Chemical warning	x
1. Introduction	1
1.1 Aims of the manual	3
1.1.1 Some key points about this book	3
1.2 Outline of the manual	4
1.3 Role of manual in training programs	7
2. What is Farm Business Management?	11
2.1 Decision making is based on value judgements	13
2.1.1 Maslow's hierarchy of needs	13
2.1.2 Bennett's hierarchy for developing objectives	15
2.2 A set of key tasks for dairy farm managers	15
2.2.1 Production technology	16
2.2.2 People skills	17
2.2.3 Business management	17
2.3 Making the best use of service providers	18
2.4 The dairy farming business	21
2.4.1 Breaking down dairy production technology	21
2.4.2 Developing a hierarchy of business management	22
3. Smallholder dairy farming in Asia	25
3.1 The importance of livestock to resource-poor farmers	25
3.1.1 Smallholder dairy farmers	27
3.1.2 What matters to dairy farmers most	28
3.2 Smallholder dairying in Asia	29
3.2.1 An historical context	29
3.2.2 The growth of dairy industries in South and East Asia	30
3.2.3 Future projections of demand and supply of milk in South and East Asia	33
3.3 Development of smallholder dairy farming	36
3.3.1 Objectives of dairy development	36

3.3.2	Types of dairy development	37
3.3.3	The importance of rural wages and other growth factors	38
3.3.4	Losses in the dairy value chain	39
3.3.5	Dairy development and farm technology	40
3.3.6	Strengthening and enabling smallholders	40
4.	Feed production technology on smallholder dairy farms	43
4.1	Feed nutrients required by dairy cows	44
4.2	Sources of feed nutrients	45
4.2.1	Dry matter	45
4.2.2	Energy	45
4.2.3	Protein	46
4.2.4	Fibre	48
4.2.5	Vitamins and minerals	48
4.2.6	Essential nutrients and sources summary	49
4.3	Predicting cow performance from nutrient intakes	50
4.3.1	Water	50
4.3.2	Energy	50
4.3.3	Protein	52
4.3.4	Fibre	53
4.4	Increasing dairy farm profitability through improved pasture technology	53
4.4.1	Recent sources of information on tropical forages	55
5.	Improved herd management on smallholder dairy farms	57
5.1	The lactation cycle	58
5.1.1	From calving to peak lactation	59
5.1.2	The rest of lactation	60
5.1.3	The dry period	61
5.2	Persistency of milk production throughout lactation	61
5.2.1	Theoretical models of lactation persistency	62
5.3	Milk responses to feeding	64
5.3.1	The law of diminishing returns	64
5.3.2	Marginal milk responses to extra feeding	64
5.3.3	An example of marginal milk responses	65
5.3.4	Immediate and delayed milk responses	66
5.4	Rearing replacement heifers	68
5.5	Reproductive performance	69
5.6	Exotic breeds and crossbreeds for milk production	70
5.7	Describing environmental stress for dairy cows	72
6.	The harvesting and marketing of milk from smallholder farms	73
6.1	Improving unit returns for milk	74
6.1.1	Milk composition	74
6.1.2	Milk quality	76

6.1.3	Examples of two milk grading schemes	77
6.2	Formal and informal milk markets	78
6.3	The role of dairy producer cooperatives	80
6.3.1	Types of services offered by dairy cooperatives	82
7.	The base price for raw milk	85
7.1	Factors affecting the base price of milk	86
7.1.1	Internal influences	86
7.1.2	External influences	86
7.2	Local prices for raw milk	88
7.2.1	Annual variations in different countries	88
7.2.2	Current farmer returns for fresh local milk	90
8.	The importance of record keeping	93
8.1	What records should be taken?	94
8.1.1	Farm records to keep	94
8.1.2	Livestock records to keep	95
8.1.3	Financial records to keep	97
8.1.4	Recording the data in the farm office	98
8.2	Describing the farm's physical and financial resources	98
8.3	Comparative farm performance or benchmarking	101
9.	Categorising farm costs and farm revenue	103
9.1	The costs of farm production	104
9.1.1	Overhead costs	105
9.1.2	Variable costs	105
9.1.3	Opportunity and labour costs	106
9.1.4	Capital investments	107
9.1.5	Finance costs	107
9.1.6	Personal expenses	107
9.2	Breaking down costs on smallholder dairy farms	108
9.2.1	Cost efficiency indicators	110
9.3	Increases in farm revenue	111
9.3.1	Farm income generated by farm produce	112
9.3.2	Imputed income from stock inventories	112
9.3.3	Farm income from creditors	114
10.	The key tools of farm business analyses	115
10.1	Balance sheets	116
10.1.1	Assets	117
10.1.2	Liabilities	118
10.1.3	Equity or net worth	118
10.1.4	Ratios to describe credit risk	119
10.2	Cash flow records	119

