The book you need to succeed!

Introduction	xxxi
--------------------	------

Part I: Getting Started With Ubuntu and Kubuntu	1
--	----------

Chapter 1: The Ubuntu Linux Project	3
--	----------

Background	4
Why Use Linux?	4
What Is a Linux Distribution?	5
Introducing Ubuntu Linux	6
The Ubuntu Manifesto	7
Ubuntu and Kubuntu Release Schedule	8
Ubuntu Update and Maintenance Commitments	9
Ubuntu and the Debian Project	10
Why Choose Ubuntu or Kubuntu?	11
What Versions of Ubuntu Are Available?	12
Installation Requirements	16
Supported System Types	17
Hardware Requirements	17
Time Requirements	18
Ubuntu CDs	18
Support for Ubuntu and Kubuntu	19
Community Support and Information	19
Documentation	22
Commercial Support for Ubuntu Linux	23
Getting More Information About Ubuntu	24
Summary	25

Chapter 2: Installing Ubuntu and Kubuntu	27
---	-----------

Ubuntu, Kubuntu, and Which Kubuntu	28
Getting a 64-Bit or Kubuntu Desktop CD	29
Bootting from a Desktop CD	30
Installing Ubuntu or Kubuntu from a Desktop CD	34
Bootting Ubuntu or Kubuntu	45
Bootting Ubuntu or Kubuntu on Dual-Boot Systems	46
The First Time You Boot Ubuntu or Kubuntu	47
Test-Driving Ubuntu or Kubuntu Linux	47
Exploring the Desktop CD's Examples Folder	48

Accessing Your Hard Drive from the Desktop CD	50
Copying Files to Other Machines Over a Network	56
Using Desktop CD Persistence	56
Wubi: Installing Ubuntu or Kubuntu on Windows	60
Summary	63

Chapter 3: Installing Ubuntu and Kubuntu on Special-Purpose Systems 65

Getting a Different Install CD	66
Bootting from a Server or Alternate Install CD	66
Install Options on the Server Install CD	67
Installing an Ubuntu Server	68
Manually Specifying Your Partition Layout	84
Bootting Your Server for the First Time	93
Install Options on the Alternate Install CD	94
Installing a Desktop System in Text Mode	96
Installing in OEM Mode	97
Installing a Command-Line System	98
Installing an LTSP Server	99
Summary	99

Part II: Ubuntu and Kubuntu for Desktop Users

101

Chapter 4: Basic Linux System Concepts 103

Working with Files and Directories	103
Standard Linux Directories	105
Other Common Directories on Linux Systems	105
Introduction to Linux Filesystems	106
Disks, Partitions, and Mount Points	106
Introducing Logical Volumes	107
Local Filesystems: Standard and Journaling	109
Network Filesystems	110
Working with Partitions and Filesystems	111
Mounting Filesystems	111
Automatically Mounting Filesystems at Boot Time	114
Automatically Mounting Removable Media Filesystems	117
Understanding Linux Permissions	117
Basic Concepts: Users and Groups	118
File and Directory Permissions Under Linux	119
Performing Privileged Operations in Ubuntu	120
Summary	121

Chapter 5: Using the GNOME Desktop 123

What's a Desktop? Graphical Environments for Linux	123
Using the Mouse	126
GNOME Desktop Overview	126

GNOME Application Windows	128
Menus in GNOME	129
Panel Menus	130
Context-Sensitive Menus	132
Customizing GNOME Menus	134
Customizing Your Desktop	138
Customizing Mouse Behavior	138
Configuring Screen Resolution	140
Customizing Panels	142
Configuring the Screensaver	147
Configuring Power Management	148
Changing Desktop Backgrounds	152
Switching Themes	153
Assistive Technologies for Using GNOME	155
GNOME Keyboard Shortcuts	156
Introducing the Nautilus File Manager	157
Basic Operations in Nautilus	158
Examples of Using Nautilus	159
Getting More Information About Nautilus	162
Using the Tracker Desktop Search Application	162
Searching with Tracker	163
Configuring Tracker	165
Using the GNOME Deskbar Applet	167
Using a Window Manager	170
Summary	174

