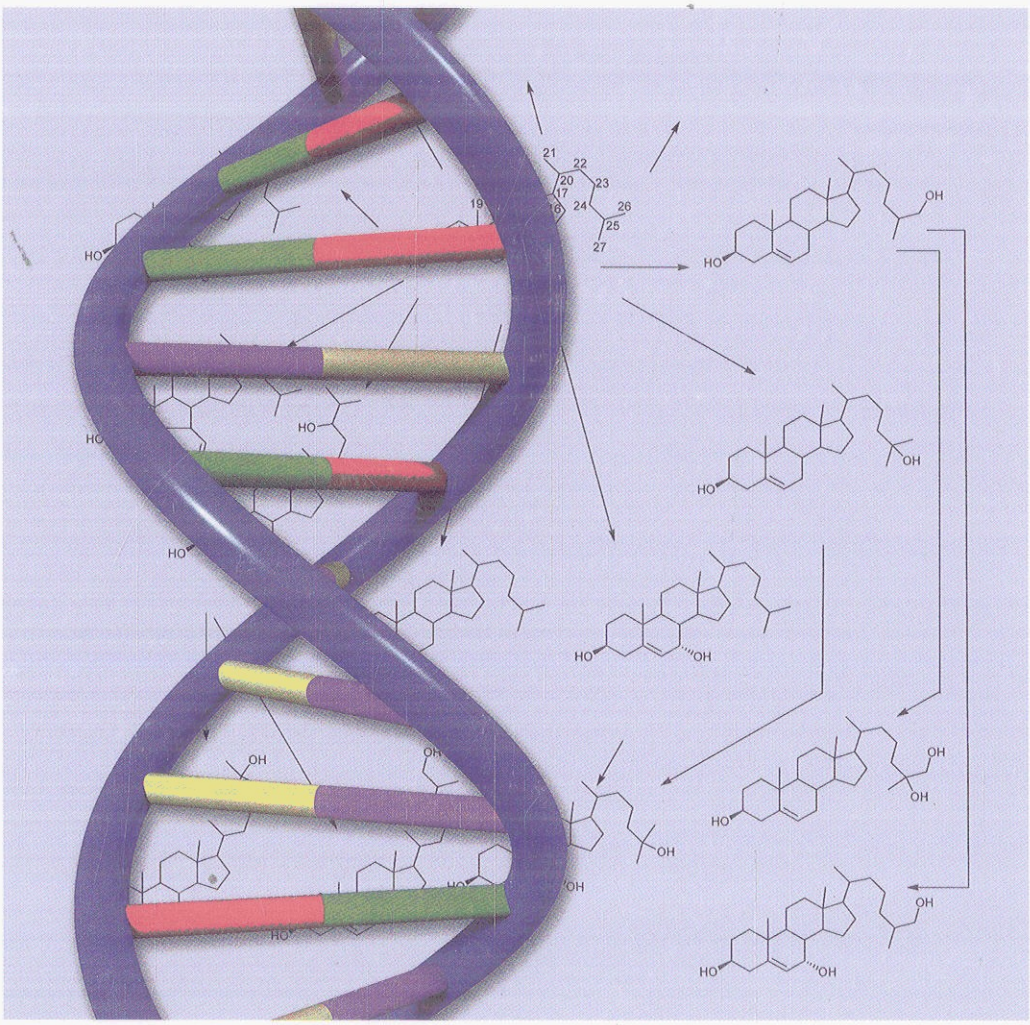
RSC Biomolecular Sciences

Edited by William J Griffiths

Metabolomics, Metabonomics and Metabolite Profiling



RSC Publishing

Contents

Chapter 1 **Mass Spectrometry for Metabolite Identification**
Yuqin Wang and William J. Griffiths

1.1 Introduction 1
1.2 Mass Spectrometry 1
1.2.1 Principles 1
1.2.2 Ionisation 2
1.2.3 Mass Analysers 14
1.2.4 Gas Chromatography/Mass Spectrometry (GC-MS) 22
1.2.5 Tandem Mass Spectrometry (MS/MS) 26
1.2.6 Liquid Chromatography–Mass Spectrometry (LC-MS) 27
1.3 Future Perspectives 29
Acknowledgements 31
References 31

