

A TEXTBOOK OF  
**Fluid  
Mechanics  
and  
Hydraulic  
Machines**  
in SI Units

R.K. RAJPUT

**S. CHAND**

# CONTENTS

## Part I — FLUID MECHANICS

Arts.	Page
<b>1. PROPERTIES OF FLUIDS</b>	<b>3-43</b>
1.1. Introduction	3
1.2. Fluid	4
1.3. Liquids and their Properties	4
1.4. Density	5
1.4.2 Mass density	5
1.4.2. Weight density	5
1.4.3 Specific volume	5
1.5. Specific Gravity	5
1.6. Viscosity	6
1.6.1 Newton's law of viscosity	7
1.6.2. Types of fluids	7
1.6.3. Effect of temperature on viscosity	10
1.6.4. <i>Effect of pressure on viscosity</i>	10
1.7. Thermodynamic Properties	24
1.8. Surface Tension and Capillarity	26
1.8.1. Surface tension	26
1.8.1.1. Pressure inside a water droplet, soap bubble and a liquid jet	27
1.8.2 Capillarity	29
1.9. Compressibility and Bulk Modulus	35
1.10. Vapour Pressure	38
<i>Highlights</i>	40
<i>Objective Type Questions</i>	41
<i>Theoretical Questions</i>	42
<i>Unsolved Examples</i>	42
<b>2. PRESSURE MEASUREMENT</b>	<b>44-96</b>
2.1. Pressure of a Fluid	44
2.2. Pressure Head of a Liquid	44
2.3. Pascal's Law	46
2.4. Absolute and Gauge Pressures	48
2.5. Measurement of Pressure	54
2.5.1. Manometers	54
2.5.1.1 Simple manometers	54
2.5.1.2 Differential manometers	64
2.5.1.3 <i>Advantages and limitations of manometers</i>	81
2.5.2 Mechanical gauges	81

2.6. Pressure at a point in Compressible Fluid	83
<i>Highlights</i>	90
<i>Objective Type Questions</i>	91
<i>Theoretical Questions</i>	93
<i>Unsolved Examples</i>	93
<b>3. HYDROSTATIC FORCES ON SURFACES</b>	<b>97—157</b>
3.1. Introduction	97
3.2. Total Pressure and Centre of Pressure	97
3.3. Horizontally Immersed Surface	97
3.4. Vertically Immersed Surface	98
3.5. Inclined Immersed Surface	116
3.6. Curved Immersed Surface	129
3.7. Dams	139
3.8. Possibilities of Dam Failure	141
3.9. Lock Gates	149
<i>Highlights</i>	154
<i>Objective Type Questions</i>	155
<i>Theoretical Questions</i>	155
<i>Unsolved Examples</i>	156
<b>4. BUOYANCY AND FLOATATION</b>	<b>158—189</b>
4.1. Buoyancy	158
4.2. Centre of Buoyancy	158
4.3. Types of Equilibrium of Floating Bodies	163
4.3.1. Stable equilibrium	163
4.3.2. Unstable equilibrium	163
4.3.3. Neutral equilibrium	163
4.4. Metacentre and Metacentric Height	163
4.5. Determination of Metacentric Height	164
4.5.1. Analytical Method	164
4.5.2. Experimental Method	165
4.6. Oscillation (Rolling) of a Floating Body	184
<i>Highlights</i>	186
<i>Objective Type Questions</i>	187
<i>Theoretical Questions</i>	188
<i>Unsolved Examples</i>	188

