

# *Lactobacillus* Molecular Biology

From Genomics to Probiotics

Edited by Åsa Ljungh and Torkel Wadström

# Contents

	List of contributors	v
	Preface	ix
1	History of Probiotics and Living Drugs Åsa Ljungh and Torkel Wadström	1
2	Taxonomy and Metabolism of <i>Lactobacillus</i> Bruno Pot and Effie Tsakalidou	3
3	Comparative and Functional Genomics of the Genus <i>Lactobacillus</i> Jan-Peter Van Pijkeren and Paul W. O'Toole	59
4	Studies of the Intestinal Microflora by Traditional, Functional and Molecular Techniques Elisabeth Norin, Cecilia Jernberg, Hans-Olof Nilsson and Lars Engstrand	83
5	Surface Proteins of <i>Lactobacillus</i> Involved in Host Interactions Jenni Antikainen, Timo K. Korhonen, Veera Kuparinen, Takahiro Toba and Stefan Roos	95
6	<i>Lactobacillus</i> Stress Responses Graciela L. Lorca and Graciela Font de Valdez	115
7	Interactions of <i>Lactobacillus</i> with the Immune System Denny Demeria, Julia Ewaschuk and Karen Madsen	139
8	Lactic Acid Bacteria: Probiotics With Anti-Cancer Activities Chandra Iyer and James Versalovic	153
9	<i>Lactobacillus</i> in the Gastrointestinal Tract John Keohane, Kieran Ryan and Fergus Shanahan	169
10	<i>Lactobacillus</i> in the Vagina: Why, How, Which Ones, and What Do They Do? Gregor Reid	183
11	From Probiotics, Prebiotics and Synbiotics to 'Living Drugs' Åsa Ljungh and Torkel Wadström	197
	Index	203
