integrating Media Files with Flash.....	xi
Part V: Adding Basic Interactivity to Flash Movies.....	xi
Part VI: Distributing Flash Movies.....	xi
Part VII: Approaching ActionScript.....	xii
Part VIII: Applying ActionScript.....	xii
Part IX: Appendixes	xii
Getting in Touch with Us.....	xii
Adobe Wants to Help You.....	xiii

Part I: An Introduction to Flash Web Production

1

Chapter 1: Understanding the Adobe Flash CS4 Blueprint 3

The Key Is Integration.....	3
The topography of Flash CS4	6
File types in Flash CS4	7
The Many Worlds of Flash CS4.....	12
Bitmap handler.....	12
Vector-based drawing program	12
Vector-based animator	13
Video engine	13
Audio player	13
Multimedia authoring program	13
Animation sequencer.....	14
Programming and database front end.....	14
Desktop application authoring program	15
Summary	15

Chapter 2: Exploring Web Technologies 17

Contextualizing Flash in the Internet Evolution	17
High expectations for Web experiences	17
To Flash or not to Flash?	20
Alternative methods of multimedia authoring	24
Exploring Companion Technologies	26
HTML is here to stay	26
Client-side scripting using JavaScript	27
The world of Web services	27
Adobe server technologies	28
Recognizing Project Potential	28
Linear presentations	28
Interactive presentations	28
Data-driven presentations	29
Data-driven applications (or Rich Internet Applications)	29
Summary	29

Chapter 3: Planning Flash Projects 31

Workflow Basics	31
Phase I: Establishing the concept and goals	32
Phase II: Producing, testing, and staging the presentation	43
Using the Project Panel in Flash CS4	46
1. Establishing a project structure	46
2. Creating the project in Flash CS4	47
3. Changing project and panel preferences	50
4. Opening and editing files in the project	53
5. Publishing the entire project	54
Summary	55

Part II: Mastering the Flash Environment 57

Chapter 4: Interface Fundamentals. 59

Getting Started	59
Welcome to Flash CS4	59
Start Page	60
Help menu options	62
The Flash CS4 interface on Macintosh and Windows	62
What to expect from the Properties panel	64
Managing Windows and Panels	66
Contextual menus	66
Floating and docking panels	67
Focus: Making panels or windows active	68
Creating custom workspace layouts	68
Keyboard shortcuts	69

The Tools Panel	71
Controlling the Tools panel	72
Reading the Tools panel	72
Using Tool options	72
Customizing the Tools panel	72
The Document Window	76
Controlling the Document window	77
Reading the Document window	78
Using scenes	80
Using Document window menu options	82
Working with Flash templates	84
The Timeline Window	84
Controlling the Timeline window	85
Using the Timeline Controller toolbar	85
Reading the Timeline	86
Editing frames and layers	90
Using Frame View options	98
Printing	100
Summary	101

Chapter 5: Drawing in Flash 103

Using Geometric Shape Tools	104
The Oval tool	104
The Oval Primitive tool	106
The Rectangle tool and Rectangle Primitive tool	107
Join and Miter settings	108
The PolyStar tool	109
The Line tool	110
Using Drawing Tools	111
The Pencil tool	111
The Brush tool	112
The Eraser tool	117
Creating Precise Lines and Bezier Curves with the Pen Tool	119
Using Fill and Stroke Controls	123
Choosing colors	123
Choosing line styles	124
Controlling Stroke Scale behavior	127
Optimizing Drawings	129
Putting Selection Tools to Work	130
The Selection tool	131
The Lasso tool	136
The Subselection tool	139
Designing and Aligning Elements	141
Simplifying snapping settings	141
Design panels	146
The Edit menu	151

Creating Patterns with Symbols Using the Spray Brush Tool and the Deco Tool	152
Applying random “ink” with the Spray Brush tool.....	153
Creating order and pattern with the Deco tool	156
Summary	160

