

PDL HANDBOOK SERIES

Handbook of Plastics Joining

A Practical Guide, Second Edition

**Edited by
Michael J. Troughton**

Introduction	xxi
Part 1 JOINING PROCESSES	1
1 Heated Tool Welding	3
1.1 Process Description	3
1.2 Advantages and Disadvantages	4
1.3 Applications	4
1.4 Materials	5
1.5 Weld Microstructure	5
1.6 Equipment	5
1.7 Joint Design	6
1.8 Welding Parameters	7
1.9 Variants of Heated Tool Welding	8
1.9.1 High Temperature Welding	8
1.9.2 Heated Tool Welding of Plastics Pipes	8
1.9.2.1 Butt Fusion	8
1.9.2.2 Socket Fusion	10
1.9.2.3 Saddle/Sidewall Fusion	11
1.9.3 Heated Wedge Welding	12
References	13
2 Ultrasonic Welding	15
2.1 Process Description	15
2.2 Advantages and Disadvantages	15
2.3 Applications	16
2.4 Materials	16
2.4.1 Polymer Structure	16
2.4.2 Fillers and Reinforcements	18
2.4.3 Additives	18
2.4.4 Mold Release Agents	19
2.4.5 Material Grades	19
2.4.6 Moisture	19
2.4.7 Dissimilar Materials	19
2.5 Equipment	20
2.5.1 Power Supply/Generator	20
2.5.2 Transducer	21
2.5.3 Booster	21
2.5.4 Horns	22
2.5.5 Actuator	23
2.5.6 Fixtures	23
2.5.7 Controls	24
2.5.8 Machine Types	24
2.6 Joint Design	25
2.6.1 Energy Directors	26
2.6.2 Shear Joints	28
2.6.3 Part Design Considerations	30
2.7 Welding Parameters	31
2.7.1 Frequency	31
2.7.2 Weld Time	31
2.7.3 Weld Pressure/Force	31
2.7.4 Amplitude	32
2.7.5 Process Control	32

2.8	Variants of Ultrasonic Welding	32
2.8.1	Ultrasonic Spot Welding	32
2.8.2	Ultrasonic Welding of Fabrics and Films	33
	References	34
3	Vibration Welding	37
3.1	Process Description	37
3.2	Advantages and Disadvantages	37
3.3	Applications	38
3.4	Materials	39
3.5	Equipment	40
3.6	Joint Design	42
3.7	Welding Parameters	43
3.8	Process Variants	45
3.8.1	Linear Vibration Welding with IR Preheating	45
3.8.2	Orbital Friction Welding	45
3.8.3	Angular Friction Welding	46
	References	46
4	Spin Welding	49
4.1	Process Description	49
4.1.1	Spin Welding Modes	50
4.2	Advantages and Disadvantages	50
4.3	Applications	50
4.4	Materials	50
4.5	Equipment	51
4.5.1	Lower Tooling	52
4.5.2	Upper Tooling	52
4.6	Joint Design	52
4.7	Welding Parameters	54
4.7.1	Inertia Spin Welding	54
4.7.2	Direct-drive Spin Welding	55
	References	55
5	Radio Frequency Welding	57
5.1	Process Description	57
5.2	Advantages and Disadvantages	58
5.3	Applications	58
5.4	Materials	59
5.5	Equipment	59
5.5.1	RF Power Generator	59
5.5.2	Control Unit	59
5.5.3	Press	59
5.5.4	RF Enclosure	59
5.5.5	Handling Mechanism	60
5.5.6	Tooling	61
5.5.7	Barrier Materials	61
5.6	Joint Design	61
5.7	Welding Parameters	61
5.7.1	Power	62
5.7.2	Heating Time	62
5.7.3	Cooling Time	62
5.7.4	Weld Depth	62
5.7.5	Pressure	62
5.7.6	Platen Temperature	62
	References	63
6	Hot Gas Welding	65
6.1	Process Description	65
6.2	Advantages and Disadvantages	66

