#### **Contents**

#### PREFACE xxiii

CHAPTER	1 Visions of the Future 1
Inti	roduction 1 The Self-Extinction Premise 1 Some Historic Examples 2
Fut	ure Environmental Challenges 3 Climate Change 3 Water Accessibility 4
Mee	eting the Challenges 4
Ho	w Will Societies Respond? 5
The	e Role of Economics 6  Debate 1.1 Ecological Economics Versus Environmental  Economics 7  The Use of Models 7
The	Road Ahead 8 The Issues 8 Debate 1.2 What Does the Future Hold? 9 An Overview of the Book 10
Sun	nmary 12
Dise	cussion Questions 12

### CHAPTER 2 Valuing the Environment: Concepts 14

Further Reading 13

Introduction 14

The Human Environment Relationship 14

The Environment as an Asset 14

The Economic Approach 16

Normative Criteria for Decision-Making 17

Evaluating Predefined Options 17

Debate 2.1 Should Humans Place an Economic Value on the Environment? 18

Example 2.1 Valuing Ecological Services from Preserved Tropical Forests 21	
Comparing Benefits and Costs Across Time 23	
Finding the Optimal Outcome 24 Static Efficiency 25 Dynamic Efficiency 27	
Applying the Concepts 27  Pollution Control 27  Example 2.2 Does Reducing Pollution Make  Economic Sense? 28  Preservation Versus Development 29	
Summary 29 Example 2.3 Choosing Between Preservation and Developme in Australia 30	nt
Discussion Question 31	
Problem 31	
Further Reading 31	
Appendix 32  The Simple Mathematics of Dynamic Efficiency 32	
CHAPTER 3 Valuing the Environment: Methods	33
Introduction 33	
Why Value the Environment? 34	
Valuing Benefits 34	
Types of Values 36	
Example 3.1 Valuing the Northern Spotted Owl 37	
Classifying Valuation Methods 38	
Example 3.2 Valuing Damage from Groundwater  Contamination Using Aparting Februarity 22	
Contamination Using Averting Expenditures 42 Example 3.3 Valuing Diesel Odor Reduction by Contingent	
Ranking 44	
Example 3.4 The Value of Wildlife Viewing 45	
Valuing Human Life 46	
Issues in Benefit Estimation 46	
Debate 3.1 Is Valuing Human Life Immoral? 47	
Primary Versus Secondary Effects 47 Tangible Versus Intangible Benefits 49	
Tangible Versus Intangible Benefits 49 Approaches to Cost Estimation 49	
The Survey Approach 49	
The Engineering Approach 49	
The Combined Approach 50	
The Treatment of Risk 50	
Choosing the Discount Rate 52	

A Critical Appraisal 54

Cost-Effectiveness Analysis 56

Impact Analysis 57

Example 3.6 NO, Control in Chicago: An Example of Cost-Effectiveness Analysis 58

Summary 59

Discussion Questions 60

Problems 60

Further Reading 61

#### CHAPTER 4 Property Rights, Externalities, and **Environmental Problems**

Introduction 62

Property Rights 63

Property Rights and Efficient Market Allocations 63

Efficient Property Right Structures 63

Example 4.1 Pollution in Centrally Planned Economies 64

Producer's Surplus, Scarcity Rent, and Long-Run

Competitive Equilibrium 67

Scarcity Rent 67

Externalities as a Source of Market Failure

The Concept Introduced 68

Types of Externalities 69

Improperly Designed Property Rights Systems 70

Other Property Rights Regimes 70

Example 4.2 Shrimp Farming Externalities in Thailand -71

Public Goods 74

Imperfect Market Structures 76

Example 4.3 Public Goods Privately Provided:

The Nature Conservancy 77

Divergence of Social and Private Discount Rates 78 Example 4.4 How Should OPEC Price Its Oil? 79

