

Ubuntu Kung Fu

Tips, Tricks, Hints,
and Hacks

Keir Thomas

Edited by Jacquelyn Carter

Contents

1	Introduction	1
1.1	How to Read This Book	2
1.2	Acknowledgments	3
1.3	Sharing	4
2	An Ubuntu Administration Crash Course	5
2.1	The Ubuntu Desktop	6
2.2	Users, Passwords, and Files	8
2.3	Command Line or GUI?	11
2.4	Software Installation and Management	22
2.5	Using gconf-editor	36
2.6	Editing Configuration Files	37
2.7	Making and Keeping Backups	39
2.8	Rescue Me! What to Do If It All Goes Wrong	41
2.9	Miscellaneous Things You Ought to Know	43
3	The Tips	49
1.	Set Any Picture as Wallpaper with a Single Click	50
2.	See (and Reuse) the Most Recently Typed Commands	51
3.	Add Cool New Visualizations to Totem/RhythmBox	52
4.	Switch Monitor Resolutions with a Single Mouse Click	52
5.	Closely Monitor the Power Consumption of a Laptop	53
6.	Stop the Cursor from Blinking	53
7.	Scroll Without the Mouse in Firefox and Evolution Mail Windows	54
8.	Optimize Startup for Faster Boot Times	54
9.	Graph the System Bootup Performance	58
10.	Change Gedit's Printing Font	59
11.	Shrink or Enlarge Images at the Command Line	60
12.	View All a Digital Photo's Technical Information	61
13.	Have Ubuntu Speak to You	61
14.	Instantly Search for Files in Nautilus	62

15. Take Photos or Record Videos with Your Webcam	62
16. Add RAR File Compression Support to Ubuntu	63
17. Add a Swap File or Expand Existing Swap Space	63
18. Get Rid of the Virtual Console Legal Boilerplate	65
19. Make Wubi Installations of Ubuntu Run Faster	65
20. Make Website or Email Links Automatically Install Software	66
21. Make Fonts Look Superb	67
22. Download Updates Faster	68
23. Slow Down a Touchpad's Scrolling	69
24. Ensure Your Windows Partition Is Always Available Under Ubuntu	70
25. Improve the GNOME Terminal Look and Feel	71
26. Ensure Ubuntu Always Knows the Time	72
27. Get More Data onto CD-R Discs	72
28. Share Files Across the Network (Without Tearing Your Hair Out)	73
29. Save Ink When Printing	75
30. Browse the Web from the Command Line	76
31. Create an "Ubuntu Install" USB Stick	77
32. Add a Menu Entry for Ubuntu's Compression Tool . . .	78
33. Quickly Run Applications Without Opening a Termi- nal Window	79
34. Instantly Search Google for Any Word or Phrase	79
35. Ensure You're Informed About the Newest Releases of Ubuntu	81
36. Create a File Delete Command That Uses the Trash . .	81
37. Configure Ubuntu's Firewall	82
38. Repair Windows from Within Ubuntu	87
39. Empty the Trash Even If Told You Can't	87
40. Log On Automatically After Bootup	88
41. Use an Alternative Wifi Connection Manager	88
42. Make Evolution More Like Outlook (Just a Little Bit) .	90
43. Give Ubuntu a Static IP Address	91
44. Format a USB Memory Stick (or Camera Memory Card)	93
45. Protect Ubuntu So It Can't Be Booted Without a Pass- word	95
46. Dump the Text on a Virtual Console to a File	98
47. Eliminate the Time Period During Which sudo/gksu Powers Hang Around	99
48. Access Ubuntu Files from Windows	100

49. Kill a Crashed GUI	101
50. Make Ubuntu Safe for Children to Use	102
51. Run Two (or More) Desktops at the Same Time	105
52. Go Completely Full-Screen in Virtually Any Application	106
53. Make Calculator Round Up (or Down) to Two Digits	107
54. Follow the Moon's Phases	107
55. Import Internet Explorer Settings into Firefox	108
56. Drag and Drop Files onto the Terminal Window	108
57. Use Older Digital Cameras with Ubuntu	108
58. Use the Ultra-quick xterm to Bash Out Commands	110
59. Install All the Program Compilation Tools You'll Need	110
60. Avoid Network Slowdowns and Incompatibilities	111
61. Print at the Command Line	112
62. Find the Ubuntu Version and Code Name	112
63. Get Your Webcam Working in Ubuntu	113
64. Downgrade to Firefox 2	113
65. Install All the Multimedia Playback Codecs You'll Ever Need	114
66. Get Better DVD Movie Playback	115
67. Run the Terminal with a Single Keypress	116
68. See the APT Cow	116
69. See What Firefox Plug-ins Are Installed	117
70. Kill the Network Connection Instantly	117
71. Post Blog Entries from your Ubuntu Desktop	117
72. Intelligently Select Only the Files You Want	118
73. Temporarily Disable a User Account	119
74. Take Complete Control of Desktop Effects and Anima- tions	120
75. Do Some Desktop Publishing	122
76. Control Volume Levels at the Command Prompt	122
77. Search the Ubuntu File System	123
78. Remove the "Bad Password" Wait Period	126
79. Make Desktop Icons Really Big	127
80. Run Ubuntu...Without the Linux Components!	127
81. Instantly Hide a File or Folder	128
82. Scan for Viruses	128
83. Temporarily Log In as the Root User at the Command Line	131
84. Start the Screensaver from the Command Line	132
85. Get the Most Out of (or into) a Nautilus Window	132
86. View Images at the Command Line	132

