

 WILEY

# Sampling and Analysis of Indoor Microorganisms

EDITED BY Chin S. Yang AND Patricia Heinsohn

# CONTENTS

---

<b>PREFACE</b>	<b>xi</b>
<b>CONTRIBUTORS</b>	<b>xv</b>
<b>1. INTRODUCTION TO MICROBIOLOGICAL GROWTH AND CONTAMINATION INDOORS</b>	<b>1</b>
<i>Chin S. Yang and Patricia A. Heinsohn</i>	
1.1. Introduction / 1	
1.2. Health Effects of Indoor Fungal and Bacterial Growth / 3	
1.3. Team and Individual Expertise / 4	
1.4. Approach of This Book / 8	
1.5. Conclusion / 10	
<b>2. CONDUCTING BUILDING MOLD INVESTIGATIONS</b>	<b>15</b>
<i>Patricia A. Heinsohn</i>	
2.1. Introduction / 15	
2.2. Baseline Investigation / 17	
2.2.1. Physical Inspection / 19	
2.2.1.1. Visual Inspection / 20	
2.2.1.2. Documentation / 22	
2.2.1.3. Moisture and Moisture Mapping / 29	
2.2.2. Sampling Design / 36	
2.2.2.1. Air Sampling Methods / 36	
2.2.2.2. Selection of Air Sampling Instruments / 37	
2.2.2.3. Air Sampling Flowrate, Pump Calibration, and Sampling Duration / 38	

- 2.2.2.4. Number of Indoor and Outdoor Air Samples, Air Sampling Locations, and Order of Sampling / 40
- 2.2.2.5. Sampling Techniques / 41
- 2.2.2.6. Surface Sampling Techniques and Analysis / 41
- 2.2.2.7. Laboratory Selection / 43
- 2.2.2.8. Prior Notification / 45
- 2.3. Destructive Testing Investigation / 46
- 2.4. Sampling during Mold Remediation Oversight and Clearance / 48
- 2.5. Conclusions / 48

### **3. MICROBIOLOGICAL SAMPLING STRATEGIES IN INDOOR ENVIRONMENTS**

**51**

*Phillip R. Morey*

- 3.1. Introduction / 51
- 3.2. Sampling Strategy / 52
- 3.3. Spatial or Location Variables / 53
- 3.4. Temporal (Time) Variables / 54
- 3.5. Indoor/Outdoor Comparisons / 55
- 3.6. Complaint and Noncomplaint Zones / 56
- 3.7. Source and Air Samples / 58
- 3.8. Bulk Samples / 59
- 3.9. Dust Samples / 61
- 3.10. Surface Sampling / 63
- 3.11. Culture Plate Impactions and Liquid Impingers / 65
- 3.12. Spore Trap Samplers / 66
- 3.13. Sampling by Filtration / 68
- 3.14. Conclusions / 70

### **4. MICROSCOPIC ANALYTICAL METHODS FOR FUNGI**

**75**

*De-Wei Li, Chin S. Yang, and F. Harrington*

- 4.1. Introduction / 75
- 4.2. Principles and Usage of Microscopes / 76
  - 4.2.1. Microscopes / 76
  - 4.2.2. Microscope Objectives / 79
  - 4.2.3. Photomicrographic Accessories / 80
- 4.3. Aseptic Technique and Biosafety / 81
- 4.4. Sample Preparation for Spore Count / 81
- 4.5. Materials Needed for Preparing Samples / 82

- 4.6. Staining and Mounting Techniques / 83
- 4.7. Procedures for Identification and Quantification of Spore Traps / 85
- 4.8. Techniques for Spore Count Analysis / 87
- 4.9. Background Particulates (Nonspore Miscellaneous Materials) / 90
- 4.10. Limits of Detection / 91
- 4.11. Data Presentation / 91
- 4.12. Variation of Replications and Duplications / 91
- 4.13. Sample Preparation for Direct Examination or from Cultures / 92
  - 4.13.1. Bulk Samples / 92
  - 4.13.2. Bulk Dust Samples / 93
  - 4.13.3. Swab Samples / 93
  - 4.13.4. Tape Lift Samples / 94
  - 4.13.5. Culture Samples / 95
- 4.14. Evaluation of Fungal Infestation / 96
- 4.15. Training of Microscopy Analysts / 98
- 4.16. Quality Assurance/Quality Control Procedures / 99
- 4.17. WEB Resources / 100

## **5. CULTURE-BASED ANALYTICAL METHODS FOR INVESTIGATION OF INDOOR FUNGI**

105

*Florence Q. Wu*

- 5.1. Advantages and Limitations of Culture-Based Analytical Methods / 105
- 5.2. Factors Influencing the Results of Culture-Based Analysis / 107
  - 5.2.1. Ecological Considerations / 107
  - 5.2.2. Viability of Fungal Spores / 108
  - 5.2.3. Selection of Culture Media / 109
  - 5.2.4. Concentration Variations / 109
  - 5.2.5. Sampler Performance, Sampling Time, and Culture Preparation / 110
  - 5.2.6. Experience of the Analyst / 111
- 5.3. Culturable Sampling Considerations / 112
  - 5.3.1. Air Samples / 112
  - 5.3.2. Surface Samples / 112
  - 5.3.3. Bulk Samples / 113
  - 5.3.4. Dust Samples / 114
- 5.4. Sample Preparation Methods / 114
- 5.5. Identification of Filamentous Fungi / 116
- 5.6. Data Reporting / 117

