Contents

| | |
|--|------------|
| <i>Preface</i> | <i>vii</i> |
| 1 Fundamentals of Mechanics | 1 |
| 1.1 Newton's Laws | 2 |
| 1.2 Frames of Reference | 3 |
| 1.3 Space-Time Symmetry | 5 |
| 1.4 Mechanics of a Particle | 5 |
| 1.5 Mechanics of a System of Particles | 10 |
| 1.6 Virial Theorem | 13 |
| 1.7 Generalised Coordinates | 15 |
| 1.8 Classification of Dynamical Systems | 16 |
| 1.8.1 Principle of virtual work | 18 |
| 1.8.2 D'Alembert's principle | 18 |
| 1.9 Generalised Force in Holonomic System | 19 |
| 1.10 Generalised Momentum | 20 |
| 1.11 Phase Space | 21 |
| 1.12 Exercise | 21 |
| 2 Rotating Frames of Reference | 23 |
| 2.1 Frames of Reference Rotating with Constant Angular Velocity | 23 |
| 2.2 Coriolis and Centrifugal Forces | 26 |
| 2.3 Effect of Coriolis Force | 30 |
| 2.3.1 Deviation of freely falling body from the vertical | 31 |
| 2.4 Foucault's Pendulum | 32 |
| 2.5 Exercise | 34 |
| 3 The Lagrangian and Hamiltonian Formulations | 37 |
| 3.1 Two Important Results | 37 |
| 3.2 Lagrange's Equations of Motion | 38 |
| 3.2.1 Velocity dependent potential | 46 |
| 3.3 Lagrange's Equations of a System Containing Dissipative Forces | 47 |
| 3.4 Expression for kinetic energy | 48 |

| | | |
|----------|--|------------|
| 3.5 | Lagrangian for a Charged Particle in an Electromagnetic Field | 58 |
| 3.6 | Lagrangian for Electrical Circuit | 60 |
| 3.7 | Two-body Problem Under Central Force | 62 |
| 3.7.1 | Equation of the orbit under central force | 63 |
| 3.7.2 | Kepler problem | 65 |
| 3.8 | Deduction of Hamilton's Equations of Motion | 68 |
| 3.8.1 | Properties of Hamiltonian and of Hamilton's equations of motion | 69 |
| 3.8.2 | Advantage of Hamiltonian over Lagrangian | 70 |
| 3.9 | Conservation Laws Using Lagrange's Equation | 73 |
| 3.9.1 | Conservation law of energy | 73 |
| 3.9.2 | Conservation theorem for generalised momentum | 75 |
| 3.9.3 | Conservation theorem for linear momentum | 75 |
| 3.9.4 | Conservation theorem for angular momentum | 76 |
| 3.10 | Routhian of a Dynamical System | 78 |
| 3.10.1 | Routhian equations of motion | 79 |
| 3.11 | Worked Out Examples | 82 |
| 3.12 | Exercise | 88 |
| 4 | Motion of a Rigid Body | 93 |
| 4.1 | Dynamics of Rigid Body when Rotating about a Fixed Point | 94 |
| 4.1.1 | Components of velocity | 94 |
| 4.1.2 | Components of angular momentum | 95 |
| 4.1.3 | Kinetic energy of a rigid body when rotating about a fixed point | 96 |
| 4.2 | Euler's Equations of Motion for a Rigid Body Rotation | 96 |
| 4.2.1 | Conservation of kinetic energy and angular momentum | 98 |
| 4.2.2 | Invariable line and invariable plane | 99 |
| 4.2.3 | Instantaneous axis of rotation | 100 |
| 4.3 | Solution of Euler's Dynamical Equations | 100 |
| 4.3.1 | Integrable cases of Euler's dynamical equations | 101 |
| 4.4 | Euler Angles | 110 |
| 4.4.1 | Components of angular velocity in terms of Euler angles | 113 |
| 4.5 | Motion of a Symmetrical Top | 114 |
| 4.5.1 | Lagrange's equation of motion | 117 |
| 4.5.2 | Steady precessional motion | 118 |
| 4.6 | Exercise | 120 |
| 5 | Variational Principles | 123 |
| 5.1 | Calculus of Variations: Deduction of Euler-Lagrange Equation | 123 |
| 5.2 | Derivation of Euler-Lagrange Differential Equations for Multiple Dependent Variables | 130 |

