

```
<element name="RecordControl">
  <element name="action">
    <attribute name="type">
      <choice>
        <value>create</value>
        <value>update</value>
        <value>suppress</value>
        <value>delete</value>
      </choice>
    </attribute>
  </element>
</element>
```

Putting XML *to Work in the Library*

► Tools for Improving
Access and Management

```
<element name="RecordControl">
  <element name="action">
    <attribute name="type">
      <choice>
        <value>create</value>
        <value>update</value>
        <value>suppress</value>
        <value>delete</value>
      </choice>
    </attribute>
  </element>
</element>
```
