Part I Quantum Dots and Wires

Emission Characteristics, Photon Statistics and Coherence Properties of high- β Semiconductor Micropillar Lasers

S. M. Ulrich, S. Ates, P. Michler, C. Gies, J. Wiersig, F. Jahnke, S. Reitzenstein, C. Hofmann, A. Löffler, A. Forchel	3
1 Introduction	3
2 Sample Growth and Preparation	4
3 Experimental Procedures	5
4 Experimental Results	6
4.1 Micropillar Emission Modes: Experiment-Theory Comparison	6
4.2 Emission Statistics and Field Coherence Properties of Micropillar Lasers	7
4.3 Coherence Properties of Elliptical Micropillar Lasers	11
5 Conclusion	14
References	14

Optical Microtube Ring Cavities

Tobias Kipp	17
1 Introduction	17
2 Sample Structure and Experiment	18
3 Results on QD Microtubes	20
4 Results on QW Microtubes	23
5 Conclusions	26
References	27

Wide-Bandgap Quantum Dot Based Microcavity VCSEL Structures

K. Sebald, H. Lohmeyer, J. Gutowski, C. Kruse, T. Yamaguchi, A. Gust, D. Hommel J. Wiersig, N. Baer, F. Jahnke	29
1 Experimental Details	30
2 II–VI Based Quantum Well Microcavities	31
2.1 Stimulated Emission	34

3	Nitride Based Quantum Well Microcavities	35
4	CdSe Quantum Dots in ZnSe-based Microcavities	37
5	Conclusion	39
	References	40

Momentum Space Wave Functions in InAs Quantum Dots Mapped by Capacitance Voltage Spectroscopy

	Dirk Reuter	43
1	Introduction	43
2	Wave Function Mapping by Capacitance Voltage Spectroscopy	44
3	C-V Spectroscopy for Conduction Band States	46
4	Charging Spectroscopy for Holes in InAs Quantum Dots	49
5	Summary	52
	References	53

Coupling Phenomena in Dual Electron Waveguide Structures

	Saskia F. Fischer	55
1	Introduction	55
2	Quantum Transport	56
3	Fabrication of Dual Electron Waveguides	58
4	Laterally Coupled Electron Waveguides	59
5	Vertically-Stacked Electron Waveguides	61
6	Summary and Outlook	63
	References	65

Part II Correlation Effects

Electronic Correlations in Electron Transfer Systems

	Ralf Bulla, Sabine Törnøw, Frithjof Anders	69
1	Introduction	69
	1.1 Electron Transfer	69
	1.2 Models	70
2	Numerical Renormalization Group	72
3	Electron Transfer: Results	73
	3.1 Equilibrium	73
	3.2 Non-Equilibrium	74
4	Summary and Discussion	76
	References	78

Criticality and Correlations in Cold Atomic Gases

	Michael Köhl, Tobias Donner, Stephan Ritter, Thomas Bourdel, Anton Öttl, Ferdinand Brennecke, Tilman Esslinger	79
1	Ultracold Quantum Gases as Model Systems for Condensed Matter Physics	79
2	Criticality and Critical Exponents	80

3	Measuring the Spatial Correlation Function	82
4	Results	84
5	Conclusion	86
	References	86

Part III Ferromagnetic Films and Particles

Magnetic Anisotropy and Magnetization Switching in Ferromagnetic GaMnAs

W. Limmer, J. Daeubler, M. Glunk, T. Hummel, W. Schoch, S. Schwaiger, M. Tabor, R. Sauer		91
1	Introduction	91
2	Experimental Details	92
3	Theoretical Overview	93
3.1	Magnetic Anisotropy	94
3.2	Longitudinal and Transverse Resistivities	95
4	Results and Discussion	96
4.1	Probing Magnetic Anisotropy by Magnetotransport	97
4.2	Strain Dependence of the Magnetic Anisotropy	99
5	Summary	102
	References	102

Spin-Polarized Tunneling in Fully Epitaxial Magnetic Tunnel Junctions with a Full-Heusler Alloy Thin Film

Masafumi Yamamoto, Takaō Marukame, Takayuki Ishikawa, Ken-ichi Matsuda, Tetsuya Uemura		105
1	Introduction	105
2	Experimental Methods	106
3	Results and Discussion	108
3.1	Structural Properties	108
3.2	Spin-Polarized Tunneling Characteristics	110
3.2.1	Co ₂ Cr _{0.6} Fe _{0.4} Al/MgO/Co ₅₀ Fe ₅₀ MTJs	110
3.2.2	Co ₂ MnSi/MgO/Co ₅₀ Fe ₅₀ MTJs and Co ₂ MnGe/MgO/Co ₅₀ Fe ₅₀ MTJs	113
4	Conclusion	114
	References	115

Structural and Magnetic Properties of Transition Metal Nanoparticles from First Principles

Markus Ernst Gruner, Georg Rollmann, Alfred Hucht, Peter Entel ...		117
1	Introduction	117
2	Methodological Details	119
3	Structural Transitions in Iron Nanoparticles	120
4	Morphologies of Fe-Pt Clusters	124
5	Conclusion	126