| | | |
|----------|--|------------|
| 5.3 | Functionals Dependent on Higher Order Derivatives | 134 |
| 5.4 | Functionals Dependent on Functions of Several Independent Variables | 136 |
| 5.5 | Hamilton's Principle | 138 |
| 5.6 | Deduction of Hamilton's Principle from D'Alembert's Principle | 139 |
| 5.7 | Deduction of Lagrange's Equations of Motion from Hamilton's Principle | 143 |
| 5.8 | Deduction of Lagrange's Equations of Motion for Non-conservative System | 144 |
| 5.9 | Deduction of Hamilton's Equations of Motion from Hamilton's Principle | 145 |
| 5.10 | Modified Hamilton's Principle | 147 |
| 5.11 | Δ -Variation and Principle of Least Action | 147 |
| 5.11.1 | Relation between Δ and δ variations | 151 |
| 5.12 | Exercise | 152 |
| 6 | Canonical Transformations | 157 |
| 6.1 | Introduction | 157 |
| 6.2 | Generating Functions and the Canonical Transformations | 158 |
| 6.3 | The Necessary and Sufficient Condition for a Transformation to be Canonical | 163 |
| 6.4 | Liouville's Theorem: Invariance of Phase-space Volume | 169 |
| 6.5 | Application of Canonical Transformation to Solve Harmonic Oscillator Problem | 171 |
| 6.6 | Exercise | 173 |
| 7 | Brackets | 175 |
| 7.1 | Poisson Bracket | 175 |
| 7.1.1 | Properties of poisson bracket | 175 |
| 7.1.2 | Hamilton's equations in terms of Poisson bracket | 178 |
| 7.1.3 | Canonical transformation in terms of Poisson bracket | 179 |
| 7.2 | Constant of Motion | 182 |
| 7.2.1 | Conservation laws | 183 |
| 7.3 | Infinitesimal Canonical Transformation | 184 |
| 7.4 | Expansion of Function in Terms of Poisson Bracket | 186 |
| 7.5 | Lagrange Bracket | 187 |
| 7.5.1 | Properties of Lagrange bracket | 187 |
| 7.5.2 | Relation between the Lagrange and Poisson brackets | 189 |
| 7.6 | Exercise | 191 |
| 8 | Hamilton-Jacobi Equation | 195 |
| 8.1 | Hamilton-Jacobi Equation | 195 |
| 8.2 | Separation of Variables in Hamilton-Jacobi Equation | 197 |
| 8.3 | Action and Action-Angle Variables | 205 |
| 8.4 | Exercise | 208 |

| | | |
|-----------|--|------------|
| 9 | Small Oscillations | 211 |
| 9.1 | Oscillations about Equilibrium | 211 |
| 9.2 | Free Vibration of a Diatomic Molecule | 214 |
| 9.3 | Free Vibration of a Linear Triatomic Molecule | 216 |
| 9.4 | Two Masses, Two springs and a Brick Wall | 219 |
| 9.5 | Double Pendulum as a Couple Oscillator | 221 |
| 9.6 | Transverse Oscillations of Masses on a Taut String | 222 |
| 9.7 | Vibrating String | 225 |
| 9.7.1 | Normal modes | 226 |
| 9.8 | Exercise | 229 |
| 10 | Special Theory of Relativity | 233 |
| 10.1 | The Galilean Transformation | 233 |
| 10.2 | Basic Postulates of Relativity | 234 |
| 10.3 | Lorentz Transformation | 235 |
| 10.4 | Consequences of Lorentz Transformation | 240 |
| 10.4.1 | Length contraction | 240 |
| 10.4.2 | Time dilation or apparent retardation of clock | 243 |
| 10.4.3 | Simultaneity | 245 |
| 10.4.4 | Transformation of velocities (addition of velocities) | 245 |
| 10.5 | Relativistic Momentum: Variation of Mass with Velocity | 246 |
| 10.6 | Relativistic Force, Work and Energy | 249 |
| 10.7 | Zero Rest Mass Particles | 252 |
| 10.8 | Space-time or Minkowski Four-vector | 253 |
| 10.9 | The Lagrangian in Relativistic Mechanics | 255 |
| 10.10 | Exercise | 256 |
| | Bibliography | 261 |
| | Index | 265 |
