TABLE OF CONTENTS

PROLOGUE	xv
PREFACE	xix

CHAPTER ONE

AIR QUALITY IMPACTS: A LOCAL AND GLOBAL CONCERN

1. INTRODUCTION	1
1.1. Air Quality as a Global Issue	3
1.2. Air Pollution in Megacities	4
2. URBAN AIR POLLUTION: HISTORICAL RECORD	6
2.1. London “Killer Fog”	6
2.2. Photochemical Smog in Los Angeles	7
3. SOURCES AND TRANSPORT OF AIR POLLUTION	8
3.1. The Atmosphere and its Contaminants	8
3.2. Characteristics of the Atmosphere	9
3.3. Atmospheric Fate of Air Pollutants	10
3.4. Meteorology and Topography	13
4. IMPACTS OF AIR POLLUTION	14
4.1. Human Health	14
4.1.1. Criteria Air Pollutants	14
4.1.2. Hazardous Air Pollutants or Air Toxics	17
4.1.3. Indoor Air Pollutants	17
4.2. Other Effects of Air Pollutants	18
4.3. Global Effects of Air Pollution	18
5. CONCLUSION	18

CHAPTER TWO

CLEANING THE AIR: A COMPARATIVE OVERVIEW

1. INTRODUCTION	21
2. CLEANING THE AIR: THE LOS ANGELES EXPERIENCE	23
2.1. Topography and Meteorology of the Los Angeles Air Basin	24
2.2. Air Pollutant Trends in the Los Angeles Air Basin	24
2.3. Air Quality Management Programs in the Los Angeles Air Basin	26
2.3.1. Air Quality Management Prior to 1970	26
2.3.2. 1970s to the Present: Developing Regional Air Quality Controls	26
2.3.3. Air Quality Management Institutions in the Los Angeles Air Basin	27
2.3.4. Control Strategies for Los Angeles Air Basin	28
2.3.5. Air Pollution Politics: The Decision-Making Process	31
2.4. Results and Consequences of the Efforts in the Los Angeles Air Basin ..	32
3. CLEANING THE AIR: THE EXPERIENCE OF THE MEXICO CITY METROPOLITAN AREA	33
3.1. Topography and Meteorology of the MCMA	33
3.2. Trends of Air Pollutants in the MCMA	36
3.3. Air Quality Management Programs of the MCMA.....	40
3.3.1. Air Quality Management: 1960s to mid-1980s	40
3.3.2. Air Quality Management: Mid-1980s to 1990	41
3.3.3. Air Quality Management: 1990-2000.....	42
3.3.4. Air Quality Management Institutions in the MCMA in the 1990s	43
3.4. Policy Measures and Control Strategies in the 1990s	45
3.5. Assessment of the Air Quality Management Programs in the MCMA	47
3.5.1. Emission Reduction	47
3.5.2. Fuel Quality	48
3.5.3. Alternative Fuels	51
3.5.4. Inspection and Maintenance.....	51
3.5.5. Reduction of Emissions in Industry and Services	52
3.5.6. Improvement of the Transportation System	53
3.5.7. Integration of Metropolitan Policies	54
4. DISCUSSION AND CONCLUSIONS.....	55

CHAPTER THREE
**FORCES DRIVING POLLUTANT
EMISSIONS IN THE MCMA**

1. INTRODUCTION	61
2. POPULATION GROWTH	62
2.1. Central Region	67
2.2. Mexico City Metropolitan Area	68
2.3. Federal District	68
2.4. Contiguous Municipalities	69
2.5. Population Density	70
2.6. Demographics	
3. URBAN GROWTH	71
3.1. Expansion of the MCMA	71
3.2. Urban and Regional Development	72
3.3. Land Use	73
4. ECONOMIC GROWTH	74
5. PRODUCTION AND CONSUMPTION OF ENERGY	80
5.1. Energy Balance	83
5.2. Fuel Supply and Quality in the MCMA	84
5.3. Transportation	86
5.4. Non-transport Related Sources of Emissions	87
5.4.1. Electric Power Generation	89
5.4.2. Industrial Production	92
5.4.3. Commercial and Service Activities and the Residential Sector	98
6. EROSION AND BIOGENIC EMISSIONS SOURCES	100
6.1. Erosion	100
6.2. Biogenic Sources	101
7. CONCLUSION	103

CHAPTER FOUR

HEALTH BENEFITS OF AIR POLLUTION CONTROL

1. INTRODUCTION	105
2. EVIDENCE OF AIR POLLUTION EXPOSURES AND HEALTH EFFECTS	107
2.1. Particulate Matter	108
2.1.1. Baseline Exposures	108
2.1.2. Mortality	109
<i>Cohort Mortality</i>	109
<i>Time-Series Mortality</i>	111
2.1.3. Chronic Bronchitis	115
2.2. Ozone	117
2.2.3. Baseline Exposures	117
2.2.3. Mortality	117
2.2.3. Restricted Activity Days	118
2.3. Air Toxics	119
2.3.1. Benzene	120
2.3.2. 1,3-Butadiene	120
2.3.3. Formaldehyde	121
2.3.4. Diesel Particle Exhaust	121
2.3.5. Polycyclic Aromatic Hydrocarbons (PAHs)	121
2.3.6. Metals	122
3. “BACK OF THE ENVELOPE” RISK ASSESSMENT	123
3.1. Particulates	124
3.2. Ozone	125
3.3. Air Toxics	126
4. APPROACHES TO VALUING HEALTH EFFECTS	126
4.1. Estimated Values of Health Effects – Extrapolating Economic Values to Mexico	128
4.2. Adjusting VSL for Age and Life Expectancy	130
4.3. “Back of the Envelope” Benefits Assessment	131
5. DISCUSSION AND CONCLUSIONS	133

