

**MEDICAL AND
VETERINARY
ENTOMOLOGY**

SECOND EDITION

EDITED BY

GARY R. MULLEN

LANCE A. DURDEN

Contents

Contributing Authors xi

Preface xiii

Acknowledgments xv

Chapter

1 Introduction 1

Lance A. Durden, and Gary R. Mullen

General Entomology 1

Medical-Veterinary Entomology Literature 1

A Brief History of Medical-Veterinary Entomology 2

Identification and Systematics of Arthropods of Medical-Veterinary Importance 3

Types of Problems Caused by Arthropods 3

Annoyance 3

Toxins and Venoms 3

Allergic Reactions 4

Invasion of Host Tissues 4

Arthropod-Borne Diseases 4

Food Contaminants 5

Fear of Arthropods 5

Delusional Disorders 5

Formicophilia 6

Host Defenses 6

Minor Arthropod Problems of Medical-Veterinary Interest 6

Chapter

2 Morphological Adaptations of Parasitic Arthropods 13

Nathan D. Burkett-Cadena

Body Shape and Wings 13

Mouthparts 13

Legs 15

Sensory Structures 17

Chapter

3 Epidemiology of Vector-Borne Diseases 19

William K. Reisen

Components of Transmission Cycles 20

Host Immunity 20

The Vertebrate Host 21

The Arthropod Vector 22

Modes of Transmission 23

Vertical Transmission 23

Horizontal Transmission 24

Transmission Cycles 25

Interseasonal Maintenance 26

Continued Transmission by Vectors 27

Infected Vectors 27

Infected Vertebrate Hosts 27

Vector Incrimination 27

Infection Rates 27

Vector Competence 28

Vectorial Capacity 28

Surveillance 29

Environmental Conditions 30

Vector Abundance 30

Enzootic Transmission Rates 30

Clinical Cases 32

Emerging Vector-Borne Diseases 32

Chapter

4 Forensic Entomology 35

William L. Krinsky

History 35

Legal Cases Involving Liability 36

Structural Entomology 36

Stored-Products Entomology 36

Occupational Hazards Associated with Arthropods 36

Veterinary and Wildlife Entomology 36

Legal Cases Involving Homicides, Suspicious and

Accidental Deaths, and Abuse and Neglect 36

Sudden Death with Arthropod Association 37

Automobile-Accident Death 37

Arthropods as Signs of Neglect or Abuse, or as Agents of Murder 37

Illicit Drug Transport, Use, and Overdose 37

Suspicious Deaths 38

Stages of Decomposition 38

Insect Succession and Postmortem Interval 39

Chapter

5 Cockroaches (Blattaria) 43

Richard D. Kramer, and Richard J. Brenner

Taxonomy 43

Morphology 43

Life History 44

Behavior and Ecology 45

Common Cockroach Species 46

Oriental Cockroach (*Blatta orientalis*) 46

Turkestan Cockroach (*Blatta lateralis*) 46

American Cockroach (*Periplaneta americana*) 47

Australian Cockroach (*Periplaneta australasiae*) 47

Brown Cockroach (*Periplaneta brunnea*) 48

Smokybrown Cockroach (*Periplaneta fuliginosa*) 48

Florida Woods Cockroach (*Eurycotis floridana*) 48

Brownbanded Cockroach (*Supella longipalpa*) 49

German Cockroach (*Blattella germanica*) 49

Asian Cockroach (<i>Blattella asahinai</i>)	50
Surinam Cockroach (<i>Pycnoscelus surinamensis</i>)	50
Public Health Importance	50
Pathogenic Agents	51
Intermediate Hosts	53
Cockroach Allergies	53
Veterinary Importance	54
Prevention and Control	55
Sanitation	55
Harborage Elimination	55
Physical Control	55
Biological Control	55
Insect Growth Regulators (IGRs)	56