6.3	Applications	67
6.4	Materials	67
6.5	Equipment	67
6.5.1	Welding Nozzles	68
6.6	Joint Design	68
6.7	Welding Parameters	69
6.8	Variants of Hot Gas Welding	70
6.8.1	Manual Lap Welding	70
6.8.2	Automatic Hot Gas Welding	70
	References	71
7	Extrusion Welding	73
7.1	Process Description	73
7.2	Advantages and Disadvantages	73
7.3	Applications	74
7.4	Materials	74
7.5	Equipment	74
7.6	Joint Design	75
7.7	Welding Parameters	76
7.8	Variants of Extrusion Welding	77
7.8.1	Discontinuous Extrusion Welding	77
7.8.2	Stationary Extruder/Movable Welding Head	77
7.8.3	Sheet Extrusion Welding	77
7.8.4	Injection Welding	78
8	Laser Welding	81
8.1	Process Description	81
8.1.1	Introduction	81
8.1.2	Interaction of Light with Polymers	81
8.1.3	Direct Laser Welding	82
8.1.4	Transmission Laser Welding	82
8.2	Advantages and Disadvantages	83
8.3	Applications	83
8.3.1	Film and Sheet	83
8.3.2	Molded Parts	83
8.3.3	Textiles	85
8.4	Materials	87
8.4.1	Absorbers Used in Transmission Laser Welding	87
8.4.2	Laser Transmission Measurement of Plastics	87
8.5	Equipment	87
8.5.1	Introduction	87
8.5.2	Laser Types	87
8.5.3	Beam Delivery	88
8.5.4	Clamping	89
8.5.5	Absorber Application Equipment	90
8.5.6	Monitoring	90
8.6	Joint Design	91
8.7	Welding Parameters	91
8.7.1	Main Parameters and Effects	91
8.7.2	Modeling	94
8.8	Troubleshooting	94
	References	94
9	Infrared Welding	97
9.1	Process Description	97
9.1.1	IR Interaction with Polymers	97
9.1.2	Process Types	98
9.1.2.1	Surface Heating	98
9.1.2.2	Through-transmission IR Welding	99

9.2	Advantages and Disadvantages	100
9.3	Applications	101
9.4	Materials	101
9.5	Equipment	101
9.6	Joint Design	102
9.7	Welding Parameters	102
	References	103
10	Resistive Implant Welding	105
10.1	Process Description	105
10.1.1	Assembly	105
10.1.2	Welding	105
10.1.3	Cooling	105
10.2	Advantages and Disadvantages	106
10.3	Applications	106
10.4	Materials	106
10.5	Equipment	106
10.6	Welding Parameters	106
10.7	<i>Electrofusion Welding</i>	107
10.7.1	Process Description	107
10.7.2	Advantages and Disadvantages	108
10.7.3	Equipment	108
10.7.4	Welding Parameters	110
	References	110
11	Induction Welding	113
11.1	Process Description	113
11.2	Advantages and Disadvantages	114
11.3	Applications	115
11.4	Materials	115
11.4.1	Implant Materials	116
11.5	Equipment	117
11.5.1	Work Coils	118
11.6	Joint Design	118
11.7	Welding Parameters	120
	References	120
12	Heat Sealing	121
12.1	Process Description	121
12.1.1	Hot-bar Welding	121
12.1.2	Impulse Welding	121
12.2	Advantages and Disadvantages	122
12.3	Applications	123
12.4	Materials	124
12.5	Equipment	124
12.5.1	Hot-bar Welding	124
12.5.2	Impulse Welding	124
12.5.3	Automatic Heat Sealing	125
12.5.4	Continuous Heat Sealing	125
12.6	Welding Parameters	126
	References	126
13	Flash-Free Welding	127
13.1	Process Description	127
13.1.1	Welding of Pipes	127
13.1.2	<i>Welding of Sheet</i>	127
13.2	Advantages and Disadvantages	127
13.3	Applications	128
13.4	Materials	128
13.5	Equipment	128

13.6	Welding Parameters	129
	References	130
14	Friction Stir Welding	131
14.1	Process Description	131
14.1.1	Rotational Friction Stir Welding	131
14.1.2	Vertical Reciprocating FSW	131
14.1.3	Viblade Welding	132
14.2	Advantages and Disadvantages	132
14.3	Applications	132
14.4	Materials	133
14.5	Equipment	133
14.5.1	Rotational FSW	133
14.5.2	Vertical Reciprocating FSW	133
14.5.3	Viblade Welding	133
14.6	Welding Parameters	133
	References	133
15	Microwave Welding	135
15.1	Process Description	135
15.2	Advantages and Disadvantages	135
15.3	Applications	136
15.4	Materials	136
15.5	Equipment	136
15.6	Welding Parameters	137
	References	137
16	Solvent Welding	139
16.1	Process Description	139
16.2	Advantages and Disadvantages	140
16.3	Applications	140
16.4	Materials	140
16.5	Equipment	141
16.6	Application Methods	142
16.6.1	Capillary Method	142
16.6.2	Dip or Soak Method	142
16.7	Joint Design	142
16.8	Welding Parameters	143
	References	143
17	Adhesive Bonding	145
17.1	Process Description	145
17.1.1	Introduction	145
17.1.2	Mechanism of Adhesive Bonding	145
17.1.3	Interface Processes and the Role of Surface Preparation in Bonding	145
17.2	Advantages and Disadvantages	146
17.2.1	Advantages	146
17.2.2	Disadvantages	147
17.3	Applications	147
17.4	Curing of Thermosetting Adhesives	149
17.5	Classification of Adhesives	150
17.5.1	Chemical Type	150
17.5.2	Physical Form	150
17.5.3	Cure Mechanism	150
17.5.4	Function	150
17.6	Adhesive Types	151
17.6.1	Acrylics	151
17.6.1.1	Structural Methacrylates	151
17.6.1.2	Second-generation Acrylics	151
17.6.1.3	Cyanoacrylates	152