Chapter 6: Symbols, Instances, and the Library 163

Understanding the Document Library.....	164
Working with Common Libraries and External Libraries.....	165
Working with multiple Document Libraries	166
Reading the Library panel.....	168
Organizing Library panels	171
Defining Content Types	172
Raw data	173
Drawing objects and shape primitives	173
Groups.....	173
Native symbols.....	174
Imported media elements.....	175
Editing Symbols.....	178
Modifying a symbol in Edit mode	178
Editing a symbol in a new window.....	178
Editing a symbol in place	178
Editing symbols from the Library	178
Returning to the Main Timeline or scene.....	179
Modifying Instance Properties.....	180
Applying basic color effects to symbol instances.....	181
Changing the symbol type of an instance	182
Swapping symbols.....	182
Building Nested Symbol Structures.....	183
Converting a raw shape into a Graphic symbol	183
Using Graphic symbols in a button	185
Animating Graphic symbols in a Movie Clip	187
Adding a Movie Clip to a Button symbol.....	188
Modifying a MovieClip instance	190
9-Slice Scaling for Movie Clip Backgrounds	192
Using the Movie Explorer	195
Filtering buttons.....	196
The display list.....	196
The Movie Explorer Options menu	197
The contextual menu	198
Using Authortime Shared Libraries	199
Summary	203

Chapter 7: Applying Color 205

Introducing Color Basics.....	206
Discussing Web-safe color issues.....	206
Using hexadecimal values.....	207
Using color effectively	207

Working in the Swatches Panel	211
Swatches panel options	213
Importing custom palettes	214
Using the Color Panel	218
Adjusting fill and stroke transparency	221
Working with gradient fills	222
Controlling gradient fill colors	223
Using alpha settings with gradients	225
Selecting bitmap fills	227
Working with Droppers, Paint Buckets, and Ink Bottles	228
Summary	229

Chapter 8: Working with Text. 231

Considering Typography	232
Text Field Types in Flash	232
Static text boxes	233
Editable text fields: Dynamic and input	235
The Text Tool and the Properties Panel	236
Working with the Text tool	237
Setting text attributes in the Properties panel	240
Font Export and Display	246
Smoothing text with anti-alias settings	246
Rendering outlines with the Bitmap text setting	249
Understanding device fonts	249
Working with the Use Device Fonts setting	249
Troubleshooting font display	250
Controlling font substitution	251
Font Symbols and Shared Font Libraries	252
Creating a font symbol	253
Updating font symbols at author time	255
Using font symbols in runtime shared libraries	256
Modifying Text	260
Editing text manually	260
Moving beyond the box with live filter effects	262
Summary	264

Chapter 9: Modifying Graphics 265

Sampling and Switching Fills and Strokes	266
The Eyedropper tool	266
The Ink Bottle tool	267
The Paint Bucket tool	268
Using the Paint Bucket Gap size option	270
Using the Paint Bucket Lock Fill option	270
Transforming Gradients and Bitmap Fills	271
Adjusting the center point with the Gradient Transform tool	272
Rotating a fill with the Gradient Transform tool	273

Adjusting scale with the Gradient Transform tool.....	274
Setting gradient fill overflow styles.....	275
Skewing a bitmap fill with the Gradient Transform tool.....	275
Gradient Transform Used for Lighting Effects.....	276
Applying Modify Shape Menu Commands.....	277
Convert Lines to Fills.....	278
Creating scalable artwork.....	278
Expand Fill.....	279
Soften Fill Edges.....	280
Free Transform Commands and Options.....	282
The Transform panel.....	283
The Modify Transform menu.....	283
The Free Transform tool.....	283
Transforming shapes, symbols, text, and groups.....	284
Manipulating Symbols in 3D Space.....	286
Controlling the camera view: Perspective and vanishing point.....	287
Transforming symbols with the 3D Rotation tool.....	288
Moving symbols with the 3D Translation tool.....	292
Modifying Item Types.....	292
Stacking order.....	293
Grouping.....	293
Applying Break apart.....	294
About the Magic Wand option.....	298
Tracing bitmaps.....	299
Working with Drawing Objects and Combine Object Commands.....	301
Working with Compound Shapes.....	302
Editing with Find and Replace.....	304
Using the History Panel.....	305
Replay Steps.....	306
Copy Steps.....	307
Clear History.....	307
History View.....	307
Save As Command.....	307
Summary.....	308

