Chapter 3	46 Steps to Improve Cost and Quality in the U.S. Healthcare System	45
------------------	---	-----------

Step 1	Define value from the perspective of the patient (customer)	46
Step 2	Map the patient's value stream	47
Step 3	Walk through all your core processes, and observe how they work in detail	48
Step 4	Implement Toyota-style lean production methods	50
Step 5	Train administrators, managers, and supervisors to be lean leaders	52
Step 6	Provide empathetic "change management" to ease the transition to lean	55
Step 7	Change "quality improvement department" to "quality and cost improvement department"	56
Step 8	Change the name "quality improvement manual" to "quality and cost improvement manual"	57
Step 9	Educate every employee about the basic strategic plan of the organization	57
Step 10	Establish an improvement plan with goals to be accomplished by specific people and dates	59
Step 11	Implement a simple scorecard for the entire healthcare organization	61
Step 12	Use a simple scorecard to monitor each department	63
Step 13	The board of directors initiates selected strategic quality and cost improvement goals	65
Step 14	Publish an annual quality report for simultaneous review with the annual financial report	66
Step 15	Create a rapid improvement team (RIT) to make quick cost and quality improvements	67
Step 16	Encourage RIT members to implement Toyota-style work teams	70
Step 17	Implement rapid improvement circles of employees (RICs)	74
Step 18	Implement a permanent organizational structure for quality and cost improvement	77

Step 19	Set a goal for each RIC member to produce one to four new suggestions per month	77
Step 20	Have a clear reward and recognition program, and communicate negative consequences	79
Step 21	Adopt and teach continuous improvement to as many people as possible in the organization	79
Step 22	The rapid improvement team quickly implements a 5S program	80
Step 23	Identify unnecessary items using red tags	83
Step 24	Promote visual control throughout the workplace and organization	83
Step 25	Eliminate all forms of waste	85
Step 26	Reduce specific examples of potential waste	103
Step 27	Sequence work and standardize it	109
Step 28	Eliminate bottlenecks to improve continuous flow	110
Step 29	Document all important processes in the organization or department	112
Step 30	Implement and maintain continuous improvement	113
Step 31	Consider radical improvement where appropriate	114
Step 32	Videotape each step of entire work processes	115
Step 33	Use flowcharts to improve core processes	116
Step 34	Use spaghetti diagrams to trace the path of a patient, employee, or product	117
Step 35	Measure process cycle times	117
Step 36	Implement quick changeovers within a process	118
Step 37	Complement nursing care delivery models with Lean	119
Step 38	Challenge and work with your extended network of suppliers and partners	120
Step 39	Automate processes to further improve quality and cost	122
Step 40	Learn from benchmark nonhealthcare organizations	122
Step 41	Learn from other benchmark healthcare organizations	127
Step 42	Learn from the institute for healthcare improvement	129
Step 43	Hold on to the gains you've achieved	129