17.6.1.4	Light-curing Acrylics	153
17.6.1.5	Anaerobic Adhesives	153
17.6.2	Epoxies	154
17.6.2.1	Two-part Room Temperature Cured Epoxies	154
17.6.2.2	Two-part Heat-cured Epoxies	154
17.6.2.3	One-part Solid Epoxies	155
17.6.2.4	Epoxy Films	155
17.6.3	Elastomeric Adhesives	155
17.6.3.1	Contact Adhesives	155
17.6.3.2	Polyurethanes	156
17.6.3.3	Silicones	156
17.6.3.4	Polysulfides	156
17.6.3.5	Pressure Sensitive Adhesives	157
17.6.4	Hot Melt Adhesives	157
17.6.5	One-part Thermoplastic Emulsions	158
17.7	Surface Preparation Methods	158
17.7.1	Overview	158
17.7.2	Chemical Cleaning Treatments	158
17.7.2.1	Solvent Cleaning and Degreasing	158
17.7.2.2	Detergent Cleaning	159
17.7.2.3	Alkaline Cleaning	159
17.7.3	Mechanical Treatments	159
17.7.4	Surface Modification	159
17.7.4.1	<i>Etching or Oxidation</i>	159
17.7.4.2	Sodium Treatment	159
17.7.4.3	<i>Iodine Treatment</i>	159
17.7.4.4	Surface Grafting	160
17.7.4.5	Thermal Treatment	160
17.7.4.6	Primers	160
17.7.5	Electrical Discharge Treatments	160
17.7.5.1	Corona Discharge	160
17.7.5.2	Plasma Discharge	160
17.7.6	Other Surface Preparation Techniques	161
17.7.6.1	Laser Treatment	161
17.7.6.2	Transcrystalline Growth	161
17.7.6.3	Ultraviolet Radiation	161
17.7.6.4	Flame Treatment	161
17.7.6.5	Removal of Surface Layers	161
17.8	Factors Affecting Adhesive Bonding	162
17.8.1	Stress Cracking	162
17.8.2	Part Thickness and Colored Dyes in UV-curable Adhesives	162
17.9	Equipment and Application Methods	162
17.10	Joint Design	166
17.11	Hybrid Joining	171
17.12	Adhesive Bonding Tips	171
	References	172

18	Mechanical Fastening	175
18.1	Introduction	175
18.2	Machine Screws, Nuts, Bolts, and Washers	175
18.3	Self-tapping Screws	176
18.3.1	Description	176
18.3.2	Advantages and Disadvantages	176
18.3.3	Classification	177
18.3.3.1	Thread-forming Screws	177
18.3.3.2	Thread-cutting Screws	177
18.3.4	Types of Self-tapping Screw	177
18.3.5	Boss Design	177
18.3.5.1	Location	177
18.3.5.2	Gusset Supports	177
18.3.5.3	Boss Dimensions	178

	18.3.5.4 Draft Angles	179
	18.3.6 Torque	180
	18.3.7 Molded-in Threads	181
18.4	Inserts	181
	18.4.1 Description	181
	18.4.2 Molded-in Inserts	181
	18.4.2.1 Advantages and Disadvantages	182
	18.4.2.2 Boss and Insert Design	182
	18.4.2.3 Factors Affecting Molded-in Inserts	183
	18.4.3 Expansion Inserts	183
	18.4.4 Thermal Inserts	183
	18.4.5 Self-tapping Inserts	184
	18.4.6 Deformation and Recovery Inserts	185
	18.4.7 Ultrasonic Inserts	185
18.5	Interference Fits	187
	18.5.1 Description	187
	18.5.2 Design	187
	18.5.2.1 Calculation of Interference Limits	187
	18.5.2.2 Reduction of Stress Concentrations	187
	18.5.3 Stress Relaxation	187
18.6.	Snap-fits	188
	18.6.1 Description	188
	18.6.2 Advantages and Disadvantages	188
	18.6.3 Types of Snap-fit	188
	18.6.3.1 Cantilever Beam	188
	18.6.3.2 Annular	188
	18.6.4 Materials	188
	18.6.5 Design	189
	18.6.5.1 Mold Considerations	190
	18.6.5.2 Cantilever Snap-fits	190
	18.6.5.3 Annular Snap-fits	193
18.7	Rivets	195
	18.7.1 Description	195
	18.7.2 Advantages and Disadvantages	195
18.8	Staking	195
	18.8.1 Description	195
	18.8.2 Advantages and Disadvantages	195
	18.8.3 Cold Staking	195
	18.8.4 Heat Staking	196
	18.8.5 Hot Air Staking	197
	18.8.6 Ultrasonic Staking	197
	18.8.7 IR Staking	200
18.9	Swaging	200
	References	200