Part III: Creating Animation and Effects

309

Chapter 10: Animation Strategies..... 311

Establishing Ground Rules.....	312
Defining Variables.....	312
The environment.....	313
The materials.....	314
The motion.....	314
Adding Personality.....	316

Manipulating Perception and Illusion	318
Viewpoint, framing, and depth.....	319
Anticipation	321
Secondary motion	323
Understanding the Laws of Nature.....	324
Law #1: Inertia	324
Law #2: Acceleration	325
Law #3: Action/reaction force pairs.....	326
Summary	327

Chapter 11: Timeline Animation and the Motion Editor 329

Basic Methods of Flash Animation	329
Frame-by-Frame Animation.....	330
Adding keyframes	332
Creating frame-by-frame animation.....	333
Modifying Multiframe Sequences	333
Onion skinning.....	335
Editing multiple frames.....	336
Using Tweens for Animation.....	338
Shape tweening.....	339
Adding shape hints	344
Motion tweening.....	348
Modifying motion tween properties	352
Working with motion tween spans and layers.....	354
Editing motion paths.....	356
Adding control to animation along a motion path.....	359
Working with motion presets.....	360
Adjusting Easing and Tween Properties with the Motion Editor.....	362
Controlling property views in the Motion Editor.....	365
Editing tween curves and property key frames	365
Eases and custom eases	366
Animating 3D properties.....	368
Integrating Multiple Animation Sequences.....	373
Moving tweens onto symbol timelines.....	374
Organizing symbol instances on the Main Timeline	376
Reusing and Modifying Tweened Symbol Instances	379
Controlling symbol instances with ActionScript.....	381
Make Flash work for you.....	382
Summary	383

Chapter 12: Applying Filters, Blends, Guides, and Masks. 385

Applying Filters in Flash.....	385
Adding and adjusting filters	386
Creating dimensional shadows	390
Combining filters and saving custom presets.....	392
Animating filters with motion tweens.....	394
Using the Motion Editor to control filter interpolation	395

Controlling Color: Properties versus Filters.....	397
Adjust Color filter	397
Color properties	401
Using advanced color effects: Understanding relative and absolute color settings	401
Layering Graphics with Blend Modes	404
Understanding blend modes	405
Applying basic blends	408
Applying compound blend modes: Alpha and Erase	408
Creating an animated Alpha blend	410
Working with Special Layer Types: Guides and Masks.....	411
Using guide layers	412
Adding masks	415
Masking with a filled shape	416
Masking with a group.....	418
Masking with a symbol instance	419
Masking text.....	420
Using Distribute to Layers.....	423
Summary	426

Chapter 13: Character Animation Techniques 427

Working with Large File Sizes.....	428
Storyboarding scenes and shots.....	428
Flash scenes and project files.....	429
Voices, sound effects, and ambient sound	429
Some Cartoon Animation Basics.....	431
Expressing motion and emotion.....	431
Anticipation	432
Weight	432
Overlapping actions	432
Blurring to simulate motion	433
Animator's Keys and Inbetweening	437
Walk cycles (or walk loops)	437
Repeaters.....	440
Types of walks	440
Coloring the Art.....	441
The model sheet.....	441
Gap problems.....	442
Speed coloring	442
Temporary backgrounds	442
Flash Tweening.....	446
Panning.....	446
Instance swapping.....	446
Motion guides	447
Lip-Syncing.....	448
Shape morphing is not for lip-syncing.....	449
Expression and lip-syncing.....	449

