

PATHOPHYSIOLOGY OF KIDNEY DISEASE AND HYPERTENSION

A. VISHNU MOORTHY
BRYAN N. BECKER
FREDERICK J. BOEHM III
ARJANG DJAMALI

Contents

Preface vii

Acknowledgments ix

1. Anatomy and Physiology of the Kidney	1	9. Cystic Diseases of the Kidney	109
A. Vishnu Moorthy and Tracy C. Blichfeldt		Kristin M. Lyerly and Arjang Djamali	
2. Body Fluid Compartments and Their Regulation	17	10. Urinalysis and an Approach to Kidney Diseases	121
Byram H. Ozer and Peter C. Brazy		A. Vishnu Moorthy and Frederick J. Boehm III	
3. Disorders of Water Metabolism	29	11. Acute Kidney Injury	131
Ryan Kipp and Peter C. Brazy		Paul S. Kellerman and Tracy C. Blichfeldt	
4. Disorders of Sodium Metabolism	41	12. Chronic Kidney Disease	145
Claire Elliott Herrick, Jonathan B. Jaffery, and Arjang Djamali		Ryan Kipp and Paul S. Kellerman	
5. Pathophysiology of Potassium Metabolism	49	13. Replacement Therapy for Kidney Failure: Dialysis	159
Kelly Ann Traeger and Sung-Feng Wen		Joshua David Lindsey and Paul S. Kellerman	
6. Acid–Base Homeostasis and Metabolic Alkalosis	63	14. Replacement Therapy for Kidney Failure: Transplantation	169
Kelly Ann Traeger, Frederick J. Boehm III, and Arjang Djamali		Milagros D. Samaniego, Yolanda T. Becker, and Joshua David Lindsey	
7. Metabolic Acidosis and Approach to Acid–Base Disorders	79	15. Essential Hypertension	179
Frederick J. Boehm III, Kelly Ann Traeger, and Arjang Djamali		Theodore L. Goodfriend and Kristin M. Lyerly	
8. Glomerular Diseases	89	16. Secondary Hypertension	197
A. Vishnu Moorthy, Byram H. Ozer, Terry D. Oberley, and Weixiong Zhong		Kristin M. Lyerly and Theodore L. Goodfriend	

Answers to Practice Questions 212

Appendix: Some Common Laboratory Tests and Their Normal Values as Reported by the Clinical Laboratory at the University of Wisconsin Hospital and Clinics 219
