Membranes in Clean Technologies

Theory and Practice

Volume 1

Contents

Volume 1

1	Development of Clean Technology Concept	1
1.1	The Evolution from Local to Global Environmental Policy	1
1.2	Proactive Strategies Contra End-of-Pipe Technologies	2
1.3	Cleaner Production Concept	3
1.4	Sustainable Chemistry Concept	4
1.5	Earlier Concepts of Sustainable Development	5
1.6	The Principles of Sustainable Development	6
1.7	Clean Technologies	8
1.8	Importance of Membranes in Clean Technologies	11
	References	12
I	Engineering of Membrane Processes	17
2	Theory of Membrane Separation Processes	19
2.1	Separation of Mixtures and Mass Transport in Membranes	19
2.2	Nonequilibrium Thermodynamics Model	23
2.3	Solution–Diffusion Model	24
2.4	Knudsen Diffusion Model	26
2.5	Viscous Flow Model	27
2.6	Concentration Polarization Model	28
	References	30
3	Membranes	31
3.1	Polymer Membranes	31
3.2	Polymer Modifications	32
3.2.1	Physical Modifications	32
3.2.2	Chemical Modifications	34
3.2.3	Polymer Blending	37

3.2.4	Pore-Filling Membranes	38
3.3	Inorganic Membranes	38
3.3.1	Sol-Gel Technique	39
3.3.2	Chemical Vapor Deposition	39
3.3.3	Zeolite Membranes	40
3.3.4	Carbon Membranes	41
3.3.5	Metal Membranes	42
3.4	Hybrid Organic-Inorganic Membranes	42
3.5	Supported Liquid Membranes	43
3.6	Membranes with Facilitated Transport	43
	References	44
4	Membrane Processes	51
4.1	Reverse Osmosis	51
4.1.1	Reverse Osmosis Theory	51
4.1.2	Effect of Concentration Polarization on the RO Process	54
4.1.3	RO Membranes	56
4.1.4	RO Modules	58
4.1.5	RO Market and Applications	58
4.2	Nanofiltration	63
4.2.1	NF Models	63
4.2.2	Rejection of Neutral Species by Size	64
4.2.3	Rejection of Charged Species	64
4.2.4	NF Membranes	65
4.2.5	NF Applications	66
4.3	Ultrafiltration	77
4.3.1	UF Theory	77
4.3.2	Limiting Flux Phenomenon	78
4.3.3	Osmotic Model	78
4.3.4	Gel Model	79
4.3.5	UF Membranes	80
4.3.6	UF Membrane Fouling	80
4.3.7	UF Applications	80
4.4	Microfiltration	84
4.4.1	MF Theory	84
4.4.2	Constant Pressure Filtration Model	85
4.4.3	Complete Pore Blocking Mechanism	85
4.4.4	Standard Mechanism of Pore Blocking	86
4.4.5	Transient Mechanism of Pore Blocking	86
4.4.6	Cake Filtration	87
4.4.7	MF Flux Enhancement	87
4.4.8	MF Applications	88
4.5	Dialysis	92
4.5.1	Dialysis Theory	93
4.5.2	DD Membranes	96

4.5.3	DD Applications	97
4.6	Electrodialysis	98
4.6.1	ED Theory	100
4.6.2	ED Membranes	101
4.6.3	ED Membrane Fouling	101
4.6.4	ED Applications	102
4.7	Pervaporation	104
4.7.1	PV Theory	104
4.7.2	PV Separation	110
4.7.3	PV Membranes	112
4.7.4	PV Applications	114
4.8	Gas Separation	123
4.8.1	GS Theory	124
4.8.2	GS Membranes Types	125
4.8.3	GS Applications	131
4.9	Vapor Permeation	133
4.9.1	VP Membranes	133
4.10	Liquid Membranes	137
4.11	Membrane Contactors	139
4.11.1	Membrane Affinity Separation	141
	References	147