CHAPTER FIVE

AIR POLLUTION SCIENCE IN THE MCMA: UNDERSTANDING SOURCE-RECEPTOR RELATIONSHIPS THROUGH EMISSIONS INVENTORIES, MEASUREMENTS AND MODELING

1. INTRODUCTION	137
1.1. Integrated Air Pollution Control: Multiple Sources, Multiple Pollutants and Multiple Impacts	138
1.2. Objectives and Organization	140
2. BASIC SCIENTIFIC UNDERSTANDING AND IMPORTANT QUESTIONS FOR POLICY	141
2.1. Basic Scientific Understanding	141
2.2. Important Scientific Questions and Relevance to Policy	142
3. MEASUREMENTS OF METEOROLOGY AND AIR QUALITY	143
3.1. Meteorological Measurements	143
3.2. Routine Air Quality Measurements: The RAMA Network	146
3.3. Deposition Measurements	148
3.4. The MARI Intensive Field Campaigns	150
3.5. The IMADA-AVER Field Campaign	151
3.5.1. Meteorological Measurements	151
3.5.2. Air Quality Measurements	151
3.6. Project Azteca and Other Research at UNAM/CCA	153
3.7. Other Measurements of Aerosols	154
3.7.1. Optical Properties of Aerosols	155
3.8. Measurements of Hydrocarbons	155
3.8.1. Other hydrocarbon measurements	156
3.9. Other Gas Phase Measurements	157
3.10. Measurements of Emissions Source Profiles	158
3.11. <i>Remote Sensing of Automobile Emissions</i>	158
3.12. Measurements of Exposure and Indoor Pollutants	160
3.13. Summary of Ambient Air Quality Measurements	161
4. EMISSIONS INVENTORIES	164
4.1. History of Emissions Inventories and Total Emissions by Category	164
4.2. Other Emissions	169
4.3. Air Quality and Mitigation of Greenhouse Gases in the MCMA	169
4.3.1. Mexico and Climate Change	169

4.3.2.	Coordinating the Local and the Global Emissions of Pollutants...	170
4.3.3.	The MCMA and its contribution to GHG Emissions	170
4.3.4.	Mexico's National Greenhouse Gas Emissions	171
4.3.5.	Conclusions and recommendations	172
5.	AIR POLLUTION MODELING APPLICATIONS	172
5.1.	Modeling Based on RAMA Measurements	172
5.2.	Modeling in the MARI Project	173
5.3.	Modeling in the IMADA Campaign	175
5.4.	Other Modeling Studies	176
6.	SCIENTIFIC UNDERSTANDING, ANALYSIS OF UNCERTAINTIES, RESEARCH METHODS, AND RECOMMENDATIONS	177
6.1.	Ozone Formation	178
6.1.1.	Ozone Sensitivity to NO _x and VOCs in the MCMA	178
6.1.2.	Correcting VOC Emissions: Are Emissions Underestimated and Where Could the Missing VOCs come from?	182
6.1.3.	The Effect of Vertical Mixing on Ozone Formation	184
6.1.4.	The Speciation and Reactivity of VOCs	186
6.1.5.	Photolysis Reaction Rate Constants	187
6.1.6.	Trace Gas Measurements and Photochemical Indicators	188
6.1.7.	Other Ozone Modeling Needs and Opportunities	189
6.1.8.	Ozone Summary	189
6.2.	Particulate Matter	190
6.2.1.	Dust Aerosols	192
6.2.2.	Other Inorganic Aerosols	193
6.2.3.	Organic and Soot Aerosols	195
6.2.4.	Visibility and Aerosol Optical Properties	199
6.2.5.	Particulates Summary	200
6.3.	Improving Emissions Inventories	201
6.4.	Meteorology	202
6.5.	Air Pollution Contingencies	203
6.6.	Linkages Between Urban, Regional and Global Air Pollution	205
6.6.1.	Influx of Pollution and Model Boundary Conditions	206
7.	SUMMARY OF KEY RECOMMENDATIONS	207
7.1.	Prioritizing Improvements to Emissions Inventories	208
7.2.	General Recommendations on Measurements	209
7.3.	Recommendations for RAMA measurements	210
7.4.	The Use of Models	211
7.5.	Conclusions	211