Chapter 6: Using the Compiz Window Manager 175

What Is Compositing? Why All the Fuss?	176
Compiz History: Compiz, Emerald, Beryl, and Friends	176
Enabling Special Effects in Compiz	178
Using the Appearance Preferences Application	178
Detailed Compiz Configuration	180
Other Useful Packages for Compiz	192
Installing and Using the Avant Window Navigator	192
Using Emerald and the Emerald Theme Manager	197
Using Compiz with KDE	200
Summary	201

Chapter 7: Using the KDE 3 Desktop 203

A Short Course in KDE History	204
Using the Mouse	205
KDE 3 Desktop Overview	206
KDE 3 Application Windows	208
Menus in KDE 3	212
Panel Menus	212

Context-Sensitive Menus	215
Customizing KDE Menus	217
Customizing the KDE 3 Desktop.....	223
Customizing Mouse Behavior	224
Configuring Screen Resolution	227
Customizing Panels	229
Configuring a Screensaver	242
Configuring Power Management	244
Changing Desktop Backgrounds	247
Switching Themes.....	248
Undoing KDE Configuration Changes	252
KDE Keyboard Shortcuts	252
Introducing the Dolphin File Manager	253
Overview of Dolphin	253
Basic Operations in Dolphin.....	257
Getting More Information About Dolphin	258
Using the Konqueror Browser.....	259
Configuring Konqueror	261
Using Konqueror as a File Manager	262
Using the Strigi Desktop Search Application	264
Changing the Window Manager for KDE	268
Installing KDE on an Ubuntu System	271
Summary.....	271

Chapter 8: Using the KDE 4 Desktop 273

What's New in KDE 4.....	274
KDE 4 Desktop Overview	277
Using the Mouse	277
KDE 4 Window Decorations.....	278
Menus in KDE 4	280
Running Commands with KRunner	288
Using the KDE 4 Panel.....	289
Using Widgets	290
Adding Widgets.....	291
Default Widgets in KDE 4.....	293
Getting Other Widgets.....	296
KWin and Compositing	297
Using Compositing in KWin	297
Standard Compositing Effects and Shortcuts.....	299
Configuring Advanced Graphics Options.....	302
Enabling and Disabling Compositing Effects.....	303
Customizing Your Desktop.....	308
Configuring Screen Resolution	309
Switching and Creating Themes	311
Summary.....	312

Chapter 9: Managing E-mail and Personal Information with Evolution. . . . 313

Starting Evolution.....	314
Using the Evolution Setup Assistant.....	315
Sending and Receiving Mail.....	326
Sending Mail in Evolution.....	330
Setting Evolution Preferences for Sending and Viewing Mail.....	331
Undeleting Mail Messages.....	334
Creating and Using Mail Folders.....	334
Using Search Folders.....	336
Filtering Incoming Mail.....	338
Automatically Processing Incoming Mail.....	338
Automatically Checking for Junk Mail.....	341
Accessing Free and Web-Based E-mail.....	342
Reading Gmail from a Desktop Mail Client.....	343
Reading Mail from Other Web-Based Mail Providers.....	347
Managing Contacts.....	349
Configuring Evolution's Contact Support.....	349
Adding and Editing Contact Information.....	354
Defining Mailing Lists.....	357
Managing Your Calendar.....	359
Basic Calendar Configuration.....	359
Creating and Editing Personal Calendar Entries.....	361
Creating and Editing Meetings.....	364
Integrating Online Calendars.....	366
Publishing Your Free/Busy Information.....	367
Additional Sources of Information About Evolution.....	369
Summary.....	370

Chapter 10: Managing E-mail and Personal Information with Kontact 371

Starting Kontact.....	371
Configuring Kontact.....	372
Configuring E-mail in Kontact.....	373
Configuring Contacts.....	386
Configuring Your Calendar.....	390
Configuring the Summary View.....	395
Sending, Receiving, and Storing Mail.....	396
Checking and Reading Mail in Kontact.....	396
Setting Preferences for Reading Mail in Kontact.....	398
Sending Mail in Kontact.....	404
Setting Preferences for Sending Mail in Kontact.....	406
Organizing and Filtering Mail.....	408
Using Folders to Organize Your Mail.....	408
Using Filters to Process Incoming Mail.....	409
Configuring Spam and Virus Detection in Kontact.....	411
Creating and Managing Contacts.....	414
Using and Managing Your Calendar.....	416
Summary.....	419