II Membranes in Clean Industry 199

5	Water Industry	201
5.1	Water Management	201
5.1.1	Scarcity of Water Resources	201
5.1.2	Integrated Water Resources Management	203
5.1.3	Wastewater Reduction by Optimal Designing of Plants	205
5.1.4	The Role of Membranes in Water Management	206
5.2	Ultrapure Water Production	208
5.2.1	Membrane Processes for Ultrapure Water Production	209
5.3	Water Treatment	214
5.3.1	Conventional Methods of Water Treatment	214
5.3.2	Membrane Technologies in Water Treatment	215
5.3.3	Fouling of Membranes for Water Treatment	224
5.4	Water Sanitation	226
5.4.1	Conventional Methods of Water Sanitation	226
5.4.2	Membranes for Water Sanitation	226
5.4.3	Case Studies on Membrane Separations of Microorganisms from Water	229
5.5	Water Softening	234
5.5.1	Conventional Water Softening	234
5.5.2	Water Softening with Membranes	235

5.6	Water Denitrification	238
5.6.1	Sources of Nitrates	238
5.6.2	Membrane Denitrification	240
5.6.3	Biological Denitrification	242
5.6.4	Chemical Denitrification Processes	253
5.7	Sulfates Removal	256
5.7.1	Sulfate Characteristic	256
5.7.2	Conventional Methods of Sulfates Removal	257
5.7.3	Membranes for Sulfates Removal	259
5.8	Phosphorus Removal	260
5.8.1	Phosphorus Characteristic	260
5.8.2	Conventional Methods of Phosphorus Removal	261
5.8.3	Biological Methods of Phosphorus Removal	262
5.8.4	Membranes for Phosphorus Removal	262
5.9	Fluoride Removal	266
5.9.1	Fluoride Characteristic	266
5.9.2	Conventional Methods of Fluoride Removal	267
5.9.3	Membrane Processes for Fluoride Removal	268
5.10	Removal of Natural Organic Pollutants from Water	270
5.10.1	Characteristic of Organic Pollutants	270
5.10.2	Conventional Methods of Organic Pollutants Removal	274
5.10.3	Membrane Separation of Organic Pollutants	275
5.10.4	Case Studies on Membrane Separations of Organic Substances from Water	277
5.11	Biocides Removal	283
5.11.1	Biocides Characteristic	283
5.11.2	Conventional Methods of Biocides Removal	286
5.11.3	Membrane Filtration for Biocides Removal	286
5.11.4	Case Studies on Membrane Filtration for Biocides Removal	287
5.12	Membranes for Wastewater Reuse	292
5.12.1	Membranes for Enhancement Wastewater Treatment	292
5.12.2	Membrane Processes for the Recovery and Reuse of Wastewater	293
5.12.3	Membrane Bioreactors for Wastewater Treatment	297
5.12.4	Membranes for Agricultural Wastewaters Treatment	299
5.13	Membranes for Water Recovery and Reuse	301
5.13.1	Water Desalination	301
5.13.2	Surface Water Recovery with Membranes	303
5.13.3	Groundwater Recovery with Membranes	307
5.13.4	Membranes for Water Recovery from Wetlands	308
5.14	Remediation of Contaminated Soils	309
5.14.1	Sources of Toxic Substances in the Soil	309
5.14.2	Conventional Soil Detoxification Technologies	312
5.14.3	Membranes for Soil Detoxification	315
5.15	Membrane Fouling in Water Technologies	317