Chapter

6 Lice (Phthiraptera) 59

Lance A. Durden, and John E. Lloyd	
Taxonomy	59
Morphology	60
Life History	63
Behavior and Ecology	64
Lice of Medical Importance	66
Human Body Louse (<i>Pediculus humanus humanus</i>)	66
Human Head Louse (<i>Pediculus humanus capitis</i>)	67
Human Crab Louse (<i>Phthirus pubis</i>)	67
Lice of Veterinary Importance	68
Lice of Cattle	68
Lice of Other Livestock Animals	70
Lice of Cats and Dogs	71
Lice of Laboratory Animals	71
Lice of Poultry and Other Birds	71
Public Health Importance	72
Epidemic Typhus	72
Louse-Borne Relapsing Fever	73
Trench Fever	74
Other Pathogens Transmitted by Human Body Lice	74
Human Lice as Intermediate Hosts of Tapeworms	75
Veterinary Importance	75
Lice of Livestock	76
Lice of Wildlife	78
Lice of Cats and Dogs	78
Lice of Laboratory Animals	79
Lice of Poultry and Other Birds	79
Prevention and Control	79

Chapter

7 True Bugs (Hemiptera) 83

William L. Krinsky	
Kissing Bugs (Reduviidae)	84
Taxonomy	85
Morphology	85
Life History	86
Behavior and Ecology	86
Public Health Importance	88
Chagas Disease (American Trypanosomiasis)	88
Other Human Parasites Associated with Kissing Bugs	92
Veterinary Importance	92
Prevention and Control	92
Bed Bugs (Cimicidae)	93
Taxonomy	93
Morphology	94
Life History	95

Behavior and Ecology	95
Public Health Importance	96
Other Cimicids that Occasionally Attack Humans	97
Veterinary Importance	97
Prevention and Control	97

Chapter

8 Beetles (Coleoptera) 101

William L. Krinsky	
Taxonomy	101
Morphology	101
Life History	102
Behavior and Ecology	102
Public Health Importance	103
Meloidae (Blister beetles)	104
Oedemeridae (False blister beetles)	105
Staphylinidae (Rove beetles)	106
Tenebrionidae (Darkling beetles)	107
Dermestidae (Larder beetles)	107
Scarabacidae (Scarab beetles)	108
Coccinellidae (Lady beetles)	109
Veterinary Importance	109
Ingestion of Toxic Beetles	109
Transmission of Pathogens	109
Intermediate Hosts of Parasites	110
Nest Associates and Ectoparasites	111
Dung Beetles and Biocontrol	111
Prevention and Control	112

Chapter

9 Fleas (Siphonaptera) 115

Lance A. Durden, and Nancy C. Hinkle	
Taxonomy	115
Morphology	116
Life History	118
Behavior and Ecology	119
Fleas of Medical-Veterinary Importance	120
Human Flea (<i>Pulex irritans</i>)	120
Cat Flea (<i>Ctenocephalides felis</i>)	121
Dog Flea (<i>Ctenocephalides canis</i>)	121
Oriental Rat Flea (<i>Xenopsylla cheopis</i>)	121
European Rabbit Flea (<i>Spilopsyllus cuniculi</i>)	121
Sticktight Flea (<i>Echidnophaga gallinacea</i>)	122
Chigoe (<i>Tunga penetrans</i>)	122
Northern Rat Flea (<i>Nosopsyllus fasciatus</i>)	122
European Chicken Flea (Hen Flea in Europe) (<i>Ceratophyllus gallinae</i>)	123
European Mouse Flea (<i>Leptopsylla segnis</i>)	123
Public Health Importance	123
Flea-Associated Allergies	124
Plague	124
Murine Typhus	127
Other Flea-Borne Rickettsial Agents	128
Other Flea-Borne Pathogens	129
Tungiasis	129
Fleas as Intermediate Hosts of Helminths	130
Veterinary Importance	130
Flea-Bite Dermatitis	131
Tungiasis	131
Myxomatosis	131
Murine Trypanosomiasis	131
Other Flea-Borne Pathogens and Parasites	132
Fleas as Intermediate Hosts of Helminths	132
Prevention and Control	132