Lip-sync tricks.....	449
Syncing with music and sound effects	450
Backgrounds and Scenery	454
Runtime bitmap caching	455
Bitmaps.....	455
QuickTime limitations	456
Building layered backgrounds in Photoshop	456
Flash mask layers	457
Long pans	457
Multiplane pans	458
Blurring to simulate depth.....	458
Creating IK Armatures with the Bone Tool and Bind Tool.....	459
Finishing Up.....	467
Final output	467
Post production.....	468
Summary	470

Part IV: Integrating Media Files with Flash

471

Chapter 14: Adding Sound 473

Identifying Sound File Import and Export Formats.....	474
Import formats	474
Export formats	476
Importing Sounds into Flash.....	478
Assigning a Sound to a Button	481
Adding Sound to the Timeline	483
Organizing Sounds on the Timeline	484
Enhanced viewing of sound layers.....	484
Organizing sound layers with a layer folder.....	485
Synchronizing Audio to Animations.....	485
Event.....	485
Start	486
Stop	486
Stream.....	486
Stopping Sounds.....	487
Stopping an event sound.....	487
Stopping a single instance of a stream sound.....	489
Stopping all sounds.....	490
Editing Audio in Flash	491
Sound-editing controls.....	491
Applying effects from the Effect menu of the Properties panel.....	493
Sound Optimization Overview.....	494
Publish Settings for Audio.....	495
The Set options	496
Supporting audio and MP3 playback.....	500

Fine-Tuning Sound Settings in the Library	500
Settings for audio in the library	501
Combining methods for controlling sounds	503
Final Sound Advice and Pointers	503
VBR (Variable Bit Rate) MP3	503
Optimizing sounds for bandwidth usage	504
Extracting a sound from a Flash document	507
Summary	509

Chapter 15: Importing Artwork 511

Defining Vectors and Bitmaps	511
Knowing the File Formats for Import to Flash	514
Preparing Bitmaps	517
Preserving Bitmap Quality	519
Importing and Copying Bitmaps	521
Importing sequences	522
Working with layered bitmap files	523
Copying and pasting a bitmap into Flash	528
Applying color effects, alpha, and filters to bitmaps	528
Setting Bitmap Properties	529
Being prepared for common problems	533
Cross-browser consistency	533
Using the Bitmap Buttons in the Properties Panel	533
Swap	534
Edit	534
Making Sense of Bitmap Compression	535
24-bit or 32-bit lossless source files	535
8-bit lossless source files	536
Source files with lossy compression	537
Converting Rasters to Vectors	538
Using External Vector Graphics	540
Importing Vector Artwork	541
Copying and pasting a vector image into Flash	543
Importing Adobe Illustrator files	544
Optimizing Vectors	547
Interpreting complex vector artwork	547
Converting text to outlines	548
Optimizing curves	549
Runtime bitmap caching	550
Working with XFL: The Flash Format of the Future	551
Summary	553

Chapter 16: Displaying Video 555

Integrating Video: The Solutions	556
Loading a Flash Video file at runtime	556
Real-time streaming a Flash Video file at runtime	556
Embedding video into a Flash movie	557

Importing the Video.....	557
An overview of codec options.....	557
Compressing video with Adobe Media Encoder CS4.....	559
Using the Video Import wizard.....	566
Deploying video files with Flash CS4.....	570
Using the FLVPlayback Component (AS3).....	575
Working with the Component parameters.....	575
Using FLVPlayback Custom UI components.....	578
Working with Cue Points.....	581
Working with Video Alpha Channels.....	594
Live action footage.....	594
Summary.....	597