5.15.1 Fouling on Nanofiltration Membranes 317

5.15.2 Fouling on MF and UF Membranes 320

5.15.3 Fouling on IX Membranes 322

References 323

6 Textile Industry 353

6.1 Water Consumption in Textile Industry 353

6.2 Water Management in Textile Industry 356

6.3 Conventional Processes for Water Purification and Reuse in Textile Industry 357

6.4 Membrane Processes for Water Purification and Reuse in Textile Industry 359

6.4.1 Microfiltration in Textile Industry 360

6.4.2 Ultrafiltration in Textile Industry 360

6.4.3 Nanofiltration in Textile Industry 360

6.4.4 Reverse Osmosis in Textile Industry 362

6.5 Membrane-Based Hybrid Processes for Water Purification and Reuse 363

6.5.1 Reverse Osmosis with Ultrafiltration and Ozonation for Water Purification and Reuse 363

6.5.2 Nanofiltration with Ozonation after Biological Treatment 364

6.5.3 Precipitation, Activated Carbon, Evaporation RO for Water Purification and Reuse 365

6.5.4 Coagulation with Ultrafiltration and Ozonation 367

6.5.5 Coagulation Nanofiltration 367

References 368

7 Tannery Industry 371

7.1 Water Consumption in Tannery Industry 371

7.2 Chemicals Used in the Tanning Processing 371

7.3 Characterization of Leather Processing 372

7.4 Conventional Wastewater Treatment in Tanneries 377

7.5 Membrane Application for Recovery and Reuse of Water from Tanneries 379

7.5.1 UF in Soaking Step 1 381

7.5.2 UF in Unhairing Step 381

7.5.3 UF in the Deliming Bating Step 382

7.5.4 UF in Degreasing Step 383

7.5.5 RO in Pickling Baths 383

7.5.6 UF and NF in Tanning Exhausted Baths 384

7.5.7 RO in Dyeing Step 385

7.5.8 RO for Water Recovery from Treated Tannery Wastewater 385

7.5.9 RO for Recovery of the Salts from Filter Pressing 386

7.5.10 Membrane Bioreactors for Treatment of Tannery Effluents 387

13.11.2	Conventional Separation Methods of Lead	634
13.11.3	Case Studies on Membrane Application for Separation of Lead	635
13.12	Lithium Separation	636
13.12.1	Lithium Characteristics	636
13.13	Manganese Separation	636
13.13.1	Manganese Characteristics	636
13.13.2	Case Studies on Membrane Application for Separation of Manganese	637
13.14	Mercury Separation	638
13.14.1	Mercury Characteristics	638
13.14.2	Case Studies on Membrane Application for Separation of Mercury	639
13.15	Molybdenum Separation	641
13.15.1	Molybdenum Characteristics	641
13.15.2	Recovery of Molybdenum by ELM	641
13.16	Nickel Separation	642
13.16.1	Nickel Characteristics	642
13.16.2	Case Studies on Membrane Application for Separation of Nickel	643
13.17	Palladium Separation	644
13.17.1	Palladium Characteristics	644
13.17.2	Palladium Recovery by ELM	645
13.18	Platinum Separation	645
13.18.1	Platinum Characteristics	645
13.18.2	Separation and Recovery of Platinum and Rhodium by SLM	645
13.19	Plutonium Separation	646
13.19.1	Plutonium Characteristics	646
13.19.2	Separation and Recovery of Plutonium from Aqueous Acidic Wastes by SLM	647
13.20	Selenium Separation	647
13.20.1	Selenium Characteristics	647
13.20.2	NF for removal of Selenium	648
13.21	Silver Separation	648
13.21.1	Silver Characteristics	648
13.21.2	Case Studies on Membrane Application for Separation of Silver	648
13.22	Thorium Separation	649
13.22.1	Thorium Characteristics	649
13.22.2	Separation of Thorium from Uranium by ELM	650
13.23	Uranium Separation	651
13.23.1	Uranium Characteristics	651
13.23.2	Case Studies on Membrane Application for Separation of Uranium	652
13.24	Zinc Separation	653
13.24.1	Zinc Characteristics	653
13.24.2	Case Studies on Membrane Application for Separation of Zinc	654
	References	655