Chapter

10 Flies (Diptera) 137

- Robert D. Hall, and Reid R. Gerhardt
- Taxonomy 137
Morphology 138
Life History 141
Behavior and Ecology 142
Families of Minor Medical or Veterinary Interest 142
- Tipulidae (Crane flies) 142
 - Bibionidae (March flies) 143
 - Sciaridae (Darkwinged fungus gnats) 143
 - Chaoboridae (Phantom midges) 144
 - Chironomidae (Chironomid midges) 144
 - Rhagionidae (Snipe flies) 145
 - Athericidae (Athericid flies) 145
 - Stratiomyidae (Soldier flies, Latrine flies) 146
 - Phoridae (Humpbacked flies, Scuttle flies) 146
 - Syrphidae (Flower flies, Hover flies) 147
 - Piophilidae (Skipper flies) 147
 - Drosophilidae (Small fruit flies) 148
 - Chloropidae (Grass flies, Eye gnats) 148
- Public Health Importance 149
Veterinary Importance 150
Prevention and Control 150

Chapter

11 Moth Flies and Sand Flies (Psychodidae) 153

- Louis C. Rutledge, and Raj K. Gupta
- Taxonomy 153
- Sycoracinae 153
 - Psychodinae 153
 - Phlebotominae 154
- Morphology 154
- Psychodinae 154
 - Phlebotominae 155
- Life History 156
- Psychodinae 156
 - Phlebotominae 156
- Behavior and Ecology 156
- Psychodinae 156
 - Phlebotominae 156
- Public Health Importance 157
- Psychodinae 157
 - Phlebotominae 158
 - Vesicular Stomatitis Virus Disease 158
 - Chandipura Virus Disease 160
 - Sand Fly Fever 160
 - Changuinola Virus Disease 160
 - Bartonellosis 161
 - Leishmaniasis 162
 - Cutaneous Leishmaniasis 163
 - Visceral Leishmaniasis 165
- Veterinary Importance 165
- Leishmaniasis 165
 - Vesicular Stomatitis Virus Disease 165
- Prevention and Control 166
- Psychodinae 166
 - Phlebotominae 166

Chapter

12 Biting Midges (Ceratopogonidae) 169

- Gary R. Mullen
- Taxonomy 169
Morphology 170

- Life History 171
Behavior and Ecology 172
Public Health Importance 174
- Oropouche Fever 176
 - Other Viral Agents 176
 - Mansonellosis 176
- Veterinary Importance 178
- Bluetongue Disease 178
 - Epizootic Hemorrhagic Disease 180
 - African Horsesickness 181
 - Other Viral Agents 183
 - Blood Protozoans 183
 - Equine Onchocerciasis 184
 - Other Filarial Nematodes 185
 - Equine Allergic Dermatitis 185
- Prevention and Control 186

Chapter

13 Black Flies (Simuliidae) 189

- Peter H. Adler, and John W. McCreddie
- Taxonomy 189
Morphology 190
Life History 191
Behavior and Ecology 192
Public Health Importance 194
- Biting and Nuisance Problems 195
 - Human Onchocerciasis 196
 - Mansonellosis 199
 - Other Diseases Related to Black Flies 199
- Veterinary Importance 200
- Bovine Onchocerciasis 201
 - Leucocytozoonosis 201
 - Other Parasites and Pathogens of Veterinary Importance 202
 - Simuliotoxicosis 202
- Prevention and Control 203
- Onchocerciasis Control 204

Chapter

14 Mosquitoes (Culicidae) 207

- Woodbridge A. Foster, and Edward D. Walker
- Taxonomy 207
Morphology 209
Life History 215
Behavior and Ecology 217
Public Health Importance 223
- Mosquito Bites 223
 - Mosquito-Borne Viruses 223
 - Togaviridae (*Alphavirus*) 225
 - Other Alphaviruses 229
 - Flaviviridae (*Flavivirus*) 229
 - Yellow Fever 230
 - Dengue 232
 - Japanese Encephalitis Virus Complex 234
 - Other Flaviviruses 237
 - Bunyaviridae (*Orthobunyavirus* and *Phlebovirus*) 237
 - Malaria 239
 - Filariasis 243
- Veterinary Importance 248
- Mosquito-Borne Viruses of Animals 248
 - Nonhuman Malaria 250
 - Dog Heartworm 251
 - Other Filarial Nematodes of Animals 252
- Prevention and Control 252
- Control of Pathogen Transmission 254

