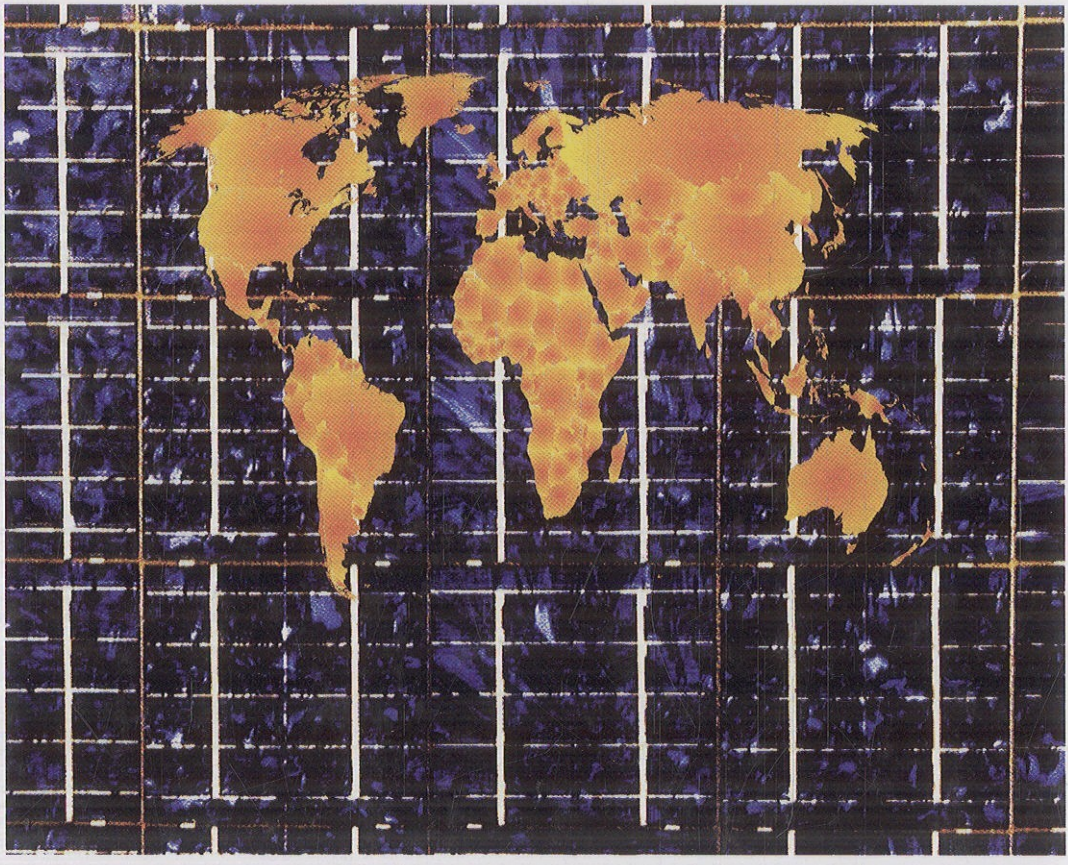
Alexis De Vos

WILEY-VCH

Thermodynamics of Solar Energy Conversion



Contents

1 Radiation *1*

1.1 Introduction *1*

1.2 Photon Modes ♡ *1*

1.3 Photon Statistics ♡ *4*

1.4 Planck's Law *7*

1.5 The Stefan–Boltzmann Law *10*

1.6 Kirchhoff's Law *11*

1.7 Why T^4? ♡ *12*

1.8 Exercises *14*

References *15*

2 The Solar System *17*

2.1 The Sun *17*

2.2 The Planets *20*

2.3 Starlight ♡ *22*

2.4 Moonlight ♡ *23*

2.5 Radiation from "Empty" Space ♡ *24*

2.6 Internal Heat Sources ♡ *25*

2.7 Conclusion *26*

2.8 Exercises *27*

References *27*

3 Thermodynamical Engines *29*

3.1 Introduction *29*

3.2 The Carnot Engine *29*

3.3 The Curzon–Ahlborn Engine *32*

3.4 Endoreversible Engines *38*

3.5 An Example *38*

3.6 The Stefan–Boltzmann Engine *41*

Thermodynamics of Solar Energy Conversion. Alexis De Vos

ISBN: 978-3-527-40841-2

3.7 Conclusion *46*
3.8 An Example *47*
3.9 Exercises *50*
References *50*

4 Wind Energy Creation *53*
4.1 Introduction *53*
4.2 Preliminary Model *53*
4.3 Final Model *57*
4.4 Why 8%? ♡ *60*
4.5 Tidal Winds and Zonal Winds *61*
4.6 Two Examples *65*
4.7 Exercises *67*
References *67*

5 Photothermal Conversion *69*
5.1 Introduction *69*
5.2 Solar Energy Efficiency *72*
5.3 The Müser Engine *75*
5.4 Why 13%? ♡ *76*
5.5 Concentrators *78*
5.6 The Müser Engine with Concentrator *80*
5.7 Selective Black Bodies *82*
5.8 The Müser Engine with Bandgap *84*
5.9 Conclusion *86*
5.10 An Example *86*
5.11 Exercises *89*
References *89*

6 Photovoltaic Conversion *91*
6.1 Introduction *91*
6.2 Semiconductors *91*
6.3 The Solar Cell *95*
6.4 An Example *101*
6.5 Exercises *103*
References *104*

7 Hybrid Conversion *105*
7.1 Introduction *105*
7.2 Is a Solar Cell Really an Endoreversible Engine? ♡ *105*
7.3 A Unified Model *108*
7.4 Alternative Model ♡ *113*

7.5 Onsager's Principle ♡ *115*
7.6 Examples *117*
7.7 Exercises *118*
References *119*

8 Multicolor Conversion *121*
8.1 Introduction *121*
8.2 Photothermal Multicolor Converters *121*
8.3 Photovoltaic Multicolor Converters *125*
8.4 Omnicolor Converters *127*
8.5 Two-Terminal Omnicolor Converters *130*
8.6 The Bose Engine ♡ *133*
8.7 Conclusion *134*
8.8 Two Examples *135*
8.9 Exercises *137*
References *137*

9 Chemical Reactions *139*
9.1 Introduction *139*
9.2 Reversible and Irreversible Chemical Engines *139*
9.3 The Generalized Endoreversible Engine *143*
9.4 Two Alternative Generalized Models ♡ *144*
9.5 The Endoreversible Chemical Reactor *147*
9.6 Conclusion *151*
9.7 Exercises *152*
References *153*

10 Photosynthesis *155*
10.1 Introduction *155*
10.2 The Photosynthesis Engine *156*
10.3 An Example *157*
10.4 Exercises *161*
References *162*

Post scriptum *163*
References *165*

Appendices

A **Constants** *167*

A.1 Mathematical Constants *167*

A.2 Physical Constants *168*

B **About the n-Dimensional Sphere** ♡ *169*

C **Kepler's Second Law** ♡ *173*

D **About a Fourth-Degree Equation** ♡ *177*

E **The General Chemical Reaction** ♡ *179*

F **List of Symbols** *183*

Index *191*