References	126

First-Principles Study of Ferromagnetic Heusler Alloys

Silvia Picozzi	129
1 Introduction	129
2 Computational and Structural Details	131
3 Loss of Half-Metallicity	131
3.1 Point Defects and Interfaces with Semiconductors	131
3.2 Other Mechanisms: Predictions from Density-Functional-Theory	133
4 Magneto-Optical Properties	134
4.1 Introduction and Methodology to Calculate the Complex Kerr Angle	134
5 Electronic and Magneto-Optical Properties of Co-Based Full-Heusler Alloys	136
6 Conclusions and Outlook	140
References	140

Part IV Graphene

Dirac Particles in Epitaxial Graphene Films Grown on SiC

Claire Berger, Xiaosong Wu, Phillip N. First, Edward H. Conrad, Xuebin Li, Michael Sprinkle, Joanna Hass, François Varchon, Laurence Magaud, Marcin L. Sadowski, Marek Potemski, G�rard Martine�, Walt A. de Heer	145
1 Introduction	145
2 Interface States	146
3 Non-Bernal Stacking of Graphene Layers	147
4 Landau Level Spectroscopy of Epitaxial Graphene	149
5 Dirac Particle Transport	150
6 Weak Anti-Localization	152
7 Coherence and Confinement	154
8 Conclusion	155
References	156

Photoemission Studies of Graphene on SiC: Growth, Interface, and Electronic Structure

A. Bostwick, K. V. Emtsev, K. Horn, E. Huwald, L. Ley, J. L. McChesney, T. Ohta, J. Riley, E. Rotenberg, F. Speck, Th. Seyller	159
1 Introduction	159
2 Experimental	160
3 Results	161
3.1 The $(6\sqrt{3} \times 6\sqrt{3})R30^\circ$ Reconstruction	161
3.2 Barriers Between SiC and FLG	163

3.3	From Graphene to Graphite: Evolution of the Band Structure	164
3.4	Switching the Gap of Bilayer Graphene	166
3.5	Many-Body Interactions in Graphene	168
4	Conclusions	169
	References	169

Raman Imaging and Electronic Properties of Graphene

	F. Molitor, D. Graf, C. Stampfer, T. Ihn, and K. Ensslin	171
1	Introduction	171
2	Raman Spectrum of Graphene	172
3	Raman Imaging of Graphene	172
4	Transport Through Few-Layer Graphene	174
	References	176

Part V THz-Physics

Interaction of Semiconductor Laser Dynamics with THz Radiation

	Carsten Brenner, Stefan Hoffmann, Martin R. Hofmann	179
1	Introduction: Current THz Technology	179
1.1	THz Sources	179
1.2	THz Detection	181
1.3	THz Systems for Industrial Mass Applications	182
2	Direct Generation of THz Radiation with Two Color Diode Lasers	183
2.1	Carrier Dynamics in the Semiconductor	183
2.2	THz Generation: Proof of Principle	184
2.3	THz Generation: Potential for Improvement	186
3	Detection of THz Radiation with Diode Lasers	186
3.1	Electronical Detection	186
3.2	Perspectives for Improvement of the Detection Scheme	187
4	Conclusions and Outlook	188
	References	189

Ultrafast THz Spectroscopy of Excitons in Multi-Component Carrier Gases

	R. A. Kaindl, M. A. Carnahan, D. Hägele, D. S. Chemla	191
1	Introduction	191
2	Optical-Pump THz-Probe Spectroscopy	192
3	Intra-Excitonic Transitions	194
4	Exciton Ionization and Thermal Quasi-Equilibria	195
5	Multicomponent Saha Equation	197
6	Conclusions	201
	References	201

Terahertz Near-Field Microscopy

Roland Kersting, Federico F. Buerstgens, Guillermo Acuna,

Gyu Cheon Cho	203
1 Introduction	203
1.1 Terahertz Spectroscopy and Microscopy	203
2 Experimental	205
3 Terahertz Microscopy	208
3.1 Imaging Mechanism	209
4 Terahertz Imaging of Charge Carrier Distributions	213
4.1 Model Calculations	213
4.2 Terahertz Microscopy of Charge Carrier Distributions	215
5 Concluding Remarks	219
References	220

Interaction of THz Radiation with Semiconductors: Microscopic Theory and Experiments

J. T. Steiner, M. Kira, S. W. Koch, T. Grunwald, D. Köhler,

S. Chatterjee, G. Khitrova, H. M. Gibbs	223
1 Introduction	223
2 Microscopic Theory of Terahertz Response	224
3 Linear Response in the Incoherent Regime	226
4 Terahertz Response after Optical Excitation	228
5 Resonant Optical Pump THz Probe Experiments on (GaIn)As MQWs	231
5.1 Experimental Detail	231
5.2 Experimental Results	232
References	234