15 Horse Flies and Deer Flies (Tabanidae) 261

- Bradley A. Mullens
- Taxonomy 261
- Morphology 263
- Life History 264
- Behavior and Ecology 266
- Public Health Importance 268
 - Loiasis 269
 - Tularemia 270
 - Other Tabanid-Transmitted Human Pathogens 270
- Veterinary Importance 270
 - Surra and Related Trypanosomiases 271
 - Equine Infectious Anemia 271
 - Anaplasmosis 271
 - Elacophorosis 272
 - Other Pathogens of Veterinary Importance 272
- Prevention and Control 272

16 Muscid Flies (Muscidae) 275

- Roger D. Moon
- Taxonomy 275
- Morphology 275
- Life History 279
- Behavior and Ecology 280
- Species of Medical-Veterinary Importance 282
 - House Fly (*Musca domestica*) 282
 - Bazaar Fly (*Musca sorbens*) 283
 - Bush Fly (*Musca vetustissima*) 283
 - Face Fly (*Musca autumnalis*) 283
 - Cluster Fly (*Pollenia rudis*) 283
 - Stable Fly (*Stomoxys calcitrans*) 283
 - Horn Fly (*Haematobia irritans irritans*) and Buffalo Fly (*Haematobia irritans exigua*) 284
 - False Stable Fly (*Muscina stabulans*) and Its Relatives 284
 - Little House Fly (*Fannia canicularis*) and Its Relatives 284
 - Garbage Flies (*Hydrotaea* spp.) 285
 - Sweat Flies (*Hydrotaea* spp.) 285
- Public Health Importance 285
 - House Fly (*Musca domestica*) 285
 - Bazaar Fly (*Musca sorbens*) 286
 - Bush Fly (*Musca vetustissima*) 286
 - Face Fly (*Musca autumnalis*) and Cluster Fly (*Pollenia rudis*) 286
 - Stable Fly (*Stomoxys calcitrans*) 287
 - False Stable Fly (*Muscina stabulans*) and Its Relatives 287
 - Little House Fly (*Fannia canicularis*) and Its Relatives 287
 - Garbage Flies (*Hydrotaea* spp.) 287
 - Sweat Flies (*Hydrotaea* spp.) 287
- Veterinary Importance 288
 - House Fly (*Musca domestica*) 288
 - Bush Fly (*Musca vetustissima*) 289
 - Face Fly (*Musca autumnalis*) 289
 - Stable Fly (*Stomoxys calcitrans*) 290
 - Horn Fly (*Haematobia irritans irritans*) and Buffalo Fly (*Haematobia irritans exigua*) 291
 - Sweat Flies (*Hydrotaea* spp.) 292
- Prevention and Control 292

17 Tsetse Flies (Glossinidae) 297

- William L. Krinsky
- Taxonomy 297
- Morphology 298
- Life History 299
- Behavior and Ecology 300
- Public Health Importance 302
 - African Sleeping Sickness 302
 - West African Trypanosomiasis 303
 - East African Trypanosomiasis 303
 - Life Cycle of Trypanosomes 303
- Veterinary Importance 305
 - Nagana 305
- Prevention and Control 306

18 Myiasis (Muscoidea, Oestroidea) 309

- Philip J. Scholl, E. Paul Catts, and Gary R. Mullen
- Taxonomy 310
- Morphology 313
- Life History 314
- Ecology and Behavior 315
 - Myths 317
- Flies Involved in Myiasis 317
 - Stratiomyidae (Soldier Flies) 317
 - Syrphidae (Flower Flies, Hover Flies, Rat-tailed Maggots) 317
 - Piophilidae (Skipper Flies) 318
 - Neottiophilidae (Nest Skipper Flies) 318
 - Drosophilidae (Pomace Flies, Vinegar Flies, Fruit Flies, and Wine Flies) 318
 - Chloropidae (Grass Flies and Australian Frog Flies) 319
 - Anthomyiidae (Root Maggots) 319
 - Fanniidae (Fanniid Flies) 319
 - Muscidae (Dung Flies) 319
 - Tropical Nest Flies 320
 - Calliphoridae (Blow Flies, Carrion Flies, Floor Maggots, Nest Maggots, Screwworms) 320
 - Sarcophagidae (Flesh Flies) 323
 - Oestridae (Bot Flies) 324
 - New World Skin Bot Flies (Cuterebrinae) 325
 - Old World Skin Bot Flies (Hypodermatinae) 327
 - Nose Bot Flies (Oestrinae) 329
 - Stomach Bot Flies (Gasterophilinae) 331
- Public Health Importance 332
 - Clinical Use of Maggots 333
- Veterinary Importance 333
- Prevention and Control 335
 - Screwworm Eradication Program 336
 - Cattle Grub Control 336

