Contents

<i>Preface</i>	v
Introduction to Finite Difference Method for PDE <i>Adimurthi and G.D. Veerappa Gowda</i>	1
Wavelet Analysis and Applications <i>N.M. Bujurke</i>	28
Discrete Dynamical System : Liapunov Exponent, Entropy and Complexity <i>C.G. Chakrabarti</i>	49
A Tour on the Theoretical Aspects of Spin Coating Technique <i>B.S. Dandapat</i>	61
On Regular to Chaotic Evolution of Dynamical Systems <i>M.K. Das</i>	78
Geometric Evolution of Curves and its Application to Integrable Systems and Pattern Formations <i>Partha Guha</i>	86
Important Quantum Features and Quantum Information Processing <i>Guruprasad Kar</i>	115
Chaotic Behavior in Field Theory Models <i>C. Nagaraja Kumar</i>	135
Solitary Wave Solutions of Class of Nonlinear Evolution Equations <i>C. Nagaraja Kumar</i>	139
Numerical Solution of Singular Integral Equations <i>B.N. Mandal</i>	143
Solitary Waves KdV Equation: Derivation from Nonlinear Shallow Water Wave Theory <i>B.N. Mandal</i>	164
Numerical Methods for Differential Equations <i>S. Natesan</i>	173
Finite-Difference Solution of Convection-Diffusion Equation with Application to Incompressible Navier-Stokes Equations <i>Pradip Niyogi</i>	214
Wavelet Analysis: An Introduction <i>D.V. Pai</i>	244

Boundary Integral Method in Elastostatic Crack and Elastodynamic Crack Scattering Problem	262
<i>A. Roy</i>	
Two Dimensional Korteweg-De Vries-Burgers (KdVB) Equation and Kadomtsev-Petviashvili Equations: Exact Travelling Wave Solutions	266
<i>Rajkumar Roychoudhury</i>	
Realization of Chaos and Fractals using Mathematica	272
<i>L.M. Saha</i>	
Quantum Entanglement-Fundamental Aspects	284
<i>Debasis Sarkar</i>