<b>5. FLUID KINEMATICS</b>	<b>190—252</b>
5.1. Introduction	190
5.2. Description of Fluid Motion	190
5.2.1. Lagrangian method	190
5.2.2. Eulerian method	191
5.3. Types of Fluid Flow	193
5.3.1. Steady and unsteady flows	193
5.3.2. Uniform and non-uniform flows	193
5.3.3. One, two and three dimensional flows	194
5.3.4. Rotational and irrotational flows	194
5.3.5. Laminar and turbulent flows	194
5.3.6. Compressible and incompressible flows	195
5.4. Types of Flow Lines	195
5.4.1. Path line	195
5.4.2. Streak line	195
5.4.3. Stream tube	196
5.4.4. Streak line	196
5.5. Rate of Flow or Discharge	204
5.6. Continuity Equation	204
5.7. Continuity Equation in Cartesian Co-ordinates	206
5.8. Equation of Continuity in Polar Co-ordinates	208
5.9. Circulation and Vorticity	215
5.10. Velocity Potential and Stream Function	223
5.10.1. Velocity potential	223
5.10.2. Stream function	224
5.10.3. Relation between stream function and velocity potential	226
5.11. Flow Nets	227
5.11.1. Methods of drawing flow nets	227
5.11.2. Uses and limitations of flow nets	228
<i>Highlights</i>	247
<i>Objective Type Questions</i>	249
<i>Theoretical Questions</i>	251
<i>Unsolved Examples</i>	251
<b>6. FLUID DYNAMICS</b>	<b>253—378</b>
6.1. Introduction	253
6.2. Different Types of Heads (or Energies) of a Liquid in Motion	253
6.3. Bernoulli's Equation	254
6.4. Euler's Equation for Motion	256

6.5.	Bernoulli's Equation for Real Fluid	270
6.6.	Practical Applications of Bernoulli's Equation	285
6.6.1.	Venturimeter	285
6.6.1.1	Horizontal venturimeters	286
6.6.1.2.	Vertical and inclined venturimeters	292
6.6.2.	Orificemeter	297
6.6.3.	Rotameter and elbow meter	302
6.6.3.1.	Rotameter	302
6.6.3.2	Elbow meter	303
6.6.4.	Pitot tube	304
6.7.	Free Liquid Jet	307
6.8.	Impulse-momentum Equation	314
6.9.	Kinetic Energy and Momentum Correction Factors (Coriolis Co-efficients)	330
6.10.	Momentum of Momentum Equation	336
6.11.	Vortex Motion	339
6.11.1.	Forced vortex flow	339
6.11.2.	Free vortex flow	339
6.11.3.	Equation of motion for vortex flow	340
6.11.4.	Equation of forced vortex flow	341
6.11.5.	Rotation of liquid in a closed cylindrical vessel	347
6.12.	Liquids in Relative Equilibrium	357
6.12.1.	Liquid in a container subjected to uniform acceleration in the horizontal direction	357
6.12.2	Liquid in a container subjected to uniform acceleration vertical direction	366
6.12.3	Liquid in container subjected to uniform acceleration along inclined plane	368
	<i>Highlights</i>	369
	<i>Objective Type Questions</i>	372
	<i>Theoretical Questions</i>	374
	<i>Unsolved Examples</i>	375
<b>7.</b>	<b>DIMENSIONAL AND MODEL ANALYSIS</b>	<b>379—447</b>
7.1.	Dimensional Analysis - Introduction	379
7.2.	Dimensions	380
7.3.	Dimensional Homogeneity	382
7.4.	Methods of Dimensional Analysis	382
7.4.1	Rayleigh's method	383
7.4.2.	Buckingham's $\pi$ -method/theorem	387
7.4.3.	Limitations of dimensional analysis	407

7.5. Model Analysis - Introduction	407
7.6. Similitude	408
7.7. Forces influencing Hydraulic Phenomena	409
7.8. Dimensionless Numbers and their Significance	410
7.8.1. Reynolds number	410
7.8.2. Froude number	410
7.8.3. Euler number	411
7.8.4. Weber number	411
7.8.5. Mach number	411
7.9. Model (or Similarity) Laws	412
7.10. Reynolds Model Law	412
7.11. Froude Model Law	425
7.12. Euler Model Law	436
7.13. Weber Model Law	437
7.14. Mach Model Law	438
7.15. Types of Models	440
7.15.1. Undistorted models	440
7.15.2. Distorted models	440
7.16. Scale Effect in models	441
7.17. Limitations of Hydraulic Similitude	442
<i>Highlights</i>	442
<i>Objective Type Questions</i>	444
<i>Theoretical Questions</i>	445
<i>Unsolved Examples</i>	446
<b>8. FLOW THROUGH ORIFICES AND MOUTHPIECES</b>	<b>448—497</b>
8.1. Introduction	448
8.2. Classification of Orifices	448
8.3. Flow through an Orifice	449
8.4. Hydraulic Co-efficients	449
8.4.1. Co-efficient of contraction	449
8.4.2. Co-efficient of velocity	450
8.4.3. Co-efficient of discharge	450
8.4.4. Co-efficient of resistance	450
8.5. Experimental Determination of Hydraulic Co-efficients	451
8.5.1. Determination of co-efficient of velocity ( $C_v$ )	451
8.5.2. Determination of co-efficient of discharge ( $C_d$ )	452
8.5.3. Determination of ( $C_c$ )	453
8.5.4. Loss of head in orifice flow	453

