Contents

SECTION I: HEALTH APPRAISAL AND RISK ASSESSMENT

1	Benefits and Risks Associated with Physical Activity	2
	Physical Activity and Fitness Terminology	2
	Public Health Perspective for Current Recommendations	5
	Benefits of Regular Physical Activity and/or Exercise	8
	Risks Associated with Exercise	8
	Sudden Cardiac Death among Young Individuals	10
	Exercise-Related Cardiac Events in Adults	11
	Exercise Testing and the Risk of Cardiac Events	12
	Risks of Cardiac Events during Cardiac Rehabilitation	12
	Prevention of Exercise-Related Cardiac Events	12
	References	15
2	Preparticipation Health Screening and Risk Stratification	18
	Preparticipation Screening	19
	Self-Guided Screening for Physical Activity	19
	Professionally Guided Screening for Physical Activity	22
	Risk Stratification	22
	Undisclosed or Unavailable Cardiovascular Disease Risk-Factor Information	24
	Known Cardiovascular, Pulmonary, and Metabolic Disease	25
	Major Signs/Symptoms Suggestive of Cardiovascular, Pulmonary, and Metabolic Disease	25
	Atherosclerotic Cardiovascular Disease Risk Factors	25
	Exercise Testing and Participation Recommendations	
	Based on Risk Category	31
	Exercise Testing and Testing Supervision Recommendations	
	Based on Risk Category	31
	Risk Stratification for Cardiac Patients	37
	References	39

SECTION II: EXERCISE TESTING

3	Pre-Exercise Evaluations	42
	Medical History, Physical Examination, and Laboratory Tests	42
	Blood Pressure	46
	Lipids and Lipoproteins	48
	Blood Profile Analyses	50
	Pulmonary Function	51

Contraindications to Exercise Testing	53
Informed Consent	53
Participant Instructions	58
References	58
4 Health-Related Physical Fitness Testing and Interpretation	60
Purposes of Health-Related Fitness Testing	60
Basic Principles and Guidelines	60
Pretest Instructions	61
Test Order	61
Test Environment	62
Body Composition	62
Anthropometric Methods	63
Densitometry	69
Other Techniques	70
Body Composition Norms	70
Cardiorespiratory Fitness	71
The Concept of Maximal Oxygen Uptake	72
Maximal versus Submaximal Exercise Testing	73
Modes of Testing	74
Cardiorespiratory Test Sequence and Measures	80
Test Termination Criteria	82
Interpretation of Results	84
Muscular Strength and Muscular Endurance	85
Rationale	87
Principles	88
Muscular Strength	90
Muscular Endurance	93
Special Considerations	96
Flexibility	98
A Comprehensive Health Fitness Evaluation	101
References	102
5 Clinical Exercise Testing	105
Indications and Applications	105
Diagnostic Exercise Testing	105
Exercise Testing for Disease Severity and Prognosis	106
Exercise Testing after Myocardial Infarction	107
Functional Exercise Testing	107
Exercise Test Modalities	111
Exercise Protocols	112
Upper-Body Exercise Testing	113
Testing for Return to Work	113
Measurements during Exercise Testing	116
Heart Rate and Blood Pressure	116
Electrocardiographic Monitoring	118
Subjective Ratings and Symptoms	120

Gas Exchange and Ventilatory Responses	121
Blood Gases	121
Indications for Exercise Test Termination	122
Postexercise Period	122
Imaging Modalities	123
Exercise Echocardiography	123
Exercise Nuclear Imaging	123
Pharmacologic Stress Testing	129
Computed Tomography in the Assessment of Coronary Artery Disease	130
Supervision of Exercise Testing	131
References	132
6 Interpretation of Clinical Exercise Test Data	135
Exercise Testing as a Screening Tool for Coronary Artery Disease	135
Interpretation of Responses to Graded Exercise Testing	136
Heart Rate Response	139
Blood Pressure Response	139
Electrocardiograph Waveforms	140
Limiting Signs and Symptoms	143
Gas Exchange and Ventilatory Responses	144
Diagnostic Value of Exercise Testing	145
Sensitivity	145
Specificity	146
Predictive Value	147
Comparison with Imaging Stress Tests	147
Prognostic Applications of the Exercise Test	147
References	148

SECTION III: EXERCISE PRESCRIPTION

7 General Principles of Exercise Prescription	152
Exercise Mode (Type)	152
Components of the Exercise Training Session	153
Aerobic (Cardiovascular Endurance) Exercise	154
Quantity of Exercise: How Much Exercise Is Enough for Health/Fitness Benefits?	154
Aerobic (Cardiovascular) Exercise Mode (Type)	163
The Components of the Aerobic (Cardiovascular Endurance) Exercise Prescription: The FITT Principle or Frequency, Intensity, Time, and Type of Exercise	165
Rate of Progression	165
Muscular Fitness	165
Frequency of Resistance Exercise	168
Types of Resistance Exercises	168
Volume of Resistance Exercise (Repetitions and Sets)	169
Resistance Exercise Technique	170

Progression/Maintenance	170
Flexibility Exercise (Stretching)	171
Neuromuscular Exercise	174
Exercise Program Supervision	174
Strategies for Improving Exercise Adoption and Maintenance	175
References	180
8 Exercise Prescription for Healthy Populations and Special Considerations	183
Pregnancy	183
Exercise Testing	183
Exercise Prescription	184
Special Considerations	185
Children and Adolescents	187
Exercise Testing	188
Exercise Prescription	189
Special Considerations	189
Older Adult	190
Exercise Testing	191
Exercise Prescription	192
Special Considerations	194
Environmental Considerations	194
Exercise in Hot Environments	194
Exercise in Cold Environments	198
Exercise in High-Altitude Environments	201
References	204
9 Exercise Prescription for Patients with Cardiac Disease	207
Inpatient Rehabilitation Programs	207
Frequency	210
Intensity	210
Time (Duration)	210
Progression	210
Outpatient Exercise Programs	211
Exercise Prescription	212
Types of Outpatient Exercise Programs	216
Special Considerations	216
Exercise Prescription without a Preliminary Exercise Test	218
Resistance Training for Cardiac Patients	219
Exercise Training for Return to Work	222
References	222
10 Exercise Prescription for Other Clinical Populations	225
Arthritis	225
Exercise Testing	225
Exercise Prescription	226
Cancer	228

Exercise Testing	228
Exercise Prescription	231
Diabetes Mellitus	232
Exercise Testing	233
Exercise Prescription	234
Disabilities	237
Cerebral Palsy	237
Spinal Cord Injuries	241
Dyslipidemia	244
Exercise Testing	245
Exercise Prescription	245
Human Immunodeficiency Virus	246
Exercise Testing	246
Exercise Prescription	247
Hypertension	248
Exercise Testing	248
Exercise Prescription	249
Metabolic Syndrome	250
Exercise Testing	252
Exercise Prescription/Special Considerations	252
Overweight and Obesity	253
Exercise Testing	253
Exercise Prescription	254
Behavioral Weight Loss Program Recommendations	255
Osteoporosis	256
Exercise Testing	256
Exercise Prescription	256
Peripheral Artery Disease	258
Exercise Testing	259
Exercise Prescription	259
Pulmonary Diseases	260
Exercise Testing	261
Exercise Prescription	262
Renal Disease	264
Exercise Testing	264
Exercise Prescription	265
References	266

SECTION IV: APPENDICES

Appendix A	Common Medications	274
Appendix B	Medical Emergency Management	292
Appendix C	Electrocardiogram Interpretation	302
Appendix D	American College of Sports Medicine Certifications	310
Index		363
