Object Oriented Simulation

A Modeling and
Programming Perspective

Springer

Contents

Part I Basic Concepts of Modeling and Simulation

1	Models and Simulation	3
1.1	Introduction	3
1.2	Systems and Models	3
1.3	Simulation	4
1.3.1	Computer Simulation Models	6
1.3.2	Simulation Results	7
1.3.3	Models with Random Behavior	8
1.3.4	Discrete-Event Simulation Models	8
1.4	Input Parameters and Performance	9
1.4.1	Workload and System Parameters	9
1.4.2	Performance Metrics	10
1.4.3	Additional Performance Concepts	10
1.5	Modeling System Behavior	11
1.6	Simulation Time	12
1.7	Discrete-Event Simulation Approaches	12
1.7.1	The Activity World View	13
1.7.2	The Event World View	13
1.7.3	The Process Interaction World View	13
1.8	Simulation Software	14
1.9	Simulation Study	15
1.10	Key Terms	17
1.11	Summary	17
	Exercises	18
2	Introduction to Arena	19
2.1	The Arena Window	19
2.2	Arena Modules	20
2.3	Using Arena	21
2.4	A Simple Model of The Carwash System	21

2.5	Summary	27
	Exercises	28
3	Introduction to Flexsim	31
3.1	Modeling Concepts and Terms in Flexsim	31
3.1.1	The Flexsim Window	32
3.1.2	Flexsim Objects	32
3.2	Using Flexsim	33
3.3	A Simple Model of The Carwash System	33
3.4	Summary	42
	Exercises	42
 Part II Object Oriented Programming with OOSimL		
4	Programs and Software Development	45
4.1	Introduction	45
4.1.1	Programs	45
4.2	Programming Languages	46
4.2.1	Assembly Languages	46
4.2.2	High-Level Programming Languages	46
4.2.3	Compiling a Program	47
4.2.4	Compiling OOSimL Programs	47
4.3	Software Development	47
4.3.1	Software Life Cycle	48
4.4	Summary	49
4.5	Key Terms	50
	Exercises	50
5	Object Orientation	51
5.1	Introduction	51
5.2	Modules	51
5.3	Modeling Objects	52
5.3.1	Defining Classes	52
5.3.2	Describing Objects	53
5.4	Object Interactions	55
5.5	Other Concepts of Object Orientation	56
5.5.1	Encapsulation	56
5.5.2	Information Hiding	57
5.6	Summary	57
5.7	Key Terms	58
	Exercises	58

6	Object-Oriented Programs	59
6.1	Introduction	59
6.2	Programs	59
6.3	Definition of Classes	59
6.4	Implementation of Programs	60
6.4.1	Programming Languages	61
6.4.2	Implementing Classes	61
6.5	Data Declaration	62
6.5.1	Data Names	63
6.5.2	Data Types	63
6.5.3	Data Declarations in OOSimL	64
6.5.4	Temporal and Spatial Properties	65
6.6	Functions	65
6.7	Summary	66
6.8	Key Terms	67
	Exercises	67
7	Functions	69
7.1	Introduction	69
7.2	Function Implementation	69
7.3	Function Calls	70
7.3.1	Calling Simple Functions	71
7.3.2	Value-Returning Functions	72
7.3.3	Function Calls with Arguments	73
7.4	Constructors	74
7.5	Complete Sample Program	76
7.6	Static Features	78
7.7	Summary	79
7.8	Key Terms	79
	Exercises	80
8	Design and Program Structures	81
8.1	Introduction	81
8.2	Design Notations	81
8.2.1	Flowcharts	82
8.2.2	Pseudo-code	83
8.3	Algorithmic Structures	84
8.3.1	Sequence	84
8.3.2	Selection	84
8.3.3	Repetition	85
8.4	Programming Statements	86
8.4.1	Assignment and Arithmetic Expressions	87
8.4.2	Simple Numeric Computing	88
8.4.3	Console I/O	89
8.5	Computing Area and Circumference	89

