

Third Edition

FORENSIC SCIENCE

**An Introduction to
Scientific and Investigative
Techniques**

Edited by

Stuart H. James and Jon J. Nordby

CRC Press
Taylor & Francis Group

Table of Contents

Foreword xv
Preface xxv
The Editors..... xxxi
Contributors xxxiii

Chapter 1: Here We Stand: What a Forensic Scientist Does 1

Jon J. Nordby

- Law and Science*
- Lawyers and Scientists*
- Theoretical Natural Sciences and Practical Forensic Sciences*
- Forensic Experts*
- An Expert's Role*
- Scientific Method*

SECTION I: Forensic Pathology and Related Specialties

Chapter 2: The Role of the Forensic Pathologist..... 13

Ronald K. Wright

- Introduction*
- Coroner System*
- Medical Examiner System*
- Education and Training of Forensic Pathologists*
- Training Requirements for a Forensic Pathologist*
- Duties of a Forensic Pathologist*
- Obtaining Appropriate Specimens*
- Photography*
- Report Preparation*
- Testimony*
- Case Studies*

Chapter 3: Forensic Nursing..... 25

Janet S. Barber Duval, Catherine M. Dougherty, and Mary K. Sullivan

- Overview*
- Domain of Practice*
- Collaborative Relationships*
- Evolution of Forensic Nursing*
- International Frontiers of Forensic Nursing*
- What Is and Is Not Forensic Nursing*
- Career Opportunities*
- Responsibilities of Hospitals in Evidence Collection and Preservation*
- Status of Forensic Nurses in the Legal System*
- Educational Preparation of Forensic Nurses*
- Future of Forensic Nursing*

Chapter 4: Investigation of Traumatic Deaths 43

Ronald K. Wright

- Introduction*
- Cause and Mechanism of Death*
- Manner of Death*
- Time of Death*
- Classification of Traumatic Deaths*
- Case Study*

Chapter 5: Forensic Toxicology61

John Joseph Fenton

Introduction
Applications of Forensic Toxicology
The Testing Process
Drugs of Abuse
Pharmaceutical Materials
Nonmedicinal Agents
Analytic Methods in Forensic Toxicology
Metal Analyses
Interpreting Drug Findings
Case Studies

Chapter 6: Forensic Odontology.....81

R. Tom Glass

Introduction
History
Dental Training
Expert Witness Testimony
Body Identification by Dental Means
Bite Mark Analysis
Collection of Bite Mark Evidence
Personal Injury Analysis
Dental Malpractice Analysis
Conclusion

Chapter 7: Forensic Anthropology101

Marcella H. Sorg and William D. Haglund

Introduction
Brief History of Forensic Anthropology as a Profession
Physical Anthropology and Human Variability
Taphonomy
Archaeology
Scene Processing
Examining Remains
Developing a Biological Profile
Levels of Certainty
Perimortem Trauma and Evidence for Cause and Manner of Death
Patterned Injury
Forensic Anthropology Documentation
Expert Witness Testimony

Chapter 8: Forensic Taphonomy121

William D. Haglund and Marcella H. Sorg

Introduction
Contributions of Methods and Theory
Taphonomic Factors
Human Remains in Water Environments
Buried Remains
Case Studies
The Future
Conclusion

Chapter 9: Forensic Entomology.....137

Gail S. Anderson

Introduction
Importance of Determining Time since Death

History
Training
Determination of Elapsed Time since Death
Determining whether the Body Has Been Moved
Body Disturbance
Position of Wounds
Linking Suspect to Scene
Drugs
Abuse
Collection of Entomological Evidence
Challenges to Forensic Entomology
Report Submission
Testifying in Court
Conclusion

SECTION II: Evaluation of the Crime Scene

Chapter 10: Crime Scene Investigation 167 *Marilyn T. Miller, Ed.D.*

Introduction
Defining the Crime Scene
Uses and Information from Physical Evidence in Criminal Investigations
Science and Crime Scene Investigations
General Crime Scene Procedures
Crime Scene Documentation
Crime Scene Searches
Collection and Preservation of Physical Evidence
Crime Scene Reconstruction
Case Study
Conclusion

Chapter 11: Forensic Digital Photo Imaging 193 *Patrick Jones*

Introduction
The Camera
The Digital Point-and-Shoot Camera
The Digital SLR Camera Body
Digital Photo Imaging
ISO Number
Exposure Index (EI)
Forensic Digital Photo Imaging
Scientific Working Group on Imaging Technology (SWGIT)
Photo Imaging the Scene
Imaging the Scene
Photo Images as Evidence
Deleting of Images from the Camera
Evidence and Items of Interest
Photo Imaging Evidence
Conclusion

Chapter 12: Recognition of Bloodstain Patterns 211 *Stuart H. James, Paul E. Kish, and T. Paulette Sutton*