Nonlinear Terahertz and Midinfrared Response of n -Type GaAs

Michael Wörner, Peter Gaal, Wilhelm Kuehn, Klaus Reimann,

Thomas Elsaesser, Rudolf Hey, Klaus H. Ploog	237
1 Generation of Single-Cycle THz Transients with High Electric-Field Amplitudes	238
2 Nonlinear THz-Propagation through n -Type GaAs	239
3 Terahertz Field-Induced Midinfrared Gain and Absorption in n -Type GaAs	245
4 Conclusion	247
References	248

Part VI Defects, Dislocations and Strain

Effect of Hydrogen and Grain Boundaries on Dislocation Nucleation and Multiplication Examined with a NI-AFM

Afroz Barnoush, Bo Yang, Horst Vehoff	253
1 Introduction	253
1.1 Strain Rate Sensitivity	254
1.2 Hydrogen Embrittlement	254
2 Experimental	255
2.1 Materials and Sample Preparation	255
2.2 NI-AFM Method	256
2.2.1 Strain Rate Sensitivity Tests with the NI-AFM	256
2.2.2 HE Tests with the NI-AFM	256
3 Results	257
3.1 Strain Rate Sensitivity in nc-Ni and UFG Ni	257
3.2 HE in Ni	260
4 Conclusion	267
References	267

Tuning the Strain in LaCoO₃ Thin Films by the Heteroepitaxial Growth on Single Crystal Substrates

Dirk Fuchs, Erhan Arac, Thorsten Schwarz,, Rudolf Schneider	271
1 Introduction	271
2 Experimental	272
3 Results and Discussion	273
4 Summary	274
References	275

Atomic Migration Phenomena in Intermetallics with High Superstructure Stability

Rafa Kozubski, Andrzej Biborski, Mirosław Kozowski, Véronique Pierron-Bohnes, Christine Goyhenex, Wolfgang Pfeiler, Marcus Rennhofer, Bogdan Sepiol	277
1 Introduction	277
2 Experimental Studies	279
3 Modelling	281
3.1 Thermal Vacancy Thermodynamics	281
3.2 Atomistic Simulations of "Order-Order" Kinetics	284
3.2.1 "Order-Order" Kinetics in Bulk Material	284
3.2.2 "Order-Order" Kinetics in L1 ₀ -Ordered Binaries with Free Surfaces	285
References	287

Material Science with Positrons:

From Doppler Spectroscopy to Failure Prediction

Matz Haaks, Patrik Eich, Judith Fingerhuth, Ingo Müller	289
1 Introduction	289
2 Positrons as Probes for Atomic Defects	290
3 The Bonn Positron Microprobe	293
4 Prediction of Fatigue Failure	294
5 A Minimal Model of Fatigue	296
6 Conclusions	298
References	299

X-Ray Diffraction Residual Stress Analysis

Wolfgang Nierlich, Jürgen Gegner	301
1 Economic Physical Measuring	301
2 Accelerated Measurement Technique	302
2.1 Reduction of Measuring Time by Modified Diffractometer Beam Path	302
2.2 Reduction of Measuring Time by Automated Self-Adjusting XRD Line Analysis	303
2.3 Measurement of the XRD Line Width and the Retained Austenite Volume Fraction	304
3 Application Fields of XRD Residual Stress Analysis	305
4 Residual Stress Generation by a Cold Working Treatment	305
5 Material Response Analysis on Run Rolling Bearings	306
5.1 Surface- and Sub-Surface Mode of Rolling Contact Fatigue	306
5.2 Time-Dependent Alteration of the XRD Material Characteristics and Calibration of the Material Response Analysis	308
5.3 Characterization of Short-Cycle Fatigue and Failure in the Middle or Lower Fatigue Endurance Limit on the Basis of Known Rig Tests	308
5.4 Characterization of the Stressing Level of Rolling Bearings in Case of Additional Loading by Vibrations	312
6 Summary	312
References	314

Piezoelectric Graded Materials – Preparation and Characterization

Ralf Steinhausen	315
1 Introduction	315
2 Preparation of a Piezoelectric Graded Material	316
3 Poling Model	318
4 Different Concepts of Piezoelectric Graded Materials	318
4.1 Combination of Piezoelectric and Electroconductive Ceramics	319
4.2 Combination of Piezoelectric and Electrostrictive Ceramics	319

4.3	Combination of Piezoelectric Hard and Soft Ceramics	322
5	Summary	325
	References	326

Part VII Materials

^{59}Co, ^{23}Na, and ^1H NMR Studies of Double-Layer Hydrated Superconductors $\text{Na}_x\text{CoO}_2 \cdot y\text{H}_2\text{O}$		
	Y. Itoh, H. Ohta, C. Michioka, M. Kato, K. Yoshimura	329
1	Introduction	329
2	Synthesis and Experiments	331
3	Experimental Results	331
3.1	Magnetic Phase Diagram Classified by ^{59}Co NQR	331
3.2	^1H NMR of Oxonium Ion	332
3.3	A-Type Spin Fluctuations via ^{23}Na NMR	333
4	^{59}Co NMR for α -Phase	335
4.1	Normal State	335
4.2	Superconducting State	337
5	Conclusion	339
	References	339
	Index	343