8.6. Discharge Through a Large Rectangular Orifice	461
8.7. Discharge Through Fully Submerged Orifice	463
8.8. Discharge Through Partially Submerged Orifice	464
8.9. Time required for Emptying a Tank Through an Orifice at its Bottom	465
8.10. Time required for Emptying a Hemispherical Tank	474
8.11. Time required for Emptying a Circular Horizontal Tank	477
8.12. Classification of Mouthpieces	480
8.13. Discharge Through an External Mouthpiece	481
8.14. Discharge Through a Convergent-Divergent Mouthpiece	483
8.15. Discharge Through an Internal Mouthpiece (or Re-entrant or Borda's Mouthpiece)	486
8.15.1. Mouthpiece running free	486
8.15.2. Mouthpiece running full	487
<i>Highlights</i>	492
<i>Objective Type Questions</i>	494
<i>Theoretical Questions</i>	495
<i>Unsolved Examples</i>	495
<b>9. FLOW OVER NOTCHES AND WEIRS</b>	<b>498—523</b>
9.1. Definitions	498
9.2. Types of Notches and Weirs	498
9.1.1. Types of notches	498
9.2.2. Types of weirs	499
9.3. Discharge Over a Rectangular Notch or Weir	499
9.4. Discharge Over a Triangular Notch or Weir	501
9.5. Discharge Over a Trapezoidal Notch or Weir	503
9.6. Discharge Over a Stepped Notch	504
9.7. Effect on Discharge Over a Notch or Weir Due to Error in the Measurement of Head	506
9.8. Velocity of Approach	508
9.9. Empirical Formulae for Discharge Over Rectangular Weir	508
9.10. Cipolletti Weir or Notch	511
9.11. Discharge Over a Broad-crested Weir	512
9.12. Discharge Over a Narrow-crested Weir	513
9.13. Discharge Over an Ogee Weir	513
9.14. Discharge Over Submerged or Drowned Weir	513
9.15. Time Required to Empty a Reservoir or a Tank with Rectangular and Triangular Weirs or Notches	516
<i>Highlights</i>	518

<i>Objective Type Questions</i>	520
<i>Theoretical Questions</i>	522
<i>Unsolved Examples</i>	523
<b>10. LAMINAR FLOW</b>	<b>524—594</b>
10.1. Introduction	524
10.2. Reynolds Experiment	524
10.3. Navier-stokes Equation of Motion	527
10.4. Relationship Between Shear Stress and Pressure Gradient	530
10.5. Flow of Viscous Fluid in Circular Pipes-Hagen Poiseuille Law	531
10.6. Flow of Viscous Fluid Through an Annulus	557
10.7. Flow of Viscous Fluid Between Two Parallel Plates	560
10.7.1. One plate moving and other at rest—couette flow	560
10.7.2. Both plates at rest;	562
10.8. Laminar Flow Through Porous Media	572
10.9. Power Absorbed in Bearings	573
10.9.1. Journal bearings	573
10.9.2. Foot-step bearings	575
10.9.3. Collar bearings	576
10.10. Loss of Head Due to Friction in Viscous Flow	577
10.11. Movement of Piston in Dashpot	579
10.12. Measurement of Viscosity	581
10.12.1. Rotating cylinder method	581
10.12.2. Falling sphere method	584
10.12.3. Capillary tube method	585
10.12.4. Efflux viscometers	587
<i>Highlights</i>	587
<i>Objective Type Questions</i>	591
<i>Theoretical Questions</i>	592
<i>Unsolved Examples</i>	593
<b>11. TURBULENT FLOW IN PIPES</b>	<b>595—628</b>
11.1. Introduction	595
11.2. Loss of Head Due to Friction in Pipe Flow—Darcy Equation	596
11.3. Characteristics of Turbulent Flow	598
11.4. Shear Stresses in Turbulent Flow	599
11.4.1. Boussinesq's theory	599
11.4.2. Reynolds theory	600
11.4.3. Prandtl's mixing length theory	600

