# LEAN SIX SIGMA

## Using SigmaXL and Minitab

ISSA BASS AND BARBARA LAWTON, PH.D.

# Contents

Preface xiii
Acknowledgments xv

Introduction 1

An Overview of SigmaXL 3

SigmaXL menu bar 3
SigmaXL templates 5
Solution 6

Chapter 1. Define 9

Project Planning 9
The Gantt chart 10
Program evaluation and review technique (PERT) 13
Project Charter 15
Project number 16
Project champion 16
Project definition 16
Project description 17
Value statement 17
Stakeholders 17
Project monitoring 17
Scheduling 17
Alternative plans 17
Risk analysis 17
Capturing the Voice of the Customer 17
Capturing the voice of the external customer 19
Capturing the voice of the internal customer 21
Capturing the voice of the customers of a project 21
Capturing the voice of the next step in the process 21
Critical-to-Quality Tree 22
Kano analysis 24
Suppliers-Input-Process-Output-Customers (SIPOC) 26

Cost of Quality 29
Assessing the cost of quality 29
Cost of conformance 30
Preventive cost 30
Appraisal cost 31
Cost of nonconformance 31
Internal failure 31
External failure 31
Optimal Cost of Quality 34
Cost of Quality According to Taguchi 36
Stakeholder Analysis 38
Force field analysis (FFA) 39

Chapter 2. Measure 43

Data Gathering 43
Data Types 43
Attribute data 44
Variable data 44
Locational data 44
Basic Probability 44
So what is probability? 44
Discrete versus continuous distributions 44
Expected value, variance, and standard deviation of discrete distribution 45
Discrete probability distributions 47
Approximating binomial problems by Poisson distribution 56
Continuous distribution 56
$Z$ transformation 58
Planning for Sampling 66
Random Sampling versus Nonrandom Sampling 67
Random sampling 67
Nonrandom sampling 68
Nonsampling errors 68
Sampling error 68
Central Limit Theorem 69
Sampling distribution of the mean $\overline{X}$ 70
Estimating the population mean with large sample sizes 71
Estimating the population mean with small sample sizes and $\sigma$ unknown $t$-distribution 74
$\chi^2$ Distribution 77
Estimating sample sizes 80
Sample size when estimating the mean 81
Measurement Systems Analysis 82
Precision and Accuracy 86
Measurement errors due to precision 86
Variations due to accuracy 93
Gauge bias 94
Gauge linearity 96

Attribute Gauge Study 100
Assessing a Processes Ability to Meet Customers' Expectations—Process Capability Analysis 103
Process Capabilities with Normal Data 106
Estimating Sigma 106
Short-term sigma 106
Long-term sigma 107
Potential Capabilities 107
Short-term potential capabilities, $C_p$ and $C_r$ 107
Long-term potential performance 109
*Actual capabilities* 109
Capability indices and parts per million 111
Process capability and $Z$ transformation 111
Minitab output 115
Taguchi's capability indices $C_{PM}$ and $P_{PM}$ 116
Process Capability Analysis with Nonnormal Data 121
Normality Assumption and Box-Cox Transformation 122
Process Capability Using Box-Cox Transformation 123
Process Capability Using Nonnormal Distribution 128
Lean Six Sigma Metrics 130
Six Sigma metrics 131
First time yield (FTY) 133
Lean metrics 134
Work in Progress (WIP) 141

Chapter 3. Analyze 143

Brainstorming 143
Nominal Group Process 143
*Affinity Diagram* 144
Cause-and-Effect Analysis 146
Pareto Analysis 149
Using Minitab 152
Fault Tree Analysis 152
Seven Types of Waste 154
Overproduction 156
Wait 157
Unnecessary inventory 158
Motion 158
Unnecessary transportation 158
Inappropriate processing 159
Product defects 159
Lean Approach to Waste Reduction 159
Cycle Time Reduction 161
Takt time 162
Batch versus one-piece flow 164
Data Gathering and Process Improvement 165
Value stream mapping 166
How to map your value stream 167

*Failure Mode and Effect Analysis* 168
Failure mode assessment 170
Action plan 171
Hypothesis testing 174
P-value method 177
Nonparametric Hypothesis Testing 182
Chi-square test 182
Contingency analysis—Chi square test of independence 185
The Mann-Whitney U test 187
Normality testing 195
Normalizing data 196
Analysis of Variance 198
Mean square 200
Regression Analysis 204
Simple linear regression (or first-order linear model) 206
Multiple regression analysis 210

Chapter 4. Improve 213

Design of Experiments 213
Factorial Experiments 215
Main effect and interaction effect 216
$2^k$ Factorial design 217
$2^2$ Two factors and two levels 218
Degrees of freedom 222
Using Minitab 222
Interpretation 225
Using SigmaXL 225
Regression Model 234
SigmaXL output 236
Residual analysis 236
$2^k$ Two levels with more than 2 factors 237
Main effects for $2^3$—two levels with three factors 239
Blocking 252
Confounding 254
$2^{k-1}$ Fractional factorial design 256
$2^{3-1}$ Fractional factorial design 258
$2^{4-1}$ Factorial design 260
Design resolution 260
The Theory of Constraints 268
The process throughput is tied to the bottleneck 271
TOC Metrics 273
Thinking Process 273
The Goldratt Cloud 274
The Goldratt Reality Trees 275
Current reality tree 276
*Future reality tree* 278
5s 280

Chapter 5. Control 283

Statistical Process Control (SPC) 283
Variation Is the Root Cause of Defects 284
Assignable (or special) causes of variation 285
Common (or chance) causes of variation 286
How to build a control chart 287
Rational subgrouping 288
Probability for misinterpreting control charts 289
Type I error $\alpha$ 289
Type II error $\beta$ 291
How to determine if the process is out of control—WECO rules 293
Categories of Control Charts 295
Variable control charts 295
The mean and range charts—$\bar{X}$ and $R$ charts 296
Calculating the sample statistics to be plotted 296
Calculating the center line and control limits 297
Control limits for $\bar{X}$ chart 298
*Standard-error-based $\bar{X}$ chart* 298
Mean-range-based $\bar{X}$ control charts 299
Control limits for $R$ chart 302
The mean and standard deviation charts $\bar{X}$ and $s$ charts 305
Individual Values Control Charts 309
Individual Moving Range Charts 310
Individual Value Chart 311
Monitoring Shifts in the Process Mean 313
CUSUM 314
Computational Approach 317
Exponentially Weighted Moving Average 319
Attribute Control Charts 322
The $p$ chart 324
The $np$ chart 327
The $c$ chart 329
The $u$ chart 330

Appendix. Tables 333

Table A.1 *Binomial* 334
Table A.2 Poisson 339
Table A.3 Chi Square 343
Table A.4 Z Table 344
Table A.5 t Table 345
Table A.6 F Table 346

Index 347