Government Failure

The Pursuit of Efficiency 81

Private Resolution Through Negotiation 81

The Courts: Property Rules and Liability Rules 81

Legislative and Executive Regulation 84

An Efficient Role for Government 85

Summary 85

Discussion Questions 86
Problems 86
Further Reading 87

### CHAPTER 5 Sustainable Development: Defining the Concept 88

Introduction 88

A Two-Period Model 89

Defining Intertemporal Fairness 93

Are Efficient Allocations Fair? 94

Applying the Sustainability Criterion 95

Example 5.1 The Alaska Permanent Fund 96

Example 5.2 Nauru: Weak Sustainability in the Extreme 98

Implications for Environmental Policy 99

Summary 99

Discussion Questions 100

Problems 101

Further Reading 101

Appendix 102

The Mathematics of the Two-Period Model 102

#### CHAPTER 6 The Population Problem 103

Introduction 103

Historical Perspective 104

World Population Growth 104

Population Growth in the United States 104

Effects of Population Growth on Economic Development 108

The Population/Environment Connection 114

Effects of Economic Development on Population Growth 114

Debate 6.1 Does Population Growth Inevitably Degrade the

Environment? 115

The Economic Approach to Population Control 118

Example 6.1 Achieving Fertility Declines in Low-Income
Countries: The Case of Kerala 123

Summary 124

Example 6.2 Income-Generating Activities as Fertility Control: Bangladesh 125 Discussion Questions 126 Problems 126 Further Reading 126

### CHAPTER 7 The Allocation of Depletable and Renewable Resources: An Overview

128

Introduction 128

A Resource Taxonomy 129

Efficient Intertemporal Allocations 133

The Two-Period Model Revisited 133

The N-Period Constant-Cost Case 134

Transition to a Renewable Substitute 135

Increasing Marginal Extraction Cost 137

Exploration and Technological Progress 139

Market Allocations 140

Appropriate Property Right Structures 140

Example 7.1 Technological Progress in the Iron Ore Industry 141

Environmental Costs 142

Summary 144

Problems 145

Further Reading 145

Appendix 146

Extensions of the Basic Depletable Resource Model 146

The N-Period, Constant-Cost, No-Substitute Case 146

Constant Marginal Cost with an Abundant

Renewable Substitute 147

Increasing Marginal Cost Case 148

Including Environmental Cost 149

# CHAPTER 8 Depletable, Nonrecyclable Energy Resources: Oil, Gas, Coal, and Uranium 150

Introduction 150

Example 8.1 Hubbert's Peak 151

Natural Gas: Price Controls 152

Oil: The Cartel Problem 157

Price Elasticity of Demand 157

Income Elasticity of Demand 158

Non-OPEC Suppliers 159
Compatibility of Member Interests 161

Oil: National Security Problem 162

Debate 8.1 How Should the United States Deal with the Vulnerability of Its Imported Oil? 164

Transition Fuels: Environmental Problems 166

Electricity 170

Example 8.2 Electricity Deregulation in California: What Happened? 173

The Long Run 174

Example 8.3 Tradable Energy Certificates: The Texas Experience 175

Summary 178
Discussion Questions 17
Problems 179

Further Reading 180

### CHAPTER 9 Recyclable Resources: Minerals, Paper, Glass, and More 181

Introduction 181

An Efficient Allocation of Recyclable Resources 182
Extraction and Disposal Cost 182
Example 9.1 Population Density and Recycling:
The Japanese Experience 183
Recycling: A Closer Look 184
Recycling and Virgin Ore Depletion 184

The Strategic-Material Problem Revisited 185
General Principles 185
Example 9.2 Lead Recycling 186
Government Response 187
Cobalt: A Case Study 187
Substitution and Vulnerability 188

Waste Disposal and Pollution Damage 189
Disposal Cost and Efficiency 189
The Disposal Decision 190
Disposal Costs and the Scrap Market 192
Subsidies on Raw Materials 192
Corrective Public Policies 193
Example 9.3 Pricing Trash in Marietta, Georgia 194
Pollution Damage 196
Example 9.4 Implementing the "Take-Back" Principle 197

Tax Treatment of Minerals 198
Product Durability 199
Functional Obsolescence 199
Fashion Obsolescence 200
Durability Obsolescence 200
Summary 202
Discussion Questions 203
Problems 204
Further Reading 204

#### CHAPTER 10 Replenishable but Depletable Resources: Water 206

Introduction 206

The Potential for Water Scarcity 207

The Efficient Allocation of Scarce Water 210

Surface Water 210 Groundwater 212

The Current Allocation System 213

Riparian and Prior Appropriation Doctrines 213

Sources of Inefficiency 215

Restrictions on Transfers 215

Federal Reclamation Projects and Agricultural

Water Pricing 216

Municipal and Industrial Water Pricing 217

Debate 10.1 What Is the Value of Water? 218

Instream Flows 218

Common Property Problems 219

#### Potential Remedies 219

Example 10.1 Using Economic Principles to Conserve Water in California 220

Example 10.2 Protecting Instream Uses Through Acquiring Water Rights 222

Example 10.3 Water Pricing in Zurich, Switzerland 226
Example 10.4 Politics and the Pricing of Scarce Water 228
Debate 10.2 Should Water Systems Be Privatized? 229