19 Louse Flies, Keds, and Related Flies (Hippoboscoidea) 339

- John E. Lloyd
- Taxonomy 339
- Morphology 340
 - Hippoboscidae 340
 - Streblidae 341
 - Nycteribiidae 341

Life History 342
Behavior and Ecology 342
Common Species of Hippoboscids 343
 Sheep Ked (*Melophagus ovinus*) 343
 Dog Fly (*Hippobosca longipennis*) 344
 Hippobosca equina 344
 Hippobosca variegata 345
 Deer Keds (*Lipoptena* and *Neolipoptena* spp.) 345
 Pigeon fly (*Pseudolynchia canariensis*) 346
Public Health Importance 346
Veterinary Importance 347
Prevention and Control 350

Chapter

20 Moths and Butterflies (Lepidoptera) 353

Gary R. Mullen
Taxonomy 353
Morphology 354
 Spicule Hairs 355
 Spine Hairs 356
Life History 357
Behavior and Ecology 357
 Urticating Caterpillars 358
 Megalopygidae 358
 Limacodidae (Cochliidiidae, Eucleidae) 358
 Saturniidae 360
 Lymantriidae 361
 Arctiidae 362
 Lasiocampidae 362
 Noctuidae 363
 Nolidae 363
 Thaumetopoeidae 363
 Nymphalidae 363
 Morphoidea 363
Lachryphagous Moths 364
 Geometridae 364
 Pyrilidae 364
 Notodontidae 364
 Noctuidae 364
 Sphingidae 365
 Thyrididae 365
Wound-Feeding and Skin-Piercing Moths 365
Public Health Importance 366
Veterinary Importance 367
 Caterpillar-induced Equine Abortion 368
Prevention and Control 368

Chapter

21 Ants, Wasps, and Bees (Hymenoptera) 371

Hal C. Reed, and Peter J. Landolt
Taxonomy 371
Morphology 373
Life History 374
Behavior and Ecology 375
Hymenoptera Venoms 376
 Ant Venoms 376
 Vespid Venoms 377
 Honey Bee Venom 377
Ants 377
 Fire Ants (*Solenopsis* species) 378
 Harvester Ants (*Pogonomyrmex* species) 380
 Pavement Ant (*Tetramorium caespitum*) 380
 Pharaoh's Ant (*Monomorium pharaonis*) 381

Wasps 381
 Solitary Wasps 381
 Social Wasps (Vespidae) 382
Bees 386
 Solitary Bees 386
 Social Bees 387
Public Health Importance 389
Veterinary Importance 392
Prevention and Control 392

Chapter

22 Scorpions (Scorpiones) 397

Gary R. Mullen, and Scott A. Stockwell
Taxonomy 397
 Buthidae 397
 Microcharmidae 398
 Pseudochactidae 398
 Chaerliidae 398
 Chactidae 399
 Euscorpiidae 399
 Superstitioniidae 399
 Troglotayosicidae 399
 Iuridae 399
 Vaejovidae 399
 Bothriuridae 400
 Liochelidae 400
 Heteroscorpionidae 400
 Hemiscorpiidae 400
 Urodacidae 400
 Diplocentridae 400
 Scorpionidae 401
Morphology 401
Life History 403
Behavior and Ecology 404
Public Health Importance 405
 Scorpions of Medical Importance 406
Veterinary Importance 407
Prevention and Control 407

