

# Cancer Stem Cells

## Identification and Targets

*Edited by*  
*Sharmila Bapat*

# CONTENTS

<b>Contributors</b>	<b>xi</b>
<b>Preface</b>	<b>xiii</b>
<b>1 Cancer Stem Cells: Similarities and Variations in the Theme of Normal Stem Cells</b>	<b>1</b>
<i>Sharmila Bapat, Anne Collins, Michael Dean, Kenneth Nephew, and Suraiya Rasheed</i>	
1.1 Introduction,	1
1.2 Stem Cells in the Life of an Organism,	2
1.2.1 Stem Cells in Early Development and Fetal Life,	3
1.2.2 Stem Cells in the Adult Organism,	4
1.3 Cancer Stem Cells,	7
1.3.1 Activation of Stem Cells and Cancer,	7
1.3.2 Isolation and Identification of Cancer Stem Cells,	10
1.3.3 De Novo Generation of a New Organ (Tumor) by Transformed Stem Cells,	12
1.4 Self-Renewal and Differentiation in CSCs,	13
1.5 CSC Plasticity as Regulated by Intrinsic and Extrinsic Stem Cell Factors,	14
1.5.1 Stem Cell Intrinsic Factors: Genetic and Epigenetic Effects,	14
1.5.2 Stem Cell Extrinsic Effects: Niche Effects and Microenvironmental Signaling,	16
1.6 Conclusions and Future Perspectives,	18
References,	20
<b>2 Leukemic Stem Cells</b>	<b>27</b>
<i>Sharmila Bapat</i>	
2.1 Introduction,	27
2.2 Dysregulation of Hematopoiesis in Leukemia,	28
2.2.1 Normal Hematopoietic Stem Cell Hierarchies,	28
2.2.2 Understanding Aberrant Hierarchies in Leukemia,	30
2.2.3 Types of Leukemia,	31

- 2.3 Identification and isolation of Cancer-Initiating Cells in Leukemia, 35
- 2.4 Molecular Regulation of Aberrant Hierarchies, 36
  - 2.4.1 Signaling Pathways Deregulated in Leukemia, 37
  - 2.4.2 Self-Renewal of Normal and Leukemic Stem Cells, 39
  - 2.4.3 Epigenetic Effects, 40
  - 2.4.4 MicroRNA in Leukemia Development, 42
- 2.5 Conclusions and Future Perspectives, 44
- References, 45

### **3 Isolation and Characterization of Breast and Brain Cancer Stem Cells**

57

*Meera Saxena and Annapoorni Rangarajan*

- 3.1 Introduction, 57
- 3.2 Breast Cancer Stem Cells, 58
  - 3.2.1 Mammary Gland Architecture and Cell Types, 58
  - 3.2.2 Breast Cancer, 59
  - 3.2.3 Identification of Breast Cancer Stem Cells, 59
  - 3.2.4 Putative Breast Cancer Stem Cells that Exhibit the CD44<sup>+</sup> CD24<sup>-/low</sup> Lin<sup>-</sup> Marker Profile, 61
  - 3.2.5 ESA<sup>+</sup> Subpopulation of CD24<sup>-low</sup> Lin<sup>-</sup> Cells Enriched by Tumorigenicity, 61
  - 3.2.6 Tumorigenic Breast Cells Displaying Properties of Stem Cells, 61
  - 3.2.7 In Vitro Propagation of Breast Cancer Stem Cells as Mammospheres, 62
- 3.3 Brain Cancer Stem Cells, 64
  - 3.3.1 Brain Architecture and Cell Types, 64
  - 3.3.2 Brain Cancers, 65
  - 3.3.3 Brain Stem Cells, 66
  - 3.3.4 Brain Cancer Stem Cells, 66
  - 3.3.5 Brain Cancer-Derived Cells that Generate Tumor Spheres, 67
- 3.4 Conclusions and Future Perspectives, 69
- References, 70

