

MUIR GRAY

EVIDENCE-BASED HEALTHCARE AND PUBLIC HEALTH

How to make decisions about
health services and public health

THIRD EDITION

CHURCHILL
LIVINGSTONE
ELSEVIER

Contents

PREFACE TO THIRD EDITION	xiii		
References			
CONFESSIONS OF AN AMANUENSIS	xv		
Reference			
HOW TO USE THIS BOOK	xvii		
Finding and appraising evidence	xvii		
Developing the capacity for evidence-based decision-making	xvii		
Getting research into practice	xviii		
Reference			
DEFINING OUR TERMS	xxi		
Defining words with words	xxi		
Defining words by their usage	xxi		
Word euthanasia	xxii		
Defining words by numbers	xxiv		
Meaning, reality and language	xxiv		
Indefinite definitions	xxv		
References			
PROLOGUE: THE GLOBALISATION OF HEALTHCARE PROBLEMS AND THEIR SOLUTIONS	1		
Common problems: common solutions	2		
Problems and solutions in poorer countries	3		
Pre-conditions for evidence-based healthcare	5		
The USA and the rest of the developed world	5		
Reference			
CHAPTER 1: EVIDENCE-BASED HEALTH SERVICES	11		
1.1 Evidence-based healthcare: a scientific approach to health services management	11		
1.2 Why focus on decision-making?	12		
Reference			
1.3 The drivers of decision-making: evidence, values, and resources and needs	13		
1.4 Evidence-based decision-making	13		
1.4.1 Skills for healthcare decision-makers			
1.4.2 Pre-requisites for good decision-making			
1.4.3 Reviewing decisions in the light of new evidence			
Reference			
1.5 Defining the scope of evidence-based healthcare	17		
1.5.1 Stage 1: Producing evidence			
1.5.1.1 Ignorance is a type of evidence			
1.5.2 Stage 2: Making evidence available			
1.5.3 Stage 3: Using evidence			
1.5.3.1 Evidence-based patient choice			
1.5.3.2 Evidence-based clinical practice			
1.5.3.3 Evidence-based policy-making, and paying for and managing health services on the basis of evidence			
References			
1.6 Realising the potential of evidence-based healthcare	23		
1.7 Strategic approaches to implementing evidence-based decision-making in healthcare systems	23		
1.7.1 Managed care			
1.7.2 Care pathways			
1.7.3 Clinical guidelines			
1.7.3.1 Who is accountable for guidelines?			
1.7.3.2 Clinical guidelines and the law			
References			
1.8 The limitations of healthcare in improving health	33		
1.8.1 Improving the health of populations			
1.8.2 Improving the health of individual patients			
1.8.2.1 Disease without illness			
1.8.2.2 Illness without disease			
References			
1.9 Evidence and other types of knowledge	36		
References			
1.10 Thinking and feeling	38		
1.10.1 The need for bounded rationality			
References			