Part V: Adding Basic Interactivity to Flash Movies 599

Chapter 17: Understanding Actions and Event Handlers 601

Actions and Event Handlers.....	601
What is ActionScript?.....	603
Navigating the Actions panel.....	603
A brief primer on code syntax.....	606
Your First Five Actions.....	609
gotoAndPlay() and gotoAndStop().....	609
nextFrame() and prevFrame().....	611
nextScene() and prevScene().....	611
play() and stop().....	612
navigateToURL().....	613
Making Actions Happen with Event Handlers.....	615
Combining an action with an event handler to make a functioning button.....	616
The Flash event handlers.....	617
Creating Invisible Buttons and Using getURL.....	619
Summary.....	625

Chapter 18: Building Timelines and Interactions 627

A Brief History of Movie Clips: The Key to Self-Contained Playback.....	627
How Movie Clips interact within a Flash movie.....	628
One movie, several timelines.....	629
Targets and Paths Explained.....	631
Absolute paths.....	632
Relative paths.....	634
Targeting Movie Clips in Flash CS4.....	635
Summary.....	639

Chapter 19: Making Your First Flash CS4 Project 641

The Main Timeline As the Site Layout.....	641
Creating a plan.....	642
Setting up a local folder structure.....	643
Determining Flash movie properties.....	643

Mapping presentation areas to keyframes	644
Creating content for each area	646
Adding Navigation Elements to the Main Timeline	652
Creating text buttons for a menu	652
Browsing the video items	657
Text Scrolling with the TextArea Component	660
Using the Custom BlurFader Component	663
Making the Movie Accessible	665
Summary	669

Part VI: Distributing Flash Movies

671

Chapter 20: Publishing Flash Movies 673

Testing Flash Movies	673
Using the Test Scene or Test Movie command	674
Using the Bandwidth Profiler	675
Using the size report	680
Publishing Your Flash Movies	681
Publish Settings	682
Selecting formats	682
Using the Flash settings	683
Using the HTML settings	688
Using the GIF settings	696
Using the JPEG settings	699
Using the PNG settings	701
Creating Windows and Mac projectors	703
Publish Preview and Publish Commands	703
Using Publish Preview	703
Using Publish	703
Using Publish Profiles	704
Summary	706

Chapter 21: Integrating Flash Content with Web Pages 707

Writing Markup for Flash Movies	707
Using the <object> tag	708
Using the <embed> tag	715
Detecting the Flash Player	717
Plug-in versus ActiveX: Forcing content without a check	718
Detecting the Flash Player with Flash CS4	719
Detecting the Flash Player with SWFObject	724
Using Flash Movies with JavaScript and DHTML	728
A word of caution to Web developers	729
Understanding how Flash movies work with JavaScript	729
Changing HTML attributes	730
Adding a percentLoaded() method	733
Summary	737

Chapter 22: Using the Flash Player and Projector 739

Using the Stand-Alone Flash Player and Projector	739
Creating a projector.....	740
Distribution and licensing.....	742
Distribution on CD-ROM or DVD-ROM	742
Stand-Alone Limitations and Solutions	743
Using the Flash Player Plug-in for Web Browsers.....	743
Supported operating systems.....	744
Supported browsers	744
Plug-in and Flash movie distribution on the Web	745
Plug-in installation	745
Using the Settings in Flash Player 6 and Later	746
Privacy	746
Local Storage.....	747
Microphone.....	747
Camera.....	748
Player Utilities.....	749
Summary	750

Part VII: Approaching ActionScript 751

Chapter 23: Knowing the Nuts and Bolts of Code. 753

Breaking Down the Interactive Process.....	754
Define your problems.....	754
Clarify the solution.....	755
Translate the solution into the interactive language	756
<i>The Basic Context for Programming in Flash</i>	757
Accessing ActionScript commands	757
Actions list organization in the Actions panel	758
The Help documentation.....	758
ActionScript 1.0 and 2.0	759
One Part of the Sum: ActionScript Variables	761
String literals.....	762
Expressions	763
Variables as declarations.....	765
<i>Declaring Variables in ActionScript</i>	766
Using actions to define variables.....	766
Loading variables from a predefined source.....	766
Establishing variables with HTML	767
Creating Expressions in ActionScript	767
Operators.....	767
Checking conditions: if . . . else actions.....	769
Branching conditions with switch() and case.....	771
Loops	773
Properties.....	777