11.5.	Universal Velocity Distribution Equation	600
11.6.	Hydrodynamically Smooth and Rough Boundaries	602
11.6.1.	Velocity distribution for turbulent flow in smooth pipes	603
11.6.2.	Velocity distribution for turbulent flow in rough pipes	605
11.7.	Common Equation for Velocity Distribution for Both Smooth and Rough Pipes	608
11.8.	Velocity Distribution for Turbulent Flow in Smooth Pipes by Power Law	610
11.9.	Resistance to Flow of Fluid in Smooth and Rough Pipes	611
	<i>Highlights</i>	623
	<i>Objective Type Questions</i>	625
	<i>Theoretical Questions</i>	626
	<i>Unsolved Examples</i>	627
<b>12.</b>	<b>FLOW THROUGH PIPES</b>	<b>629—715</b>
12.1.	Introduction	629
12.2.	Loss of Energy (or Head) in Pipes	629
12.3.	Major Energy Losses	629
12.3.1.	Darcy-Weisbach formula	630
12.3.2.	Chezy's formula for loss of head due to friction	630
12.4.	Minor Energy Losses	636
12.4.1.	Loss of head due to sudden enlargement	636
12.4.2.	Loss of head due to sudden contraction	643
12.4.3.	Loss of head due to obstruction in pipe	647
12.4.4.	Loss of head at the entrance to pipe	648
12.4.5.	Loss of head at the exit of a pipe	648
12.4.6.	Loss of head due to bend in the pipe	648
12.4.7.	Loss of head in various pipe fittings	648
12.5.	Hydraulic Gradient and Total Energy Lines	648
12.6.	Pipes in Series or Compound Pipes	659
12.7.	Equivalent Pipe	662
12.8.	Pipes in Parallel	665
12.9.	Syphon	690
12.10.	Power Transmission Through Pipes	694
12.11.	Flow Through Nozzle at the End of a Pipe	697
12.11.1.	Power transmitted through the nozzle	698
12.11.2.	Condition for transmission of maximum power through nozzle	698
12.11.3.	Diameter of the nozzle for transmitting maximum power	699

12.12	Water Hammer in Pipes	702
12.12.1.	Gradual closure of valve	702
12.12.2.	Instantaneous closure of valve, in rigid pipes	703
12.12.3.	Instantaneous closure of valve in elastic pipes	704
12.12.4.	Time required by pressure wave to travel from the valve to the tank and from tank to valve	705
	<i>Highlights</i>	707
	<i>Objective Type Questions</i>	710
	<i>Theoretical Questions</i>	712
	<i>Unsolved Examples</i>	712
<b>13.</b>	<b>BOUNDARY LAYER THEORY</b>	<b>716–772</b>
13.1.	Introduction	716
13.2.	Boundary layer Definitions and Characteristics	716
13.2.	Boundary layer thickness	718
13.2.2.	Displacement thickness	718
13.2.3.	Momentum thickness	719
13.2.4.	Energy thickness	719
13.3.	Momentum Equation for Boundary Layer by Vonkarman	729
13.4.	Laminar Boundary Layer	732
13.5.	Turbulent Boundary Layer	755
13.6.	Total Drag Due to Laminar and Turbulent Layers	758
13.7.	Boundary Layer Separation and its Control	762
	<i>Highlights</i>	766
	<i>Objective Type Questions</i>	768
	<i>Theoretical Questions</i>	770
	<i>Unsolved Examples</i>	771
<b>14.</b>	<b>FLOW AROUND SUBMERGED BODIES—DRAG AND LIFT</b>	<b>773—811</b>
14.1.	Introduction	773
14.2.	Force Exerted by a Flowing Fluid on a Body	773
14.3.	Expressions for Drag and Lift	774
14.4.	Dimensional Analysis of Drag and Lift	776
14.5.	Stream-lined and Bluff Bodies	786
14.6.	Drag on a sphere	786
14.6.1	Terminal velocity of a body	787
14.6.2	Applications of Stokes law	789
14.7.	Drag of a cylinder	791

