

Environmental ENGINEERING

WATER, WASTEWATER,
Soil and Groundwater Treatment and Remediation

SIXTH EDITION

Nelson L. NEMEROW, Franklin J. AGARDY, Patrick SULLIVAN, and Joseph A. SALVATO

CONTENTS

PREFACE	xiii
CONTRIBUTORS	xv
CHAPTER 1 WATER SUPPLY	1
<i>T. David Chinn</i>	
Introduction / 1	
Groundwater Pollution Hazard / 3	
Travel of Pollution through the Ground / 5	
Disease Transmission / 10	
Water Quantity and Quality / 10	
Water Cycle and Geology / 10	
Groundwater Flow / 13	
Groundwater Classification / 16	
Water Quality / 17	
Sampling and Quality of Laboratory Data / 26	
Sanitary Survey and Water Sampling / 30	
Sampling Frequency / 33	
Water Analyses / 36	
Heterotrophic Plate Count—The Standard Plate Count / 37	
Bacterial Examinations / 38	
Biological Monitoring / 42	
Virus Examination / 42	
Protozoa and Helminths Examination / 43	
Specific Pathogenic Organisms / 43	
Physical Examinations / 44	
Microscopic Examination / 46	
Chemical Examinations / 48	
Drinking Water Additives / 68	

Water Quantity / 69	
Water Conservation / 70	
Water Reuse / 75	
Source and Protection of Water Supply / 77	
General / 77	
Groundwater / 88	
Dug Well / 88	
Bored Well / 89	
Driven and Jetted Well / 90	
Drilled Well / 91	
Well Development / 93	
Grouting / 96	
Well Contamination—Cause and Removal / 99	
Spring / 101	
Infiltration Gallery / 101	
Cistern / 103	
Domestic Well-Water Supplies—Special Problems / 105	
Household Treatment Units (Point-of-Use and Point-of-Entry) / 108	
Desalination / 111	
References / 118	
Bibliography / 126	

CHAPTER 2 WATER TREATMENT

133

T. David Chinn

Treatment of Water—Design and Operation Control / 133	
Introduction / 133	
Surface Water / 134	
Treatment Required / 135	
Disinfection / 136	
Gas Chlorinator / 137	
Testing for Residual Chlorine / 138	
Chlorine Treatment for Operation and Microbiological Control / 139	
Distribution System Contamination / 145	
Plain Sedimentation / 146	
Microstraining / 146	
Coagulation, Flocculation, and Settling / 147	
Filtration / 149	

Slow Sand Filter /	149
Rapid Sand (Granular Media) Filter /	151
Direct Filtration /	157
Pressure Sand Filter /	160
Diatomaceous Earth Filter /	160
Package Water Treatment Plant /	161
Water Treatment Plant Wastewater and Sludge /	162
Causes of Tastes and Odors /	162
Control of Microorganisms /	163
Zebra Mussel and Its Control /	169
Aquatic Weed Control /	169
Other Causes of Tastes and Odors /	170
Methods to Remove or Reduce Objectionable Tastes and Odors /	172
Iron and Manganese Occurrence and Removal /	182
Corrosion Cause and Control /	187
Removal of Inorganic Chemicals /	197
Prevention and Removal of Organic Chemicals /	201
Water System Design Principles /	205
Water Quantity /	205
Design Period /	206
Watershed Runoff and Reservoir Design /	206
Intakes and Screens /	208
Pumping /	209
Distribution Storage Requirements /	210
Peak Demand Estimates /	213
Distribution System Design Standards /	217
Small Distribution Systems /	220
Fire Protection /	220
Cross-Connection Control /	222
Hydropneumatic Systems /	226
Pumps /	231
Displacement Pump /	231
Centrifugal Pump, Also Submersible and Turbine /	233
Jet Pump /	235
Air-Lift Pump /	235
Hydraulic Ram /	236
Pump and Well Protection /	237
Pump Power and Drive /	237

Automatic Pump Control /	239
Water Hammer /	239
Rural Water Conditions in the United States /	240
Design of a Household Water System /	242
Examples /	242
Design of Small Water Systems /	242
Design of a Camp Water System /	255
Water System Cost Estimates /	255
Cleaning and Disinfection /	257
Wells and Springs /	258
Pipelines /	260
Storage Reservoirs and Tanks /	261
Emergency Water Supply and Treatment /	262
Boiling /	263
Chlorination /	263
Iodine /	266
Filtration in an Emergency /	267
Bottled, Packaged, and Bulk Water /	267
References /	269
Bibliography /	278

CHAPTER 3 WASTEWATER TREATMENT AND DISPOSAL 283

John R. Kiefer

Disease Hazard /	283
Criteria for Proper Wastewater Disposal /	285
Definitions /	285
Small Wastewater Disposal Systems /	288
Wastewater Characteristics /	289
Soil Characteristics /	289
Soil Suitability /	290
Pollutant Travel from Septic Systems /	291
Soil Percolation Test /	291
Sewage Flow Estimates /	293
Septic Tank /	295
Care of Septic Tank and Subsurface Absorption Systems /	299
Subsurface Soil Absorption Systems /	301
Absorption Field System /	301

Leaching Pit / 305	
Cesspool / 305	
Dry Well / 306	
Small Wastewater Disposal Systems for Unsuitable Soils or Sites / 308	
General / 308	
Modified Septic Tank Soil Absorption System / 308	
Example / 309	
Capillary Seepage Trench / 309	
Raised Bed Absorption-Evapotranspiration System / 310	
Septic Tank Sand Filter System / 312	
Aerobic Sewage Treatment Unit / 315	
Septic Tank Mound System / 315	
Example 1 / 317	
Electric Osmosis System / 318	
Septic Tank Evapotranspiration System / 318	
Example 2 / 320	
Water Conservation / 321	
Sewage Works Design—Small Treatment Plants / 322	
Disinfection / 322	
Physical-Chemical Treatment / 326	
Sedimentation / 326	
Coagulation/Flocculation / 326	
Filtration / 327	
Activated Carbon Adsorption / 328	
Biological Treatment / 328	
Wastewater Reuse / 334	
Wastewater Aerosol Hazard / 335	
Wastewater Disposal by Land Treatment / 336	
Advanced Wastewater Treatment / 341	
Typical Designs for Small Treatment Plants / 344	
Standard-Rate Trickling Filter Plant with Imhoff Tank / 344	
High-Rate Trickling Filter Plant with Imhoff Tank / 346	
Intermittent Sand Filter Plant with Imhoff Tank or Septic Tank / 347	
Design of Large Treatment Plants / 347	
Biosolids Treatment and Disposal / 352	
Cost of Sewage Treatment / 357	

Industrial Wastes / 360

Hazardous and Toxic Liquid Wastes / 360

Pretreatment / 362

References / 363

Bibliography / 367

INDEX