87. Administer the Printer from a Web Browser	133
88. Move a Window Without Clicking the Title Bar	133
89. Connect to Shared Folders from the Command Line . .	134
90. Deactivate Caps Lock	135
91. Format Floppies	136
92. Switch to a Lightweight File Manager	136
93. Use Syntax Highlighting in Gedit	138
94. Stop ZIP Files That Are Emailed to Colleagues from Getting Lost	139
95. Use an Alternative Email Client	139
96. Ensure People Hear You When Using a Microphone . .	141
97. Quickly Browse to a Location	141
98. Turn Off the Beep	142
99. Add a Second Hard Disk	142
100. Update Ubuntu in the Background	144
101. Install 465 Open Source Fonts	144
102. Be Careful Not to Badly Name Files/Folders in Your Windows Partition	145
103. Make Your Windows Partition Read-Only	145
104. Stop Nautilus from Neatly Arranging Icons	146
105. Run GUI Programs from a Terminal Window Without Typing Up Input	146
106. Set the CPU Speed from the Desktop	147
107. Switch to Kubuntu, Xubuntu, or Edubuntu Without Installing from Scratch	148
108. SSH into Ubuntu from Windows	148
109. Recover a Damaged Desktop	149
110. Recover a Damaged Desktop #2	149
111. Enable the Root User	149
112. Quickly Create Graphical Text Banners	150
113. Securely Erase Data	151
114. Play Emacs Games	153
115. Fix Video Playback Problems	153
116. Turn Any Text File into a PDF at the Command Line .	153
117. Avoid Repetitive Strain Injury When Using Ubuntu . .	154
118. Uninstall Ubuntu	154
119. Network Ubuntu, Mac, and Windows...Without Doing Anything	157
120. Access ISO Images As If They Were Disk Drives	157
121. Improve Ubuntu's Microsoft Office 2007 File Support .	158
122. Use a Friendly Version of vim	159

123. Get Around Partitioning Errors If Using Boot Camp on Macs	159
124. Have Macs Correctly Refer to Ubuntu in Dual-Boot Mode	160
125. Sleep, Ubuntu, Sleep!	160
126. Instantly Create an HTML Slideshow of Photos	161
127. Reveal the Desktop	161
128. Set Hard Disk Power-Saving	162
129. View the GNOME Desktop Version	163
130. Avoid GNOME Startup Errors	163
131. Use FTP Under Ubuntu	164
132. Switch to Old-Fashioned Tree View in Nautilus	165
133. Kill Any Crashed Program	166
134. Increase the Number of Documents Remembered by Gedit	167
135. Utilize All of a Sound Card's Features	167
136. Monitor Network Speed	168
137. Make the Command Prompt Colorful	169
138. Make Windows Permanently Available	170
139. Give the Boot Menu Wallpaper	171
140. Access All Removable Storage from the Command Line	173
141. Reconfigure Your Graphics Card from the Ground Up .	174
142. Unlock the Package Database	175
143. Administer Ubuntu Using a Web Browser from Any Computer (or Operating System)	175
144. Give Nautilus Windows Their Own Wallpaper	178
145. Create an Encrypted File Store Accessible from Any Operating System	178
146. Find Out How Much Disk Space Is Available	182
147. Make Ubuntu Blue (or Dark Gray or Dark Brown) . . .	183
148. Use Versions of Ubuntu That Are Entirely Free Software	184
149. Install OpenOffice.org's Database Component	185
150. Monitor Your Computer's Temperature and Fan Speeds	185
151. Print Multiple Photos on One Sheet of Paper	186
152. Try Some Alternative Web Browsers	186
153. Quickly Hide/Unhide Windows Using the Keyboard . .	187
154. Convert Images from One Format to Another at the Command Line	188
155. Significantly Expand Gedit's Functionality	188
156. Make New Mail Windows Taller	189
157. Avoid Making Badly Burned CD-R/RW Discs	189