Chapter 11: Surfing the Web with Firefox	421
A Quick History of Firefox	421
Starting Firefox	422
The Firefox User Interface	424
Standard Parts of a Firefox Window	424
Using the Mouse in Firefox	426
Special and Not-So-Special Firefox Features	427
Configuring Firefox	429
Setting Your Home Page	429
Controlling Pop-ups, JavaScript, and More	430
Configuring Your Privacy Settings	431
Working with Bookmarks	434
Creating Bookmarks in Firefox	435
Managing Your Bookmarks	437
Creating Live Bookmarks	439
Enhancing Firefox	442
Registering for Add-ons	442
Viewing Installed Firefox Add-ons and Themes	442
Adding Firefox Add-ons and Themes	444
Adding New Firefox Plug-ins	450
Summary	453
Chapter 12: Migrating from Windows Systems	455
Overview of Migration Scenarios	456
Backing Up Your Personal Data	457
Migrating E-mail to Linux	458
Migrating Mail via Thunderbird	459
Manually Migrating Mail	473
Migrating Web/Browser Settings to Linux	475
Migrating from Firefox to Firefox	476
Migrating from Internet Explorer/Safari to Firefox	479
Migrating Just Your Bookmarks	481
Working with Windows Application Data	489
Summary	491
Chapter 13: Sending and Receiving Instant Messages	493
Instant Messaging Overview	494
Getting an Instant Messaging Account	496
Instant Messaging on Ubuntu with Pidgin	498
Configuring Instant Messaging Accounts in Pidgin	498
Using Pidgin	501
Getting More Information about Pidgin	509
Instant Messaging on Kubuntu with Kopete	510
Configuring Instant Messaging Accounts in Kopete	510
Using Kopete	513
Getting More Information about Kopete	525

Using IRC	525
Using IRC in Pidgin	526
Using IRC in Kopete	528
Getting More Information about IRC	531
Other Instant Messaging Packages	531
Resolving IM Communication Problems	532
Summary	533

Chapter 14: Using Command-Line Tools 535

Why Use the Command Line?	536
Executing Commands from the Command Line	536
What's a Shell?	542
Getting to a Shell	544
Using the GNOME Terminal Application	545
Using the KDE Konsole	546
Using the X Window System Terminal Application	548
Popular Command-Line Commands	551
Moving Around in the Linux Filesystem	552
Copying, Moving, Renaming, and Deleting Files and Directories	552
Changing File and Directory Permissions	556
Finding Commands That Do Specific Things	559
Working with the Bash Shell	559
Using Command History	560
Using Command and Filename Completion	561
Using Wildcards	562
Pipes and Input and Output Redirection	563
Introducing Job Control	564
Exploring the Bash Configuration File	565
Using Environment Variables	566
Defining and Using Aliases	568
Summary	568

Chapter 15: Working with Text Files on Ubuntu. 569

Introduction to Linux Text Editors	570
Using vi	571
Starting and Exiting vi	573
Inserting Text in vi	574
Moving Around in vi	574
Deleting and Changing Text in vi	575
Cutting, Copying, and Pasting in vi	576
Searching for and Replacing Text in vi	577
Undoing Changes in vi	578
Using Multiple Windows in vi	579
Customizing vim	580
Graphical Versions of vi	582
More Information About vi and vim	583

Using emacs	583
A Few Words About emacs Commands.....	586
Emacs Terminology	587
Starting and Exiting emacs.....	588
Moving Around in emacs.....	591
Cutting, Copying, and Pasting in emacs.....	592
Searching for and Replacing Text in emacs.....	592
Working with Multiple Windows and Buffers in emacs.....	592
Customizing emacs.....	593
Getting More Information About emacs	595
Using gedit	595
Popular KDE Text Editors.....	597
Using KEdit	597
Using KWrite.....	599
Using Kate	600
Other Text Editors for Linux Systems.....	602
Summary.....	603