Chapter 2 **1D and 2D NMR Spectroscopy: From Metabolic Fingerprinting to Profiling**
Mark R. Viant, Christian Ludwig and Ulrich L. Günther

2.1 Introduction 44
2.2 NMR Methods in Metabolomics 46
2.2.1 Sample Preparation 46
2.2.2 1D NMR Methods 47
2.2.3 2D NMR Methods 51
2.3 NMR Data Analysis 56
2.3.1 NMR Fingerprinting 56
2.3.2 Multi-dimensional Analysis of 2D NMR Spectra 63
2.3.3 NMR Profiling 63

2.3.4 Reporting Requirements for NMR Metabolomics 65
2.4 Conclusions and Future Developments 66
Acknowledgements 67
References 67

Chapter 3 Steroids, Sterols and the Nervous System
Yuqin Wang and William J. Griffiths

3.1 Introduction 71
3.2 Steroids, Neurosteroids, Oxysterols and Neurosterols 78
3.2.1 Steroids 78
3.2.2 Neurosteroids 78
3.2.3 Oxysterols 78
3.2.4 Neurosterols 85
3.2.5 Biological Activity of Oxysterols 86
3.3 Analysis by Mass Spectrometry 87
3.3.1 GC-MS Analysis 88
3.3.2 LC-MS Analysis 90
3.4 Metabolite Profiling in Brain: Neurosteroids and Neurosterols 96
3.5 Linking Proteomics with Lipidomics 101
3.6 Future Prospective 106
Acknowledgement 106
Appendix 106
References 108

Chapter 4 Phospholipid Profiling
Anthony D. Postle

4.1 General Overview of Lipidomic Characterisation of Membrane Function 116
4.2 Phospholipid Structures 117
4.3 Electrospray Ionisation Mass Spectrometry of Phospholipids 118
4.4 Phospholipid Metabolism 121
4.5 Phospholipids of Lung Surfactant 122
4.5.1 Lung Structure and Surfactant Function 123
4.5.2 ESI/MS Analysis of Lung Surfactant Phospholipid 125
4.6 Conclusions 131
References 131

Chapter 5 New Developments in Multi-dimensional Mass Spectrometry Based Shotgun Lipidomics
Xianlin Han and Richard W. Gross

5.1 Introduction 134
5.2 The Principles of Multi-dimensional Mass Spectrometry Based Shotgun Lipidomics 137
5.2.1 Multiplexed Extractions 137
5.2.2 Intrasource Separation 138
5.2.3 Identification of Lipid Molecular Species by Multi-dimensional Mass Spectrometry and Array Analysis 139
5.2.4 Quantitation of Lipid Molecular Species Using a Two-step Procedure 141
5.2.5 Analysis in the Low Concentration Regime by Shotgun Lipidomics 141
5.3 The Chemical Mechanisms Underlying Intrasource Separation 142
5.4 An Enhanced Shotgun Lipidomics for Cardiolipin Analysis 145
5.5 Derivatization as an Additional Dimension of Multi-dimension Mass Spectrometry in Shotgun Lipidomics 150
5.5.1 Derivatization of Phosphoethanolamine-containing Lipid Molecular Species for Shotgun Lipidomics 152
5.5.2 Derivatization of Cholesterol with Methoxy-acetic Acid for Quantitation by Shotgun Lipidomics 156
5.6 Summary 158
Acknowledgements 158
References 158

Chapter 6 Neutral Lipidomics and Mass Spectrometry
Robert C. Murphy, Mark Fitzgerald and Robert M. Barkley

6.1 Introduction 161
6.1.1 Neutral Lipid Analysis and Lipidomics 161
6.2 Glyceryl Lipids 162
6.2.1 Overview 162
6.2.2 Electron Ionization (EI) 164
6.2.3 Negative-ion Chemical Ionization (NCI) 165
6.2.4 Electrospray Ionization/Tandem Mass Spectrometry 166
6.2.5 Atmospheric Pressure Chemical Ionization 173

6.3 Cholesterol Esters 177
6.3.1 Electron Ionization 179
6.3.2 Chemical Ionization 180
6.3.3 Electrospray Ionization 180
6.4 Wax Esters 181
6.4.1 Electron Ionization 183
6.4.2 Electrospray and Desorption Ionization 188
6.5 Conclusions 189
Acknowledgement 189
References 189