158. Import Email Messages from Outlook and/or Outlook Express	190
159. Use the Mac OS “Quit” Keyboard Shortcut	191
160. Switch to bash If sh Is in Use	191
161. Instantly Edit a File When You’re Viewing It in less . . .	192
162. Access Ubuntu’s Desktop from Any Computing Device . . .	192
163. Remove the Annoying Delay When Installing Firefox Extensions	193
164. View Technical Details of Your PC’s Hardware	193
165. Switch to Old-Fashioned “Spatial Browsing” Mode	194
166. Clear the Package Cache	195
167. Search man Pages	195
168. Convert a PDF to an Image	196
169. Use a Dial-Up Modem	196
170. Steal the Windows (or Mac OS) Fonts	197
171. Use Unusual Characters or Symbols	199
172. Encrypt and Sign Emails	200
173. Get a Nice Trash Can on the Desktop	204
174. Create .zip Files Using Maximum Compression	205
175. Create an Ubuntu “Updates” CD/DVD	205
176. Stop Ubuntu “Graying Out” Stalled Program Windows Quickly	207
177. Get a High-Quality (and Free) Command-Line Word Processor with Microsoft Word	207
178. Create a “Superuser Terminal” Shortcut	209
179. Find Out Who You Are!	210
180. Install Ubuntu Partner Software	210
181. Use a GUI Version of vim	211
182. Rescue a Crashed GUI	211
183. See a Quote of the Day Whenever You Log In	212
184. Make GNOME System Monitor Appear When Ctrl+Alt+Delete Is Hit	214
185. Change Your Computer’s Name (Hostname)	215
186. Reduce the Wubi Boot Delay	216
187. Swap Around the Minimize, Maximize, and Close Buttons	217
188. Add an Uber-Start Button to Ubuntu	217
189. View Technical Details of PDF Files	218
190. Connect to a Remote Computer As If You Were Sitting in Front of It	218
191. Change Ubuntu’s System Sounds	221

192. Move Around the Command Line Like a Pro	222
193. "Scroll" a Virtual Console	222
194. Do Math at the Command Line	223
195. Create Keyboard Shortcuts That Use the Windows Key	224
196. Create a Text File Without a Text Editor	225
197. Turn Off the OpenOffice.org Splash Screen	226
198. See Which Virtual Console You're Working At	226
199. Periodically Change the Desktop Wallpaper	227
200. Get Warned When sudo Powers Hang Around	228
201. Add a "Similar Words" Sidebar to the Dictionary	228
202. Add Drop Shadows to Screenshots	229
203. Create a Backup ISO Image of Almost Any Physical CD/DVD	229
204. Change Firefox's Spell-Checker Language	230
205. Take Full Control of PulseAudio Sound Output	230
206. Use the Command Prompt to Sleep, Hibernate, Shut Down, or Reboot	231
207. Mirror Commands and Output Across Different Ter- minal Windows	232
208. Instantly View a Load of Images as a Slideshow	233
209. Use a Windows-Style Start Button and Taskbar	234
210. Change Your Password	236
211. Convert Hex to Decimal (and Vice Versa)	236
212. Quickly Save Pictures on Websites	238
213. Quickly Send Web Links by Email	238
214. Sharpen Images at the Command Line	239
215. View PDFs at the Command Line	240
216. Run Windows Programs Under Ubuntu	240
217. Uninstall Ubuntu If Wubi Has Been Used	242
218. See a Visual Representation of File and Folder Locations	243
219. Create Text Banners	244
220. Use a Macintosh OS X-like Dock	246
221. Process Words at the Command Line	247
222. View a Calendar at the Command Prompt	248
223. Repair Ubuntu File System Errors	249
224. Clone Your Ubuntu Installation onto a New Hard Disk	250
225. Create a Boot Log to Help Solve Startup Problems	254
226. Install a Personal FTP Server for File Sharing	255
227. Shut Down, Reboot, Hibernate, or Sleep Ubuntu with a Single Click	259
228. Delete Files Rather Than Trash Them	260