Introduction
History of Bloodstain Pattern Interpretation
Properties of Human Blood
Target Surface Considerations
Size, Shape, and Directionality
Spattered Blood

- Other Bloodstain Patterns*
- Interpretation of Bloodstains on Clothing and Footwear*
- Documentation of Bloodstain Evidence*
- The Use of Luminol Photography for Bloodstain Pattern Analysis*
- Absence of Evidence Is Not Evidence of Absence*
- Report Writing*
- Conclusions*
- Case Report*
- Conclusions*
- Training and Education*
- Scientific Working Group on Bloodstain Pattern Analysis (SWGSTAIN)*
- Conclusion*

SECTION III: Forensic Science in the Laboratory

Chapter 13: The Forensic Laboratory 243 *Linda R. Netzel*

- Introduction*
- Qualifications of a Forensic Examiner*
- Understanding the Role of the Criminalist*
- Linking a Crime Scene to a Suspect*
- Laboratory Sections, Analytical Instruments, and Specialized Equipment*
- Case Studies*

Chapter 14: The Identification and Characterization of Blood and Bloodstains..... 261 *Robert P. Spalding*

- Introduction*
- Analysis of Blood in Forensic Serology*
- Identification of Blood*
- Species Origin Determination in Bloodstains*
- Genetic Markers in Blood*
- Case Example*
- Conclusion*

Chapter 15: Identification of Biological Fluids and Stains..... 285 *Andrew Greenfield and Monica M. Sloan*

- Introduction*
- Identification of Semen in the Forensic Laboratory*
- Methods for the Identification of Saliva*
- Other Body Fluids*
- Case Examination Strategy*
- Case Study*

Chapter 16: Forensic DNA: Technology, Applications, and the Law 303 *Susan Herrero*

- Genetics: The Beginnings*
- Inheritance of DNA Characteristics*
- How DNA Made It Into the Courts*
- DNA in Forensic Analysis*
- Interpretation of Results: What is the Meaning of a DNA Match?*
- Mixtures*
- Y-STRs*
- Nonhuman DNA in Criminal Cases*
- On the Horizon*

Laser Copy DNA
Mitochondrial DNA
Medical and Biological Applications of DNA
Historical Applications of DNA
Identification of War Dead
DNA in Noncriminal Cases
DNA in Criminal Cases: Criminal Guilt and Innocence
Admissibility of DNA Evidence
What Can Go Wrong and What Can Be Done to Prevent It?
Forensic Casework
Admissibility of Evidence: Technology Collides with the Fourth Amendment
DNA Dragnets
Protecting the Innocent
Genetic Privacy
DNA in the Future

Chapter 17: Microanalysis and Examination of Trace Evidence 327
Thomas A. Kubic and Nicholas Petraco

Introduction
Instruments of Microanalysis and Sample Types
Other Instrumental Techniques of Value to a Microanalyst
Microscopic Evidence and Its Analysis

Chapter 18: Fingerprints 355
R. E. Gaensslen

Fingerprints as Evidence
Fingerprints as a Means of Identification
What Fingerprints Are
Fingerprint Patterns
History of Fingerprints
Fingerprint Classification
Computer-Based Fingerprint Files
Types of Evidentiary Fingerprints
Development (Enhancement) of Latent Fingerprints
Recognition, Collection, and Preservation of Fingerprint Evidence
Fingerprint Identification—The Heart of the Matter
The Fingerprint Identification Profession
Disclaimer

Chapter 19: Forensic Footwear Evidence377
William J. Bodziak

Introduction
Forms of Footwear Impressions
Information from Footwear Impressions
Location and Recovery of Footwear Impressions
Enhancement Methods
Known Shoes and Preparation of Exemplars
The Examination Process and Conclusions
Case Studies

Chapter 20: Forensic Tire Tread and Tire Track Evidence 393
William J. Bodziak

Introduction
Original Equipment Tires, Replacement Tires, and Tire Construction
Tread Nomenclature and Sidewall Information
Noise Treatment

Tread Wear Indicators (Wear Bars)
Retread Tires
Tire Reference Material and Databases
Tire Track Evidence
Known Tires and Tire Exemplars
Tire Impressions, the Examination Process, and Conclusions
Case Study

Chapter 21: Firearm and Tool Mark Examinations 407

Walter F. Rowe

Introduction
Types of Modern Firearms
Manufacture of Firearms
Firearm Ammunition
Collection of Firearms-Related Evidence
Laboratory Examinations
Types of Tool Marks
Processing of Tool Marks at Crime Scenes
Laboratory Examinations of Tool Marks
Tool Marks on Manufactured Items
Striation Matching for Personal Identification
Case Study

Chapter 22: Questioned Documents 439

Howard Seiden and Frank H. Norwitch

Introduction
Functions of a Forensic Document Examiner
Becoming a Document Examiner
Theory of Handwriting
Collection of Writing Standards
Process of Comparison
Types of Fraudulent Writing
Factors That Can Affect Handwriting
Challenge to the Document Field
Alteration, Obliteration, and Ink Differentiation
Photocopy and Photocopier Examination
Typewriter and Typewriting Examination
Paper and Watermark Examination
Miscellaneous Examinations

Chapter 23: Analysis of Controlled Substances 457

Donnell R. Christian, Jr.

