

Seventh Edition

# Reinforced Concrete Design

PEARSON

*George F. Limbrunner*  
*Abi O. Aghayere*

# Contents

## **CHAPTER 1 MATERIALS AND MECHANICS OF BENDING 1**

1-1	Concrete	1
1-2	The ACI Building Code	2
1-3	Cement and Water	2
1-4	Aggregates	2
1-5	Concrete in Compression	3
1-6	Concrete in Tension	5
1-7	Reinforcing Steel	6
1-8	Beams: Mechanics of Bending Review	10
	References	18
	Problems	19

## **CHAPTER 2 RECTANGULAR REINFORCED CONCRETE BEAMS AND SLABS: TENSION STEEL ONLY 22**

2-1	Introduction	23
2-2	Analysis and Design Method	23
2-3	Behavior Under Load	25
2-4	Strength Design Method Assumptions	27
2-5	Flexural Strength of Rectangular Beams	28
2-6	Equivalent Stress Distribution	29
2-7	Balanced, Brittle, and Ductile Failure Modes	34
2-8	Ductility Requirements	35
2-9	Strength Requirements	39
2-10	Rectangular Beam Analysis for Moment (Tension Reinforcement Only)	41

2-11	Summary of Procedure for Rectangular Beam Analysis for $\phi M_n$ (Tension Reinforcement Only)	47
2-12	Slabs: Introduction	47
2-13	One-Way Slabs: Analysis for Moment	48
2-14	Rectangular Beam Design for Moment (Tension Reinforcement Only)	52
2-15	Summary of Procedure for Rectangular Reinforced Concrete Beam Design for Moment (Tension Reinforcement Only)	60
2-16	Design of One-Way Slabs for Moment (Tension Reinforcement Only)	61
2-17	Summary of Procedure for Design of One-Way Slabs for Moment (to Satisfy ACI Minimum $h$ )	64
2-18	Slabs on Ground	65
	References	66
	Problems	66

## CHAPTER 3 REINFORCED CONCRETE BEAMS: T-BEAMS AND DOUBLY REINFORCED BEAMS 72

3-1	T-Beams: Introduction	73
3-2	T-Beam Analysis	75
3-3	Analysis of Beams Having Irregular Cross Sections	81
3-4	T-Beam Design (for Moment)	84
3-5	Summary of Procedure for Analysis of T-Beams (for Moment)	90
3-6	Summary of Procedure for Design of T-Beams (for Moment)	92
3-7	Doubly Reinforced Beams: Introduction	93
3-8	Doubly Reinforced Beam Analysis for Moment (Condition I)	94
3-9	Doubly Reinforced Beam Analysis for Moment (Condition II)	99
3-10	Summary of Procedure for Analysis of Doubly Reinforced Beams (for Moment)	104
3-11	Doubly Reinforced Beam Design for Moment	106
3-12	Summary of Procedure for Design of Doubly Reinforced Beams (for Moment)	110
3-13	Additional Code Requirements for Doubly Reinforced Beams	111
	Problems	112

## CHAPTER 4 SHEAR IN BEAMS 120

4-1	Introduction	120
4-2	Shear Reinforcement Design Requirements	123
4-3	Shear Analysis Procedure	127
4-4	Stirrup Design Procedure	128
4-5	Torsion of Reinforced Concrete Members	140
	Problems	157

## **CHAPTER 5 DEVELOPMENT, SPLICES, AND SIMPLE-SPAN BAR CUTOFFS 162**

5-1	Development Length: Introduction	162
5-2	Development Length: Tension Bars	164
5-3	Development Length: Compression Bars	173
5-4	Development Length: Standard Hooks in Tension	173
5-5	Development of Web Reinforcement	178
5-6	Splices	180
5-7	Tension Splices	181
5-8	Compression Splices	182
5-9	Simple-Span Bar Cutoffs and Bends	182
5-10	Code Requirements for Development of Positive Moment Steel at Simple Supports	191
	Problems	193

## **CHAPTER 6 CONTINUOUS CONSTRUCTION DESIGN CONSIDERATIONS 199**

6-1	Introduction	199
6-2	Continuous-Span Bar Cutoffs	201
6-3	Design of Continuous Floor Systems	203
	Problems	225

