Preface *v*

1. Tensors and their Algebra **1**
1.1 Introduction 1
1.2 Transformation of Coordinates 2
1.3 Summation Convention 4
1.4 Kronecker Delta 5
1.5 Scalar, Contravariant and Covariant Vectors 7
1.6 Tensors of Higher Rank 11
1.7 Symmetry of Tensors 13
1.8 Algebra of Tensors 21
Addition and Subtraction 22
Equality of Tensors 22
Inner and Outer Products 23
Contraction 24
The Quotient Law 25
1.9 Irreducible Tensor 29
Exercises 30

2. Riemannian Space and Metric Tensor **33**
2.1 Introduction 33
2.2 The Metric Tensor 35
2.3 Raising and Lowering of Indices: Associated Tensor 43
2.4 Vector Magnitude 44
2.5 Relative and Absolute Tensors 49
2.6 Levi-Civita Tensor 51
Exercises 58

3. Christoffel Symbols and Covariant Differentiation **60**
3.1 Introduction 60
3.2 Christoffel Symbols 60
3.3 Transformation Laws for Christoffel Symbols 63
3.4 Equation of a Geodesic 65
3.5 Affine Parameter 69
3.6 Geodesic Coordinate System 70
3.7 Covariant Differentiation 81

Covariant Derivatives of Contravariant and Covariant Vectors 82
Covariant Derivatives of Rank Two Tensors 84
Covariant Derivative of Tensors of Higher Rank 85
3.8 Rules for Covariant Differentiation 86
3.9 Some Useful Formulas 91
Divergence of a Vector Field 91
Gradient of a Scalar and the Laplacian 92
Curl of a Vector 92
Divergence of a Tensor Field 93
3.10 Intrinsic Derivative: Parallel Transport 100
3.11 Null Geodesics 103
3.12 Alternative Derivation of Equation of Geodesic 107
Exercises 109

4. The Riemann Curvature Tensor **112**
4.1 Introduction 112
4.2 The Riemann Curvature Tensor 112
4.3 Commutation of Covariant Derivative: Another Way of Defining the Riemann Curvature Tensor 114
4.4 Covariant Form of the Riemann Curvature Tensor 116
4.5 Properties of the Riemann Curvature Tensor 118
4.6 Uniqueness of the Riemann Curvature Tensor 124
4.7 The Number of Algebraically Independent Components of the Riemann Curvature Tensor 125
4.8 The Ricci Tensor and the Scalar Curvature 128
4.9 The Einstein Tensor 135
4.10 The Integrability of the Riemann Tensor and the Flatness of the Space 143
4.11 Einstein Space 151
4.12 Curvature of a Riemannian Space 152
4.13 Spaces of Constant Curvature 155
Exercises 158

5. Some Advanced Topics **161**
5.1 Introduction 161
5.2 Geodesic Deviation 161
5.3 Decomposition of the Riemann Curvature Tensor 166
5.4 Electric and Magnetic Parts of the Riemann and Weyl Tensors 178
5.5 Classification of Gravitational Fields 180
5.6 Invariants of the Riemann Tensor 183
5.7 Curvature Tensors Involving the Riemann Tensor 186
Space-matter Tensor 186
Conharmonic Curvature Tensor 188

5.8 Lie Derivative 190
5.9 The Killing Equation 199
5.10 The Curvature Tensor and Killing Vectors 203
Exercises 209

References 211
Answers and Hints to Exercises 213