Chapter 16: Creating and Publishing Documents 605

Using Document Markup Languages	606
Installing TeX and LaTeX.....	606
Using TeX Markup.....	607
Introducing LaTeX Markup	608
Formatting and Previewing DVI Files.....	610
Using Graphical Tools to Work with TeX and LaTeX.....	611
More Information About TeX and LaTeX.....	615
Word Processing with OpenOffice.org Writer.....	615
Installing Files for Writer	617
Taking a Quick Tour of Writer.....	618
Personalizing Writer.....	620
Using Wizards to Create Documents.....	622
Modifying Document Styles and Layout.....	625
Creating and Using Templates	627
Importing Documents from Other Word Processors	630
More Information About Writer.....	633
Word Processing (and More) with KWord.....	633
Installing KWord	634
Quick Tour of KWord.....	634
Creating and Editing Documents in KWord.....	637
Working with Frames.....	638
Importing, Exporting, and Saving Documents	645
More Information About KWord	645
Desktop Publishing with Scribus	645
Installing Scribus.....	646
Taking a Quick Scribus Tutorial	647
More Information About Scribus	656

Other Word Processors and Office Suites.....	657
Summary.....	657

Chapter 17: Other Office Software: Spreadsheets and Presentations.659

Introduction to Spreadsheets: A Quick Tutorial	660
Creating and Using OpenOffice.org Spreadsheets	669
Installing Files for OpenOffice.org Calc.....	670
Starting Calc	671
Taking a Quick Tour of Calc	672
Invoking Functions in Calc	674
Specifying the Type of Data in a Cell.....	674
Importing Existing Spreadsheets into Calc.....	677
Creating and Using Gnumeric Spreadsheets.....	680
Starting Gnumeric	681
Taking a Quick Tour of Gnumeric.....	681
Invoking Functions in Gnumeric.....	682
Specifying the Type of Data in a Cell.....	684
Importing Existing Spreadsheets into Gnumeric	686
Creating and Using KSpread Spreadsheets	688
Starting KSpread.....	688
Taking a Quick Tour of KSpread.....	689
Invoking Functions in KSpread	690
Specifying the Type of Data in a Cell.....	691
Importing Existing Spreadsheets into KSpread.....	693
Creating and Using OpenOffice.org Presentations	695
Installing Files for Impress	695
Starting Impress	696
Taking a Quick Tour of Impress	699
Creating a Presentation.....	700
Importing Existing Presentations	702
Summary.....	704

Chapter 18: Working with Graphics.705

Overview of Digital Graphics Terminology	706
Using GIMP.....	709
Starting GIMP.....	710
A Quick Tour of GIMP.....	711
Sample GIMP Tasks.....	714
More Information About GIMP.....	721
Using Krita	721
Starting Krita	723
A Quick Tour of Krita	724
Test-Drive: Using Krita	725
More Information About Krita	729
Photo Editing Overview	730
Using OpenOffice.org Draw	733
Starting Draw	733

<i>A Quick Tour of Draw</i>	733
More Information About OpenOffice.org Draw	735
Vector Graphics Tools for Linux	735
Using Inkscape	736
Using Karbon14	739
Other Graphics Applications	742
Summary	743

Chapter 19: Working with Multimedia 745

<i>Overview of Digital Audio and Video Terminology</i>	745
Configuring Sound Devices, Levels, and System Sounds on Ubuntu Systems	750
Specifying and Testing Sound Devices	751
Setting System Sound Levels	753
Testing and Customizing System Sounds	755
Getting Detailed Information about Your Sound Hardware	757
Setting Blank CD and DVD Preferences	758
Configuring Sound Devices, Levels, and System Sounds on Kubuntu Systems	760
Specifying System Sound Devices	760
<i>Setting System Sound Levels</i>	765
Testing and Customizing System Sounds	766
Getting Detailed Information about Your Sound Hardware	768
Setting Blank CD and DVD Preferences	769
Exploring the Linux Multimedia Stack	772
Introducing Drivers, Servers, and Frameworks	773
Configuring the GStreamer Framework and Plug-Ins	775
Configuring PulseAudio on Ubuntu	776
Playing CDs and DVDs	779
<i>Playing Audio CDs Using Rhythmbox on Ubuntu</i>	780
Playing Audio CDs with Amarok on Kubuntu	780
Installing Software to Play Encrypted DVDs	782
Playing DVDs with Totem on Ubuntu	783
Playing DVDs on Kubuntu Systems	784
Ripping Audio CDs	787
Ripping Audio CDs Using Rhythmbox on Ubuntu	787
Ripping Audio CDs Using k3b	789
Backing Up DVDs from the Command Line	792
<i>Creating CDs and DVDs</i>	793
Burning CDs Using Brasero on Ubuntu	793
Burning Data CDs and DVDs Using Nautilus	799
Burning CDs and DVDs Using k3b	801
Working with Other Audio Sources	808
Playing Audio Files and Internet Radio Using Rhythmbox	809
Playing Audio Files and Internet Radio on Kubuntu	814
Converting Audio File Formats	820
Summary	824