14	Acids Separation	671
14.1	Inorganic Acids	671
14.1.1	Inorganic Acids Applications	671
14.1.2	Conventional Methods of Acids Disposal	672
14.1.3	Membranes Separation of Inorganic Acids	673
14.1.4	Case Studies on Membrane Application for Separation of HCl	675
14.1.5	Case Studies on Membrane Application for Separation of Phosphoric Acid	676
14.1.6	Case Studies on Membrane Application for Separation of HF	676
14.1.7	Case Studies on Membrane Application for Separation of Sulfuric Acid	678
14.1.8	Case Studies on Membrane Application for Separation of Nitric Acid	679
14.1.9	HI Hydriodic Acid Separation by Electrodialysis	679
14.1.10	Boric Acid Separation by Membrane Contactor	680
14.1.11	Chromic Acid Separation on Charged Ultrafiltration Membranes	680
14.1.12	Fluorosilicic and Fluoride Acids Recovery from Fertilizers Production with RO and UF	680
14.2	Organic Acids	682
14.2.1	Characteristic of Organic Acids	682
14.2.2	Characteristic of Lactic Acid	685
14.2.3	Case Studies on Membrane Application for Separation of Lactic Acid	685
14.2.4	Characteristic of Acetic Acid	686
14.2.5	Case Studies on Membrane Application for Separation of Acetic Acid	686
14.2.6	Characteristic of Citric Acid	688
14.2.7	Case Studies on Membrane Application for Separation of Citric Acid	689
14.2.8	Characteristic of Gluconic Acid	689
14.2.9	Case Studies on Membrane Application for Separation of Gluconic Acid	690
14.2.10	Amino Acids Characteristic	691
14.2.11	Amino Acids Separation with Membranes	692
14.2.12	Case Studies on Membrane Application for Separation of Amino Acids	692
	References	695
15	Hydrocarbon Separations	703
15.1	Classification and Definitions of Hydrocarbons	703
15.2	Removal of Synthetic Organics from Water	704
15.2.1	Conventional Methods of Organics' Separation from Water	707
15.2.2	Membrane Processes for Organics Separation from Water	708

15.3	Nonhalogenated Volatile Organic Compounds	712
15.3.1	Characteristic of Nonhalogenated VOCs	712
15.3.2	Case Studies on PV Application for Separation of Nonhalogenated VOC	714
15.3.3	Case Studies on NF/RO Application for Separation of VOCs	717
15.3.4	Case Studies on Application of Other Membrane Processes for Separation of VOCs	718
15.4	Halogenated Volatile Organic Compounds	719
15.4.1	Characteristic of Halogenated VOCs	719
15.4.2	Case Studies on Membrane Application for Separation of Halogenated VOCs from Water	722
15.4.3	Case Studies on <i>Hybrid Systems</i> for Separation of Halogenated VOCs from Water	724
15.4.4	Removal of Halogenated VOCs from Soil With Membranes	725
15.5	Nonhalogenated Semivolatile Organic Compounds	727
15.5.1	Characteristic of Nonhalogenated SVOCs	727
15.6	Halogenated Semivolatile Organic Compounds	728
15.6.1	Characteristic of Halogenated SVOCs	728
15.6.2	Removal of Endocrine Disruptors by PV Membranes	729
15.7	Fuels Contaminants	730
15.7.1	Characteristic of Fuel Contaminants	730
15.7.2	Case Studies on Application of Membrane Processes for Separation of BTX from Water	731
15.7.3	Phenols Characteristic	733
15.7.4	Phenols Degradation	735
15.7.5	Case Studies on Phenol Separation From Water With Membranes	736
15.7.6	Aniline Removal From Water	739
15.8	Removal of Synthetic Organics From Air	741
15.8.1	Separation of Organic Solvents Vapor From the Air	741
15.8.2	Removal Odorous Components From the Air	741
15.8.3	Case Studies on Membrane Processes for Separation of Synthetic Organic From the Air	742
15.9	Dehydration of Solvents	742
15.9.1	Solvents Characteristic	742
15.9.2	Dehydration of Solvents With Membranes	743
15.9.3	Membranes for Solvent Dewatering	744
15.9.4	Case Studies on PV Membranes for Organic Dehydration	745
15.10	Separation of Organic–Organic Mixtures	748
15.10.1	General Overview	748
15.10.2	Membranes for Separation of Organic–Organic Mixtures	749
15.11	Separation of Polar–Nonpolar Solvent Mixtures	750
15.11.1	Characteristic of Fuel Oxygenates	750
15.11.2	Case Studies on PV Application for Separation of Polar–Nonpolar Solvents	752

