## SECTION 1 – INDIVIDUAL VIRUSES

Introduction to virology	1
1 Adenoviruses	7
2 Arboviruses and haemorrhagic fever viruses	10
3 Cytomegalovirus (CMV)	17
4 Epstein–Barr virus (EBV)	21
5 Enteroviruses	24
6 Hepatitis A virus (HAV)	28
7 Hepatitis B and D viruses (HBV and HDV)	32
8 Hepatitis C virus (HCV)	41
9 Hepatitis E virus (HEV)	46
10 Herpes simplex virus (HSV)	49
11 Human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS)	54
12 Human herpes viruses types 6, 7 and 8 (HHV 6, 7 and 8)	62
13 Human T-cell leukaemia virus (HTLV)	64
14 Influenza viruses	69
15 Measles virus	73
16 Mumps virus	77
17 Noroviruses	80
18 Parainfluenza viruses	82
19 Papilloma and polyoma viruses	84

20	Parvovirus B19	90
21	Pox viruses	94
22	Rabies virus	98
23	Respiratory syncytial virus (RSV)	101
24	Rhinoviruses	104
25	Rotavirus	106
26	Rubella virus	109
27	SARS CoV and other coronaviruses	113
28	Varicella-zoster virus (VZV)	116

## **SECTION 2 – OTHER RELATED AGENTS**

29	Chlamydia	121
30	<i>Toxoplasma gondii</i>	126
31	Transmissible spongiform encephalopathies (CJD and vCJD)	129

## **SECTION 3 – CLINICAL SYNDROMES**

32	Central nervous system viral infections	133
33	Viral eye infections	137
34	The common cold	141
35	Respiratory virus infections	144
36	Atypical pneumonia	147
37	Gastroenteritis viruses	150
38	Viral hepatitis	153
39	Genital tract and sexually transmitted infections (STIs)	160
40	<i>Glandular fever-type illness</i>	164
41	Viral rashes and skin infections	166
42	Infections in pregnancy, congenital and neonatal infections	173
43	Virus infections in immunocompromised patients	184
44	Viral malignancies	193
45	Travel-related infections	198

## **SECTION 4 – DIAGNOSTIC TECHNIQUES**

46	Sending specimens to the laboratory	201
47	Serological techniques	204

48	Virus detection	211
49	Molecular techniques	217

## **SECTION 5 – PATIENT MANAGEMENT**

50	Antiviral drugs	221
51	Viral vaccines	232
52	Infection control	239
53	Occupational health	246