### **4 Cancer Stem Cell Side Populations**

73

*Danuta Balicki and Raymond Beaulieu*

- 4.1 Introduction, 73
- 4.2 Stem Cell Side Populations, 75
- 4.3 Side Populations in Normal Tissue, 78
- 4.4 Side Populations in Tumors, 79

4.5	Overcoming Side Population Limitations,	80
4.6	Conclusions and Future Perspectives,	81
	References,	82
<b>5</b>	<b>Evidence for Cancer Stem Cells in Retinoblastoma</b>	<b>87</b>
	<i>Gail M. Seigel</i>	
5.1	Introduction,	87
5.2	Elusive Origins of Retinoblastoma,	87
5.3	Sources of Retinoblastoma Cells for Study,	88
5.4	Precedent for Cancer Stem Cells,	88
5.5	Side Populations in Retinoblastoma,	89
5.6	Immunoreactivity to Stem Cell Markers in Retinoblastoma,	89
5.7	Conclusions and Future Perspectives,	91
	References,	92
<b>6</b>	<b>Ovarian Stem Cell Biology and the Emergence of Ovarian Cancer Stem Cells</b>	<b>95</b>
	<i>Anjali Kusumbe and Sharmila Bapat</i>	
6.1	Introduction,	95
6.2	Overview of the Human Ovary,	95
6.2.1	Histological Landmarks,	95
6.2.2	Ovarian Development: The Story Before Birth,	96
6.2.3	The Mammalian Oogenesis Dogma,	98
6.3	Stem/Progenitor Cells in the Adult Mammalian Ovary,	98
6.3.1	Historical Perspective,	98
6.3.2	The Oogenesis Dogma Revisited,	99
6.4	Is Ovarian Cancer a Stem Cell Disease?,	104
6.4.1	Putative Role of Stem/Progenitor Cells in Ovarian Cancer,	104
6.4.2	Tumor as an Aberrant Organ Initiated by Cancer Stem Cells,	105
6.4.3	Ovarian Cancer Stem Cells Isolated as a Side Population,	106
6.4.4	New Challenge: Targeting Ovarian Cancer Stem Cells,	106
	References,	107
<b>7</b>	<b>Prostate Cancer Stem Cells</b>	<b>111</b>
	<i>Stefanie Hager, Norman J. Maitland, and Anne Collins</i>	
7.1	Introduction,	111
7.2	Human Prostate Biology, Gland Architecture, and Pathological Alterations,	111

- 7.3 Prostate Epithelial Stem Cells, 113
  - 7.3.1 Evidence for Prostate Epithelial Stem Cells, 113
  - 7.3.2 Isolation of Human Prostate Epithelial Stem Cells and Demonstration of Their Stem Cell Character, 116
  - 7.3.3 Epithelial Stem Cells in the Murine Prostate, 118
  - 7.3.4 Other Markers of Prostate Epithelial Stem Cells, 119
- 7.4 Prostate Cancer Stem Cells, 120
  - 7.4.1 Role of Stem Cells in Prostate Cancer, 120
  - 7.4.2 Prospective Isolation of Prostate Cancer Stem Cells from Human Tissue Samples, 122
  - 7.4.3 Role of the Stem Cell Niche in Prostate Cancer, 124
  - 7.4.4 Putative Markers of Prostate Cancer Stem Cells, 124
- 7.5 Stem Cell Tracking in the Prostate, 125
- 7.6 Conclusions and Future Perspectives, 127
- References, 127