14.8. Circulation and Lift on a Circular Cylinder	792
14.8.1. Flow patterns and development of lift	792
14.8.2. Position of stagnation points	793
14.8.3. Pressure at any point on the cylinder surface	794
14.8.4. Expression for lift on the cylinder (Kutta-Joukowski Theorem)	794
14.8.5. Expression for lift co-efficient for rotating cylinder	796
14.8.6. Magnus effect	797
14.8.9. Lift on an Airfoil	802
<i>Highlights</i>	805
<i>Objective Type Questions</i>	807
<i>Theoretical Questions</i>	810
<i>Unsolved Examples</i>	810
<b>15. COMPRESSIBLE FLOW</b>	<b>812—866</b>
15.1. Introduction	812
15.2. Basic Thermodynamic Relations	812
15.2.1. The characteristic equation of state	812
15.2.2. Specific heats	813
15.2.3. Internal energy	813
15.2.4. Enthalpy	814
15.2.5. Energy, work and heat	814
15.3. Basic Thermodynamic Processes	814
15.4. Basic Equations of Compressible Fluid Flow	815
15.4.1. Continuity equation	816
15.4.2. Momentum equation	816
15.4.3. Bernoulli's or energy equation	816
15.5. Propagation of Disturbances in Fluid and Velocity of Sound	824
15.5.1. Derivation of sonic velocity	824
15.5.2. Sonic velocity in terms of 'Bulk modulus'	825
15.5.3. Sonic velocity for isothermal process	825
15.5.4. Sonic velocity for adiabatic process	826
15.6. Mach Number	826
15.7. Propagation of Disturbance in Compressible Fluid	828
15.8. Stagnation Properties	830
15.8.1. Expression for stagnation pressure in compressible flow	830
15.8.2. Expression for stagnation density	833
15.8.3. Expression for stagnation temperature	833

15.9. Area-Velocity Relationship and Effect of Variation of Area for Subsonic, Sonic and Supersonic Flows	837
15.10. Flow of Compressible Fluid Through a Convergent Nozzle	839
15.11. Variables of Flow in Terms of Mach Number	843
15.12. Flow through Laval Nozzle (Convergent-Divergent Nozzle)	847
15.13. Shock Waves	852
15.13.1. Normal shock wave	852
15.13.2. Oblique shock wave	855
15.13.3. Shock strength	855
15.14. Measurement of Compressible Flow	856
15.15. Flow of Compressible Fluid Through Venturimeter	856
<i>Highlights</i>	859
<i>Objective Type Questions</i>	862
<i>Theoretical Questions</i>	864
<i>Unsolved Examples</i>	865
<b>16. FLOW IN OPEN CHANNELS</b>	<b>867—946</b>
16.1. Introduction	867
16.1.1. Definition of channel	867
16.1.2. Comparison between open channel and pipe flow	867
16.1.3. Types of channels	868
16.2. Types of Flow in Channels	868
16.2.1. Steady flow and unsteady flow	868
16.2.2. Uniform and non-uniform (or varied) flow	868
16.2.3. Laminar flow and turbulent flow	869
16.2.4. Subcritical flow, critical flow and supercritical flow	869
16.3. Definitions	870
16.4. Open Channel Formulae for Uniform Flow	871
16.4.1. Chezy's formula	871
16.5. Most Economical Section of Channel	876
16.5.1. Most economical rectangular channel section	876
16.5.2. Most economical trapezoidal channel section	879
16.5.3. Most economical triangular channel section	894
16.5.4. Most economical circular channel section	897
16.6. Open Channel Section for Constant Velocity at All Depths of Flow	901
16.7. Non-uniform Flow Through Open Channels	904
16.8. Specific Energy and Specific Energy Curve	904
16.9. Hydraulic Jump or Standing Wave	910
16.10. Gradually Varied Flow	925

16.10.1. Equation of gradually varied flow	925
16.10.2. Backwater curve and afflux	928
16.11. Measurement of Flow of Irregular Channels	935
16.11.1. Area of flow	936
16.11.2. Mean velocity of flow	936
<i>Highlights</i>	938
<i>Objective Type Questions</i>	942
<i>Theoretical Questions</i>	944
<i>Unsolved Examples</i>	945
<b>Additional Objective Type Questions</b>	<b>949—999</b>

