

GIS *and* Spatial Analysis *for the* Social Sciences Coding, Mapping, *and* Modeling

Robert Nash Parker
Emily K. Asencio

Contents in Detail

Preface *viii*

Overview *xiii*

Section 1 **Introduction to Geocoding and Mapping / 1**

How to Make a Pin Map / 2

The Basics of Geocoding / 3

 Example: The Process of Geocoding / 5

Geocoding Addresses / 12

Data Mining and GIS / 24

 Example: The Science and Art of Interactive Geocoding / 29

 Example: Exporting a Geocoded Map / 48

Thematic Maps / 51

 Example: Creating a Thematic Map from Sample Data / 52

 Example: Racial Profiling Thematic Map / 62

 Example: Juvenile Crime Thematic Map / 75

Conclusion / 83

Section 2 **Mapping for Analysis, Policy, and Decision Making / 84**

Basic Multivariate Displays / 84

Mapping Rates / 85

 Example: Classification of World Armed Rivalries / 88

 Example: Subsets of Youth Violence / 95

 Example: Maps for School Planning / 105

What is the Proper Unit of Analysis in GIS?—Using Tessellations and Related Database Issues / 112

 Example: Tessellations and Youth Violence / 115

Dynamic Maps: Showing Change over Time / 124

 Example: Rates of Poverty over Time in New Orleans / 124

Multiple Variable Maps / 128

 Example: Patterns of Residency by Ethnicity / 135

 Example: Diffusion of Innovation in the United States (3D map) / 141

 Example: Socioeconomic Conditions in 3D / 157

Using Complex Maps to Simplify and Support Better Decision Making / 160

Policies and Planning / 160

 Example: Homicide Patterns / 160

 Example: Alcohol Availability and Youth Violence, Perris / 164

 Example: Hurricane Katrina's Impact on Children and Schools / 166

 Example: HIV and Armed National Rivalries / 174

Example: Immigration and Unemployment in the U.S. / 175

Example: California Education System / 188

Conclusion / 200

Section 3 **Geospatial Modeling and GIS / 201**

Geospatial Modeling and GIS / 202

The Meaning of Space in Causal Modeling / 206

Measuring the Impact of Space and Spatial Relationships / 207

Statistical Issues in Spatial Modeling / 208

The Impact of Spatial Autocorrelations and Error Structures in Spatial Modeling / 212

Statistical Modeling of Spatial Data / 213

Types of Data Used in Spatial Models / 216

Choosing Software to Estimate Spatial Models / 217

Example: A Cross Sectional Spatial Model: Gang Crime and Alcohol Availability / 219

Example: Multisite Studies in Spatial Modeling / 225

Example: Pooled Cross Sectional and Time-Series Spatial Models / 227

Example: Spatial Models: Limitations, Issues, and Emerging Developments / 231

Substantive Issues in Spatial Modeling / 231

New Developments in Spatial Modeling / 232

Conclusion / 233

Appendix **GIS Data Sources / 235**
