

Real-time PCR

Current Technology
and Applications

Edited by
Julie Logan,
Kirstin Edwards,
and Nick Saunders

Contents

	List of contributors	v
	Preface	ix
1	An Introduction to Real-Time PCR Nick A. Saunders	1
2	An Overview of PCR Platforms Julie M. J. Logan and Kirstin J. Edwards	7
3	Homogeneous Fluorescent Chemistries for Real-Time PCR Martin A. Lee, David J. Squirrell, Dario L. Leslie and Tom Brown	23
4	Reference Gene Validation Software for Improved Normalization Jo Vandesompele, Mikael Kubista and Michael W. Pfaffl	47
5	Data Analysis Software Michael W. Pfaffl, Jo Vandesompele and Mikael Kubista	65
6	Performing Real-time PCR Kirstin J. Edwards and Julie M. J. Logan	85
7	Internal and External Controls for Reagent Validation Martin A. Lee, Dario L. Leslie and David J. Squirrell	95
8	Introduction to the Applications of Real-Time PCR Nick A. Saunders	105
9	Analysis of mRNA Expression by Real-time PCR Stephen A. Bustin and Tania Nolan	111
10	Validation of Array Data Elisa Wurmbach	137
11	Mutation Detection by Real-Time PCR Elaine Lyon, Rong Mao and Jeffrey Swensen	149
12	Real-Time NASBA Julie D. Fox, Catherine Moore and Diana Westmoreland	163

iv | Contents

13	Applications in Clinical Microbiology Andrew David Sails	177
14	Diagnosis of Invasive Fungal Infections David S. Perlin	221
15	Biodefence Christina Egan, Nick M. Cirino and Kimberlee A. Musser	235
16	Real-time PCR: Application to Food Authenticity and Legislation Gordon Wiseman	253
17	Molecular Haplotyping by Real-time PCR Genevieve Pont-Kingdon, Alison Millson and Elaine Lyon	269
	Index	279
	Plates	A-1