Introduction
Standards of Analysis
Scope of Analysis
Chemical Examinations
Instrumental Examinations
Quantitation
Quality Assurance (QA)/Quality Control (QC)
Clandestine Drug Laboratories
Conclusion

SECTION IV: Forensic Engineering

Chapter 24: Structural Failures 489

Randall K. Noon

Introduction
Static Loads

Dynamic Loads
Case Studies

Chapter 25: Basic Fire and Explosion Investigation..... 507

David R. Redsicker

Introduction
Chemistry and Behavior of Fire or Explosion
Behavior of Fire
Origin and Cause Analysis
Fatal Fire Investigation
Motor Vehicle Fires
Collection of Fire Evidence
Evidence Containers
Case Studies

Chapter 26: Vehicular Accident Reconstruction.....527

Randall K. Noon

Introduction
Primary Causes of Vehicular Accidents
Analytical Tools Used to Evaluate Accidents
Converting Scene Data into an Event Sequence
Basic Energy Method
Basic Momentum Method
Tips and Solution Strategies

SECTION V: Cybertechnology and Forensic Science

Chapter 27: Informatics in Forensic Science551

Zeno Geradts

Introduction
Forensic Databases
Image Databases
DNA Databases
Paint Databases
Forensic Archiving of X-Ray Spectra
Video Image Processing and Animation Software
Use of Networks in Forensic Science

Chapter 28: Computer Crime and the Electronic Crime Scene

569

Thomas A. Johnson

Introduction and Historical Developments
Crime Scenes with Digital and Electronic Evidence
Computers, Electronic Equipment, Devices, and Information Repositories
Legal Issues in the Searching and Seizure of Computers
Summary

SECTION VI: Forensic Application of the Social Sciences

Chapter 29: Forensic Psychology..... 585

Louis B. Schlesinger

Psychological Research and Law
Clinical Forensic Psychology

Psychology and Law: An Uneasy Alliance
*Forensic Assessment: Distinctions between
the Clinical and Forensic Approaches*
Psychological Testing: Traditional and Specialized Forensic Tests
Interviews in Altered States of Consciousness
Complicating Factors in Forensic Assessment: Deception Syndromes
Conclusion

Chapter 30: Forensic Psychiatry..... 605

Robert L. Sadoff

Definition of Forensic Psychiatry
History of Forensic Psychiatry
Scope of Forensic Psychiatry
Assessment of Competency
Training in Forensic Psychiatry
Case Studies
Summary

Chapter 31: Serial Offenders: Linking Cases by Modus Operandi and Signature617

Robert D. Keppel

Introduction to Crime Scene Assessment
Historical Perspective
What Is a Killer's Signature?
Signature Versus Modus Operandi
The Shoreline Murders
Summary

Chapter 32: Criminal Personality Profiling..... 627

Michael R. Napier and Kenneth P. Baker

Introduction
History of Profiling and Criminal Investigative Analysis
General Concepts
Results: Type of Analyses
Case Linkages for Serial Offenses
Equivocal Death Analyses
Search Warrant Application
Concepts and Applications in Sexual Assault Investigations
Applications in Homicide Investigations
Conclusion

SECTION VII: Legal and Ethical Issues in Forensic Science

Chapter 33: Forensic Evidence..... 649

Terrence F. Kiely

Introduction
Forensic Evidence
Criminal Law Theory and Evidence
Class and Individual Characteristics
Forensic Evidence and the Crime Scene
Laboratory Matches and Courtroom Rules of Evidence
Forensic Science, Forensic Evidence, and Litigation
Litigation as History
Forensic Science and Forensic Evidence: Sutherland Case

*People v. Sutherland: Forensic Science and Justice Issues
Conclusion*

**Chapter 34: Countering Chaos: Logic, Ethics, and the
Criminal Justice System**..... 667

Jon J. Nordby

Introduction

Legal Components of Reliability

Law Enforcement and the Law

Attorneys and the Law

Forensic Scientists, Scientific Values, and the Law

Organizational Codes of Scientific Conduct

Scientifically Reliable Methods

Scientific Testimony

Appendix A: Biohazard Safety Precautions679

Appendix B: Forensic Web Sites..... 685

**Appendix C: Trigonometric Tables: Sine and Tangent
Functions**691

Appendix D: Metric Measurements and Equivalents 693

Glossary 697
(Words highlighted in blue in text are terms included in the Glossary)
