

# Environmental ENGINEERING

## PREVENTION and RESPONSE to Water-, Food-, Soil-, and Airborne Disease and Illness

SIXTH EDITION

Nelson L. NEMEROW, Franklin J. AGARDY, Patrick SULLIVAN, and Joseph A. SALVATO

# CONTENTS

---

<b>PREFACE</b>	<b>xv</b>
<b>CONTRIBUTORS</b>	<b>xvii</b>
<b>CHAPTER 1 DISEASE TRANSMISSION BY CONTAMINATED WATER</b>	<b>1</b>
<i>Richard F. Unz</i>	
Introduction / 1	
Control of Source (Agent Factors) / 3	
Control of Mode of Transmission / 5	
Control of Susceptibles (Host Factors) / 6	
Typical Epidemic Control / 8	
Waterborne Diseases / 12	
General / 12	
Survival of Pathogens / 13	
Substance Dose to Cause Illness / 15	
Summary of Characteristics and Control of Water- and Foodborne Diseases / 17	
Vehicle or Means by Which Waterborne Diseases Are Spread / 44	
Historical Waterborne Disease Background / 45	
Control and Prevention of Waterborne Diseases / 55	
Prevention of Waterborne Diseases / 56	
Schistosomiasis / 58	
Bioterrorism / 59	
Smallpox / 61	
Anthrax / 62	
Plague / 64	
Tularemia / 65	

Glanders / 65	
Botulism / 66	
Tetanus or Lockjaw / 67	
Noninfectious and Noncommunicable Diseases and Conditions Associated with the Water Environment / 67	
Background / 67	
Prevention and Control / 71	
Investigation of a Water Disease Outbreak / 72	
General / 72	
Samples and Specimens / 81	
Epidemiology and Risk / 83	
Molecular Detection of Waterborne Pathogens / 86	
References / 90	
Bibliography / 98	

## **CHAPTER 2    CONTROL OF DISEASES OF THE AIR AND LAND                      99**

*Nabarun Dasgupta*

Communicable Diseases / 99	
Background / 99	
Life Expectancy and Mortality / 101	
Framework for Disease Transmission / 106	
Regulatory Authorities in Health / 108	
Epidemic Control at the Individual Level / 109	
Behavioral Change / 110	
Antibiotics and Antivirals / 111	
Vaccination (or Immunization) / 111	
Control of Infectious Agents and Vectors / 113	
Environmental Control of Infectious Diseases / 114	
Arthropodborne Diseases / 116	
Zoonoses and Their Spread / 127	
Infectious Respiratory Diseases / 138	
Bioterrorism / 141	
Smallpox / 142	
Anthrax / 143	
Noncommunicable Diseases and Conditions Associated with the Environment / 143	
Background / 143	
Prevention and Control / 146	

Environmental Control Legislation /	147
Lead Poisoning /	151
Carbon Monoxide Poisoning /	154
Mercury Poisoning /	155
Illnesses Associated with Air Pollution—Lung Diseases /	157
Asbestos Diseases /	159
Malignant Neoplasms (Cancer) /	160
Cardiovascular Diseases /	160
Methemoglobinemia /	162
Dental Caries /	162
Hypothermia /	163
High Environmental Temperatures /	163
Skin Damage from Sunlight /	164
Tap Water Scalds /	165
Sporotrichosis /	165
Definitions /	165
Useful Internet Web Sites /	169
References /	169

### **CHAPTER 3    **FOODBORNE DISEASES****

**175**

*Nabarun Dasgupta*

Introduction /	175
Survival of Pathogens /	176
Infectious Dose /	177
Reservoir or Source of Disease Agents /	178
Humans as Reservoirs /	178
Animals as Reservoirs /	180
Food Spoilage /	181
Burden and Cost of Foodborne Illness /	183
Foodborne Disease Outbreak Surveillance /	184
Poultry /	185
Milk and Other Dairy Products /	186
Fruits and Vegetables /	188
Meat and Seafood /	188
Control and Prevention of Foodborne Diseases /	188
Prevention of Foodborne Diseases /	188
Mercury Poisoning /	197

Methemoglobinemia /	199
Dental Caries /	200
Sporotrichosis /	201
Nutritional Deficiency and Related Diseases /	201
References /	207

## **CHAPTER 4    APPROPRIATE TECHNOLOGY FOR DEVELOPING COUNTRIES**

**213**

*Harvey F. Ludwig*

Abbreviations /	213
Introduction /	215
Background /	215
History /	215
Problem of Developing Countries /	216
Summary of DC Problem /	217
Purpose of This Chapter /	219
Specific Subjects Included in This Chapter /	220
Environmental Governance /	223
Introduction /	223
Situation in DCs versus United States/ICs /	223
What DC and IAA Practitioners Can Do to Correct This Problem /	224
Role of the Private Sector /	225
Urban Water Supply /	225
Situation in United States/ICs /	225
Situation in Typical DCs /	226
Suggested Approach for Improving IAA Assistance to DCs /	227
Appropriate Water Quality Standards /	229
Water and Sewer Pipes in Same Trench /	229
Reuse of Treated Wastewater /	231
IAA-Sponsored Community Water Supply Programs /	231
Other Considerations /	232
Water Hyacinths /	233
Water Quality Analyses /	234
Water Quality Monitoring /	238
Role of Private Sector /	238

