Foreword	vii
Advisors	ix
Contributors and reviewers	x
Preface and user's guide	xi

Part 1

Drugs A to Z	3
Safe I.V. drug administration	
I.V. drug compatibilities	S2
Conversions and calculations	S6
Drug infusion rates	S7
Venipuncture and peripheral venous access	S10
Preventing and treating extravasation	S16
High-alert drugs	S17
Hazardous I.V. drugs	S18
Guidelines for administering hazardous drugs	S19
Avoiding dangerous abbreviations	S23
Common abbreviations	S24
I.V. drugs and drug names that look or sound alike	S26
Monitoring blood levels	S28
Anaphylaxis: Treatment guidelines	S30
Adult cardiac arrest: Treatment guidelines	S31
Pediatric cardiac arrest: Treatment guidelines	S32

Part 2

Less commonly used drugs	661
---------------------------------	------------

Part 3

Appendix	
Common laboratory values	692
Body surface area in adults	695
Body surface area in children	696

Contents

I.V. drug and solution compatibilities	697
Effects of dialysis on drug therapy	700
Identifying life-threatening adverse reactions	703
Selected references	710
Index	712
