

STARCHES

*Characterization, Properties,
and Applications*

Edited by
Andréa C. Bertolini

CRC Press
Taylor & Francis Group

Contents

Preface.....	vii
About the Editor.....	ix
Contributors.....	xi
Chapter 1 Trends in starch applications	1
<i>Andréa C. Bertolini</i>	
Chapter 2 Characterization of starch granules: An atomic force microscopy approach	21
<i>Renata Antoun Simão and Beatriz Rosana Cordenunsi</i>	
Chapter 3 Starch macromolecular structure	33
<i>Luis Arturo Bello-Perez, Sandra Leticia Rodriguez-Ambriz, Mirna Maria Sanchez-Rivera, and Edith Agama-Acevedo</i>	
Chapter 4 Solid-state NMR applied to starch evaluation	59
<i>Maria Inês Bruno Tavares</i>	
Chapter 5 Thermal transitions of starches.....	71
<i>Paul Colonna and Alain Buleon</i>	
Chapter 6 Starch-based plastics.....	103
<i>Rossana Mara da Silva Moreira Thiré</i>	
Chapter 7 Trends in microbial amylases	129
<i>Marcia Nitschke</i>	
Chapter 8 Modified starch: Chemistry and properties.....	145
<i>Kerry C. Huber and James N. BeMiller</i>	
Chapter 9 Starch-based nanocomposites.....	205
<i>Eliton S. Medeiros, Alain Dufresne, and William J. Orts</i>	

Chapter 10 Biodegradation of starch blends	253
<i>Derval dos Santos Rosa and Cristina das Graças Fassina Guedes</i>	
Index	271