- 5.7. Data Interpretation / 118
- 5.8. Laboratory Quality Assurance / 119

**6. AIRBORNE BACTERIA IN INDOOR ENVIRONMENTS** **123**

*Linda D. Stetzenbach*

- 6.1. Introduction / 123
- 6.2. Bacterial Aerosols / 123
- 6.3. Selected Bacteria-Associated Health Effects / 124
- 6.4. Analysis of Samples for Airborne Bacteria / 125
- 6.5. Summary / 127

**7. GENETICS-BASED ANALYTICAL METHODS FOR BACTERIA AND FUNGI IN THE INDOOR ENVIRONMENT** **133**

*Richard A. Haugland and Stephen J. Vesper*

- 7.1. Introduction / 133
- 7.2. Genetics-Based Analytical Techniques / 134
  - 7.2.1. In Vitro Nucleic Acid Amplification / 134
  - 7.2.2. Hybridization Probes / 137
  - 7.2.3. Nucleic Acid Sequencing / 138
  - 7.2.4. Microbial Strain Typing / 139
- 7.3. Applications of Genetics-based Methods for Indoor Microbiological Analyses / 139
  - 7.3.1. Detection of Pathogenic, Allergenic, and Toxigenic Bacteria and Fungi Using Nucleic Amplification and Hybridization Probe Techniques / 139
  - 7.3.2. Microbial Strain Typing and Identification by Nucleic Acid Sequencing / 141
- 7.4. Quality Control/Quality Assurance and other Challenges / 142
- 7.5. Outlook for the Future / 144

**8. WOOD IN THE BUILT ENVIRONMENT—CONDITIONS FOR MOLD AND DECAY** **155**

*Susan E. Anagnost*

- 8.1. Introduction / 155
- 8.2. Molds and Wood Decay Fungi / 155
- 8.3. Moisture Requirements for Growth of Molds and Wood Decay Fungi / 158
- 8.4. Water and Wood—Relative Humidity versus Moisture Content / 159
  - 8.4.1. Wood Moisture Content and the Fiber Saturation Point / 161

- 8.5. Moisture Requirements for Fungal Growth / 164
  - 8.5.1. Moisture Requirements for Wood Decay Fungi / 164
  - 8.5.2. Moisture Requirements for Mold Fungi / 166
- 8.6. The Effect of Changing Moisture and Temperature Conditions / 167
- 8.7. Susceptibility of Building Materials to Mold / 168
  - 8.7.1. Visible versus Concealed Mold / 168
- 8.8. The Effects of Building Design and Construction / 170
- 8.9. Techniques for Assessment of Wood Decay and Mold in Buildings / 172
  - 8.9.1. Nondestructive Testing / 174
  - 8.9.2. Destructive Testing / 175
- 8.10. Summary / 176

**9. USE OF STATISTICAL TOOLS FOR DATA PRESENTATION AND ANALYSIS OF INDOOR MICROORGANISMS**

**179**

*Stella M. Tsai*

- 9.1 Introduction / 179
- 9.2 Descriptive Analysis / 180
- 9.3 Correlation / 183
- 9.4 *t*-test and Nonparametric Methods / 185
  - 9.4.1. Using *t*-test to Test Differences between Two Means (Two Groups of Samples) / 186
  - 9.4.2. Nonparametric Test for Two Groups of Samples / 186
- 9.5 Analysis of Variance (ANOVA) and Chi-Square Statistics / 186
- 9.6 Discussion / 189

**10. ECOLOGY OF FUNGI IN THE INDOOR ENVIRONMENT**

**191**

*Chin S. Yang and De-Wei Li*

- 10.1. Introduction / 191
- 10.2. Factors Affecting Fungal Growth Indoors / 191
  - 10.2.1. Biotic Factors / 192
  - 10.2.2. Abiotic Factors / 193
  - 10.2.3. Interactions Between Temperature, Moisture, and Fungi Indoors / 199
- 10.3. Ecological Interactions Between Fungi and Environmental Factors / 200
  - 10.3.1. Indoor Fungal Ecology / 200
  - 10.3.2. Specific Ecological Niche of Some Common Indoor Fungi / 202

10.4. Release and Dispersal of Fungal Spores /	206
10.4.1. Fungal Spore Types and Their Release /	207
10.4.2. Fungal Spore Dispersal /	208
10.5. Conclusions /	209
<b>11. A RETROSPECTIVE AND FORENSIC APPROACH TO ASSESSMENT OF FUNGAL GROWTH IN THE INDOOR ENVIRONMENT</b>	<b>215</b>
<i>Chin S. Yang</i>	
11.1. Introduction /	215
11.2. Microbial Forensics /	216
11.3. Rationales and Mycological Backgrounds /	216
11.4. Other Signs and Information /	220
11.5. Case Studies /	223
11.6. Conclusions /	227
<b>12. MICROBIAL REMEDIATION IN NONINDUSTRIAL INDOOR ENVIRONMENTS</b>	<b>231</b>
<i>Philip R. Morey</i>	
12.1. Introduction /	231
12.2. Mold Remediation Principles /	232
12.3. Mold Removal Methods /	233
12.4. Dust Control during Mold Remediation /	233
12.5. Air Sampling for Molds /	234
12.6. Clearance by Measurement of Residual Dust /	235
12.7. HVAC System Mold Remediation /	236
12.8. Remediation of Room Contents in Moldy Buildings /	237
12.9. Quality Assurance during Mold Remediation /	237
12.10. Microbial Remediation of Legionellas and Biofilms /	238
12.11. Remediation of Sewage Contamination /	239
<b>APPENDIX COMMON AIRBORNE AND INDOOR FUNGI AND THEIR SPORES</b>	<b>243</b>
<i>De-Wei Li</i>