15.11.3	Case Studies on RO Application for Separation of Polar–Nonpolar Solvents	753
15.12	Separation of Aromatic Aliphatic Mixtures	754
15.12.1	Industrial Importance of the Aromatic–Aliphatic Separation Problem	754
15.12.2	Pervaporation of the Aromatic–Aliphatic Mixtures	755
15.12.3	Polymeric Membranes Used in Separation of Aliphatic and Aromatic Mixtures	756
15.12.4	Zeolite Membranes Used in Separation of Aliphatic and Aromatic Mixtures	757
15.12.5	Case Studies on PV Application for Separation of Aromatic–Aliphatic Hydrocarbons	757
15.13	Alkenes–Alkenes (Olefins–Olefins) Separation	765
15.13.1	Industrial Importance of the Olefins–Olefins Separation Problem	765
15.13.2	Membrane Applications for the Olefins–Olefins Separation	765
15.13.3	Application of Membrane Reactors for Hydrogenation of Alkenes	766
15.13.4	Case Studies on Membrane Applications for the Olefins–Olefins Separation	766
15.14	Alkenes–Alkanes (Olefin–Paraffin) Separations	768
15.14.1	Industrial Importance of Olefin–Paraffin Separations	768
15.14.2	Conventional Separation of Light Olefins and Paraffins	768
15.14.3	Membrane Separation of Olefin–Paraffin Mixtures	769
15.14.4	Case Studies on Membrane Applications for the Olefin–Paraffin Separations	771
	References	777

16 Membrane Selection Chart 807

17 Symbols 833

17.1	Symbols of Variables	833
17.2	Greek letters	834
17.3	Subscripts	835
17.4	Symbols of Polymers	835
17.5	Symbols of Membrane Processes	836

Appendix 839

List of Institutions Dealing with Clean Technologies	839
List of Companies Dealing with Membranes (To Be Completed)	841
The “Black List” [1]	844
The “Red List”	849
IPC Integrated Pollution Control and Local Air Pollution Control	850
Releases into the Air (Part A and Part B Processes)	850
Releases into Water (Part A Processes Only)	850
Releases to Land (Part A Processes Only)	851

IPPC Draft Pollution Prevention and Control Regulations	852
Air	852
Water	852
United Kingdom National Air Quality Strategy	853
Inter-Departmental Committee on the Redevelopment of Contaminated Land (ICRCL)	853
Group A: Contaminants which may Pose Hazards to Health	854
Group B: Contaminants which are Phytotoxic but not Normally Hazards to Health	854
Contaminants Associated with Former Coal Carbonization Sites	854
Special Sites Under Schedule 1 of the Draft Contaminated Land Regulations	854
European Drinking Water Directive (80/778/EEC)	855
Water Supply (Water Quality) Regulations/Private Water Supplies Regulations	857
European Groundwater Directive (80/68/EEC)	859
List I (for which discharge is to be prevented)	859
List II (for which investigation is required prior to discharge)	859
European Bathing Water Directive (76/160/EEC)	860
European Directive on Waters for Freshwater Fish (78/659/EEC)	861
European Directive on Waters for Shellfish (79/923/EEC)	862
Pesticides Forbidden in the European Union	863
Rotterdam Convention on Prior Informed Consent	864