8.6	Summary	91
8.7	Key Terms	91
	Exercises	91
9	Selection	93
9.1	Introduction	93
9.2	Selection Structure	93
9.2.1	Flowchart of Selection Structure	93
9.2.2	IF Statement	94
9.2.3	Boolean Expressions	95
9.2.4	Example of Selection	95
9.3	Example Program	96
9.3.1	High-level Design	96
9.3.2	Implementation	97
9.4	If Statement with Multiple Paths	100
9.5	Using Logical Operators	101
9.6	The Case Statement	102
9.7	Summary	103
9.8	Key Terms	103
	Exercises	103
10	Repetition	105
10.1	Introduction	105
10.2	The While Loop Structure	105
10.2.1	While-Loop Flowchart	105
10.2.2	The While Statement	106
10.3	Employee Pay Problem with Repetition	107
10.4	Loop Until	109
10.5	For Loop Structure	110
10.6	Summary	111
10.7	Key Terms	112
	Exercises	112
11	Arrays	115
11.1	Introduction	115
11.2	Array Declaration	115
11.3	Creating Arrays	116
11.4	Manipulating an Array	117
11.5	Array Parameters	119
11.6	Array Return Types	120
11.7	Arrays with Multiple Dimensions	121
11.8	Examples with Arrays	122
11.8.1	Finding Maximum and Minimum Values in an Array	122
11.8.2	The Average Value in an Array	123
11.8.3	Searching	124

11.8.4	Sorting	127
11.9	Summary	128
11.10	Key Terms	129
	Exercises	129
12	Inheritance	131
12.1	Introduction	131
12.2	Modeling Classes	131
12.3	Inheritance	132
12.3.1	Defining Subclasses with OOSimL	133
12.3.2	Inheritance and Initializer Functions	133
12.3.3	Complete Example with Inheritance	135
12.3.4	Function Overriding	138
12.4	Summary	138
12.5	Key Terms	138
	Exercises	138
13	Advanced Object Oriented Concepts	141
13.1	Introduction	141
13.2	Abstract Classes	141
13.2.1	Definition of Abstract Classes	142
13.2.2	Inheriting Abstract Classes	143
13.3	Interfaces	144
13.3.1	Interface Definition	144
13.3.2	Implementing an Interface	145
13.4	Object Types	146
13.5	Polymorphism	146
13.6	Summary	147
13.7	Key Terms	148
	Exercises	148
14	Introduction to Graphical Interfaces	151
14.1	Introduction	151
14.2	Graphical Components	151
14.3	Containers	152
14.4	Frames	152
14.4.1	Simple Components	153
14.4.2	Placing Components in a Frame	154
14.5	Event-Driven Programs with GUIs	157
14.5.1	Event Components	158
14.5.2	Registering a Listener Object	158
14.5.3	Text Fields	159
14.5.4	Output Formatting	160
14.6	Panels	161
14.7	Applets	162

14.8	Drawing Objects	164
14.8.1	Functions for Drawing	164
14.8.2	Drawing of Rectangles	166
14.9	Summary	168
14.10	Key Terms	169
	Exercises	169
15	Exceptions	171
15.1	Introduction	171
15.2	Programming with Exceptions	171
15.2.1	Checked and Unchecked Exceptions	172
15.2.2	Handling of Exceptions	172
15.3	Summary	174
15.4	Key Terms	174
	Exercises	175
16	Input and Output	177
16.1	Introduction	177
16.2	Files	177
16.2.1	Text and Binary Files	178
16.2.2	Input and Output Streams	178
16.3	Using Text Files	178
16.3.1	Reading Text Files	179
16.3.2	Writing Text Files	180
16.3.3	Write File Application	181
16.3.4	Read File Application	183
16.4	Summary	186
16.5	Key Terms	187
	Exercises	187
17	Recursion	189
17.1	Introduction	189
17.2	Defining Recursive Solutions	189
17.3	Examples of Recursive Functions	190
17.3.1	Sum of Squares	190
17.3.2	Exponentiation	191
17.3.3	Reversing a Linked List	193
17.4	Recursive Executions	197
17.5	Summary	199
17.6	Key Terms	199
	Exercises	199