Chapter 20: Would You Like to Play a Game?	825
Default Games on Ubuntu	825
Card Games	826
Board Games	827
Video Games	829
Games on Kubuntu Systems	830
Arcade Games	831
Board Games	835
Card Games	837
Games for Kids	838
Tactics & Strategy	839
Games on the Games Menu	841
Other Popular Games	842
Billions and Billions of Versions of Chess	842
Go	845
Monopoly Clones	847
Scrabble Clones	851
Unique Arcade Games for Linux	852
Summary	857
Chapter 21: Consumer Electronics and Ubuntu/Kubuntu.	859
Configuring Your System for Consumer Electronics Devices	860
Digital Device Recognition on Ubuntu Systems	860
Digital Device Recognition on Kubuntu Systems	865
Working with Your Digital Camera	873
Working with Digital Cameras on Ubuntu Systems	873
Working with Digital Cameras on Kubuntu Systems	879
Working with iPods and Other Digital Audio Players	884
Digital Audio Players and Rhythmbox on Ubuntu	885
Digital Audio Players and Amarok on Kubuntu	888
Working with an iPod Using gtkpod	896
Working with CompactFlash and SD Cards	901
Summary	901
 Part III: Ubuntu and Kubuntu for System Administrators	 903
Chapter 22: Understanding the System Startup and Shutdown Processes . .	905
Overview of the Ubuntu/Kubuntu Startup Process	905
The Boot Monitor or BIOS	906
The Boot Loader	906
Loading the Kernel	909
Loading and Using an Initial RAM Disk or RAM Filesystem	909
The Init Process	911
Examining the Boot Process with Bootchart	916

Optimizing the Boot Process	917
Minimizing the Amount of Software You Start	918
Optimizing Application Loading	919
The Ubuntu/Kubuntu Shutdown Process.....	921
Summary	923

Chapter 23: Adding, Removing, and Updating Software 925

Installing Software with the Add/Remove Menu Item	927
Using the Add/Remove Menu Item in Ubuntu.....	927
Using the Add/Remove Programs Menu Item in Kubuntu.....	929
Package Management Software Overview	931
Ubuntu Repositories and Components.....	932
Enabling Additional Repository Components.....	934
Other Repositories of Interest	936
Enabling Additional Repository Sources Using the Software Sources Tool.....	936
Problems Adding or Accessing Nonstandard Repositories.....	942
Exploring Your System Using dpkg and Friends.....	942
Listing the Packages That Are Installed on Your System.....	943
Listing the Packages That Are Available for Your System	944
Listing Information About a Package.....	947
Listing the Contents of a Package	947
Determining What Package Provides an Existing File	948
Determining What Package Provides a Missing File.....	949
Using apt-get to Add and Remove Software	950
Upgrading Your System Using apt-get.....	951
Smart System Upgrades Using apt-get	951
Retrieving Package Source Code Using apt-get	952
Satisfying Build Dependencies Using apt-get	953
Using aptitude to Add and Remove Software.....	954
Tips and Tricks for Using the aptitude User Interface	955
Using aptitude to Install Recommended Software	956
Advantages of Using aptitude to Install and Remove Software	958
Using Synaptic to Add and Remove Software	959
Configuring Synaptic Preferences.....	961
Searching for Software in Synaptic	962
Installing Packages in Synaptic.....	964
Removing Packages in Synaptic.....	968
Using the Ubuntu Update Manager.....	970
Using the Adept Tools	972
Using the Adept Manager on KDE 3-Based Systems.....	972
Using the Adept Updater on KDE 3-Based Systems.....	980
Using the Adept Manager on KDE 4-Based Systems.....	980
Using the Adept Updater on KDE 4-Based Systems.....	987
Converting Packages from Other Package Formats	988
Keeping Your System Lean, Mean, and Pristine.....	991
Summary	992