Integrated Economic-cum-Environmental Development Planning (IEEDP) /	240
Water Resources Management /	240
Reducing Water Irrigation Requirement /	241
China Studies Sponsored by World Bank /	241
Watershed Management /	242
Urban Sewerage and Excreta Management (USEM) /	242
Situation in ICs /	243
Situation in Typical DCs /	245
Sewerage-cum-Sanitation Systems for 100 Percent Excreta Management /	247
Sewage Treatment Systems /	247
Sewage Collection (Including Interceptors, Pumping, Transmission) /	248
Sewage Characteristics and Needs for Treatment and Point Source Control /	250
Sewage Flow Measurement /	250
Appropriate Standards /	251
Marine Sewage Disposal /	251
Buffer Area Requirements around Treatment/Pumping Plants /	253
Regional Water Pollution Control /	253
Industrial Wastewater Management /	253
Situation in ICs versus DCs /	253
Discharge into Municipal Sewerage Systems (MSSs) /	255
Discharge Directly to Environment /	256
Appropriate Standards /	257
Cleaner Production (CP) /	257
Industrial Estates /	258
Marine Disposal /	258
Abstract /	260
Urban Solid Waste Management /	261
Situation in United States versus DCs /	261
Practical Sanitary Landfilling Technology for DCs /	261
Experience in Asian DCs /	262
Alternative Disposal Methods /	264
Reclamation of Swamp Lowlands by Refuse Landfilling /	264

Urban Air Pollution Control /	269
Background /	269
Thailand: General Situation /	269
Thailand: Sharing of Controls for Multiple Industries /	270
Air Pollution Control Experience in India /	272
Hazardous Wastes Management /	276
Background /	276
Guidelines Manual for DCs /	276
Megacities: Rural to Urban Migration /	282
Background /	282
Economic Policies for Sustainable Development (ADB) /	282
Existing Situation in the DCs /	283
Urban Growth Management/Action Strategy /	285
Effective Control of Environmental Degradation /	287
Follow-up Evaluation of ADB Study /	288
Essay on Urban Population Growth in DCs /	290
Urban Slums /	292
Background /	292
Indonesia Kampung Improvement Projects (KIPs) /	292
Urban Sanitation /	295
Ports and Harbors /	295
Coastal City of Chonburi in Thailand /	296
Public Water Supply Taps /	296
Rural Sanitation /	298
Very Low Priority for Attention /	298
WHO Manuals /	298
Xiaolangdi Resettlement /	298
Farm Animal Manures /	300
Handwashing /	300
School Sanitation /	301
Hazard of Flies /	301
Septic Tanks for Coastal Homes on Stilts /	301
Water Treatment for Homes Using Surface Waters /	301
Public Health /	302
Assessment by Asian Development Bank /	302
Water Supply and Sanitation /	302
Disease Reporting /	303
Environmental Impact Assessment (EIA) /	305

Difficulties in Application of EIA Process to DCs /	305
Effective Use of EIA Process in DCs /	306
Recommended EIA Report Components /	309
Constraints for Construction Contractors /	310
Need for Effective Training /	312
Environmental Economics and Financing /	313
Inclusion of Environmental Values in Project	
Economic Analysis (PEA) /	313
Effect of EPMs on Project Economic and Financial	
Analyses /	313
Human Greed Parameter /	313
Economic-cum-Environmental Development	
Planning /	314
Value of Human Life /	314
Protecting Precious Eco-Resources /	314
Emergencies Management /	315
Technology Transfer (TT) /	315
Problem /	315
Recommendation /	317
Development Planning for DCs /	317
Social Parameters: Attention to Rural Poverty Poor /	317
Eco-Resources Protection /	319
Affordability of Environmental Improvements /	322
Integrated Economic-cum-Environmental	
Development Planning (IEEDP) /	322
Global Warming /	323
Problem /	323
Future of Environment in Developing Countries /	325
Problem of DCs /	325
Changes in Environmental Policy in the ICs /	325
Glimpse of Future /	326
Recommendations /	326
References /	326

## **CHAPTER 5 ENVIRONMENTAL EMERGENCIES AND EMERGENCY PREPAREDNESS**

**335**

*Piero M. Armenante and James P. Mack*

Introduction /	335
Emergency Planning for Industrial Facilities /	339

## Resources / 340

- Emergency Operations Centers (EOCs) / 341

- Media Center / 341

- Communication Equipment and Alarm Systems / 342

- Firefighting Facilities, Equipment, and Supplies / 344

- Spill and Vapor Release Control Equipment / 345

- Medical Facilities, Equipment, and Supplies / 345

- Meteorological Equipment / 346

- Security and Access Control Equipment / 346

- Environmental Testing Systems / 346

## Emergency Action Levels / 347

## Emergency Response Organization / 347

- Initial-Response Organization / 348

- Full Emergency Response Organization / 349

- Emergency Director (Site Emergency Coordinator) / 349

- Response Operations Coordinator / 349

- Incident Response Commander (IRC, Field  
Operations Coordinator) / 351

- Incident Response Team / 351

## Emergency Functions / 352

## Emergency Response Actions / 353

- Concept of Operations / 353

- Emergency Response Implementing Procedures / 353

- Environmental Considerations / 354

- Recovery, Reentry, and Restoration / 354

## Training, Exercises, and Plan Maintenance / 355

## Emergency Planning at the Local Level / 356

- Emergency Management / 356

- Leadership Commitment / 356

- Planning Team / 357

## Planning Process / 358

- Hazards Analysis / 358

- Damage Assessment and Recovery Operations / 360

- Resources / 360

- Content of the Plan and Procedures / 361

- Plan Integration / 362

Public Information / 363

Public Education / 363

Public Emergency Notification / 364

Conclusion / 364

References / 364