Chapter 7 Bioinformatics of Lipids
Eoin Fahy

7.1 Introduction 195
7.2 Lipid Classification, Nomenclature, and Structure Representation 196
7.2.1 Classification 196
7.2.2 Nomenclature 199
7.2.3 Structure Representation 200
7.3 Lipid Molecular Databases 200
7.4 Lipid-associated Protein/Gene Databases 202
7.5 Lipid-associated Pathways and Networks 203
7.5.1 Lipidomic Data 204
7.6 Bioinformatics Tools for Lipidomics Research 204
7.6.1 Data Collection 204
7.6.2 Standards Libraries 205
7.6.3 MS Prediction Tools 206
7.6.4 Automated Structure Drawing 207
7.7 Conclusion 208
Acknowledgements 208
References 208

Chapter 8 Mass Spectrometry in Glycobiology
João Rodrigues, Carla Antonio, Sarah Robinson and Jane Thomas-Oates

8.1 Introduction 210
8.2 Glycolytic Intermediates and Sugar Phosphates 212
8.2.1 Sampling and Extraction 212
8.2.2 Sample Handling and Derivatisation 213
8.2.3 Analytical Methods 213
8.2.4 Data Analysis 217

8.3 Metabolic Disorders of Carbohydrate Metabolism 218
8.3.1 Sampling and Extraction 219
8.3.2 Sample Handling and Derivatisation 220
8.3.3 Analytical Methods 221
8.3.4 Data Analysis 224
8.4 Glucuronidated Metabolites as Biomarkers for Drug and Alcohol Abuse 224
8.4.1 Sampling and Extraction 225
8.4.2 Sample Handling and Derivatisation 226
8.4.3 Analytical Methods 226
8.5 Conclusions 230
References 231

Chapter 9 Matrix Assisted Laser Desorption Ionisation Mass Spectrometric Imaging – Principles and Applications
Caroline J. Earnshaw, Sally J. Atkinson, Michael Burrell and Malcolm R. Clench

9.1 Introduction 234
9.2 Practical Aspects of MALDI Mass Spectrometric Imaging (MALDI-MSI) 235
9.2.1 Instrumentation for MALDI-MSI 235
9.2.2 Sample Preparation Procedures 238
9.3 Applications of MALDI-MSI 240
9.3.1 MALDI-MSI in the Study of Proteins in Diseased and Healthy Tissue 240
9.3.2 MALDI-MSI in the Study of Drug/Xenobiotic Distribution 240
9.3.3 MALDI-MSI and Phospholipids 244
9.3.4 MALDI-MSI and Metabonomics 246
9.4 Data Handling and Data Interpretation Issues 249
9.5 Conclusions 251
Acknowledgements 251
References 251

Chapter 10 Plant Metabolomics
Thomas Moritz and Annika I. Johansson

10.1 Introduction 254
10.2 Analytical Technology 255
10.2.1 General Considerations 255
10.2.2 Sample Preparation 256
10.2.3 GC/MS 257
10.2.4 LC/MS 259

10.3 Applications of Plant Metabolomics 261
10.3.1 Phenotyping Plants Using Metabolomics 261
10.3.2 Genetic Metabolomics: Identification of Metabolic QTLs 264
10.3.3 Plant Metabolomics and Gene Identification 265
10.3.4 Other Applications of Plant Metabolomics 268
10.4 Conclusions and Future Directions 268
References 269

Chapter 11 Data Mining for Metabolomics
Anders Nordström

11.1 Introduction 273
11.1.1 Data Extraction – Generating Variables 274
11.1.2 Data Pre-treatment 278
11.2 Data Mining 279
11.2.1 Multivariate Data Mining 280
11.2.2 Exploratory Data Mining 283
11.2.3 Databases 284
11.3 Conclusions 288
Acknowledgement 288
References 288

Chapter 12 Metabonomics and Global Systems Biology
Ian D Wilson and Jeremy K. Nicholson

12.1 Introduction 295
12.2 Biological Fluids as a Window on the Global "System" 297
12.3 Examples of the Use of Metabonomics in Normal and Disease Models 298
12.4 The Microbiome – an Integral Part of the Global System 303
12.5 Pharmaco-metabonomics 306
12.6 Combining Omics 307
12.7 Conclusions 314
References 314

Subject Index 317