Chapter 24: Adding Hardware and Attaching Peripherals993

Adding a Printer	994
Adding a Printer on Ubuntu	995
Adding and Configuring Printers on Kubuntu	1002
Using a Scanner	1018
Using a Scanner on a Ubuntu System	1018
Using a Scanner on a KDE 3-Based System	1023
Adding Internal Disks and CD/DVD Drives	1027
Adding EIDE/ATA Drives	1027
Adding SATA Drives	1029
Adding SCSI Drives	1030
Troubleshooting Boot Problems after Adding New Drives	1030
Locating, Partitioning, and Formatting New Drives	1032
Using PCMCIA Cards	1043
Adding PCI Cards	1044
Examining and Troubleshooting Devices Graphically	1045
Summary	1047

Chapter 25: Network Configuration and Security1049

Networking 101	1050
Configuring Your Network Hardware	1053
Using Network Manager on Ubuntu	1054
Using the Network Manager on Kubuntu	1067
Configuration Files for Network Interfaces	1077
Network Testing with Network Tools	1080
Tips for Securing Your System	1082
Installing a Firewall	1083
Overview of Linux Firewalling and Packet Filtering	1084
Installing and Configuring a Firewall	1085
Summary	1090

Chapter 26: Going Wireless1091

Overview of Wireless Technologies	1091
Using Wicd	1094
Installing Wicd	1095
Using Wicd	1096
Configuring Wicd	1100
Command-Line Tools for Wireless Networking	1102
Installing and Using Windows Networking Drivers	1104
Installing NDIS Wrapper and Friends	1104
Installing Microsoft Windows Drivers	1105
NDIS Wrapper Tips and Tricks	1107
Summary	1108

Appendix: What's on the DVD and CD-ROM?	1109
System Requirements	1109
Using the DVD with Windows	1110
Using the DVD with Linux	1110
What's on the DVD	1110
What's on the CD	1111
Troubleshooting	1112
Customer Care	1112

Index	1113
--------------------	-------------

Part IV: Bonus Chapters (CD only) **1**

Chapter B1: Connecting to Other Systems	3
Establishing Secure Connections to Other Systems	3
Logging in to Remote Systems Using ssh	4
Enabling Incoming SSH Connections to Your System	5
Connecting to Other Systems Using VNC	7
Configuring a VNC Server	7
VNC Client and Server Software for Other Systems	12
Using Ubuntu's Remote Desktop Viewer	13
Using Kubuntu's Remote Desktop Connection	16
Connecting to Remote Windows Terminal Servers	20
Using rdesktop for Terminal Server Connections	20
Using Ubuntu's tsclient for Terminal Server Connections	22
Using Kubuntu's krdc for Terminal Server Connections	24
Using Other Remote Connection Software	27
Summary	27
Chapter B2: File Transfer and Sharing	29
Transferring Files to Other Systems	30
Using FTP	32
Accessing Shares on Windows Systems	45
Accessing NFS Directories from Linux Systems	53
Peer-to-Peer File Sharing on Ubuntu	55
Installing and Using gtk-gnutella	56
Using BitTorrent	58
Summary	63
Chapter B3: Software Development on Ubuntu and Kubuntu	65
Installing and Using Development Software	66
Installing GCC Compilers, make, and Friends	66
GCC Compiler Overview	66
Using GCC's C Compiler	67
Creating Simple Makefiles	68