229. Yank a USB Stick Even If You're Told You Shouldn't . . .	261
230. Rename Many Files at Once (aka Bulk Rename)	261
231. Get an Alternative Media Player	263
232. Compare Two Files to See Whether They're Different . .	267
233. Use the Mouse at the Virtual Console (complete with Copy and Paste)	267
234. See a Progress Display as the Desktop Loads	268
235. Get Free-of-Charge Ubuntu CDs	269
236. Make the GNOME Terminal Window Translucent	269
237. Automate the Downloading and Installation of New Theme Components	270
238. Burn Ubuntu CD Images (ISOs) Using Windows—for Free	271
239. Quickly Create Links to Files, Folders, and/or Appli- cations	272
240. Monitor CPU Usage	273
241. See Whenever Caps Lock Is Active	274
242. Make Files and Folders Entirely Private	274
243. Get Quick Access to Stuff You're Working On	275
244. Insert Command-Line Output and Files into the Clip- board	276
245. Have a Cow Talk to You	277
246. Get Notified When New Mail Arrives	277
247. Increase Output "Remembered" by GNOME Terminal .	278
248. Use Ubuntu's Version of Microsoft Paint	279
249. Have OpenOffice.org Save in Microsoft Office Format by Default	279
250. Password-Protect and Encrypt Files	280
251. Add Notes to Any File/Folder	284
252. Encrypt Files So That Only the Recipient Can Open Them	285
253. See Your File-Browsing History	286
254. Define Your Own Menu Shortcut Keys	286
255. Always Know Your IP Address	287
256. See the Size of Files/Folders on the Desktop	288
257. View Technical Details of Any Multimedia File	288
258. Convert PDFs and Images to Flash Slideshows	289
259. Create an Alias to Save Typing Long Commands	290
260. Send Genuine Smileys in Your Emails	291
261. Add an "Open in terminal" Option to Nautilus's Right- Click Menu	292

262. Make Windows Bootable If Things Go Wrong During Ubuntu Installation	292
263. Edit the Name and Artist Information of MP3 Files . . .	293
264. Never Touch the Mouse While Using Ubuntu (Well, Almost)	294
265. Alter Image Viewer's Zoom Speed	295
266. Install Skype	295
267. Arrange Output into Columns	296
268. View Images Without a Graphical Environment	297
269. Synchronize Files Between a Laptop and Desktop PC .	297
270. Rename Files Quickly	301
271. Have sudo Insult You	301
272. Make Nautilus Display "Traditional" File Permissions .	302
273. See the GNOME Fish	303
274. Use Desktop Widgets	304
275. Read E-books	306
276. Make (Almost) Any Wifi Card Work with Ubuntu	306
277. Connect to the Remote Desktop of a Windows Vista Computer	311
278. Use Ubuntu on Your Games Console	312
279. Use a "Legal" MP3 Codec	313
280. Use Look-a-Likes of the Microsoft Fonts	313
281. Play Old MS-DOS Games	314
282. Install Google Applications	315
283. Install MS Comic Sans-Style Fonts	319
284. Use Alternative Office Applications	319
285. Have the Firefox Robot Talk to You	322
286. Back Up Your Data	322
287. Use the Ubuntu Install CD as a General-Purpose Partitioning Tool	327
288. Give Old Macintosh Computers a New Lease on Life . .	327
289. Use Absolutely Any Picture as an Icon	328
290. Install the GNOME Wallpapers	328
291. Zoom In for More Info in Nautilus	329
292. Play MP3/Ogg Files at the Command Line	329
293. Optimize Ubuntu's Performance	330
294. Tweak Ubuntu into Oblivion	331
295. Do Just About Anything to a File by Right-Clicking It .	333
296. Get Notified of New Gmail Messages	336
297. OCR Scanned Text	337
298. Use Ubuntu's Movie Player to Watch YouTube Movies .	339

299. Turn Your Desktop into Your /home Folder	339
300. Avoid Programs Quitting When the Terminal Is Closed	340
301. Allow Terminal Server Client to Access VNC Desktops	340
302. Search All of Ubuntu's "Supported" Software	341
303. Install Windows on a Computer That Has Ubuntu on It	341
304. Turn Your Computer into a Egg Timer	345
305. Create a Portable USB Stick Installation of Ubuntu	345
306. Enhance the Copy and Paste Clipboard	349
307. Be Told When Your Tea Has Brewed	351
308. Avoid Bad Formatting When Viewing OpenOffice.org Files on Windows	351
309. Fix USB Key Sticks That Wrongly Report They're Full	352
310. Use Ubuntu's Built-in Download Manager	353
311. Avoid an F-Spot Startup Error	354
312. Record Your Desktop	355
313. Take Screenshots in Any Format	356
314. Trace Network Routes	356
315. Automatically Scroll PDF Files	357