Built-in functions	777
Creating and calling subroutines	777
Creating a Login Sequence with Variables	778
Summary	782

Chapter 24: Controlling Movie Clips 785

Movie Clips: The Object Overview	785
Movie Clip properties	786
Movie Clip methods	791
Event listener methods: The flexible Movie Clip handler	794
Other classes and functions that use the MovieClip object	795
Working with Movie Clip Properties	797
Positioning Movie Clips	797
Scaling Movie Clips	798
Rotating Movie Clip instances	800
Creating Draggable Movie Clips	801
Drag-and-drop basics	801
Detecting the drop position: Using dropTarget	803
Making alpha, scale, and blur sliders	806
Summary	820

Chapter 25: Using Functions and Arrays 821

What Are Data Types?	821
String	822
Number	823
Boolean	824
Object	824
Function	824
Undefined	825
Checking data types with typeof	825
Checking class type in ActionScript 3.0	826
Overview of Functions as Procedures	828
What functions do	828
When to create a function	829
How to define a function	829
How to execute a function	830
Managing Related Data: The Array Class	831
Creating a Dynamic Reusable Flash Menu	832
Summary	838

Chapter 26: Interacting with Movie Clips 839

Movie Clip Collision Detection	839
Using dropTarget	840
Collision detection with hitTestObject() and hitTestPoint()	840
Using the Mouse Class	842
Manipulating Color Attributes	845
Creating a ColorTransform object	846
Setting multiplier and offset values	851

Enabling Sound with ActionScript	855
Creating sounds with ActionScript	858
Creating a SoundTransform object	861
Creating volume and balance sliders for sounds	861
Printing with ActionScript	864
Summary	871

Part VIII: Applying ActionScript 873

Chapter 27: Animating with ActionScript 875

Reviewing the Tween Parameters	875
Making an Object Move Back and Forth	878
Animating 3D Properties	880
Following the Mouse Cursor	882
Summary	885

Chapter 28: Sharing and Loading Assets 887

Managing Smooth Movie Download and Display	888
Preloading a Flash Movie	889
Loading Flash Movies	895
Basic overview of Flash site architecture	896
Loading an external .swf file into a movie	897
How Flash handles loaded movies of differing dimensions	900
Placing, scaling, and rotating externally loaded Flash movies	900
Loading Images into Flash Movies	904
Loading MP3 Audio into Flash Movies	907
Loading a Flash Video into a Flash Movie	911
Displaying a Flash Video at Its Native Size	916
Adjusting video size with metadata	916
Setting the video size without metadata	920
Accessing Items in Shared Libraries	921
Setting up a shared library file	922
Specifying the shared library's location	924
Publishing the shared library movie file	925
Linking to assets from other movies	925
Updating shared assets	926
Summary	928

Chapter 29: Sending Data In and Out of Flash 929

Using Text Fields to Store and Display Data	930
Input text fields	930
Dynamic text fields	932
Defining a Data Process with States	934
Input state	935
Send state	935
Wait state	936
Output state	936

Creating a User Comment Form	936
Using XML Data in Flash Movies	944
Understanding XML	944
Loading an XML document into a Flash movie	945
Summary	946

Chapter 30: Applying HTML and Text Field Formatting. 947

Exploring HTML Usage in Text Fields	947
Supported HTML tags	948
Formatting text with the Properties panel	950
Inserting HTML tags into text fields with ActionScript	952
Formatting fields with the TextFormat object	954
Applying style sheets to text fields	955
Inserting images into text fields	958
Using the TextEvent.LINK event with anchor tags	961
Controlling Text Field Properties	961
Scroll properties	961
Text rendering properties	963
Pixel-based Text Scrolling with Movie Clips	971
Summary	976