Building Open Source Software.....	70
Building a Standalone Package	71
Building Add-On Software	78
Building Supported Software in Different Ways	79
Using an Integrated Development Environment.....	80
Popular IDEs for Linux	81
Installing Eclipse	82
Using Eclipse for C Application Development	83
Getting More Information about Eclipse.....	99
Source Code Control Software	99
The Concurrent Versioning System (CVS)	100
Installing and Using Subversion	100
Summary.....	108

Chapter B4: Managing Users, Groups, Authentication, and Advanced Permissions 109

Creating and Managing Users and Groups.....	110
Managing Users and Groups on Ubuntu Systems.....	110
Managing Users and Groups on KDE 3 Systems.....	116
Managing Users and Groups on KDE 4 Systems.....	121
PAMs and the Linux Authentication Process.....	125
PAM Configuration Files for Applications and Services.....	126
Example: PAMs Used by the Login Process	127
Configuration Files for Various PAMs.....	130
What If PAM Configuration Files Are Missing?	131
Customizing the sudo Command.....	132
Using ACLs for Sophisticated File Sharing.....	135
Overview of Linux ACLs	136
Installing ACL Commands	136
Activating Filesystem Support for ACLs	137
Working with ACLs from the Command Line.....	137
Working with ACLs Using Graphical Tools	140
Configuring Kerberos Authentication.....	142
Installing Kerberos Client and Server Commands.....	142
Configuring NTP on Servers and Clients.....	143
Setting Up a Kerberos Server	145
Setting Up a Kerberos Client.....	147
Summary.....	149

Chapter B5: Managing System Policies and Security 151

Overview and Comparison of AppArmor and SELinux.....	152
Identifying Resources	153
Rule Readability and Ease of Creation	154
Comparison Summary.....	154
Configuring and Using AppArmor	154
Installing and Configuring AppArmor	155

AppArmor Profiles and Profile Syntax	157
Additional Information about AppArmor	167
Configuring and Using SELinux.....	167
Installing SELinux	168
SELinux Tools.....	169
Additional Information about SELinux.....	170
Summary.....	170

Chapter B6: Backing Up and Restoring Files. 171

Backups 101	172
Why Do Backups?.....	172
Different Types of Backups.....	174
Verifying and Testing Backups	176
Deciding What to Back Up	177
Backup Software for Linux.....	177
Local Backup and Restore Software for Linux	179
Network-Oriented Backup Software for Linux	180
Backing Up Files to Local, Removable Media	182
Archiving and Restoring Files Using tar	182
Making an Up-to-Date Copy of a Local Directory Using cp.....	184
Making an Up-to-Date Copy of a Remote Directory Using rsync.....	185
Installing and Using BackupPC.....	187
Installing and Configuring BackupPC.....	188
Identifying Hosts to Back Up	190
Defining a Backup Using rsync.....	191
Defining a Backup Using SMB	193
Starting Backups in BackupPC	194
Restoring from Backups in BackupPC	195
Linux Time Machines.....	198
Summary.....	201

Chapter B7: Using Virtual Machines and Emulators 203

Overview of Virtualization and Emulation.....	204
Why Virtualize?	204
Types of Virtual Machines	205
What Kinds of Virtualization Can I Use?	207
Selecting a Virtualization Technology.....	208
Popular Emulation Software for Linux.....	208
Managing Virtual and Emulated Machines	209
Getting More Information About Virtualization	210
Installing and Using VirtualBox	211
VirtualBox Overview	211
Installing VirtualBox	212
Creating a Virtual Machine in VirtualBox	213
Installing an Operating System in a Virtual Machine	220
Installing VirtualBox Guest Additions.....	224

Starting and Stopping Virtual Machines	224
Networking and VirtualBox	227
Fixing Virtual Machine Boot/Installation Problems	233
Installing and Using VMware Server	234
Downloading and Installing VMware Server	235
Starting VMware Server	242
Creating a Virtual Machine	244
Starting a VMware Virtual Machine	249
Installing and Using KVM	252
Installing KVM and Related Packages	253
Creating a Disk for a KVM Virtual Machine	254
Installing an Operating System in a Virtual Machine	255
Starting a KVM Virtual Machine	257
Networking for KVM	257
Installing and Using Xen	261
Overview of Xen	261
Installing Xen	263
Creating Xen DomainU Configuration Files	263
Building and Booting a Paravirtualized DomainU	267
Creating a Hardware Virtual Machine DomainU	271
Getting More Information About Xen	272
Installing and Using QEMU	273
Summary	275

