Air Quality in Urban Environments

RSC Publishing

Contents

Urban Air Pollution Climates throughout the World	1
<i>Ole Hertel and Michael Evan Goodsite</i>	
1 Introduction	1
1.1 Emission and Formation of Urban Air Pollution	2
1.2 Urban Pollution Levels and Indicators	3
2 Sources in the Vicinity of the City	4
3 Impact of the Geography, Topography and Meteorology	5
3.1 Geography	5
3.2 Topography	6
3.3 Meteorology	6
4 Pollutant Dispersion in Urban Streets (see also chapter by Salmond and McKendry)	7
5 Nitrogen Dioxide Pollution in Urban Areas (see also chapter by Bloss)	8
6 Particle Pollution in Urban Areas	9
6.1 Particle Mass Concentrations	9
6.2 Particle Number Concentrations	11
6.3 Importance of Measurement Location	13
6.4 Contribution from Natural Processes	13
7 Polycyclic Aromatic Hydrocarbons (PAH) in Urban Areas	13
7.1 Sources and Emissions	13
7.2 Sampling Artefacts	15
7.3 Long Range Transport	16
7.4 Future Requirements	16
8 Trace Elements, including Heavy Metals in Urban Areas	16
8.1 Heavy Metals	17
8.2 Trace Elements	17
8.3 Recommendations for Modelling	18

9	Conclusions	18
	References	19

Influences of Meteorology on Air Pollution Concentrations and Processes in Urban Areas **23**

Jenny A. Salmond and I. G. McKendry

1	Introduction	24
2	The Polluted Urban Atmosphere	26
3	The Urban Canopy Layer	29
3.1	Emissions, Intra-Urban Variability and Data Sources	29
3.2	Flow Patterns within the Urban Canopy Layer	30
3.3	Street Canyons	30
3.4	Vertical Exchange Processes: Coupling the UCL to the UBL	32
4	Larger Scale Processes Affecting Urban Air Pollution	33
4.1	Mesoscale Flows	34
4.2	Regional Transport	35
4.3	Synoptic Scales	36
4.4	Global Scales and "Chemical Weather"	37
5	Conclusions	37
	Acknowledgements	38
	References	38

Atmospheric Chemical Processes of Importance in Cities **42**

William Bloss

1	Introduction	43
2	Emissions in the City Environment	43
3	Dynamic Considerations	45
4	Gas-phase Chemical Processing	46
4.1	NO _x -Ozone Interactions	46
4.2	Oxidant Radicals and Ozone Production	48
4.3	Night-Time Processes	50
4.4	Timescales of Ozone Production	51
4.5	Analysis of Ozone Sources	52
4.6	Limits on Ozone Production: NO _x -Limited and VOC-Limited	52
5	Modifications Particular to the Urban Environment	54
5.1	Radical Sources	54
5.2	VOC Speciation and Abundance	56
5.3	Primary Emissions of NO ₂	57
6	Particulate Phase Chemistry	58
6.1	Chemical Composition	59
6.2	Secondary Particle Formation	59

6.3 Other Impacts of Aerosol	61
7 Modelling Urban Atmospheric Chemistry	61
8 Conclusions	62
References	62

Air Pollution in Underground Railway Systems 65

Imre Salma

1 Introduction	65
2 Physical and Chemical Properties	67
2.1 Particle Mass and Number Concentrations	67
2.2 Time Variation	69
2.3 Chemical Composition	71
2.4 Size Distributions	75
2.5 Morphology and Speciation	76
3 Emission Sources	78
4 Consequences for Human Health	80
5 Conclusions	82
Acknowledgements	83
References	83

Human Exposure: Indoor and Outdoor 85

Sotiris Vardoulakis

1 Introduction	86
2 Characteristics of Outdoor and Indoor Exposure	87
2.1 Outdoor Exposure	87
2.2 Indoor Exposure	88
2.3 Time-Activity Patterns	89
2.4 Indoor-Outdoor Relationships	89
3 Exposure Assessment	90
3.1 Exposure Monitoring	90
3.1.1 Monitoring Networks	90
3.1.2 Personal Monitoring	92
3.1.3 Biomonitoring	93
3.2 Exposure Modelling	94
3.2.1 Proximity and Buffer Zone Models	95
3.2.2 Dispersion and Photochemical Air Quality Models	96
3.2.3 Geostatistical Interpolation and Land-Use Regression Models	98
3.2.4 Receptor-Oriented Models	99
3.2.5 Time-Activity (or Micro-Environmental) Modelling	99
3.3 Modelling Uncertainty	100

4	Evidence from Personal Exposure Surveys in Urban Areas	101
4.1	North American Studies	101
4.2	European Studies	102
5	Role of Exposure Assessment in Regulatory Control of Air Pollution	103
6	Conclusions	104
	References	104

Health Effects of Urban Pollution 108

Robert L. Maynard

1	Introduction	109
2	Exposure to Air Pollutants	109
3	Epidemiological Approaches	110
3.1	Time-Series Studies	110
3.2	Intervention Studies	113
3.3	Cohort Studies	113
4	Particulate Matter	114
5	Nitrogen Dioxide	116
6	Sulfur Dioxide	118
7	Ozone	120
8	Carbon Monoxide	122
9	Carcinogenic Air Pollutants found in Urban Areas	123
	References	124

The Policy Response to Improving Urban Air Quality 129

Martin Williams

1	Introduction	130
2	Policy and the Evidence Base after the Smog Episodes of 1952 and 1962	130
3	The Development of Strategies in the UK and Europe	134
4	Policy Instruments which Reduce Emissions	137
5	Future Developments in Air Quality Management Policies	139
5.1	Exposure Reduction	139
5.2	Links and Co-benefits with Climate Change Policies	142
	Disclaimer	145
	References	145