## **CHAPTER 7 SERVICEABILITY 227**

7-1	Introduction	227
7-2	Deflections	227
7-3	Calculation of $I_{cr}$	229
7-4	Immediate Deflection	233
7-5	Long-Term Deflection	234
7-6	Deflections for Continuous Spans	239
7-7	Crack Control	239
	Problems	242

## **CHAPTER 8 WALLS 245**

8-1	Introduction	245
8-2	Lateral Forces on Retaining Walls	247
8-3	Design of Reinforced Concrete Cantilever Retaining Walls	251
8-4	Design Considerations for Bearing Walls	281
8-5	Design Considerations for Basement Walls	285
8-6	Shear Walls	286
	Problems	298

## **CHAPTER 9 COLUMNS 301**

9-1	Introduction	301
9-2	Strength of Reinforced Concrete Columns: Small Eccentricity	303
9-3	Code Requirements Concerning Column Details	306
9-4	Analysis of Short Columns: Small Eccentricity	308
9-5	Design of Short Columns: Small Eccentricity	310
9-6	Summary of Procedure for Analysis and Design of Short Columns with Small Eccentricities	315
9-7	The Load–Moment Relationship	315
9-8	Columns Subjected to Axial Load at Large Eccentricity	316
9-9	$\phi$ Factor Considerations	317
9-10	Analysis of Short Columns: Large Eccentricity	318
9-11	The Slender Column	334
	References	338
	Problems	339

## **CHAPTER 10 FOOTINGS 342**

10-1	Introduction	342
10-2	Wall Footings	344
10-3	Wall Footings Under Light Loads	353
10-4	Individual Reinforced Concrete Footings for Columns	354
10-5	Square Reinforced Concrete Footings	358
10-6	Rectangular Reinforced Concrete Footings	365
10-7	Eccentrically Loaded Footings	374
10-8	Combined Footings	375
10-9	Cantilever or Strap Footings	379
	Problems	382

## **CHAPTER 11 PRESTRESSED CONCRETE FUNDAMENTALS 384**

11-1	Introduction	384
11-2	Design Approach and Basic Concepts	385
11-3	Stress Patterns in Prestressed Concrete Beams	388
11-4	Prestressed Concrete Materials	390
11-5	Analysis of Rectangular Prestressed Concrete Beams	391
11-6	Alternative Methods of Elastic Analysis: Internal Couple Method	396
11-7	Alternative Methods of Elastic Analysis: Load Balancing Method	399
11-8	Flexural Strength Analysis	407
11-9	Notes on Prestressed Concrete Design	410
	References	410
	Problems	411

## **CHAPTER 12 CONCRETE FORMWORK 414**

12-1	Introduction	414
12-2	Formwork Requirements	415
12-3	Formwork Materials and Accessories	416
12-4	Loads and Pressures on Forms	420
12-5	The Design Approach	422
12-6	Design of Formwork for Slabs	430
12-7	Design of Formwork for Beams	441
12-8	Wall Form Design	448
12-9	Forms for Columns	456
	References	461
	Problems	461

## **CHAPTER 13 DETAILING REINFORCED CONCRETE STRUCTURES 464**

13-1	Introduction	464
13-2	Placing Drawings	465
13-3	Marking Systems and Bar Marks	466
13-4	Schedules	470
13-5	Fabricating Standards	471
13-6	Bar Lists	477
13-7	Extras	477
13-8	Bar Supports and Bar Placement	477
13-9	Computer Detailing	479
	References	481

## **APPENDIX A TABLES AND DIAGRAMS 482**

## **APPENDIX B SUPPLEMENTARY AIDS AND GUIDELINES 502**

B-1	Accuracy for Computations for Reinforced Concrete	502
B-2	Flow Diagrams	503

## **APPENDIX C METRICATION 508**

C-1	The International System of Units (SI)	508
-----	--	-----

C-2	SI Style and Usage	510
C-3	Conversion Factors	513
	References	524

## **APPENDIX D ANSWERS TO SELECTED PROBLEMS 525**

## **INDEX 528**