## **8 Molecular Signatures of Highly Malignant Melanoma Stem Cells 135**

*Suraiya Rasheed*

- 8.1 General Properties of Human Melanomas, 135
- 8.2 Characteristics of Stem Cell–Derived Melanomas, 136
- 8.3 The Cat Model System for Stem Cell Melanomas, 137
  - 8.3.1 Biological Characteristics of Highly Malignant Stem Cell Melanomas, 138
  - 8.3.2 Trans-differentiation of the Malignant Cat Melanoma into Neuronal Cells, 139
  - 8.3.3 Proteins Associated with Neuronal Cell Differentiation, 140
  - 8.3.4 Cell Cycle Dysregulation and Antitumorigenic Effects During Cell Differentiation, 144
  - 8.3.5 Molecular Signatures of Self Renewal and Long-Term Proliferation of Tumor Cells, 145
  - 8.3.6 Proteins Involved in Tumorigenesis and Metastasis, 147
  - 8.3.7 Expression of Germline and Embryonic Proteins in Cat Melanomas, 149
  - 8.3.8 Naturally Occurring Protein–Protein Interaction Complexes in Melanomas, 149
  - 8.3.9 Networks of Protein Interaction Pathways, 152
- 8.4 Challenges of Research in Cancer Stem Cells and Therapeutics, 152
- 8.5 Conclusions and Future Perspectives, 154
- References, 156

<b>9</b>	<b>Invasion Program of Normal and Cancer Stem Cells</b>	<b>167</b>
	<i>David Olmeda, Gema Moreno-Bueno, David Sarrió, José Palacios, and Amparo Cano</i>	
9.1	Introduction, 167	
9.2	Basics of Tumor Progression: Invasion and Metastasis, 168	
9.3	Epithelial-to-Mesenchymal Transition in Development and Its Relation to The Invasive Process, 169	
9.4	Regulation of EMT: From Signals to Molecular Pathways, 172	
9.5	EMT and Cancer Stem Cells, 176	
9.6	Can Stem Cell Properties Be Extensive to Invasive Tumor Cells?, 177	
9.7	Is There a Unique EMT Program Linked to Invasion?, 178	
9.8	Evidence of EMT in Human Clinical Tumors, 180	
9.9	Expression of Mesenchymal Markers and Cadherin Switching in Carcinomas, 181	
9.10	Expression of EMT Inducers in Human Tumors, 183	
9.11	Occurrence of EMT in a Specific Subset of Breast Carcinomas, 185	
9.12	Conclusions and Future Perspectives, 186	
	References, 187	
<b>10</b>	<b>Epigenetics in Cancer Stem Cell Development</b>	<b>197</b>
	<i>Kenneth Nephew, Curt Balch, Tim H.-M. Huang, Zhang Shu, Michael Chan, and Pearlly Yan</i>	
10.1	Introduction, 197	
10.2	Characterization of Candidate Cancer Stem Cells, 198	
10.3	Possible Origins of Cancer Stem Cells, 198	
10.4	Epigenetics in Normal Development, 199	
10.5	Epigenetic Regulation of the Cancer Stem Cell Phenotype, 200	
10.6	Contributions of Epigenetics to Drug Resistance in Cancer Stem Cells, 204	
10.7	Genome-Wide Interrogation of Epigenetic Modifications in Cancer Stem Cells, 206	
10.8	Epigenetic Therapies Against Poorly Differentiated Cancer Cells, 207	
10.9	Conclusions and Future Perspectives, 208	
	References, 209	
<b>11</b>	<b>Cancer Stem Cells and New Therapeutic Approaches</b>	<b>217</b>
	<i>Michael Dean</i>	
11.1	Cancer Stem Cells, 217	

- 11.2 Activation of Stem Cells and Cancer, 218
  - 11.2.1 Initiation and Promotion Revised, 219
  - 11.2.2 Stem Cell Activation and Specific Cancers, 221
- 11.3 Major Cancers and Risk Factors, 223
  - 11.3.1 Liver Cancer, 223
  - 11.3.2 Lung Cancer, 224
  - 11.3.3 Gastric Cancer, 224
  - 11.3.4 Pancreatic Cancer, 224
  - 11.3.5 Cervical Cancer, 225
- 11.4 Treatment Implications, 225
- 11.5 Future Perspectives, 227
- 11.6 Conclusions, 228
- References, 243

## **12 Immunobiology of Cancer Stem Cells**

**233**

*Shubhada V. Chiplunkar*

- 12.1 Cancer Stem Cells, 233
- 12.2 Cancer Stem Cells and Lymphocytes, 234
- 12.3 Trafficking of Normal Stem Cells and Metastasis of Cancer Stem Cells, 236
- References, 238