18	Threads	201
18.1	Introduction	201
18.2	Programming with Multiple Threads	201
18.3	Defining Thread Classes	202
18.4	More on Thread Behaviors	203
18.4.1	Suspending A Thread	203
18.4.2	Interrupting a Thread Object	204
18.4.3	Thread Priorities	205
18.4.4	Thread Coordination	205
18.4.5	The Wait/Notify Mechanism	206
18.5	Summary	207
18.6	Key Terms	207
18.7	Exercises	208
	Exercises	208
19	Linked lists	209
19.1	Introduction	209
19.2	General Form of a Linked List	209
19.3	Node Objects	210
19.4	Linked Lists	211
19.5	Linked List with Two Ends	215
19.6	Nodes with Two Links	217
19.7	Higher-level Data Structures	218
19.7.1	Queues	218
19.7.2	Stacks	221
19.8	Generic Classes	224
19.9	Using Java Collections Framework	227
19.9.1	Declaring and Creating Collection Object References	228
19.9.2	Operations on List Collections	228
19.10	Summary	230
19.11	Key Terms	230
	Exercises	230
20	Using Assertions with Programming	233
20.1	Introduction	233
20.2	Using Assertions in Programming	233
20.2.1	Preconditions	235
20.2.2	Postconditions	235
20.2.3	Class Invariants	235
20.3	Advantages of Using Assertions	235
20.4	Specification of Classes	236
20.4.1	The Notion of a Contract	236
20.4.2	Class Invariants	237
20.4.3	Improved Documentation	237
20.5	Using Assertions with OOSimL	237

20.6 Loop Invariants and Loop Variants	242
20.6.1 Loop Invariants	242
20.6.2 Loop Variants	243
20.6.3 Examples in OOSimL	243
20.7 Summary	245
20.8 Key Terms	245
Exercises	245

Part III Discrete-Event Simulation

21 Models of Single-Server Systems	249
21.1 Introduction	249
21.2 Object-Oriented Simulation with OOSimL	249
21.3 Implementing A Simulation Model	250
21.3.1 General Form of a Model	250
21.3.2 The Main Class	251
21.3.3 Method <i>main</i>	251
21.3.4 Method <i>main_body</i>	251
21.4 General Structure of Single-Server Models	252
21.5 A Model for The Car-Wash System	252
21.5.1 The Conceptual Model	253
21.5.2 The Car-Wash Deterministic Model	255
21.5.3 The Car-Wash Stochastic Model	258
21.6 Activity Diagrams	260
21.6.1 Activity Symbols	261
21.6.2 Process Interaction	262
21.7 Implementing The Simulation Model	266
21.8 Graphical User Interfaces	277
21.9 Summary	279
21.10 Key Terms	279
Exercises	279
22 Models of Multi-Server Systems	281
22.1 Introduction	281
22.2 Queuing Models	281
22.3 Multi-Server Queuing Models	282
22.4 The Carwash System	282
22.4.1 The Server Object	284
22.4.2 The Car Object	284
22.4.3 The Arrivals Object	284
22.4.4 Simulation Outputs	285
22.5 OOSimL Implementation of the Model	287
22.6 Models With Multiple Queues	292
22.6.1 The Customer Object	292
22.6.2 The Server Object	293

22.7	Queuing Networks	293
22.8	Summary	294
22.9	Key Terms	295
	Exercises	295
23	Models with Priorities	297
23.1	Introduction	297
23.2	Priorities With Single-Server Models	298
23.2.1	Process Priorities	298
23.2.2	Priority Queues	299
23.3	Car Wash Model with Priorities	302
23.3.1	Description of the Server Object	302
23.3.2	The Arrivals Objects	302
23.3.3	The Car Objects	303
23.3.4	Outputs of a Simulation Run	303
23.3.5	Implementation Of the Carwash Model	307
23.4	Multi-Server Models with Priorities	315
23.5	Summary	315
23.6	Key Terms	316
	Exercises	316
24	Standard Resources	317
24.1	Introduction	317
24.2	Resource Manipulation	317
24.2.1	Software Implementation of Resources	318
24.2.2	Using Resources	320
24.3	Model of a Warehouse System	322
24.4	Allocating Resources with Priorities	329
24.5	Deadlock	329
24.6	Summary	329
	Exercises	330
25	Detachable Resources	331
25.1	Introduction	331
25.2	Infinite Containers	331
25.3	Producer and Consumer Processes	332
25.4	Implementing Detachable Resources	333
25.4.1	OOSimL Implementation	334
25.4.2	Producer Process	335
25.4.3	Consumer Process	335
25.5	A Machine Parts-Replacement System	336
25.6	Summary	343
25.7	Exercises	343