Chapter 31: Creating a Game in Flash. 977

The Game Plan: Four Phases of Game Design	977
Game design	978
Interaction design	978
Visual and sound design	979
Scripting	979
Building the Project	981
Scripting the Game	982
Initializing the Game	983
Main Timeline and Document Class overview	983
The Hangman.as document class	983
The shared font layer	987
The placeholder GameView instance	988
Building the Interface	990
Creating text fields	990
Creating the alphabet	993
Starting the Game	995
Display the letters of the alphabet	996
Choose a random word	997
Create the letters of the displayed word	998
The User Input	1000
Interpreting the User Input	1000
Was the letter selected before?	1000
Is the letter part of the word?	1001

Checking the Status of the Game	1003
Is the word complete?	1003
Is the hangman complete?	1003
Are there more words to guess?	1004
How do you end the round?	1004
Removing the hangman	1005
Reset the game or just the round?	1006
Added Feature: Storing User and Game Information	1007
Summary	1008

Chapter 32: Using Components 1009

What Are Components?	1010
Why Use Components?	1010
Compiled Clips: A Specific Component Format	1011
How to Add a Component	1013
Where to Find Components, Assets, and Parameters	1013
Components panel	1014
Component Inspector panel	1015
Library panel	1015
Actions panel and ActionScript	1015
Modifying Component Color Properties and Parameters	1016
Removing Components from Your Movie	1016
Components in Flash CS4	1016
Button component	1017
CheckBox component	1018
ComboBox component	1019
List component	1021
RadioButton component	1022
ScrollPane component	1024
TextArea component	1025
UIScrollBar component	1027
Understanding the Listener Event Model for Components	1028
What a typical listener looks like	1029
Letting the component know who its listeners are	1029
Using Components in Your Movie	1031
Modifying Components	1036
Global style formats	1037
Changing styles for a component class	1038
Changing styles for individual instances	1038
Using Embedded Fonts with Components	1039
Modifying AS3 Component Skins	1041
Using the UI Loader and ProgressBar Components	1043
Adding a UI Loader component to your Flash movie	1043
Applying the ProgressBar component	1044

Custom Components	1045
Live preview	1046
Exchanging and acquiring components	1046
Summary	1047

Chapter 33: Building an Image Gallery Component 1049

Creating a Plan	1050
Describing the feature set	1050
Determining the server-side scripting requirements	1051
Phase 1: Setting Up the Gallery Class	1055
Reviewing the starter files	1056
Constructing the Gallery component	1057
Phase 2: Loading Thumbnails into the ScrollPane	1060
Uploading scripts and images to your Web server	1060
Building data properties for the Gallery class	1061
Architecting the Thumbnail class	1064
Creating thumbnail holders in the Gallery class	1066
Phase 3: Displaying the Full-Size JPEG Image	1071
Loading the full-size image	1071
Updating the scroll bar and auto-loading the first image	1075
Phase 4: Enhancing the Thumbnail and Image States	1077
Tracking the selected thumbnail	1077
Framing the selected thumbnail with the BevelFilter class	1081
Creating a loading transition with the BitmapData and BlurFilter classes	1083
Transitioning thumbnail states with the Tween and ColorMatrixFilter classes	1090
Setting the image caption	1094
Completing the thumbnail button handlers	1096
Building a right-click download menu item for the full-size JPEG	1099
Phase 5: Finalizing the Component	1102
Copying existing component class files	1102
Adding the component definition	1102
Changing script paths for final deployment	1105
Summary	1105

Part IX: Appendixes 1107

Appendix A: Using the CD-ROM 1109

Appendix B: Guest Experts' Information 1113

Appendix C: Digital Audio Basics 1115

Appendix D: Digital Video Basics 1123