Summary 230

Discussion Questions 231

Problems 231

Further Reading 231

### CHAPTER II Reproducible Private-Property Resources: Agriculture 233

Introduction 233

Global Scarcity 234

Formulating the Global Scarcity Hypothesis 23

Testing the Hypothesis 23°

Outlook for the Future 237

Technological Progress 238

Allocation of Agricultural Land 239

Energy Costs 240

Environmental Costs 240

The Role of Agricultural Policies 243

Example 11.1 Do Mandatory Labels Correct

Externalities? 245

A Summing Up 246

Distribution of Food Resources 246

Defining the Problem 246

Debate 11.1 Should Genetically Modified Organisms

Be Banned? 247

Example 11.2 Are Consumers Willing to Pay a Premium for

GMO-Free Foods? 248

Domestic Production in Less Developed Countries 248

The Undervaluation Bias 250

Feeding the Poor 251

Feast and Famine Cycles 252

Summary 256

Discussion Ouestions 256

Problems 257

Further Reading 257

### CHAPTER 12 Storable, Renewable Resources: Forests 258

Introduction 258

Characterizing Forest Harvesting Decisions 260

Special Attributes of the Timber Resource 260

The Biological Dimension 260

The Economics of Forest Harvesting 261

Extending the Basic Model 265

Land Conversion 267

```
Sources of Inefficiency 268
     Perverse Incentives for the Landowner 269
     Perverse Incentives for Nations 271
       Biodiversity 271
       Climate Change 272
Poverty and Debt 272
Sustainable Forestry 273
Public Policy 274
     Changing Incentives 276
       Debt-Nature Swaps 276
     Example 12.1 Producing Sustainable Forestry Through
          Certification 277
       Extractive Reserves 278
       Conservation Easements and Land Trusts 278
       The World Heritage Convention 279
     Royalty Payments 280
Summary 280
     Example 12.2 Does Pharmaceutical Demand Offer Sufficient
          Protection to Biodiversity? 281
     Example 12.3 Trust Funds for Habitat Preservation 282
Discussion Ouestions 283
Problems 284
Further Reading 284
Appendix 285
     The Harvesting Decision: Forests 285
```

### CHAPTER 13 Renewable Common-Pool Resources: Fisheries and Other Species 286

Introduction 286

Efficient Allocations 287
The Biological Dimension 287
Static Efficient Sustainable Yield 289
Dynamic Efficient Sustainable Yield 291

Appropriability and Market Solutions 293
Example 13.1 Open-Access Harvesting of the Minke Whale 296
Example 13.2 Harbor Gangs of Maine 297

Public Policy Toward Fisheries 297
Aquaculture 297
Raising the Real Cost of Fishing 299
Taxes 301

Individual Transferable Quotas (ITQs) 302  Marine Reserves 305  Example 13.3 The Relative Effectiveness of Transferable Quotas and Traditional Size and Effort Restrictions in the Atlantic Sea Scallop Fishery 306  The 200-Mile Limit 308  The Economics of Enforcement 308  Preventing Poaching 309  Example 13.4 Local Approaches to Wildlife Protection: Zimbabwe 310
Summary 311
Discussion Questions 311
Problems 312
Further Reading 312
Appendix 313
The Harvesting Decision: Fisheries 313
ER 14 <b>Generalized Resource Scarcity</b> 316 Introduction 316 Factors Mitigating Resource Scarcity 317 Exploration and Discovery 317 Technological Progress 318 Substitution 318
Detecting Resource Scarcity 319  Example 14.1 Resource Scarcity in Historical  Perspective: Timber 320  Criteria for an Ideal Scarcity Indicator 320  Applying the Criteria 321  The Physical Indicators 321  Resource Prices 322  Scarcity Rent 323  Marginal Discovery Cost 324  Marginal Extraction Cost 324
Evidence on Resource Scarcity 325 Physical Indicators 325 Economic Indicators 329 Extraction Cost 329 Example 14.2 Geochemically Scarce Metals: How Would the Economy React? 330 Example 14.3 The Bet 333 Studies of Resource Price Trends 333