CHAPTER 2: 'DOING THE RIGHT THINGS RIGHT' **41**

2.1 The growing need for evidence-based healthcare 41

2.1.1 Population ageing

2.1.2 New technology and new knowledge

2.1.3 Expectations about healthcare

2.1.3.1 Rising patient expectations

2.1.3.2 Rising professional expectations

References

2.2 The evolution of evidence-based healthcare 44

2.2.1 Doing things cheaper

2.2.2 Doing things better

2.2.3 Doing things right

2.2.4 Doing the right things

2.2.5 Doing the right things right

2.3 Decision rules for resource allocation in healthcare 48

Reference

2.4 Value for money in healthcare 50

2.4.1 Better value healthcare

Reference

2.5 The new management agenda for health services 52

2.5.1 Strategies to increase the good-to-harm ratio

2.5.1.1 Starting starting right

2.5.1.2 Stopping starting and starting stopping

2.5.1.3 Slowing starting

2.5.2 Promoting relevant research

2.5.2.1 Preventing unnecessary research

2.5.3 Managing change in clinical practice

2.5.4 Minimising health inequalities

References

2.6 The impact of science on clinical practice and healthcare costs 62

Reference

2.7 Who 'carries the can'? 64

2.8 Industry and evidence-based decision-making 65

CHAPTER 3: MAKING DECISIONS ABOUT HEALTH SERVICES **67**

3.1 Making decisions under pressure 67

3.1.1 Dealing with difficult decisions

3.1.2 Battalions of difficult decisions

Reference

3.2 Therapeutic and preventive interventions 69

3.2.1 Dimensions and definitions

3.2.2 Searching

3.2.3 Appraisal

3.2.3.1 The balance of good and harm

3.2.3.2 Assessing innovations in health service delivery

3.2.4 Getting research into practice

3.2.4.1 Therapy

3.2.4.2 Innovations in health service delivery

References

3.3 Tests 74

3.3.1 Dimensions and definitions

3.3.1.1 Sensitivity and specificity

3.3.1.2 Predictive values

3.3.1.3 Types of test result

3.3.1.4 Between a rock and a hard place

3.3.1.5 Tests: the producer's perspective

3.3.1.6 Tests: the clinician's perspective

3.3.1.7 Tests: the perspective of those who pay for healthcare

3.3.2 Searching

3.3.3 Appraisal

3.3.4 Getting research into practice

References

3.4 Screening 90

3.4.1 Dimensions and definitions

3.4.1.1 The changing balance of good and harm

3.4.2 Searching

3.4.3 Appraisal

3.4.4 Getting research into practice

References

3.5 Health policy 101

3.5.1 Dimensions and definitions

3.5.1.1 Healthcare policy

3.5.1.2 Public health policy

3.5.2 Searching

3.5.3 Appraisal

3.5.3.1 Appropriate study designs for evidence about healthcare policies

3.5.3.2 Natural experiments as sources of evidence about healthcare policy

3.5.3.3 Appraising research on public health policies

3.5.4 Getting research into practice

References

CHAPTER 4: FINDING GOOD-QUALITY EVIDENCE **109**

4.1	The searcher's problems	109
4.1.1	The relevance gap: absence of high-quality evidence	
4.1.2	The publication gap: failure to publish research results	
4.1.3	The hunting gap: difficulties in finding published research	
4.1.4	The quality gap: the need for critical appraisal	
4.1.4.1	Flaws in the methodology and reporting of research	
4.1.4.2	Misleading abstracts	
4.1.4.3	Peer review: the death of another sacred cow	
	References	
4.2	Coping alone	119
4.2.1	Becoming a better scanner	
4.2.2	Becoming a better searcher	
4.2.3	Becoming better at critical appraisal	
4.2.4	Use it or lose it	
4.3	A knowledge service for the 21st century	121
	Reference	
	Further reading	

CHAPTER 5: APPRAISING THE QUALITY OF RESEARCH **125**

5.1	What is research?	125
5.1.1	Hypothesis-testing research	
5.1.2	Fraud in medical research	
	References	
5.2	Choosing the right research method	129
5.3	Systematic reviews	129
5.3.1	Dimensions and definitions	
5.3.1.1	Meta-analysis	
5.3.2	Searching	
5.3.3	Appraisal	
5.3.3.1	Systematic reviews	
5.3.3.2	Systematic reviews including meta-analysis	
5.3.4	Uses and abuses	
	References	
5.4	Randomised controlled trials	140
5.4.1	Dimensions and definitions	
5.4.1.1	Mega trials	
5.4.1.2	Patient preference in trials	
5.4.1.3	'N of 1' trials	
5.4.2	Searching	
5.4.3	Appraisal	
5.4.3.1	Subgroup analysis	