Chapter B8: Setting Up a Web Server 277

World Wide Web 101	277
Introduction to Web Servers and Apache	279
Installing Apache	280
Apache 2 File Locations	280
Configuring Apache	282
Troubleshooting	285
More Information	286
Summary	286

Chapter B9: Setting Up a Mail Server. 287

Introduction to Mail Servers	288
Popular Linux Mail Transfer Agents	288
Why Run Your Own Mail Server?	290
Installing Postfix and Friends	291
Packages to Install	291
Built-in Postfix Configuration Models	292
Configuring Postfix	294
Postfix Configuration Files	295
Identifying Trusted Hosts and Domains	297
Rewriting Addresses in Outgoing Mail	297
Accepting Mail for an Entire Domain	298

Activating Qpopper for POP/POP3 Support	298
Adding Spam Filtering and Virus Scanning to Postfix.....	300
Greylisting via postgrey	300
Adding Postfix Parameters to Reject Bogus Mail.....	301
Integrating MailScanner, SpamAssassin, and ClamAV with Postfix	303
More Information	305
Summary	306

Chapter B10: Setting Up a DHCP Server 307

Overview of DHCP.....	308
Installing a DHCP Server.....	309
Managing a DHCP Server from the Command Line.....	311
Creating DHCP Configuration Files Using a Text Editor	311
Specifying Additional DHCP Server Configuration File Entries	313
Managing a DHCP Server Graphically.....	314
Troubleshooting DHCP	319
Summary	320

Chapter B11: Setting Up a DNS Server. 321

Overview of DNS and BIND	322
Installing a DNS Server	325
Overview of BIND Configuration Files.....	325
Creating DNS Zone and Reverse Lookup Files	327
Using Common Entries for Zone and Reverse Lookup Files: SOA and \$TTL	327
Creating Zone Files.....	329
Creating Reverse Lookup Files	331
Incorporating Zone and Reverse Lookup Files with BIND	332
Restarting and Testing Your Name Server	333
Troubleshooting DNS	335
Getting More Information About DNS and BIND.....	337
Summary	337

Chapter B12: Setting Up a Print Server 339

Linux and UNIX Printing History.....	339
Enabling Remote Hosts to Access Your CUPS Print Server.....	340
Enabling Remote Printing on Ubuntu and KDE 4-Based Systems	341
Enabling Remote Printing on KDE 3-Based Systems	344
Integrating Windows Printing with an Ubuntu Print Server.....	346
Integrating Mac OS X Printing with an Ubuntu Print Server	347
Troubleshooting Remote Printing.....	350
Checking the CUPS Log Files.....	351
Accessing Controls for Portions of the CUPS Web Interface.....	351
Handling Preformatted Print Jobs.....	352
Getting More Information About CUPS.....	352
Summary	353

Chapter B13: Setting Up an NFS Server 355

Overview of the Network File System.....	356
How NFS Works.....	357
Comparing Different Versions of NFS.....	359
Installing an NFS Server.....	360
Configuring an NFS Server	360
Configuring Common NFS Options.....	361
Configuring NFS Kernel Server Options	362
Setting Up the Pseudo-Filesystem and Exported Directories.....	363
Defining Exported Directories in /etc/exports	363
Mounting NFS Directories on Clients.....	365
Debugging NFS Problems.....	367
Verifying RPC Services	367
Verifying Filesystem Export	368
Debugging NFS Operations.....	369
Getting More Information About NFS	370
Summary.....	370

Chapter B14: Setting Up a Samba Server 371

Overview of Microsoft Windows File Sharing.....	371
Introducing Samba	373
Installing the Samba Server and Friends.....	373
Samba Server Configuration Essentials	374
Identifying Your Workgroup or Domain.....	374
Configuring Samba Authentication	376
Sharing Printers and Home Directories Using Samba.....	376
Verifying the Samba Configuration File.....	378
Testing Samba Availability and Services	379
Sharing Other Directories via Samba	379
Getting More Information About Samba	380
Summary.....	380