10.2.1	Cash operating surplus	121
10.3	Income statements	122
10.3.1	Key measures from income statements	122
10.3.2	Anticipating problems by interpreting farm business data	123
11.	Measures of farm profit	127
11.1	Quantifying cash and non-cash profit	128
11.2	Quantifying change in farm efficiency	129
11.3	Quantifying wealth creation	132
11.4	Drivers of profit	134
11.5	Assessing the business 'health' of Asian smallholder dairy farms	135
11.5.1	Liquidity	136
11.5.2	Solvency	136
11.5.3	Profitability	137
11.5.4	Efficiency	137
11.6	FEEDPROFIT and FARMPROFIT, two computer programs to quantify farm profits	138
12.	Formulating profitable rations	139
12.1	Defining 'Milk income less feed costs'	139
12.2	Case studies of smallholder dairy farmers	141
12.2.1	Introduction to case studies	141
12.2.2	Case study 1: Formulating least cost rations	143
12.2.3	Case study 2: Feeding cows in early lactation	145
12.2.4	Case study 3: Feeding cows during the dry season	145
13.	Feeding decisions driving profit	149
13.1	Determining the optimum herd size	150
13.1.1	Other factors influencing herd profitability	151
13.2	Determining optimum on-farm stocking capacities	152
13.3	Flow charts of feeding decisions that drive profit	154
14.	Key performance measures of farm profitability	157
14.1	Simple measures of farm performance	158
14.2	Feed-related key factors influencing farm profitability	158
14.2.1	Stocking capacity	158
14.2.2	On-farm forage production	160
14.2.3	Forage quality	161
14.2.4	Concentrate feeding program	162
14.2.5	Total feed costs	163
14.2.6	Milk income less feed costs	163
14.3	Herd-related key factors influencing farm productivity	163
14.3.1	Proportion of productive cows	163

14.3.2	Pattern of milk production	166
14.3.3	Reproductive performance	166
14.3.4	Heifer management	168
14.4	Ease of collecting raw data to calculate KPIs	169
14.5	A final word about KPIs	170
15.	Budgeting for future farm development	173
15.1	Types of budgets	174
15.1.1	Cash development budgets	174
15.1.2	Partial budgets	175
15.2	Steps for a partial budget	176
15.2.1	A case study for partial budgeting	178
15.3	Sensitivity analysis	181
15.4	Accounting for time in a budget	182
16.	Risk in tropical dairy farming	185
16.1	Types of risk	186
16.1.1	Business v financial risk	186
16.1.2	External v internal sources of risk	187
16.1.3	Risk in short-term and long-term decisions	188
16.1.4	Good and bad risks	188
16.2	Strategies for managing risk	189
16.2.1	Analysing risk in farm management	190
16.3	Biosecurity as a risk management strategy	192
17.	Case studies of profitable tropical dairy farming systems	195
17.1	Cost of production of dairy farming in Thailand	196
17.1.1	Competitiveness analyses	199
17.1.2	Comments on IFCN methodology	199
17.2	Comparing dairy farm production economics in Thailand and Vietnam	200
17.2.1	General comments on Asian dairy industries	201
17.3	Comparing rural and peri-urban dairying	203
18.	Planning and conducting workshops in Farm Business Management	205
18.1	Workshop objectives	206
18.2	Workshop preparation	206
18.3	Daily programs for each workshop	207
18.3.1	Workshop 1	207
18.3.2	Workshop 2	208
18.4	Group presentations from Workshop 1	209
18.5	Theoretical farm case study in Workshop 2	209
18.5.1	Calculation of financial measures	211
18.5.2	Developing partial budgets	213

18.6	Conclusions from FBM workshops in Thailand	214
19.	The future for smallholder dairy industries in tropical Asia	217
19.1	The relevance of 'high technology'	219
19.1.1	The process of technological change	222
19.1.2	Technology and fertilisers	224
19.1.3	Technology and animal health	225
19.2	Making agriculture more sustainable	226
19.2.1	Pollution and the public perception of dairy farming	228
19.3	The role for Public Private Partnerships in dairy development	229
19.3.1	The key roles for both public and private sectors	230
19.3.2	Lessons learnt from the nine country study	231
19.4	Ensuring a future for smallholder dairying	233
	Indonesian dairy smallholder pamphlet	236
	Appendix 1 Temperature Humidity Index	240
	Appendix 2 Conversion of units of measurement	241
	Appendix 3 Currency converter for South and East Asia	244
	Appendix 4 Tables of nutrient requirements	245
	Appendix 5 Worksheets for ration formulation	249
	Appendix 6 Financial statements	253
	Appendix 7 Examples of expectation and evaluation forms for Farm Business Management workshops	259
	Glossary and abbreviations	263
	References and further reading	275
	Index	279