5.4.4	Uses and abuses	
5.4.4.1	Interpretation and presentation	
5.4.4.2	Reporting trial end points	
	Further reading	
	References	
5.5	Case-control studies	154
5.5.1	Dimensions and definitions	
5.5.1.1	Study of the causation of disease	
5.5.1.2	Study of the adverse effects of treatment	
5.5.2	Searching	
5.5.3	Appraisal	
5.5.4	Uses and abuses	
	References	
5.6	Cohort studies	157
5.6.1	Dimensions and definitions	
5.6.1.1	The role of clinical databases	
5.6.2	Searching	
5.6.3	Appraisal	
5.6.4	Uses and abuses	
	References	
5.7	Controlled before and after studies	162
5.7.1	Dimensions and definitions	
5.7.2	Searching	
5.7.3	Appraisal	
5.7.4	Uses and abuses	
	Reference	
5.8	Interrupted time series	165
5.8.1	Dimensions and definitions	
5.8.2	Searching	
5.8.3	Appraisal	
5.8.4	Uses and abuses	
	Reference	
5.9	Surveys	168
5.9.1	Dimensions and definitions	
5.9.2	Searching	
5.9.3	Appraisal	
5.9.4	Uses and abuses	
	References	
5.10	Qualitative research	170
5.10.1	Dimensions and definitions	
5.10.2	Searching	
5.10.3	Appraisal	
5.10.4	Uses and abuses	
	References	
5.11	Decision analysis	173
5.11.1	Dimensions and definitions	
5.11.2	Searching	
5.11.3	Appraisal	
5.11.4	Uses and abuses	
	References	

**CHAPTER 6: ASSESSING THE
OUTCOMES FOUND 181**

6.1 Five key questions about outcomes 181

- 6.1.1 How many outcomes were studied?
- 6.1.2 How large were the effects found?
 - 6.1.2.1 Which yardstick?
- 6.1.3 With what degree of confidence can the results of the research be applied to the whole population?
- 6.1.4 Does the intervention do more good than harm?
- 6.1.5 How relevant are the results to the local population or service?

6.2 Measuring outcomes 187

- 6.2.1 Problems and pitfalls of performance measurement
 - 6.2.1.1 Natural problems
 - 6.2.1.2 Man-made problems
 - 6.2.1.3 Resurgence of outcome measures in the measurement of quality
- 6.2.2 In praise of process

References

6.3 Equity 189

- 6.3.1 Dimensions and definitions
 - 6.3.1.1 Measuring equity
 - 6.3.1.2 Assessing equity: evidence-based cuts at the margin
- 6.3.2 Searching
- 6.3.3 Appraisal
- 6.3.4 Applicability and relevance

References

6.4 Effectiveness 192

- 6.4.1 Dimensions and definitions
 - 6.4.1.1 Assessing effectiveness from the patient's perspective
 - 6.4.1.2 Improving outcomes by providing emotional support
 - 6.4.1.3 Improving outcomes through patient participation
 - 6.4.1.4 Improving outcomes through process: in the absence of an effective technical intervention
- 6.4.2 Searching
- 6.4.3 Appraisal
 - 6.4.3.1 Experimental studies of effectiveness
 - 6.4.3.2 Observational studies of effectiveness
- 6.4.4 Applicability and relevance

References

6.5 Safety 201

- 6.5.1 Dimensions and definitions
- 6.5.2 Searching
- 6.5.3 Appraisal
 - 6.5.3.1 Which method?
 - 6.5.3.2 Appraising the quality of studies on safety
- 6.5.4 Applicability and relevance

References

6.6 Patient satisfaction and patients' experience of care 207

- 6.6.1 Dimensions and definitions
 - 6.6.1.1 Acceptability of care
 - 6.6.1.2 Patient satisfaction
 - 6.6.1.3 Patients' experience of care
 - 6.6.1.4 The benefits of measuring patient experience
- 6.6.2 Searching
- 6.6.3 Appraisal
- 6.6.4 Applicability and relevance

References

6.7 Cost-effectiveness 213

- 6.7.1 Dimensions and definitions
 - 6.7.1.1 Productivity
 - 6.7.1.2 Efficiency and cost-effectiveness
 - 6.7.1.3 The use of quality-adjusted outcome measures: QALYs and DALYs
 - 6.7.1.4 Marginal and opportunity costs
 - 6.7.1.5 Evaluations of cost-effectiveness
- 6.7.2 Searching
- 6.7.3 Appraisal
- 6.7.4 Applicability and relevance

References

6.8 Quality 221

- 6.8.1 Dimensions and definitions
 - 6.8.1.1 Quality assessment by measuring the process of care
 - 6.8.1.2 Quality assessment by measuring the outcome of care
 - 6.8.1.3 Reporting outcomes in the public domain
- 6.8.2 Searching for and appraising evidence on standards of care
 - 6.8.2.1 Searching for papers on quality standards
 - 6.8.2.2 Appraising evidence on quality standards
- 6.8.3 Searching for and appraising evidence on variations in healthcare outcome