## Part II — HYDRAULIC MACHINES

<b>17. IMPACT OF FREE JETS</b>	<b>1003—1051</b>
17.1. Introduction	1003
17.2. Force Exerted on a Stationary Flat Plate Held Normal to the Jet	1003
17.3. Force Exerted on a Stationary Flat Plate Held Inclined to the Jet	1004
17.4. Force Exerted on a Stationary Curved Plate	1005
17.5. Force Exerted on a Moving Flat Plate Held Normal to Jet	1012
17.6. Force Exerted on a Moving Plate Inclined to the Direction of Jet	1013
17.7. Force Exerted on a Curved Vane when the Vane is Moving in the Direction of Jet	1016
17.8. Jet Striking a Moving Curved Vane Tangentially at One Tip and Leaving at the Other	1022
17.9. Jet Propulsion of Ships	1040
17.10. Typical Examples (For Competitive Examinations)	1047
<i>Highlights</i>	1047
<i>Objective Type Questions</i>	1049
<i>Theoretical Questions</i>	1049
<i>Unsolved Examples</i>	1050
<b>18. HYDRAULIC TURBINES</b>	<b>1052—1171</b>
18.1. Introduction	1052
18.2. Classification of Hydraulic Turbines	1052
18.3. Impulse Turbines - Pelton Wheel	1054
18.3.1. Construction and working of Pelton wheel/turbine	1055
18.3.2. Work done and efficiency of a Pelton wheel	1056
18.3.3. Definitions of heads and efficiencies	1059
18.3.4. Design aspects of Pelton wheel	1061
18.4. Reaction Turbine	1079
18.4.1. Francis turbine	1080
18.4.1.1. Work done and efficiencies of a Francis turbine	1082
18.4.1.2. Working proportions of a Francis turbine	1084
18.4.1.3. Design of a Francis turbine runner	1084
18.4.1.4. Advantages and disadvantages of Francis turbine over a Pelton wheel	1086
18.4.2. Propeller and Kaplan turbines—Axial flow reaction turbines	1118
18.4.2.1. Propeller turbine	1118
18.4.2.2. Kaplan turbine	1119
18.4.2.3. Kaplan turbine versus Francis turbine	1121
18.5. Deriaz turbine	1126
18.6. Tubular or bulb turbines	1127

18.7. Runaway Speed	1128
18.8. Draft Tube	1128
18.8.1. Draft tube theory	1128
18.8.2. Types of draft tubes	1130
18.9. Specific Speed	1134
18.10. Unit Quantities	1139
18.11. Model Relationship	1140
18.12. Scale Effect	1148
18.13. Performance Characteristics of Hydraulic Turbines	1149
18.13.1. Main or constant head characteristic curves	1149
18.13.2. Operating or constant speed characteristic curves	1151
18.13.3. Constant efficiency or iso-efficiency or Muschel curves	1152
18.14. Governing of Hydraulic Turbines	1152
18.14.1. Governing of impulse turbines	1153
18.14.2. Governing of reaction turbines	1153
18.15. Cavitation	1154
18.16. Selection of Turbines	1157
18.17. Surge Tanks	1158
<i>Highlights</i>	1160
<i>Objective Type Questions</i>	1163
<i>Theoretical Questions</i>	1166
<i>Unsolved Examples</i>	1167
<b>19. CENTRIFUGAL PUMPS</b>	<b>1172—1239</b>
19.1. Introduction	1172
19.2. Classification of Pumps	1172
19.3. Advantages of Centrifugal Pump over Displacement (Reciprocating) Pump	1173
19.4. Component Parts of a Centrifugal Pump	1173
19.5. Working of a Centrifugal Pump	1176
19.6. Work done by the Impeller (or Centrifugal Pump) on Liquid	1176
19.7. Heads of a Pump	1179
19.8. Losses and Efficiencies of a Centrifugal Pump	1180
19.8.1. Losses in centrifugal pump	1180
19.8.2. Efficiencies of a centrifugal pump	1181
19.8.3. Effect of outlet vane angle on manometric efficiency	1182
19.9. Minimum Speed for Starting a Centrifugal Pump	1211
19.10. Effect of Variation of Discharge on the Efficiency	1213
19.11. Effect of Number of Vanes of Impeller on Head and efficiency	1215
19.12. Working Proportions of Centrifugal Pumps	1215

