CONTENTS

PREFACE	xi
SYMBOLS	xiii
ACRONYMS AND ABBREVIATIONS	xv
I INTRODUCTION	1
INTRODUCTION	3
1 THE WORKING PRINCIPLES OF A FUEL CELL	7
1.1 Thermodynamic Aspects	7
1.2 Schematic Layout of Fuel Cell Units	11
1.3 Types of Fuel Cells	15
1.4 Layout of a Real Fuel Cell: The Hydrogen–Oxygen Fuel Cell with Liquid Electrolyte	15
1.5 Basic Parameters of Fuel Cells	20
Reference	26
2 THE LONG HISTORY OF FUEL CELLS	27
2.1 The Period Prior to 1894	27
2.2 The Period from 1894 to 1960	30

2.3	The Period from 1960 to the 1990s	33
2.4	The Period After the 1990s	39
	References	40
II	MAJOR TYPES OF FUEL CELLS	43
3	PROTON-EXCHANGE MEMBRANE FUEL CELLS	45
3.1	History of the PEMFC	46
3.2	Standard PEMFC Version from the 1990s	49
3.3	Special Features of PEMFC Operation	54
3.4	Platinum Catalyst Poisoning by Traces of CO in the Hydrogen	57
3.5	Commercial Activities in Relation to PEMFCs	59
3.6	Future Development of PEMFCs	60
3.7	Elevated-Temperature PEMFCs	67
	References	70
4	DIRECT LIQUID FUEL CELLS	73
	PART A: DIRECT METHANOL FUEL CELLS	73
4.1	Methanol as a Fuel for Fuel Cells	73
4.2	Current-Producing Reactions and Thermodynamic Parameters	74
4.3	Anodic Oxidation of Methanol	74
4.4	Milestones in DMFC Development	76
4.5	Membrane Penetration by Methanol (Methanol Crossover)	77
4.6	Varieties of DMFCs	79
4.7	Special Operating Features of DMFCs	81
4.8	Practical Models of DMFCs and Their Features	83
4.9	Problems To Be Solved in Future DMFCs	85
	PART B: DIRECT LIQUID FUEL CELLS	87
4.10	The Problem of Replacing Methanol	87
4.11	Fuel Cells Using Organic Liquids as Fuels	88
4.12	Fuel Cells Using Inorganic Liquids as Fuels	94
	References	97

5	PHOSPHORIC ACID FUEL CELLS	101
5.1	Early Work on Phosphoric Acid Fuel Cells	101
5.2	Special Features of Aqueous Phosphoric Acid Solutions	102
5.3	Construction of PAFCs	103
5.4	Commercial Production of PAFCs	104
5.5	Development of Large Stationary Power Plants	105
5.6	The Future of PAFCs	105
5.7	Importance of PAFCs for Fuel Cell Development	107
	References	107
6	ALKALINE FUEL CELLS	109
6.1	Hydrogen–Oxygen AFCs	110
6.2	Alkaline Hydrazine Fuel Cells	117
6.3	Anion-Exchange (Hydroxyl Ion–Conducting) Membranes	121
6.4	Methanol Fuel Cells with Anion-Exchange Membranes	122
6.5	Methanol Fuel Cell with an Invariant Alkaline Electrolyte	123
	References	123
7	MOLTEN CARBONATE FUEL CELLS	125
7.1	Special Features of High-Temperature Fuel Cells	125
7.2	Structure of Hydrogen–Oxygen MCFCs	126
7.3	MCFCs with Internal Fuel Reforming	128
7.4	Development of MCFC Work	130
7.5	The Lifetime of MCFCs	131
	References	133
8	SOLID-OXIDE FUEL CELLS	135
8.1	Schematic Design of Conventional SOFCs	136
8.2	Tubular SOFCs	138
8.3	Planar SOFCs	143
8.4	Monolithic SOFCs	146
8.5	Varieties of SOFCs	147
8.6	Utilization of Natural Fuels in SOFCs	149
8.7	Interim-Temperature SOFCs	151
8.8	Low-Temperature SOFCs	155
8.9	Factors Influencing the Lifetime of SOFCs	157
	References	158