6.8.3.1	Searching for papers on <i>variations in healthcare outcome</i>	
6.8.3.2	Appraising evidence on <i>variations in healthcare outcome</i>	
6.8.4	Applicability and relevance	
	References	
6.9	Appropriateness	231
6.9.1	Dimensions and definitions	
6.9.1.1	Appropriateness for individual patients	
6.9.1.2	Appropriateness for groups of patients or populations	
6.9.1.3	Identifying concerns about appropriateness	
6.9.1.4	It may be appropriate but is it necessary?	
6.9.1.5	Who defines necessity?	
6.9.1.6	Medical futility	
6.9.2	Searching	
6.9.3	Appraisal	
6.9.4	Applicability and relevance	
	References	

CHAPTER 7: EVIDENCE-BASED HEALTH SERVICE MANAGEMENT 247

7.1	Creating the context for an evidence-based organisation	247
7.1.1	Tacit and explicit knowledge management	
7.1.1.1	Knowledge from experience	
7.1.2	The learning organisation	
7.1.3	Hypertext organisations	
7.1.4	The evidence-based knowledge-rich learning organisation	
	References	
7.2	Culture	252
7.2.1	The evidence-based chief executive	
7.2.2	The evidence-based board	
7.3	Systems	254
7.3.1	Systems that provide evidence	
7.3.1.1	The 'evidence centre'	
7.3.1.2	The National Library for Health	
7.3.2	Systems that promote the use of evidence	
7.3.2.1	Evidence-based clinical audit	
7.3.2.2	Training for evidence-based decision-making	
7.3.3	Systems that consume and use evidence	
7.3.3.1	Systems that should be more evidence-based	

7.3.3.2	Systems for managing <i>innovation</i>	
	References	
7.4	Change management	265
7.4.1	Evidence-based re-organisation?	
	References	
7.5	Evidence-based primary care	267
7.5.1	Improving access: promoting finding	
7.5.1.1	Ease of access to information	
7.5.1.2	Provision of relevant information	
7.5.2	Improving appraisal skills	
	References	
7.6	Paying for or commissioning healthcare using the evidence base	271
7.6.1	Resource re-allocation among disease management systems	
7.6.2	Resource re-allocation within a single disease management system	
7.6.3	Managing innovation	
7.6.3.1	Promoting innovation: starting starting right	
7.6.3.2	Stopping starting	
7.6.3.3	Starting stopping	
7.6.3.4	Promoting trials	
7.6.4	Improving the quality of care	
7.6.4.1	Competition as a way of improving healthcare	
7.6.5	Evidence-based insurance	
7.6.6	'Black belt' decision-making	
7.6.7	The limits of structural reform	
	References	
7.7	The ethics of prioritisation	288
7.7.1	Prioritising the good of the individual or that of society?	
7.7.2	Decision-making in the context of prioritisation	
	References	
7.8	Evidence-based policy making	290
7.8.1	The dominance of values in policy-making	
7.8.2	The influence of budgetary pressures	
7.8.3	The growing influence of evidence in policy-making	
7.8.4	Evidence-based healthcare policy-making	
7.8.5	Evidence-based policy-making in the developing world	
	References	
7.9	Evidence-based litigation	295
7.9.1	'Evidence' in court	
7.9.2	Death of an expert witness	
7.9.3	The influence of clinical guidelines in malpractice litigation	
7.9.4	Failure to act on the evidence	
	References	