19.13. Multi-stage Centrifugal Pumps	1216
19.13.1. Pumps in series	1216
19.13.2. Pumps in parallel	1217
19.14. Specific Speed	1219
19.15. Model Testing and Geometrically Similar Pumps	1221
19.16. Characteristics of Centrifugal Pumps	1225
19.17. Net Positive Suction Head (NPSH)	1227
19.18. Cavitation in Centrifugal Pumps	1228
19.19. Priming of a Centrifugal Pump	1231
19.20. Selection of Pumps	1231
19.21. Operational Difficulties in Centrifugal Pumps	1232
<i>Highlights</i>	1232
<i>Objective Type Questions</i>	1234
<i>Theoretical Questions</i>	1236
<i>Unsolved Examples</i>	1237
<b>20. RECIPROCATING PUMPS</b>	<b>1240–1277</b>
20.1. Introduction	1240
20.2. Classification of Reciprocating Pumps	1240
20.3. Main Components and Working of a Reciprocating Pump	1241
20.4. Discharge, Work Done and Power Required to Drive Reciprocating Pump	242
20.4.1. Single-acting reciprocating pump	1242
20.4.2. Double-acting reciprocating pump	1243
20.5. Co-efficient of Discharge and Slip of Reciprocating Pump	1243
20.5.1. Co-efficient of discharge	1243
20.5.2. Slip	1244
20.6. Effect of Acceleration of Piston on Velocity and Pressure in the Suction and Delivery Pipes	1247
20.7. Indicator Diagrams	1249
20.7.1. Ideal indicator diagram	1249
20.7.2. Effect of acceleration in suction and delivery pipes on indicator diagram	1250
20.7.3. Effect of friction in suction and delivery pipes on indicator diagram	1257
20.7.4. Effect of friction and acceleration in suction and delivery pipes on indicator diagram	1258
20.8. Air Vessels	1265
<i>Highlights</i>	1273
<i>Objective Type Questions</i>	1275

<i>Theoretical Question</i>	1275
<i>Unsolved Examples</i>	1276

**21. MISCELLANEOUS HYDRAULIC MACHINES** **1278—1313**

21.1. Introduction	1278
21.2. Hydraulic Accumulator	1278
21.3. Hydraulic Intensifier	1286
21.4. Hydraulic Press	1289
21.5. Hydraulic Crane	1293
21.6. Hydraulic Lift	1296
21.7. Hydraulic Ram	1299
21.8. Hydraulic Coupling	1305
21.9. Hydraulic Torque Converter	1308
21.10. Air Lift Pump	1308
21.11. Jet Pump	1309
<i>Highlights</i>	1310
<i>Objective Type Questions</i>	1311
<i>Theoretical Questions</i>	1312
<i>Unsolved Examples</i>	1312

**22. WATER POWER DEVELOPMENT** **1314—1345**

22.1. Hydrology	1314
22.1.1. Definition	1314
22.1.2. Hydrologic cycle	1314
22.1.3. Measurement of run-off	1315
22.1.4. Hydrograph	1316
22.1.5. Flow duration curve	1318
22.1.6. Mass curve	1319
22.2. Hydro-power Plant	1323
22.2.1. Introduction	1323
22.2.2. Application of hydro-electric power plants	1324
22.2.3. Advantages and disadvantages of hydro-electric power plants	1324
22.2.4. Average life of hydro-plant components	1325
22.2.5. Hydro-plant controls	1325
22.2.6. Safety measures in hydro-electric power plants	1325
22.2.7. Preventive maintenance to hydro-plant	1326
22.2.8. Calculation of available hydro-power	1326
22.2.9. Cost of hydro-power plant	1327

22.2.10. Hydro-power development in India	1327
22.2.11. Combined hydro and steam power plants	1328
22.2.12. Comparison of hydro-power station with thermal power stations	1329
<i>Highlights</i>	1344
<i>Theoretical Questions</i>	1345
<i>Unsolved Examples</i>	1345
<b>Objective Type Test Questions</b>	<b>1349—1361</b>
<b>LABORATORY PRACTICALS</b>	<b>3—60</b>
<b>Index</b>	<b>(i)—(vi)</b>
