Introduction	I
1 Mechanics and the mechanical: some problems of terminology	9
The critics of prevailing usage	11
Some candidate definitions of the 'mechanistic'	15
2 'Mechanistic' thought before mechanics?	21
Divine versus human technology	24
Working artifacts before the fourth century	29
Ancient atomism and the machine analogy	34
The 'shortfalls' of ancient technology	39
The 'exclusion' of ancient mechanics	43
3 Mechanics in the fourth century	54
The scope of ancient Greek mechanics	55
Archytas and the foundation of mechanics	87
Aristotle's 'mechanics' of motion	97
Conclusion	104
4 The theory and practice of ancient Greek mechanics	105
The Aristotelian <i>Mechanica</i>	106
Ctesibius	115
Archimedes	117
Philo of Byzantium	123

Vitruvius	130
Hero of Alexandria	134
Pappus of Alexandria	143
Models of the heavens	146
5 Ancient Greek mechanics continued: the case of pneumatics	155
Pneumatic technology in the post-classical period	157
Ancient Greek pneumatic theory	165
The status of mechanics revisited: natural or artificial?	170
6 The philosophical reception of mechanics in antiquity	177
Mechanical theory in natural philosophy	179
The theory of pneumatics in natural philosophy	191
Pneumatics and medical theory	197
Working artifacts and the notion of a self-mover	201
Mechanical analogies for the functioning of organisms	205
Working artifacts in astronomy	216
Mechanical analogies in cosmology	220
Conclusion	231
<i>Appendix: Ancient mechanics and the mechanical in the seventeenth century</i>	236
<i>Bibliography</i>	250
<i>Index of passages</i>	274
<i>General index</i>	282