CHAPTER 8: EVIDENCE-BASED PUBLIC HEALTH 303

8.1 The development of public health and the evolution of an evidence base 304

8.1.1 Public health practice and service development 1850–1950

8.1.2 Public health practice and health service development since 1950

8.1.2.1 The evidence base for preventive services

8.1.3 Public health practice and health education

8.1.4 Public health practice and health promotion

8.1.4.1 The evidence base for health promotion

8.1.5 Public health practice and legislation

8.1.6 Public health practice and policy-making

8.1.6.1 The evidence base in policy-making

8.1.6.2 Using the public health evidence base to achieve health gain from non-health and health-related proposals

8.1.7 Public health practice and humanitarianism

References

8.2 Developing systematic reviews for the evidence base in public health 319

8.2.1 The Campbell Collaboration

8.2.2 The use of systematic reviews in public health decision-making

References

8.3 The need for an eclectic approach towards the evidence base for public health 322

References

8.4 The basis for public health decision-making 325

8.4.1 The need for judgement

Reference

8.5 Public health practice in the 21st century: knowledge-based public health 327

8.5.1 Knowledge-based health improvement

8.5.2 Supporting an evidence-based approach in healthcare systems

References

CHAPTER 9: DEVELOPING THE SKILLS OF INDIVIDUALS 333

9.1 Developing skills for evidence-based practice 333

References

9.2 Approaches to learning 334

9.2.1 Problem-based learning

9.2.1.1 Problem-based learning and continuing professional development

9.2.2 Self-directed and reflective learning

9.2.2.1 Meeting appraised learning needs

9.2.3 e-Learning

9.2.4 Learning by doing

9.2.4.1 Informatics support for staff who are learning by doing

9.2.4.2 Support for staff learning by doing: the educational prescription

References

9.3 Teaching and learning evidence-based practice 341

9.4 The five steps to evidence-based practice 342

9.4.1 Asking the right question

9.4.1.1 Competencies

9.4.2 Searching for evidence

9.4.2.1 Retrieval

9.4.2.2 Competencies

9.4.3 Appraising evidence

9.4.3.1 The GATE frame

9.4.3.2 Competencies

9.4.4 Integrating and applying the evidence

9.4.4.1 Competencies

References

9.5 Developing capacity as well as skills 351

9.6 Case-studies of applying evidence-based practice skills 352

9.6.1 Diagnosis

9.6.2 Decision analysis

9.6.2.1 Introduction

9.6.2.2 Case-study

9.6.3 Treatment

References

9.7 Resources 356

9.7.1 Resources for critical appraisal

9.7.2 Guidelines to improve the standard of reporting published research

9.7.3 Educational resources

CHAPTER 10: EVIDENCE-BASED CLINICAL PRACTICE 361

10.1 Clinical decision-making 361

10.1.1 'Faceless' decision-making

10.1.2 Face-to-face decision-making

10.2 Communicating with patients 363

10.2.1	The provision of evidence-based information		10.4.3	Shared decision-making	
10.2.1.1	Other sources of information for patients		10.4.3.1	Decision aids	
10.2.2	Interpretation			References	
10.2.3	Discussion		10.5	Dealing with the patient's anxiety	388
	References			Reference	
10.3	Facilitating evidence-based patient choice	367	10.6	Dealing with conflict around limiting treatment	389
10.3.1	Factors inhibiting evidence-based patient choice			Reference	
10.3.1.1	Clinical ignorance		EPILOGUE: EVIDENCE-BASED HEALTHCARE IN THE 21ST CENTURY		
10.3.1.2	Emphasising the benefits of intervention				391
10.3.1.3	Disclosure		Evidence, economics and ethics		391
10.3.1.4	Withholding information about organisational policies		Values trump evidence		392
	References		References		
10.4	Understanding evidence-based clinical practice	370	Doing better, feeling worse		393
10.4.1	Definitions and dimensions		Reference		
10.4.1.1	Failures in clinical decision-making		The modernisation of medicine		394
10.4.2	The clinician's dilemma		Post-modern medicine		395
10.4.2.1	Treating individual patients		Die Risikogesellschaft		
10.4.2.2	Clinical freedom		Evidence-based risk management		
10.4.2.3	Clinical governance		References		
10.4.2.4	To whom should the clinician be loyal: patient or State?		Post-modern clinical practice		397
10.4.2.5	Remember the multiple goals of therapy: applying wisdom and discretion		Anxiety and disease		
			Dealing with uncertainty		
			Reference		
			Back to the future: 21st century healthcare		399
			The 21st century clinician		
			The 21st century patient		
			Does the 21st century patient want choice?		
			Sharing knowledge from experience		
			References		
			Conclusion		403
			INDEX		405