#### Discovery Cost 335 Juxtaposing Alternative Measures 335

Summary 336
Further Reading 336

### CHAPTER 15 Economics of Pollution Control: An Overview 338

Introduction 338

A Pollutant Taxonomy 339

Defining the Efficient Allocation of Pollution 340 Stock Pollutants 340 Fund Pollutants 342

Market Allocation of Pollution 344

Efficient Policy Responses 345

Example 15.1 Environmental Taxation in China 346

Cost-Effective Policies for Uniformly Mixed

Fund Pollutants 347

Defining a Cost-Effective Allocation 347

Cost-Effective Pollution Control Policies 348

Emission Standards 349

Emission Charges 349

Transferable Emission Permits 352

Cost-Effective Policies for Nonuniformly Mixed

Surface Pollutants 353

Debate 15.1 Should Developing Countries Rely on Market-Based Instruments to Control Pollution? 354

The Single-Receptor Case 355

Policy Approaches 357

The Many-Receptors Case 359

Other Policy Dimensions 360

The Revenue Effect 360

Responses to Changes in the Regulatory Environment 361

Example 15.2 The Swedish Nitrogen Charge 362

Instrument Choice Under Uncertainty 363

Product Charges: Another Form of Environmental Taxation 364

Summary 364

Example 15.3 The Irish Bag Levy 365

Discussion Questions 367

Problems 367

Further Reading 367

Appendix 368

The Simple Mathematics of Cost-Effective Pollution Control 368

Policy Instruments 369

#### CHAPTER 16 Stationary-Source Local Air Pollution 370

Introduction 370

Conventional Pollutants 371

The Command-and-Control Policy Framework 371

Debate 16.1 Should the New Source Review Program

Be Changed? 374

The Efficiency of the Command-and-Control

Approach 375

The Threshold Concept 376

The Level of the Ambient Standard 376

Debate 16.2 The Particulate and Smog Ambient Standards

Controversy 377

Uniformity 377

Timing of Emission Flows 378

Concentration Versus Exposure 378

Cost-Effectiveness of the Command-and-Control

Approach 378

Air Quality 379

Example 16.1 Controlling SO<sub>2</sub> Emissions by Command-and-

Control in Germany 381

Innovative Approaches 383

The Emissions Trading Program 383

The Emission Reduction Credit 383

The Offset Policy 384

The Bubble Policy 384

Netting 384

Banking 385

The Effectiveness of Emissions Trading 385

Smog Trading 387

Emission Charges 388

Hazardous Pollutants 389

Example 16.2 Technology Diffusion in the Chlorine

Manufacturing Sector 392

Summary 392
Discussion Questions 393
Problems 394
Further Reading 394

## CHAPTER 17 Regional and Global Air Pollutants: Acid Rain and Atmospheric Modification 395

Introduction 395 Regional Pollutants Acid Rain 396 What Is It? 396 The Effects 396 Example 17.1 Adirondack Acidification 397 The Transboundary Problem 398 Crafting a Policy 398 The Sulfur Allowance Program 400 Example 17.2 The Sulfur Allowance Program 401 Example 17.3 Why and How Do Environmentalists Buy Pollution? 402 Results of the Program 403 Global Pollutants 404 Ozone Depletion 404 Climate Change 407 Example 17.4 Tradable Permits for Ozone-Depleting Chemicals 408 Debate 17.1 Should Carbon Sequestration Be Credited? 411 Negotiations Over Climate-Change Policy Options 411 International Agreements on Climate Change 412 Example 17.5 The European Emissions Trading System (EU ETS) 414 Complementary Strategies 414 The Case for Emissions Trading 415 Controversies 416 The Timing of Policy 416 Debate 17.2 Is Global Greenhouse Gas Trading Immoral? 417 Creating Incentives for Participation in Climate-Change Agreements 418