CHAPTER SIX

THE MCMA TRANSPORTATION SYSTEM: MOBILITY AND AIR POLLUTION

1.	INTRODUCTION	213
2.	URBAN TRANSFORMATION	216
3.	TRANSPORTATION DEMAND	219
3.1.	Passenger Trips in the MCMA	220
3.1.1.	Mode Share	222
3.1.2.	Spatial/Temporal Distributions	223
3.1.3.	Future Growth	225
3.2.	Freight Trips	227
4.	TRANSPORTATION SUPPLY	228
4.1.	Roadways and Road-based Vehicles	228
4.1.1.	Level of Service	231
4.1.2.	Traffic Signalization	231
4.1.3.	Parking	231
4.1.4.	Vehicles Fleet	232
4.1.5.	Private Cars and Taxis	237
	<i>Taxis</i>	238
	<i>Hoy No Circula Program</i>	238
4.1.6.	Road-Based Public Transport	240
	<i>Buses</i>	240
	<i>Trolleybuses</i>	242
	<i>Colectivos</i>	243
4.1.7.	Delivery and Freight Vehicles	245
4.2.	Rail Transit	247
4.2.1.	Metro	247
4.2.2.	Light Rail	250
4.3.	Public Transport Passenger Modes: Comparative User Costs	251
5.	TRANSPORT-RELATED EMISSIONS	252
5.1.	Mobile Source Emissions Inventory	252
5.2.	Fuel Quality	254
5.3.	Fleet Aging and Turnover	255
5.4.	Inspection and Maintenance	257
5.4.1.	Organization of the System	259
5.4.2.	Testing Procedure	259

5.4.3. Relevant Program Statistics	260
5.4.4. Coupling Inspection with the 'Hoy No Circula' Program	262
5.4.5. Audits and Calibration	263
5.4.6. Key Points and Recommendations	264
6. REGIONAL ARCHITECTURE FRAMEWORK	267
6.1. Dynamic Issues	269
6.1.1. Federalism	270
6.1.2. Institutional Capacity	270
7. TRANSPORTATION STRATEGIC PLANNING BY VARIOUS GOVERNMENT AGENCIES	272
8. KEY PROBLEMS AND FUTURE POLICY AREAS	274
8.1. Institutions, Finance, Planning And Management Capacities	274
8.2. Land Use, Urban Growth and Infrastructure	276
8.2.1. The Case of Induced Demand	276
8.2.2. A Path Forward?	277
8.3. Travel Demand and Infrastructure Management	277
8.4. Vehicle and Fuel Technologies	278
8.5. Public Transportation Management and Mode Share	279
8.6. Inspection and Maintenance	281
8.7. Conclusions	282

CHAPTER SEVEN

CONCLUSIONS: KEY FINDINGS AND RECOMMENDATIONS

1. INTRODUCTION	285
2. INTEGRATED FRAMEWORK FOR AIR QUALITY MANAGEMENT PLANS.....	286
3. HEALTH BENEFITS OF POLLUTION CONTROL	286
3.1. Effects of Exposure to Particulate Matter	286
3.2. Effects of Exposure to Ozone	287
3.3. Effects of Exposure to Other Air Pollutants	287
3.4. Monetary Value of Health Benefits from Air Pollution Controls	287

3.5. Recommendations for Future Research	288
4. AIR POLLUTION SCIENCE: UNDERSTANDING SOURCE-RECEPTOR RELATIONSHIPS	289
4.1. Ozone Formation	290
4.2. Fine Particulate Formation	290
4.3. Emissions Inventories	290
4.4. Greenhouse Gas Emissions	291
4.5. Recommendations for Future Research	292
4.5.1. Recommendations for Improving Emissions Inventories	293
4.5.2. Recommendations for Measurements Studies	293
4.5.3. Recommendations for Modeling and Data Analysis Studies	294
5. OPTIONS TO REDUCE MOBILE SOURCE EMISSIONS AND IMPROVE MOBILITY	295
5.1. Key Trends	297
5.2. Proposed Policy Options to Reduce Transport-Related Emissions	298
5.2.1. Fleet Compositions and Operations	299
5.2.2. Public Transportation	300
5.2.3. Fuels	300
5.2.4. Infrastructure and Technology	301
5.2.5. Regional Land-Use Strategies	302
5.2.6. Institutions	302
5.2.7. Inspection and Maintenance	303
6. OPTIONS TO REDUCE NON-TRANSPORT EMISSIONS SOURCES ...	304
6.1. Power Generation Plants	304
6.2. Industrial Production	305
6.3. Commercial, Service and Residential Sectors	306
6.4. Informal Sector	307
6.5. Erosion and Biogenic Emissions Sources	308
7. INSTITUTIONAL FRAMEWORK FOR AIR QUALITY MANAGEMENT.....	309
8. EDUCATION AND CAPACITY BUILDING	310
9. FUNDING MECHANISMS FOR AIR QUALITY PROGRAMS	310
10. SUMMARY	311

PHOTOGRAPHS	313
APPENDIX A: MEXICO METROPOLITAN INDEX FOR AIR QUALITY (IMECA) AND THE ENVIRONMENTAL CONTINGENCY PROGRAM	329
APPENDIX B: “NO DRIVING DAY” PROGRAM (<i>HOY NO CIRCULA</i>)	333