26	Synchronous Process Cooperation	345
26.1	Introduction	345
26.2	Joint Process Activities	345
26.3	Synchronization Mechanism	346
26.3.1	Creating Cooperation Objects in OOSimL	347
26.3.2	Wait to Cooperate	348
26.3.3	Cooperate with Slave Process	348
26.3.4	Length of Slave Queue	349
26.3.5	Length of Master Queue	349
26.4	Cooperation with Several Slaves	349
26.5	Synchronous Process Communication	350
26.6	Process Cooperation Model	351
26.7	Summary	361
26.8	Questions	361
27	Conditional Waiting	363
27.1	Introduction	363
27.2	Using Conditional Waiting	363
27.3	Conditional Waiting with OOSimL	365
27.3.1	Creating Conditional Objects	365
27.3.2	Wait Until Condition	365
27.3.3	Signal Conditional Object	366
27.3.4	Length of Conditional Queue	366
27.4	The Port System	367
27.4.1	Implementing The Simulation Model	367
27.5	Summary	373
27.6	Exercises	373
28	Interrupts	375
28.1	Introduction	375
28.2	Basic concepts of Interrupts	375
28.3	Handling Interrupts	376
28.4	Interrupts using OOSimL	378
28.4.1	Checking the Interrupt Level	378
28.4.2	Get the Interrupt Level Status	379
28.4.3	Get Remaining Time	379
28.4.4	Clear Interrupt Levels	380
28.5	Carwash Model with Interrupts	380
28.6	The Machine Breakdowns Model	389
28.7	Summary	390
28.8	Key Terms	391
	Exercises	391

29	Input Analysis and Specification	393
29.1	Introduction	393
29.2	Types of Input Variables	394
29.3	Representing Data	394
29.3.1	Probability Distributions	395
29.3.2	The Uniform Distribution	396
29.3.3	The Triangular Distribution	396
29.3.4	The Exponential Distribution	397
29.3.5	The Normal Distribution	398
29.3.6	The Weibull Distribution	399
29.3.7	The Bernoulli Distribution	400
29.3.8	The Geometric Distribution	400
29.3.9	The Binomial Distribution	401
29.3.10	The Poisson Distribution	401
29.4	Testing Selected Distributions	402
29.5	Summary	402
	Exercises	403
30	Simulation Output Analysis	405
30.1	Introduction	405
30.2	Performance Measures	405
30.3	Comparing Sample Data	406
30.4	Statistical Inference	407
30.4.1	Confidence Intervals	407
30.4.2	Calculating A Confidence Interval	407
30.5	Terminating and Non-terminating Runs	408
30.5.1	Analyzing Terminating Simulations	408
30.5.2	Analyzing Non-terminating Simulations	409
30.6	Summary	409
31	Model Validation	411
31.1	Introduction	411
31.2	Verification Techniques for Simulation Models	411
31.2.1	Simulation Traces	412
31.2.2	Simulation Tests	412
31.3	Validation of Simulation Models	412
31.3.1	General Validation Approach	413
31.3.2	Black Box Validation	414
31.3.3	White Box Validation	414
31.4	Summary	415
A	Configuring Tools and Compiling OOSimL Programs	417
A.1	The OOSimL Compiler	417
A.2	Developing Models with The jGRASP Environment	418
A.3	Using The Eclipse Platform	423

A.4	Configuring Eclipse for OOSimL Models	423
A.4.1	Setting Eclipse for Editing OOSimL Source Files	424
A.4.2	Configuring Eclipse for the OOSimL Compiler	426
A.4.3	Developing OOSimL Simulation Models with Eclipse	427
A.5	Developing Models in a DOS Window	430
B	Overview of Basic Probability Theory	435
B.1	Introduction	435
B.2	Experiments and Probabilities	435
B.2.1	Set Theory	435
B.2.2	Probabilities	436
B.3	Random Variables	437
B.4	Other Properties of Random Variables	438
B.5	Stochastic Processes	438
B.6	Random Numbers in Simulation Models	439