Summary 419

Problems 421

Further Reading 421

Introduction 422

The Economics of Mobile-Source Pollution 424

Implicit Subsidies 424

Externalities 424

Consequences 425

Policy Toward Mobile Sources 426

History 426

Structure of the U.S. Approach 427

Certification Program 427

Associated Enforcement Program 427

Lead 428

Local Responsibilities 428

Alternative Fuels and Vehicles 429

Example 18.1 Project XL—The Quest for Effective,

Flexible Regulation 430

European Approaches 430

An Economic and Political Assessment 431

Example 18.2 Car-Sharing: Better Use of Automotive Capital? 432

Technology Forcing and Sanctions 433

Differentiated Regulation 433

Uniformity of Control 434

The Deterioration of New-Car Emission Rates 434

Inspection and Maintenance (I&M) Programs 434

Alternative Fuels 435

Lead Phaseout Program 436

Possible Reforms 436

Fuel Taxes 436

Example 18.3 Getting the Lead Out: The Lead Phaseout

Program 437

Congestion Pricing 437

Private Toll Roads 438

CAFE Standards 438

Example 18.4 Innovative Mobile-Source Pollution Control Strategies: Singapore 439

Debate 18.1 CAFE Standards or Fuel Taxes? 440

Parking Cash-Outs 441

Feebates 441

Pay-As-You-Drive (PAYD) Insurance 441

Accelerated Retirement Strategies 441

Example 18.5 Modifying Car Insurance as an Environmental Strategy 442

Example 18.6 Counterproductive Policy Design 443

Summary 443
Discussion Questions 445
Further Reading 445

#### CHAPTER 19 Water Pollution 446

Introduction 446

Nature of Water Pollution Problems 447

Types of Waste-Receiving Water 447

Sources of Contamination 447

Example 19.1 Incidents of Groundwater Pollution 448

Rivers and Lakes 448

Ocean Pollution 449

Types of Pollutants 450

Fund Pollutants 451

Stock Pollutants 452

Traditional Water Pollution Control Policy 453

Early Legislation 453

Subsequent Legislation 454

Point Sources 454

Nonpoint Sources 456

The Safe Drinking Water Act 456

Ocean Pollution 457

Oil Spills 457

Ocean Dumping 457

Citizen Suits 457

Efficiency and Cost-Effectiveness 458

Ambient Standards and the Zero-Discharge Goal 458

National Effluent Standards 459

Enforcement Problems 459

Allocating Control Responsibility 460

The European Experience 463

Example 19.2 Effluent Trading and the Cost of Reducing

Waste Treatment Discharges into Long

Island Sound 464

Municipal Waste Treatment Subsidies 466

The Allocation of Funds 466

Operation and Maintenance 466

Capital Costs 467

Pretreatment Standards 467

Nonpoint Pollution 467

Costs 467

Example 19.3 Cost-Effective Pretreatment Standards 468

Oil Spills 469

Citizen Suits 471

An Overall Assessment 472

Summary 473

Discussion Questions 474

Problem 474

Further Reading 474

#### CHAPTER 20 Toxic Substances 475

Introduction 475

Nature of Toxic Substance Pollution 476

Health Effects 477

Cancer 477

Reproductive Effects 477

Policy Issues 477

Number of Substances 477

Latency 478

Uncertainty 478

Market Allocations and Toxic Substances 479

Occupational Hazards 479

Example 20.1 Susceptible Populations in the

Hazardous Workplace 482

Product Safety 483

Third Parties 484

Current Policy 484

Common Law 484

Negligence 484

Example 20.2 Judicial Remedies in Toxic Substance Control:

The Kepone Case 485

Strict Liability 486

Criminal Law 486

Statutory Law 487

Federal Food, Drug, and Cosmetic Act 487

Occupational Safety and Health Act 488

Federal Environmental Pesticide Control Act 488

Resource Conservation and Recovery Act 488

Toxic Substances Control Act 489

Comprehensive Environmental Response, Compensation,

and Liability Act 489

The Toxic Release Inventory Program 490

The 33/50 Program 491

Proposition 65 491

International Agreements 492

An Assessment of the Legal Remedies 492  The Common Law 492  Judicial-Legislative Complementarity 492  Limitations of Judicial Remedies 493  Joint and Several Liability Doctrine 495  The Statutory Law 496  Balancing the Costs 496  Degree and Form of Intervention 497  Scale 498  Performance Bonds: An Innovative Proposal 498
Summary 499  Example 20.3 Performance Bonds for Brominated  Flame Retardants 500
Discussion Questions 501
Further Reading 501
0
CHAPTER 21 Environmental Justice 503
Introduction 503
The Incidence of Hazardous Waste Siting Decisions 504 History 504 Recent Research and the Emerging Role of Analysis Using GIS 505 The Economics of Site Location 506 The Policy Response 507 Environmental Justice in Canada and Europe 508 The Role of Risk Perception 509 Compensation as a Policy Instrument 509 Debate 21.1 Does Offering Compensation for Accepting an Environmental Risk Always Increase the Willingness to Accept the Risk? 510 The Incidence of Pollution Control Costs:
Individual Industries 510 A Competitive Industry 511 Incidence 511 Scale Effects 512 Monopoly 513 New-Source Bias 515 Debate 21.2 Jobs Versus the Environment: Which Side Is Right? 516
The Generation of Pollutants 517
The Incidence on Households 517  Air Pollution 517  Automobile Control 517  Stationary-Source Control 519

A Combined Assessment Greenhouse Gas Control 521 Water Pollution 521 Point Sources 522 Implications for Policy 523 Example 21.1 Distributional Impacts of RECLAIM 524 Summary 525 Discussion Questions 526 Further Reading 526 CHAPTER 22 Development, Poverty, and the Environment Introduction 52 The Growth Process 528 Nature of the Process 528 Increases in Inputs 528 Technological Progress 529 Potential Sources of Reduced Growth 529 Reduced Input Flows 529 Limits on Technological Progress 531 The Natural Resource Curse 532 Example 22.1 The "Natural Resource Curse" Hypothesis 532 Environmental Policy 533 Energy 533 Example 22.2 Jobs Versus the Environment: What Is the Evidence? 534 Outlook for the Near Future Population Impacts 536 The Information Economy 537 The Growth-Development Relationship 537 Conventional Measures 538 Alternative Measures 540 Adjusted Net Savings 540 Genuine Progress Indicator 541 Ecological Footprint 542 The Human Development Index 542 Growth and Poverty: The Industrialized Nations 543 The Effects on Income Inequality 543 Poverty in the Less Industrialized Nations 544 Appropriateness of the Traditional Model 545

Scale 545

Forms of Development 545

Barriers to Development 546

Population Growth 546

Land-Ownership Patterns 546

Trade Policies 547

Debt 548

Natural Disasters 549

Summary 549
Discussion Questions 551
Further Reading 551

#### CHAPTER 23 The Quest for Sustainable **Development** 552

Introduction 552

Sustainability of Development 553

Market Allocations 555

Efficiency and Sustainability 556

Example 23.1 Resource Depletion and Economic

Sustainability: Malaysia 558

Trade and the Environment 560

The Role of Property Rights 560

Pollution Havens and the Race to the Bottom 560

The Porter "Induced Innovation" Hypothesis 561

The Environmental Kuznets Curve 562

*Example 23.2 Has NAFTA Improved the Environment in Mexico?* 563

in Mexico? 563

Investor Protections: NAFTA's Chapter 11 564

Trade Rules Under GATT and the WTO 565

Debate 23.1 Should an Importing Country Be Able to Use Trade Restrictions to Influence Harmful Fishing Practices in an Exporting Nation? 566

A Menu of Opportunities 567

Agriculture 567

Energy 568

Waste Reduction 568

Managing the Transition 569

Example 23.3 Sustainable Development:

Three Success Stories 570

Opportunities for Cooperation 571

Example 23.4 Controlling Land Development with TDRs 572

Restructuring Incentives 573

The Full-Cost Principle 574

The Cost-Effectiveness Principle 575

The Property Rights Principle 576
The Sustainability Principle 577
The Information Principle 578
Example 23.5 Reputational Strategies for Pollution Control in Indonesia 579

Forced Transition 579
Defining the Target 580
Institutional Structure 580
Population Stabilization 580
Stock and Throughput Stabilization 581
Ensuring Distributional Fairness 581
Administration 581

Summary 582
Discussion Questions 583
Further Reading 584

#### CHAPTER 24 Visions of the Future Revisited 585

Addressing the Issues 585
Conceptualizing the Problem 585
Institutional Responses 587
Example 24.1 Private Incentives for Sustainable Development:
Can Adopting Sustainable Practices Be Profitable? 588
Sustainable Development 591
Example 24.2 Public/Private Partnerships: The Kalundborg
Experience 593
A Concluding Comment 595

PROBLEM SET ANSWERS 597 GLOSSARY 607 NAME INDEX 627 SUBJECT INDEX 633