9	OTHER TYPES OF FUEL CELLS	161
9.1	Redox Flow Cells	161
9.2	Biological Fuel Cells	164
9.3	Semi-Fuel Cells	167
9.4	Direct Carbon Fuel Cells	170
	References	174
10	FUEL CELLS AND ELECTROLYSIS PROCESSES	177
10.1	Water Electrolysis	177
10.2	Chlor-Alkali Electrolysis	182
10.3	Electrochemical Synthesis Reactions	185
	References	187
III	INHERENT SCIENTIFIC AND ENGINEERING PROBLEMS	189
11	FUEL MANAGEMENT	191
11.1	Reforming of Natural Fuels	192
11.2	Production of Hydrogen for Autonomous Power Plants	196
11.3	Purification of Technical Hydrogen	199
11.4	Hydrogen Transport and Storage	202
	References	205
12	ELECTROCATALYSIS	207
12.1	Fundamentals of Electrocatalysis	207
12.2	Putting Platinum Catalysts on the Electrodes	211
12.3	Supports for Platinum Catalysts	214
12.4	Platinum Alloys and Composites as Catalysts for Anodes	217
12.5	Nonplatinum Catalysts for Fuel Cell Anodes	219
12.6	Electrocatalysis of the Oxygen Reduction Reaction	221
12.7	The Stability of Electrocatalysts	227
	References	228
13	MEMBRANES	231
13.1	Fuel Cell–Related Membrane Problems	232
13.2	Work to Overcome Degradation of Nafion Membranes	233

13.3	Modification of Nafion Membranes	233
13.4	Membranes Made from Polymers Without Fluorine	235
13.5	Membranes Made from Other Materials	237
13.6	Matrix-Type Membranes	237
13.7	Membranes with Hydroxyl Ion Conduction	238
	References	239
14	SMALL FUEL CELLS FOR PORTABLE DEVICES	241
14.1	Special Operating Features of Mini-Fuel Cells	242
14.2	Flat Miniature Fuel Batteries	243
14.3	Silicon-Based Mini-Fuel Cells	245
14.4	PCB-Based Mini-Fuel Cells	247
14.5	Mini-Solid Oxide Fuel Cells	248
14.6	The Problem of Air-Breathing Cathodes	249
14.7	Prototypes of Power Units with Mini-Fuel Cells	250
14.8	Concluding Remarks	253
	References	253
15	MATHEMATICAL MODELING OF FUEL CELLS	255
	<i>Felix N. Büchi</i>	
15.1	Zero-Dimensional Models	257
15.2	One-Dimensional Models	257
15.3	Two-Dimensional Models	258
15.4	Three-Dimensional Models	259
15.5	Concluding Remarks	260
	References	260
IV	COMMERCIALIZATION OF FUEL CELLS	263
16	APPLICATIONS	265
16.1	Large Stationary Power Plants	265
16.2	Small Stationary Power Units	269
16.3	Fuel Cells for Transport Applications	272
16.4	Portables	277
16.5	Military Applications	281
	References	283

17 FUEL CELL WORK IN VARIOUS COUNTRIES	285
17.1 Driving Forces for Fuel Cell Work	285
17.2 Fuel Cells and the Hydrogen Economy	287
17.3 Activities in North America	289
17.4 Activities in Europe	290
17.5 Activities in Other Countries	291
17.6 The Volume of Published Fuel Cell Work	294
17.7 Legislation and Standardization in the Field of Fuel Cells	295
References	296
18 OUTLOOK	297
18.1 Periods of Alternating Hope and Disappointment	297
18.2 Some Misconceptions	299
<i>Klaus Müller</i>	
18.3 Ideal Fuel Cells	300
18.4 Projected Future of Fuel Cells	302
References	304