Chapter

23 Solpugids (Solifugae) 411

Gary R. Mullen

Chapter

24 Spiders (Araneae) 413

Gary R. Mullen, and Richard S. Vetter
Taxonomy 413
 Mygalomorph Spiders 413
 Araneomorph Spiders 414
Morphology 416
Life History 417
Behavior and Ecology 418
Public Health Importance 418
 Tarantism 419
 Tarantulism 419
 Atraxism 421
 Phoneutriism 422
 Cheiracanthism 422
 Tegenarism 422
 Loxoscelism 423
 Latrodectism 426

Veterinary Importance 430
Prevention and Control 430

Chapter

25 Mites (Acari) 433

Gary R. Mullen, and Barry M. O'Connor
Taxonomy 433
Morphology 433
Life History 435
Behavior and Ecology 436
Public Health Importance 436
Mite-Induced Dermatitis 436
Stored-Products Mites 442
Skin-Invading Mites 445
Mite-Induced Allergies 449
Internal Acariasis 452
Mite-Borne Diseases of Humans 453
Rickettsialpox 453
Tsutsugamushi Disease 454
Intermediate Hosts of Human Parasites 455
Delusory Acariasis and Acarophobia 456
Veterinary Importance 456
Mite-Induced Dermatitis 456
Laelapidae 458
Trombiculidae 459
Fur Mites 460
Feather Mites 463
Mange Mites 464
Other Sarcoptid Genera 471
Notoedres Species 472
Mite-Induced Allergies 478
Ear Mites 478
Respiratory Mites 481
Mite-Borne Diseases 484
Mites as Intermediate Hosts of Tapeworms 485

Chapter

26 Ticks (Ixodida) 493

William L. Nicholson, Daniel E. Sonenshine, Robert S. Lane, and Gerrit Uilenberg
Taxonomy 493
Family Ixodidae (Hard Ticks) 493
Family Argasidae (Soft Ticks) 495
Family Nuttalliellidae 495
Morphology 495
External Anatomy 495
Ixodidae 496
Argasidae 498
Internal Anatomy 498
Life History 499
Ixodid Life Cycles 499
Argasid Life Cycles 500
Behavior and Ecology 501
Tick Species of Medical-Veterinary Importance 505
Public Health Importance 511
Human Babesiosis 512
Tick-Borne Encephalitis Complex 513
Colorado Tick Fever 514
Rocky Mountain Spotted Fever 515
Boutonneuse Fever 517
Other Spotted Fever Group Rickettsiae 517
Human Ehrlichiosis 518
Human Granulocytic Anaplasmosis 519
Q Fever 519

Lyme Disease 520
Tick-Borne Relapsing Fever 522
Tularemia 524
Tick Paralysis 525
Tick-Bite Allergies 526
Veterinary Importance 526
Piroplasmoses 526
Louping Ill 528
African Swine Fever 529
Diseases Caused by Members of the Family Anaplasmataceae 529
Borrelioses 532
Tularemia 532
Q Fever 533
Dermatophilosis 533
Tick Paralysis 534
Tick Toxicoses 534
Prevention and Control 535
Personal Protection 535
Acaricides 535
Pheromone-Assisted Control 536
Passive Treatment 536
Hormone-Assisted Control 537
Vaccines 537
Management 537
Eradication 538

Chapter

27 Molecular Tools Used in Medical and Veterinary Entomology 543

Dana Nayduch
Cloning Genes and Genomics 543
Cloning Genes: Recombinant DNA Technology 543
Genomics: Cataloguing an organism's complete genetic sequence 544
Library Construction and Genome Assembly 544
Bioinformatics and databases 546
Genomes of Vectors and Vector-borne Pathogens 546
Polymerase Chain Reaction (PCR) 546
Applications of PCR 546
Analyzing Gene Expression 549
RNA Analysis 550
Diagnostic Techniques 553
Rapid Detection and Quantification of Pathogens in Hosts and Vectors 553
Visualization of Pathogens in Hosts and Vectors 553
Immune-based Diagnosis of Host Infection 553
Conclusions 554

Appendix: Arthropod-Related Viruses of Medical and Veterinary Importance 557

Michael J. Turell

Glossary 565