24.1	Polyetheretherketone	241
24.1.1	General	241
24.1.2	Heated Tool Welding	241
24.1.3	Ultrasonic Welding	242
24.1.4	Vibration Welding	242
24.1.5	Laser Welding	242
24.1.6	Resistive Implant Welding	243
24.1.7	Heat Sealing	244
24.1.8	Adhesive Bonding	244

24.2	Polyetherketoneetherketoneketone	248
24.2.1	General	248
24.2.2	Heated Tool Welding	248
24.2.3	Ultrasonic Welding	248
24.2.4	Vibration Welding	248
24.2.5	Hot Gas Welding	249
24.2.6	Adhesive Bonding	249
24.2.7	Mechanical Fastening	249
24.3	Polyetherketone	249
24.3.1	General	249
24.3.2	Adhesive Bonding	249
24.4	Polyetherketoneketone	250
24.4.1	Adhesive Bonding	250
24.4.2	Mechanical Fastening	250
24.5	Polyketone	250
24.5.1	Laser Welding	250
25	Polyamides	251
25.1	Nylon General	251
25.1.1	General	251
25.1.2	Heated Tool Welding	251
25.1.3	Ultrasonic Welding	251
25.1.4	Vibration Welding	253
25.1.5	Spin Welding	254
25.1.6	Laser Welding	254
25.1.7	Solvent Welding	254
25.1.8	Adhesive Bonding	256
25.1.9	Mechanical Fastening	257
25.2	Nylon 6	259
25.2.1	Heated Tool Welding	259
25.2.2	Ultrasonic Welding	260
25.2.3	Vibration Welding	260
25.2.4	Laser Welding	263
25.2.5	Induction Welding	265
25.2.6	Adhesive Bonding	265
25.2.7	Mechanical Fastening	267
25.3	Nylon 66	268
25.3.1	Heated Tool Welding	268
25.3.2	Ultrasonic Welding	268
25.3.3	Vibration Welding	269
25.3.4	Spin Welding	271
25.3.5	Laser Welding	272
25.3.6	Induction Welding	272
25.3.7	Microwave Welding	272
25.3.8	Mechanical Fastening	273
25.4	Nylon 612	273
25.4.1	Ultrasonic Welding	273
25.5	Nylon 46	273
25.5.1	Adhesive Bonding	273
25.6	Nylon 11	273
25.6.1	Heated Tool Welding	273
25.7	Nylon 12	274
25.7.1	General	274
25.7.2	Heated Tool Welding	274
25.7.3	Solvent Welding	274
25.7.4	Adhesive Bonding	275
25.8	Nylon 6/3T	275
25.8.1	General	275
25.8.2	Ultrasonic Welding	275

25.8.3	Solvent Welding	276
25.8.4	Adhesive Bonding	276
25.9	Polyphthalamide	276
25.9.1	General	276
25.9.2	Heated Tool Welding	276
25.9.3	Ultrasonic Welding	277
25.9.4	Vibration Welding	277
25.9.5	Spin Welding	277
25.9.6	Adhesive Bonding	278
25.9.7	Mechanical Fastening	279
25.10	Polyarylamide	279
25.10.1	Ultrasonic Welding	279
25.10.2	Adhesive Bonding	280
25.10.3	Mechanical Fastening	280
26	Polyamide-imide	283
26.1	Adhesive Bonding	283
26.2	Mechanical Fastening	284
27	Polycarbonate	287
27.1	General	287
27.2	Heated Tool Welding	288
27.3	Ultrasonic Welding	290
27.4	Vibration Welding	293
27.5	Spin Welding	297
27.6	Radio Frequency Welding	297
27.7	Laser Welding	297
27.8	Induction Welding	298
27.9	Heat Sealing	299
27.10	Solvent Welding	299
27.11	Adhesive Bonding	303
27.12	Mechanical Fastening	307
28	Polyesters	315
28.1	Polyethylene Terephthalate	315
28.1.1	General	315
28.1.2	Ultrasonic Welding	315
28.1.3	Hot Gas Welding	315
